Nathalie Dhénin vous présente son jeu de tarot contemporain spécialement conçu pour ceux et celles qui souhaitent connaître leur avenir ou celui des autres. Le tarot indique les événements importants à venir et propose une ou plusieurs voies, mais c'est au consultant d'assumer sa volonté de s'engager dans tel ou tel chemin. C'est en cela que le tarot, qui est un support de voyance, se révèle être un précieux guide spirituel. Le tarot n'est pas un support passif de voyance, mais une connaissance de soi et des autres. Cet ensemble de cartes nous permet d'accéder à un autre monde, servant de tremplin à notre intuition. Il nous demande aussi constamment de nous enrichir, de découvrir d'autres horizons afin de mieux le servir. Ses 22 lames, superbement décorées, sont tirées de tableaux du célèbre magnétiseur Yvon Bailly.

Le Tarot Contemporain

Trop longtemps cantonné à une image vieillotte et occulte, le tarot divinatoire est pourtant un formidable outil de développement personnel, d'une incroyable modernité et d'une redoutable efficacité. Ce guide pratique de 52 exercices renouvelle le genre, en vous permettant de faire le point sur tous les aspects de votre vie. Pas besoin d'être un spécialiste pour tirer les cartes et découvrir leurs symboliques. Les cartes détachables en fin d'ouvrage et les explications de l'auteure vous donnent toutes les clés pour faire de ce jeu un compagnon quotidien, fiable et efficace. Laissez-vous mener sur la voie de la connaissance de soi, du développement et de l'accomplissement ! Spécialisée dans les jeux divinatoires depuis plus d'une dizaine d'années, Carole-Anne Eschenazi est elle-même créatrice d'oracles et de tarots, notamment le Cat Tarot et le Tarot de la Nuit parus aux éditions Lo Scarabeo. Collectionneuse insatiable, elle possède plus de 450 jeux divinatoires. Elle est par ailleurs romancière, blogueuse et youtubeuse.

Se développer et s'épanouir avec le tarot divinatoire

Antoine Court de Gébelin nous explique dans ce passionnant essai les allégories qu'offrent les diverses Cartes du jeu des Tarots; les formules numériques transmises jusqu'à nous; ses rapports avec la Chine; et ses rapports avec les jeux des cartes françaises. Ce petit ouvrage est suivi d'une Dissertation où l'on établit comment ce Jeu était appliqué à l'art de la Divination. Cet opuscule revient sur les principes Égyptiens originaux de l'art de deviner l'avenir par les Cartes, principes qui distinguèrent plus tard les tireurs de cartes Bohémiens. Un ouvrage érudit et richement documenté pour tout curieux de l'astrologie et des arts divinatoires.

- Ce manuel a la particularité non seulement d'utiliser 2 tarots différents, mais aussi d'augmenter les possibilités d'interprétation puisque chaque carte/lame vous offre son sens endroit et son contraire. Par exemple : le Bateleur endroit peut représenter un jeune homme dégourdi et volontaire, alors que renversé, indiquera plutôt un jeune homme maladroit et inconscient... - Pourquoi 2 tarots différents ? Tout simplement parce que je n'ai jamais trouvé l'inspiration dans les arcanes mineurs du tarot de Marseille ! Par contre, si vous préférez les utiliser, il vous suffit de remplacer (dans les interprétations fournies) les " carreaux par les bâtons " , " trèfles par deniers \

Tarot

A profusely illustrated history of the occult nature of the tarot from its origins in ancient Persia • Thoroughly examines the original historical source for each tarot card and how the cards' divinatory meanings evolved from these symbols • Provides authentic 18th- and 19th-century spreads and divination techniques • Reveals the divinatory meanings of the cards as understood by diviners in the Middle Ages and Renaissance The origins of the tarot have been lost in the mists of time. Most scholars have guessed that its origins were in China, Egypt, or India. In *Mystical Origins of the Tarot*, Paul Huson has expertly tracked each symbol of the Minor Arcana to roots in ancient Persia and the Major Arcana Trump card images to the medieval world of mystery, miracle, and morality plays. A number of tarot historians have questioned the use of the tarot as a divination tool prior to the 18th century. But the author demonstrates that the symbolic meanings of the Major Arcana were evident from the time they were first employed in the mid-15th century in the popular divination practice of sortilege. He also reveals how the identities of the court cards in the Minor Arcana were derived from a blend of pagan and medieval sources that strongly influenced their interpretation in tarot divination. *Mystical Origins of the Tarot* provides a thorough examination of the original historical source for each card and how the cards' divinatory meanings evolved from these symbols. Huson also provides concise and practical card-reading methods designed by the cartomancers of the 18th and 19th centuries and reveals the origins of the card interpretations promoted by the Hermetic Order of the Golden Dawn and A. E. Waite.

