[#Avicenna](#) [#Ibn Sina](#) [#Islamic medicine](#) [#Medical pioneer](#) [#The Canon of Medicine](#)

Explore the profound legacy of Ibn Sina, also known as Avicenna, a towering figure in Islamic medicine and philosophy during the Islamic Golden Age. His monumental work, "The Canon of Medicine," served as a standard medical text for centuries, significantly influencing both Eastern and Western medical traditions and solidifying his status as a pioneering medical scholar.

Father's Corner

All Coming Home Tired and Souland To Eat Supper in a Kitchen That Was a Parlor Also with another Crowded Angry Family Quarreling Just across the Dumbwaiter Shaft and Squeaking Pulleys at the

Windows Where Dirty Washings on Dirty Lines above a Court Full of Old Brooms and Mops and Ash Cans He Stopped by the Windmill To Look Up at the Frosty Winter Stars and Draw a Long Breath before He Went inside that Kitchen with the Shiny Windows Was Dear to Him but the Sleeping Fields in the Bright Stars and the Noble Darkness Were Dearer Still Five on the Day before Christmas He Didn't Much Need an Apprentice but He Was Sorry for the Boy and Took Him In for no Wages but His Keep and What He Could Pick Up the Pickings Were Supposed To Be Coppers Given You When You Took Work Home to a Customer but Most of the Customers Called for Their Clothes Themselves and the Coppers That Came Anton's Way Were Very Few He Had However a Place To Sleep the Tailor's Family Lived Upstairs in Three Rooms a Kitchen a Bedroom Where Lish Knits and His Wife and Five Children Slept

Though the Poor Woman Did the Best She Could Rasika Knew She Often Went Empty To Give another Potato or a Spoonful of Drippings to the Two Hungry Sad-Eyed Boys Who Lodged with Her He Used To Think He Would Never Get out of There Never Get a Clean Shirt to His Back Again What Would He Do He Wondered When His Clothes Actually Dropped to Pieces and the Worn Cloth Wouldn't Hold Patches any Longer It Was Still Early When the Old Farmer Put Aside His Sewing in His Recollections the Sky Had Been a Dark Grey all Day with Not a Gleam of Sun and the Light Failed at Four O'clock He Went To Shave and Change His Shirt while the Turkey Was Roasting Rudolph and Paulie Were Coming Over for Supper

And I Think I Won't Work no More Today He Stood Around for a Few Minutes and Then He Says Ain't You Near through I Won't You Should Get Up a Nice Supper for Us Tonight It's Fourth of July I Told Him To Get Along that I Was Right in the Middle of Preserving but the Plums Would Taste Good on Hot Biscuit I'M Going To Have Fried Chicken Too He Says and He Went Off and Killed a Couple You Three Oldest Boys Was Little Fellers Playing Round outside Real Hot and Sweaty and Your Father Took You to the Horse Tank Down by the Windmill and Took Off Your Clothes and Put You in Them to Boxelder Trees Was Little Din

