The Heart of Leadership

The Heart of Leadership challenges the view that new tools, processes, and knowledge are enough to deliver the highest levels of safety, quality performance, employee engagement, and financial health. The book examines the leadership characteristics of ten transformational leaders from a variety of work environments who have had significantly more success than many of their peers in similar circumstances. It is an inspirational, optimistic, and practical guide to leading transformational change. The Heart of Leadership illustrates the important point that it is not what these leaders do as much as it is who they are. It looks at the common themes, values and work environments these ten transformational leaders have fostered. Interviews with each leader reveal their personal backgrounds, character-building experiences and individual beliefs. The interviews are interspersed with quotes from those with whom the leaders work, and include reflection points from the authors along with a model for transformational leadership, developed from a synthesis of the interviews. The book provides useful insights by covering the most advanced and progressive health care leadership practices - where many leaders struggle. The book's examples can help readers strengthen their own leadership capabilities.

Knowledge Management in Healthcare

Knowledge management goes beyond data and information capture in computerized health records and ordering systems; it seeks to leverage the experiences of all who interact in healthcare to enhance care delivery, teamwork, and organizational learning. Knowledge management - if envisioned thoughtfully - takes a systemic approach to implementation that includes the embodiment of a learning culture. Knowledge is then used to support that culture and the knowledge workers within it to encourage them to share what they know, thusly enabling their peers, their organizations and ultimately their patients to benefit from their experience to proactively dismantle hierarchy and encourage sharing about what works, and what doesn't to focus efforts on improvement. Knowledge Management in Healthcare draws on relevant business, clinical and health administration literature plus the analysis of discussions with a variety of clinical, administrative, leadership, patient and information experts. The result is a book that will inform thinking on knowledge access needs to mitigate potential failures, design lasting improvements and support the sharing of what is known to enable work towards attaining high reliability. It can be used as a general tool for leaders and individuals wishing to devise and implement a knowledge-sharing culture in their institution, design innovative activities supporting transparency and communication to strengthen existing programs intended to enhance knowledge sharing behaviours and contribute to high quality, safe care.

Lead From The Heart

Leadership and engagement expert Mark C. Crowley shows how trading in the old business playbook for heart-led leadership strategies will create purpose-driven, dedicated employees and higher levels of performance. Revised and updated to address the needs of those managing Gen Z and millennial employees in addition to the latest global research on employee engagement. In this thoroughly revised and updated edition of his now classic book, visionary Mark C. Crowley provides the roadmap workplace leaders the world over are seeking: How to most successfully and sustainably inspire and manage other human beings in the post-pandemic era. · Nearly 50 million workers quit their jobs in the U.S. alone in 2021—a record number likely to be exceeded in 2022. · While we might imagine that an opportunity to earn greater pay is the key driver of this “Great Resignation,” research shows two-thirds of the reasons people leave jobs boil down to issues related to their engagement and overall well-being. · More specifically, people quit when they feel they aren't valued, respected, appreciated, coached—or cared about personally—by their manager and organization. · Thanks in large part to the COVID pandemic and a global reset of what matters most to people in their lives, human beings have profoundly evolved in what they need and want in exchange for their work. · Consequently, a radical change in employee expectations demands that organizations and managers rapidly pivot by embracing leadership practices that match the moment. · The remedy to the Great Resignation is to adopt more humane ways of managing people knowing they inherently lead to infinitely greater engagement not to mention optimal employee performance. · In this new and updated version of his seminal and visionary book, Mark C. Crowley draws upon emerging medical and other scientific discoveries which prove it's the heart, not the mind, that drives human motivation and achievement. · While we've long been led to believe that human beings are essentially rational beings, new research shows that feelings and emotions far more often motivate human behavior and what people care about most and commit themselves to in their lives. · In light of this breakthrough understanding, it's become incumbent upon workplace managers to pay great attention to their employees' emotional experience at work—far greater attention than any of us ever believed necessary. · Ironically, most of us were told the heart has no place in workplace management. In fact, most of us were taught that the heart acts like Kryptonite in leadership: it inherently undermines a manager's effectiveness - and lowers performance. · What makes this book so remarkable is that it brilliantly contradicts all those traditional beliefs and proves why people naturally and instinctively respond to managers who care about them personally and support their deep human needs. · To be absolutely clear, there's nothing soft or weak about the

Lead From The Heart philosophy. Instead, it represents the future of workplace management and a roadmap to driving uncommon engagement, productivity and profitability when organizations around the world are wanting it most. · Rich with inspiring stories and illuminating research, this book proves that when you lead people with a greater balance of mind and heart, people naturally follow. And they also excel.