Initiation à la cartomancie & à la taromancie

Devenez un pro du tarot ! Dans cet ouvrage, Josephine Ellershaw nous enseigne comment interpréter et associer les cartes du tarot avec pertinence, raconter leur histoire et obtenir les réponses dont nous avons besoin. Au fil des pages, elle nous révèle les secrets des arcanes, le décodage des mots-clés, la

signification des symboles, le décryptage des illustrations, et les multiples associations qui permettent d'enrichir et d'éclairer un tirage. Vous découvrirez également comment apporter de la profondeur à vos lectures en interprétant la connexion subtile entre les cartes qui, reliées les unes aux autres, donnent de la profondeur aux messages. Vous comprendrez aussi que les cartes inversées ou opposées ont du sens, mais surtout, que les nombreuses combinaisons que vous offre le tarot sont un prolongement de vous-même et de vos lectures.

Monde primitif, analyse et comparé avec le monde moderne: Dissertations mêlées

Les sources historiques et linguistiques nous ont prouvé que le Corpus du Jeu de Tarot au cours de son histoire a perdu deux Arcanes; un peu comme si il avait perdu ses yeux. Le Tarot au cours de son Histoire n'a pas toujours été un jeu de Cartes. Des oeuvres monumentales de Taremi/ Egypte, au Tablettes de Babylone/ Sumer en passant par les 24 images rouges Hong Hua de la Chine, jusqu'aux Horloges Astronomiques de l' Europe et l' Almanach, les Tarots ou Rota (Les Roues) ont su se fondre dans les différentes traditions et enregistrer leurs contenus. Les arcanes sont un peu une sorte de boîte noire qui a enregistré au cours des âges, tous les contenus des différentes traditions dispersées sur la planète et il a projeté l' Homme également jusqu'aux étoiles. Ce que nous avons entre les mains, les 24+56 Arcanes du Tarot sous la forme d'un jeu de cartes à jouer est sa dernière mue, sa dernière forme dont nous venons de retrouver les yeux. C'est-à-dire les deux derniers arcanes qui s'étaient perdus sur la grande roue du Temps. Et c'est une merveille: A la fois un grand résumé de tous les secrets de la Tradition Primordiale, la Gnose et de ses rayons: C'est-à-dire de toutes les traditions qui ont émané de celle-ci. Mais c'est aussi un formidable outil d'enseignement à la fois pour connaître l' Histoire ainsi que les Sciences ésotériques telles que l' Alchimie, les mathématiques et la géométrie sacrée. Pour donner une teinte plus ludique et plus moderne tout en conservant le principe d' universalité de cet outil, nous avons été puiser dans différents éléments culturels de toutes les traditions; des plus anciens aux plus modernes. Anges, monuments contemporains, personnages mythiques et mythologiques d' Asie, d' Afrique et d' Occident... Nous avons réuni tous les continents, toutes les cultures, tous les langages en un seul et unique corpus plus vivant, plus coloré, plus dynamique comme l' est la Vie. Il s'agissait aussi de proposer ce corpus aux plus jeunes, c'est-à-dire aux enfants et aux jeunes étudiants de la terre entière. Toutefois, rien n'y est fantaisiste, rien n'y est laissé au hasard, tout y est à sa place et a son utilité. Tout en étant une véritable fête à la fois pour les yeux et surtout pour le coeur. Car nous pensons que nous ne pouvons pas vraiment connaître quelque chose qui ne nous étonne pas ou que nous n'aimons pas. Car comme disait le Grand Écrivain Français Antoine de St Exupéry: - On ne voit bien qu'avec le Coeur Le Tarot en quelques mots simples pour nos lecteurs qui découvrent ce support: Le