I'M Going To Have Fried Chicken Too He Says and He Went Off and Killed a Couple You Three Oldest Boys Was Little Fellers Playing Round outside Real Hot and Sweaty and Your Father Took You to the Horse Tank Down by the Windmill and Took Off Your Clothes and Put You in Them to Boxelder Trees Was Little Din but They Made Shade over the Tank and He Took Off All His Own Clothes and Got In with You while He Was Playing in the Water with You the Methodist Preacher Drove into Our Place To Say How All the Neighbors Was Going To Meet at the Schoolhouse that Night To Pray for Rain And Your Father Took You to the Horse Tank Down by the Windmill and Took Off Your Clothes and Put You in Them to Boxelder Trees Was Little Din but They Made Shade over the Tank and He Took Off All His Own Clothes and Got In with You while He Was Playing in the Water with You the Methodist Preacher Drove into Our Place To Say How All the Neighbors Was Going To Meet at the Schoolhouse that Night To Pray for Rain He Drove Right to the Windmill of Course and There Was Your Father So He Laid in the Tank Where He Was and Put One of You Boys on Top of Him To Cover Him Up a Little and Talk to the Preacher When You Got through Playing in the Water He Put Clean Clothes on You and a Clean Shirt on Himself and by that Time I'D Begun To Get Supper He Says It's Too Hot in Here To Eat Comfortable Let's Have a Picnic in the Orchard We'LI Eat Our Supper behind the Mulberry Hedge under Them Linden Trees so He Carried Our Supper Down and a Bottle of My Wild Grape Wine and Everything Tasted Good I Can the Wind Got Cooler as the Sun Was Going Down You Mean You Won't Get no Crop At All I Asked Him I Couldn't Believe It after He'D Worked So Hard no Crop this Year He Said that's Why We'Re Having a Picnic We Might As Well Enjoy What We Got and that Shows How Your Father Behaved When All the Neighbors Was So Discouraged They Couldn't Look You in the Face and We Enjoyed Ourselves a Year Poor as We Was and Our Neighbors Wasn't a Bit Better Off for Being Miserable some of Them Grieved till They Got Poor Digestion Xand Couldn't Relish What They Did Have the Younger Boys Said They Thought Their Father Had the Best of It It Ain't So Much Fun Being Poor in a Big City like London and I'LI Say All the Windows Is Full of Good Things To Eat and all To Push Carts in the Streets Is Full and You Smell Him All the Time and You Ain't Got no Money Not a Damn Bit I Don't Mind a Cold So Much though I Didn't Have no Overcoat Just a Short Jacket I'D Outgrown so It Wouldn't Meet on Me and My Hands Was Chapter Raw but I Always Had a Good Appetite like You all Know and Decided Import Pies and the Windows Was Awful for Me Day before Christmas Was Terrible Foggy that Year and that Fog Gets into Your Bones I Went into My Corner Real Quiet and Roll Up at My Feder Quilt but I Ain't Got My Head Down till I Smelled Something Good Seem like It Gets Stronger and Stronger and I Can't Get To Sleep no Way I Can't Understand that Smell There Was a Gas Light in Hall across the Court That Always Shine in My Window a Little I Got Up and Look Around I Got a Little Wooden Box in My Corner for a Stool because I Ain't Got no Chair

There Was a Gas Light in Hall across the Court That Always Shine in My Window a Little I Got Up and Look Around I Got a Little Wooden Box in My Corner for a Stool because I Ain't Got no Chair I Picks Up that Box and under It There's a Roast Goose on a Platter I Can't Believe My Eyes I Carry It to the Window Where the Light Comes In and Touch It and Smell It To Find Out and Then I Taste It To Be Sure I Say I Will Eat Just One Little Bite of Deku so I Can Go to Sleep and Tomorrow I Won't Eat None At All but I Tell You Boys

Where the Light Comes In and Touch It and Smell It To Find Out and Then I Taste It To Be Sure I Say I Will Eat Just One Little Bite of Deku so I Can Go to Sleep and Tomorrow I Won't Eat None At All but I Tell You Boys When I Stop One Half of that Goose Was Gone the Narrator Bowed His Head and the Boys Shouted but Little Josephine Slipped behind His Chair and Kissed Him on the Neck beneath His Ear Poor Little Papa I Don't Want Him To Be Hungry that's Long Ago Child I Ain't Never Been Hungry since I Had Your Mutter To Cook for Me Go On and Tell Us the Rest Please Said Paulie Well When I Come To Realize

And It all Come to Me How that Poor Woman Saved To Buy that Goose and How She Could some Neighbor To Cook It That Got More Fire and How She Put It in My Corner To Keep It Away from Them Hungry Children There Was an Old Carpet Hung Up To Shut My Corner Off and the Children Wasn't Allowed To Go In There and I Know She Put It in My Corner because She Trusts Me More and She Did the Violin Boy I Can't Stand To Face Her after I Spoiled a Christmas

There Was an Old Carpet Hung Up To Shut My Corner Off and the Children Wasn't Allowed To Go In There and I Know She Put It in My Corner because She Trusts Me More and She Did the Violin Boy I Can't Stand To Face Her after I Spoiled a Christmas So I Put On My Shoes and I Go Out into the City I Tell Myself I Better Throw Myself in the River but I Guess I Ain't that Kind of a Boy It Was after 12 O'clock and Terrible Cold and I Start Out To Walk about London all Night I Walk along the River a While but There Was Lots of Drunks All along Men and Women Too I Just Move Along To Keep Away from the Police I Get On to Districts Fir'D Street Where There Was a Big German Restaurant on the Ground Floor with Big Windows all Fixed Up Fine and I Could See the People Having Parties