The Heart of a Nurse Leader

The rapid changes in health care including novel technologies as well as the changing economic, political, and social landscapes are all forcing physicians as well as most types of health care practitioners to re-think their role in leadership. This is particularly true in the US in recent years, but the same issues are widely prevalent affecting health care workers around the globe. Developing capable medical leaders who can navigate these challenges will be essential. Physicians and other health care practitioners usually receive little or no leadership training in the course of their education. At the next steps in their training: internship, residency and fellowship, gaining clinical acumen takes precedence over developing other skills that are at the core of leadership training. Leadership Lessons for Health Care Providers will allow all types of health professionals to gain a better understanding of what leadership is, how to develop their skills while still early in their careers, how to understand and handle common leadership conundrums and chart a path towards increasing their leadership capabilities as they reach mid-career and beyond. This book will provide a great start for those who are interested in learning more about leadership and includes recommendations for next steps at all stages in leadership work. Discusses and offers practical advice on a number of leadership development topics including levels of leadership, different styles and techniques, dealing with conflict, making hard decisions, and setting priorities Includes valuable insight from leaders and specialists in the health care field Directs readers to additional leadership resources as next steps

Leadership Lessons for Health Care Providers

This guide helps undergraduate medics and junior doctors, as well as experienced doctors taking on new managerial responsibilities, to become effective leaders and managers by introducing both management and clinical leadership theory and practice, and the challenges facing medical managers in today's NHS. Despite growing recognition of the importance of leadership and management to doctors in meeting their clinical responsibilities, training in medical schools and foundation years remains patchy. The book explores how management and leadership can enhance health professionals' individual and organisational effectiveness, job satisfaction, and careers. Scenarios draw from the authors' real-life tales, while accompanying exercises encourage readers to reflect on their own experience. Fully referenced, and digestible both in full and as a reference resource, this is vital reading for medical students, junior doctors, and those who teach and train them. It will also prove useful to experienced doctors taking on new managerial responsibilities. 'Clinical leadership across the NHS may take many forms ranging from frontline leaders who provide excellent service through a spectrum of clinical innovators and academics, to those who provide leadership through their professional bodies or through managerial involvement at various levels in their employing institution. This admirable book is aimed at young clinicians and invites them, through a series of vignettes and issues coupled with practical theory, to enter the world of management. I hope that everyone who reads this book will accept that invitation, because it is only through effective service design, management and change that we can practise medicine in the way and in the environment that is best for both patients and clinicians.' Professor Sir Bruce Keogh NHS Medical Director

The Medical Staff Leader's Survival Guide William K. Cors, MD, MMM, FACPE An affordable, time-sensitive solution to medical staff leadership training. Physicians who accept or are assigned leadership positions are often left on their own to develop leadership skills and educate themselves about their responsibilities as medical staff leaders. Just because a physician is a great clinician does not mean he or she is a great leader. The challenges of being a successful medical staff leader are twofold: You must be well-versed in your role and responsibilities (i.e., peer review, credentialing, medical staff bylaws), and you must inspire other medical staff members to follow the rules while continuing to deliver excellent patient care. A well-trained medical staff leader is vital to the culture of a hospital's medical staff and can save a hospital from the expense of lawsuits affiliated with negligent credentialing/peer review. This book aims to teach physicians how to become great medical staff leaders and how to motivate other medical staff members on topics such as: AHP credentialing and supervision Reappointment challenges Physician-hospital competition Liability risks Medical staff disharmony and distrust Table of Contents Chapter 1: Where to Begin? The Medical Staff Leader's Survival Guide

This innovative book analyses the evolving nature of leadership, exploring an ever-increasing range of theoretical concepts and applying these to practices within healthcare organisations. A wide range of theories are covered, from behavioural to attitudinal, socio-cognitive to contingency, and social exchange to team. By identifying the common underlying characteristics that are present in leadership styles and approaches, the author successfully crafts a useful model that is adaptable to different scenarios and contexts within the realms of healthcare management. Offering a series of detailed case studies from around the world, this book proposes three crucial concepts for leadership within the health sector: leadership credibility, professional credibility and organisational dynamics. Both scholars and practitioners will find the theoretical framework provided in this book insightful and applicable in real-life situations.