Tarot est un jeu et malheureusement beaucoup de professionnels dans le domaine de la cartomancie ou même plus généralement de l'hermétisme semblent l'avoir oublier. C'est un jeu de cartes avec lequel tout le monde peut jouer en assimilant les règles en quelques minutes. Mais comme pour tous les jeux, il faudra peut-être du temps et surtout beaucoup de joie et d'amour pour en "capter" toutes les subtilités. La joie et l'amour sont les deux pôles essentiels de toute activité basée sur le jeu et j'aime à penser que si la Vie est un jeu, elle nécessite beaucoup de joie et beaucoup d'amour. Le Tarot a cette double exigence et il nous enseigne à jouer avec ses propres mots mais aussi les nôtres qui sont des images parfois un peu étranges, avec des colories parfois lumineuses ou obscures. Des images parfois graves parfois légères: Le Tarot c'est la vie sous la forme d'une journée en 24 images comme un film en 24 images par seconde que l'on va pouvoir déplier, ralentir et explorer. Le Tarot est un jeu de piste, un peu comme le jeu de l'Oie pour celles et ceux qui y ont déjà joué. Sur la première "case" du plateau, du terrain de ce jeu, le joueur est maintenu dans l'étonnement: Il ne sait pas qui il est vraiment. Il a cette intuition vague, parfois un peu plus précise qu'il joue en fait à "cache-cache" avec lui-même.

Je m'appelle MARTINE et je suis PARAPSYCHOLOGUE-CONSEIL; UNE VOCATION, une PASSION... que j'aimerais vous faire partager! De plus en plus de personnes sont attirées par les arts divinatoires, mais il n'est pas toujours aisé de se retrouver dans les multiples ouvrages que l'on nous propose. Parallel Transport of Vectors

This Is like a Little Machine at every Point It's a Black Box That Says if You Give Me these Three Vectors I'M GonNa Spit Out a Fourth Vector and We Have a Name for this Machine this Is Called the Riemann Curvature Tensor and Again no One's GonNa Tell You this until You Take General Relativity or You Listen to these Videos so a Tensor Is a Generalization of the Idea of a Vector You Know the Vector Is a Set of Components a Tensor Is a Bigger Collection of no Arranged Either in Columns or Rows or Matrices or Cubes or Something like that but It's a Whole Big Kind of Set of Numbers That Can Tell You a Map from a Set of Vectors to another Set of Vectors That's all It Is It's a Way of Mapping Vectors to Vectors and the Riemann Curvature Tensor Is this Particular Map

Either in Columns or Rows or Matrices or Cubes or Something like that but It's a Whole Big Kind of Set of Numbers That Can Tell You a Map from a Set of Vectors to another Set of Vectors That's all It Is It's a Way of Mapping Vectors to Vectors and the Riemann Curvature Tensor Is this Particular Map

so the Riemann Curvature Tensor Specifies at every Point at every Point You Can Do this You Give Me a Point I'M Going To Give You Two Different Vectors I'M Going To Track Parallel Transport around a Third Vector and See How Much It Moves by that's the Value of the Riemann Curvature Tensor Which Tells Me What Is the Distance along an Infinitesimal Path the Metric Exists at every Point It's a Field That Can Take On Different Value the Connection Is the Answer to How Does How Do I Parallel Transport Vectors and It Is Also a Field So at every Point I Have a Way of Parallel Transporting Vectors in every Direction so It's a Complicated Mathematical Object and I Call that a Connection if You Just Want To Think about What Do You Mean by a Connection It's a Field That Tells Me How To Parallel Transport Things It Conveys that Information What Does It Mean To Keep Things Constant To Keep Things Parallel

And It all Fits Together a Nice Geometric Bundle in Fact You Know When We Thought about Newtonian Physics versus the Principle of Least Action the Newtonian Laplacian Way of Thinking about the Laws of Physics Was Start with a Point and Just Chug Forward Using $F = ma$ You Get the Same Answers Doing Things that Way as You Do with the Principle of Least Action Which Says Take the Whole Path and Minimize the Action along the Path You Might Think Is this Analogous to these Two Different Ways of Defining Straight Lines the Whole Path and Find the Minimum Length or Parallel Transport Your Direction Your Momentum Vector and the Answer Is Yes They Are a Hundred Percent Completely Analogous It's the Differential Version versus the Integral Version if You Want To Think about It that Way