I Guess I Went Crazy and I Done What I Ain't Never Done Before nor since I Went Right Up to Them Gay People and Begun To Beg Them Fellow Countrymen for God's Sake Give Me Money Enough To Buy a Goose They Laugh of Course but the Ladies Speak Awful Kind to Me and They Take Me Back into the Restaurant and Give Me Hot Coffee and Cakes and Make Me Tell All about How I Happen To Come to London and What I Was Doing There They Take My Name and Where I Work Down on Paper and both the Dem Ladies Give Me Ten Shillings the Big Market at Covent Garden a Very Far Away and by that Time It Was Opened I Go There and Buy a Big Goose

When I Get Home Everybody Is Still Asleep I Pile all I Bought onto the Kitchen Table and I Go In and Lay Down on My Bed and I Ain't Waking Up til I Hear that Woman Scream When She Come Out Here into Her Kitchen My Goodness but She Was Surprised She Laugh and Cry at the Same Time and Hug Me and Waken All the Children She Ain't Stopped for no Breakfast She Get to Christmas Dinner Ready Dabbe Morning and We all Sit Down and Eat all We Can Hold Ain't Never Seen Doubt Island Boy Have all He Can Hold

Future historians will wonder why, despite the risks, society persisted in its warm relationship with the cigarette; by the end of the century global consumption was still rising. The 1995 symposium at the Wellcome Institute for the History of Medicine not only examined tobacco's connection with health, but the varied attitudes towards smoking, which have included regarding it as 'manly', relaxing, fashionable - and decadent. A particular feature was a witness seminar attended not only by those who had made the initial discovery but by those with a crucial role in promoting public awareness of the dangers. And, as shown in this book, we still cannot escape the paradox that, while a considerable proportion of a country's population is hooked on the cigarette, the tobacco industry and the government are equally addicted to the profits and tax revenues it generates.

"Tea has been one of the most popular commodities in the world. Over centuries, profits from its growth and sales funded wars and fueled colonization, and its cultivation brought about massive changes--in land use, labor systems, market practices, and social hierarchies--the effects of which are with us even today. *A Thirst for Empire* takes a vast and in-depth historical look at how men and women--through the tea industry in Europe, Asia, North America, and Africa--transformed global tastes and habits and in the process created our modern consumer society. As Erika Rappaport shows, between the seventeenth and twentieth centuries the boundaries of the tea industry and the British Empire overlapped but were never identical, and she highlights the economic, political, and cultural forces that enabled the British Empire to dominate--but never entirely control--the worldwide production, trade, and consumption of tea. Rappaport delves into how Europeans adopted, appropriated, and altered Chinese tea culture to build a widespread demand for tea in Britain and other global markets and a plantation-based economy in South Asia and Africa. Tea was among the earliest colonial industries in which merchants, planters, promoters, and retailers used imperial resources to pay for global advertising and political lobbying. The commercial model that tea inspired still exists and is vital for understanding how politics and publicity influence the international economy ..."--Jacket.

The Muspratt family form a fascinating dynasty in the history of British commerce and manufacturing. Associated principally with the development of the chemical industry in Liverpool - James Muspratt (1793-1884) was the first person to make alkali on a large scale using the Leblanc Process - the three generations of the family also contributed to wider Victorian and Edwardian culture through their interests in politics, education (founding the Liverpool College of Chemistry in 1848), art, literature

and theatre. This is the first study to present the history of the Muspratts as a family group and to consider the entrepreneurial spirit they brought to chemical manufacture in Britain and to their many other ventures.