Creating the Culture for Innovation

Reassess your leadership style, discover how to connect with people, and become a leader who can make things happen in the real world. Built on a unique four-year experiment working alongside real leaders in real businesses, *Living Leadership* explodes the myth of the charismatic, transformational leader, to show that real progress comes from the dramatically ordinary aspects of leadership. From building relationships, to working with the grain of the organisation rather than against it, and to knowing our limitations as much as pushing every boundary, the new edition of this book will challenge you to push your leadership skills to a new level. "Living Leadership shows how, when you take away the myths and misconceptions, leading can genuinely be made easier." Hans Straberg, CEO, Electrolux "A 'how to' book that redefines leadership in terms of the realities and choices facing people in organisations today." Professor Michael Osbaldeston, Director of Cranfield School of Management

Leadership in Healthcare

No healthcare organization is immune to financial decline. Healthcare leaders must be able to recognize the warning signs of financial distress and take action to maintain or restore their organization's

financial health. The author of this step-by-step guide shares what he learned while leading several successful financial turnarounds. Along with concrete tools and action plans, he provides candid advice about minimizing the fears of employees, physicians, and board members. In this book, you will learn how to preserve crucial relationships while directly addressing difficult questions. Topics covered include: Using performance analytics to predict a financial crisis Acknowledging a negative financial trend and accepting responsibility Improving cash flow and reducing costs Initiating pivotal discussions with key stakeholders Creating an effective communications and public relations strategy Developing a dashboard for the turnaround process Fielding the right turnaround team and determining responsibilities Maintaining strong relationships with your medical staff Avoiding common leadership missteps Considering the use of outside consultants Creating closure after a turnaround

Living Leadership

This practical and positive guide shows how good, effective reflection can help people to stay on track, as well as understand what is working well and what might be improved - essential skills for leaders at all levels of practice from newly qualified staff to senior managers. Supporting readers to link theory and action with reflection, the authors illustrate how practitioners can exercise their own kinds of leadership to strengthen, improve and thrive. Taking a realistic and achievable view of leadership, the book: reviews the different leadership approaches and styles that help to inform us about what makes a good leader; explores the role of emotional intelligence, appreciative intelligence and narrative intelligence in leadership, especially in complex, challenging and continually changing healthcare settings; and uses case studies and practice examples to ensure the book is relevant, current and helpful. Reflective leadership is fundamental to providing safe, effective healthcare to all patients, as well as enhancing resilience for individuals, teams and organisations. This guide is an essential read for healthcare students and practitioners, no matter at what stage or level they are at as a leader.

Leading a Hospital Turnaround

Leadership is liberating, and the development of leadership in health care organisations is vital. In this timely and exciting textbook, Christopher Johns addresses the most vital aspects of health care development and education, and reveals the tensions of becoming a leader within health care organizations. Being able to understand and work towards resolving these tensions is essential in becoming an effective leader. To be an effective leader, however, requires an awareness and acceptance of circumstances that is best termed 'mindfulness'. Equipped with the theoretical and practical-know-how to drive forward health reform and ensure quality, this book will enable health care students and practitioners to become reflective and genuinely mindful leaders.

Reflective Leadership in Healthcare

In this new edition Peter Spurgeon and Robert Klaber take you through the latest leadership and management thinking, in particular the medical leadership competency framework as endorsed by the GMC for undergraduate and postgraduate education.

Mindful Leadership

In 1999 D J Brown left his job as a doctor in the NHS, frustrated by a system that seemed intent on breaking him. He developed a career as a business consultant, helping companies to improve the way they worked. But his vocation eventually drew him back to healthcare and he returned to the NHS, only to find that it was still hampered by inadequate leadership, inefficient processes, unbalanced targets and a lack of collaboration. He found institutions full of caring and committed healthcare staff unable to do the jobs for which they were trained. And then the local hospital nearly killed his mother. This book is a response to that near-tragedy. It is a response also to our need for a safer, happier and more productive healthcare system. Drawing on his experience as both a front-line doctor and his work with successful international companies, D J has developed the seven-stage CAREFUL programme. This simple approach will transform your healthcare organisation and deliver the clinical efficiency that you, your staff and your patients deserve. By putting people before process and taking the long-term view, he shows how we can improve the reputation and safety of every healthcare institution in the country. Filled with real-life anecdotes and practical examples, this book exudes a passion to transform and improve the way that healthcare is delivered.