You Might Think Is this Analogous to these Two Different Ways of Defining Straight Lines the Whole Path and Find the Minimum Length or Parallel Transport Your Direction Your Momentum Vector and the Answer Is Yes They Are a Hundred Percent Completely Analogous It's the Differential Version versus the Integral Version if You Want To Think about It that Way Okay so that's Geometry for You There It Is that's all You Need To Know Everything Else Is Derived from that in some Sense but the Derivations Might Be Hard Next We're on to Topology Topology Is Sort of the Opposite in some Sense of What We've Been Doing So What We've Been Doing Is Working Really Hard To Figure Out How at every Point To Characterize the To Answer the Question How Curved Is this Space That We're Living in Topology Doesn't Care about the Curvature of Space at every Point at all Topology Is the Study Properties of Spaces

Deform a Sphere into a Torus

And I CanNot Deform One into the Other I CanNot Do that Smooth Movement of the Circle in this Plane That Doesn't Go through the Point so these Are Topologically Different Okay so the Fundamental Group of the Plane Is Just Trivial It's Just One Element There's Only One Way To Map a Circle into the Plane but the Plane-a Point I Clearly Have Different Ways this Orange Curve I Can Deform Back to the Identity and by the Way I Should Mention this There's a Sense There's a Direction so the Circle Has a Clockwise Nisour Anti-Clockwise Ness Notion So Let Me Draw that I've Drawn It this Way I Can that's that's a Different Topological

Okay I CanNot Deform the Loops That Go Around Twice to either the Loops That Go Around Once or the Loops That Go Around Zero Times What this Means Is They Put Braces around Here so You Know that this Is the Space I'M Mapping It to the Fundamental Group of the Plane-a Point Is Characterized by Something We Call the Winding Number of the Map We Have all Sorts of Ways of Mapping the Circle into this Space and all That Matters topologically Is How Many Times the Circle Wraps around Winds around that Point so the Winding Number Could Be 0 for the Orange Curve It Could Be 1 for the Yellow Curve It Could Be 2 for the Green Curve

That's Why It's Called a Group because You Can Add Integers Together We'll Get Later to What the Technical Definition Is Well What I Mean by Group but the Point Is this Is a Top this Feature of the Space Is a Topological Invariant and the Feature Is Quote-Unquote the Integers the Integers Classify the Winding Numbers the First the Fundamental Group of the Plane so We Can Do that with Other Spaces Right What about the Sphere so What We're the to the 2-Dimensional Sphere in this Case Right So Actually Then Let's Do the One Dimensional Sphere Why We're at It

And those Are Different Things That Green Circle and that Orange Circle CanNot Be Continuously Deformed into each Other There's Basically Two Distinct Topological Ways of Wrapping a and the Taurus and Once I Wrap Around once I Can Wrap around any Number of Times so that Is a Very Quick Hand Wavy Demonstration of the Fact that π_1 One of the Tourists Is $\mathbb{Z}$ plus $\mathbb{Z}$ It's Two Copies of the Integers Two Different Winding Numbers How Do You Wind around this Way How Do You Wind around that Way so You Might Think You Might Think for these Brief Numbers of Examples That the Fundamental Group π_1 One of any Space Is either Zero or It's the Integers or some Copy of the Integers

I Get another Curve That Is Deformable to Zero Right That Doesn't Wind At All and that's a That's a

Perfectly Good Reflection of the Fact that in the Integers $\mathbb{Z}$ Has the Property That $+1$ Plus minus 1 Equals Zero Right Not a Very Profound Mathematical Fact but There It Is So if that Were True if It Were True that the Same Kind of Thing Was Happening in this Doubly Punctured Plane I Should Be Able To Go around a and Then around B and Then I Should Be Able To Go Backward around a and Backward around B and I Should Be Equivalent to Not Doing Anything At All but that's Not Actually What Happens Let's See It's Unlikely I Can Draw this in a Convincing Way but Backward And It Comes Out but Then It's GonNa Go Up Here so that Means It Comes Over There That Goes to that I'M GonNa Keep Going so You Can See What's Happening Here My Base Point Is Fixed but I Have this So I'M Going To Make It Go Down and that's GonNa Go Up this Is GonNa Go like this I'M GonNa Keep Going and Then I Can Just Pull this All the Way through So in Other Words I Can Contract this Down to Zero I Hope that that's Followed What I Did Here if I Call this Aabb this Is Aa the Be Aa the Be Aabb and They Just Contract Right Through