Entrepreneurial Ventures in Chemistry

Over the past four centuries botanists and gardeners in the British Isles have gathered, maintained and propagated many varying species of plants. Their work has been documented in innumerable books and articles which are often difficult to trace. The Dictionary of British and Irish Botanists and Horticulturalists represents a time-saving reference source for those who wish to discover more about the lives and achievements of the horticulturalists listed. The dictionary's utility comes not only from indicating the major publications of the named authors, but also the location of their herbaria and manuscripts.; The previous 1977 edition of the Dictionary has for many years been a much used source of information for botanists, botanic artists and archivists. In this revised edition the scope has been expanded to include among its 13,000 entries flower painters in addition to botanical artists over 1400 entries and, for the first time, garden designers.; Finally the Dictionary should have international appeal since so many botanists and gardeners worked on collective plants overseas, in particular in North America and the British Commonwealth.; Each entry gives, wherever possible, details of dates and places of birth and death, educational qualifications, professional posts, honours and awards, publications, location of plant collections, manuscripts, drawings and portraits. Its main function, however, is to provide further biographical references to books and periodicals. Comprehensive classified indices facilitate access by professions and activities, countries, and plant interests.

A Science of Impurity

Critical attention to the Victorian supernatural has flourished over the last twenty-five years. Whether it is spiritualism or Theosophy, mesmerism or the occult, the dozens of book-length studies and hundreds of articles that have appeared recently reflect the avid scholarly discussion of Victorian mystical practices. Designed both for those new to the field and for experts, this volume is organized into sections covering the relationship between Victorian spiritualism and science, the occult and politics, and the culture of mystical practices. The Ashgate Research Companion to Nineteenth-Century Spiritualism and the Occult brings together some of the most prominent scholars working in the field to introduce current approaches to the study of nineteenth-century mysticism and to define new areas for research.

Terrors of the Table is an absorbing account of the struggle to find the necessary ingredients of a healthy diet, and the fads and quackery that have always waylaid the unwary and the foolish when it comes to the matter of food and health. Walter Gratzer tells the tale of nutrition's heroes, heroines and charlatans with characteristic crispness and verve. We find an array of colourful personalities, from the distinguished but quarrelsome Liebig, to the enterprising Lydia Pinkham. But we also find the slow recognition that the lack of vital ingredients can cause terrible illnesses - scurvy, rickets, beriberi. These diseases stalked the poor in the West even into the 20th century, and scandalously remain in poorer parts of the world today. The narrative stretches from classical times to the modern day and gives a valuable historical perspective to our current understanding. It also highlights some of the problems faced by the developed world regarding health today - in particular diabetes and obesity. And despite our far greater understanding of what our body needs, there are still many who would fall for fads and fancy diets - some dangerous, others just daft. Of course, the story of nutrition does not end there. We have discovered the key vitamins and minerals our body needs, but research continues on the connections between diet, health and disease. The body's biochemistry is complex, and there are no easy answers, no magic formula, that applies to all individuals. The safest and most rational course would seem to be a sensible, moderate, and varied diet, not forgetting that 'a little of what you fancy does you good'.

The Ashgate Research Companion to Nineteenth-Century Spiritualism and the Occult

Victorian City is a study of the social and intellectual attitudes of Victorian society to the challenge of urbanization.

Terrors of the Table

From pre-historic grooming rituals to New Age medicine, from ascetics to cosmetics, Clean looks at how different cultures have interpreted and striven for personal cleanliness and shows how, throughout history, this striving for purity has brought immense social benefits as well as great tragedies. Looking at human history through the lens of public baths, lavatories, laundry, teeth cleaning, cosmetics, food storage and panty liners, Virginia Smith here combines archeology, psychology, biology, and other fields to illuminate our modern obsession cleanliness. She peppers her entertaining account with engaging and often surprising details. The book reveals, for instance, that even at the earliest stages of human development, our bodies produced pleasure-giving chemical opiates when things smelled or felt clean, inducing us to bathe or at least remove dirty clothes. She describes how, during the Bronze Age, an emerging hierarchy of wealthy elites turned their love of grooming into an explosion of the cosmetic and luxury goods industry, greatly affecting the culture and economy of Eurasia and leading to advances in chemistry and medicine. Likewise, in Greece and Rome, citizens focused much of their leisure time on perfecting, bathing, or just writing about the model athletic body. Even today, our enlightened medical knowledge could not stop an onslaught of health remedies, treatments, spas, and New Age nature cures--all in the pursuit of purity. This engrossing and highly original work will introduce you to the customs and ideas of a myriad of cultures across centuries of human history, providing a marvelous new perspective on the importance of cleanliness to human civilization.

The Victorian City

As a food, milk has been revered and ignored, respected and feared. In the face of its 'material resistance', attempts were made to purify it of dirt and disease, and to standardize its fat content. This is a history of the struggle to bring milk under control, to manipulate its naturally variable composition and, as a result, to redraw the boundaries between nature and society. Peter Atkins follows two centuries of dynamic and intriguing food history, shedding light on the resistance of natural products to the ordering of science. After this look at the stuff in foodstuffs, it is impossible to see the modern diet in the same way again.

"Pure food" became the rallying cry among a divergent group of campaigners who lobbied Congress for a law regulating foods and drugs. James Harvey Young reveals the complex and pluralistic nature not only of that crusade but also of the broader Progressive movement of which it was a significant strand. In the vivid style familiar to readers of his earlier works, *The Toadstool Millionaires* and *The Medical Messiahs*, Young sets the pure food movement in the context of changing technology and medical theory and describes pioneering laws to control imported drugs and domestic oleomargarine. He explains controversy within the pure food coalition, showing how farming and business groups sought competitive commercial advantage, while consumer advocates wished to promote commercial integrity and advance public health. The author focuses on how the public became increasingly fearful of hazards in adulterated foods and narcotic nostrums and how Congress finally achieved the compromises necessary to pass the Food and Drugs Act and the meat inspection law of 1906. Originally published in 1987, this volume examines the ideals and realities of river use in 19th Century Britain and the failure of legal and technological remedies for river pollution. It deals with the involvement of scientists, particularly chemists, in pollution inquiries and considers the effects on the normal workings of the scientific community of scientists' participation in the adversary forums in which water and sewage policy was made. It discusses 19th ideas of decomposition, disease causation and purification and examines the gap between the abilities of science and the needs of society that developed as the existence of water-borne disease became increasingly clear. It also deals with the politicization of water bacteriology and the emergence of a technology of biological sewage treatment from a political context.

Drug Adulteration: Detection and Control in Nineteenth-century Britain

We live in a world saturated by chemicals—our food, our clothes, and even our bodies play host to hundreds of synthetic chemicals that did not exist before the nineteenth century. By the 1900s, a wave of bright coal tar dyes had begun to transform the Western world. Originally intended for textiles, the new dyes soon permeated daily life in unexpected ways, and by the time the risks and uncertainties surrounding the synthesized chemicals began to surface, they were being used in everything from clothes and home furnishings to cookware and food. In *A Rainbow Palate*, Carolyn Cobbold explores how the widespread use of new chemical substances influenced perceptions and understanding of food, science, and technology, as well as trust in science and scientists. Because the new dyes were among the earliest contested chemical additives in food, the battles over their use offer striking insights and parallels into today's international struggles surrounding chemical, food, and trade regulation.

Pharmaceutical Correspondence of Jonathan Pereira to Jacob Bell, London 1844 to 1853

A Cultural History of Chemistry in the Nineteenth Century covers the period from 1815 to 1914 and the birth of modern chemistry. The elaboration of atomic theory - and new ideas of periodicity, structure, bonding, and equilibrium - emerged in tandem with new instruments and practices. The chemical industry expanded exponentially, fuelled by an increasing demand for steel, aluminium, dyestuffs, pharmaceuticals, and consumer goods. And the chemical laboratory became established in its two distinct modern settings of the university and industry. At the turn of the century, the discovery of radioactivity took hold of the public imagination, drawing chemistry closer to physics, even as it threatened to undermine the whole concept of atomism. The 6 volume set of the *Cultural History of Chemistry* presents the first comprehensive history from the Bronze Age to today, covering all forms and aspects of chemistry and its ever-changing social context. The themes covered in each volume are theory and concepts; practice and experiment; laboratories and technology; culture and science; society and environment; trade and industry; learning and institutions; art and representation. Peter J. Ramberg is Professor of the History of Science at Truman State University, USA. Volume 5 in the *Cultural History of Chemistry* set. General Editors: Peter J. T. Morris, University College London, UK, and Alan Rocke, Case Western Reserve University, USA.