A Wall Street Journal Bestseller Named a Financial Times top title How to unleash "human magic" and achieve improbable results. Hubert Joly, former CEO of Best Buy and orchestrator of the retailer's spectacular turnaround, unveils his personal playbook for achieving extraordinary outcomes by putting people and purpose at the heart of business. Back in 2012, "Everyone thought we were going to die," says Joly. Eight years later, Best Buy was transformed as Joly and his team rebuilt the company into one of the nation's favorite employers, vastly increased customer satisfaction, and dramatically grew Best Buy's stock price. Joly and his team also succeeded in making Best Buy a leader in sustainability and innovation. In *The Heart of Business*, Joly shares the philosophy behind the resurgence of Best Buy: pursue a noble purpose, put people at the center of the business, create an environment where every employee can blossom, and treat profit as an outcome, not the goal. This approach is easy to understand, but putting it into practice is not so easy. It requires radically rethinking how we view work, how we define companies, how we motivate, and how we lead. In this book Joly shares memorable stories, lessons, and practical advice, all drawn from his own personal transformation from a hard-charging McKinsey consultant to a leader who believes in human magic. *The Heart of Business* is a timely guide for leaders ready to abandon old paradigms and lead with purpose and humanity. It shows how we can reinvent capitalism so that it contributes to a sustainable future.

The Meaning of Careful

"Good leadership is more creative and satisfying than simply managing. But it takes a book as good as this to help us realise that. Wherever you are in your career - this book offers a great deal to inspire and to provoke thought. We could all learn from it." Nursing Standard "This book is timely. The increasing emphasis on the need for good leadership is signalled by the establishment across the world of new leadership development initiatives. In the United Kingdom, for example, this includes the new NHS National Leadership Council that will champion the transformation of leadership capacity and capability across the healthcare system. Effective leadership is crucial for improving the quality of care for patients and others and for developing staff. This highly readable and informative book, written by experts in the field, will be of interest to all nursing and allied health professionals, particularly those aspiring and emerging leaders." Professor David R Thompson, University of Leicester, UK "This is a book that all students studying leadership in health care have been waiting for. It provides an excellent broad perspective on aspects of leadership common to all disciplines. It aims to empower all health care providers to fully realise their potential as a leader and demonstrates how this can be achieved in reality. It is inspirational, exciting to read with its many different case studies, exercises to bring about reflection and should result in a more empowered and enlightened work force." Phil Halligan, University College Dublin, Ireland "With the increased focus on clinical leadership this book is a welcome addition to the vast array of leadership books currently available and will appeal to a wide range of practising clinicians looking for an introduction to the subject. The use of historical case studies allows comparison of leadership styles of a range of well known figures and sets the scene for an exploration of some of the multitude of leadership theories that are available in the literature ... Readers who are currently practising clinicians, regardless of profession, should use this opportunity to 'stand up and be counted' and to take forward the leadership agenda in their professions for the benefit of patients and inform future practice and knowledge." Mark Sewell, Postgraduate Student, University of Birmingham/University of Manchester, UK It is time to take stock, to promote and support our articulate and strategic thinkers, and to let them shine! This inspiring book is a wake-up call to nurses and allied health professionals to develop their leadership skills and to make a real difference to global health and social development. Veronica Bishop uses high profile historical case studies to illustrate the concept of leadership and put it into a context that is easily understood. The book demystifies the key elements of leadership, highlights the difference between leadership and management and identifies the essential components for successful leadership amongst health care professionals. The book incorporates: A new research based theory of leadership that embraces clinical excellence Educational and practice based concepts to support key leadership skills Case examples of real experiences Exercises for developing your own leadership skills at the end of each chapter Contributions from experts from a wide range of countries and with diverse knowledge bases make a topic that is often presented as highly complex and 'out of reach' readily accessible. Leadership for Nursing and Allied Health Care Professions is key reading for all nurses and allied health care professionals aspiring to be leaders. Contributors: Sue Antrobus, Mary Lovegrove, Annie Macleod, Abigail Masterson, Dawn Freshwater, Iain Graham, Philip Esterhuizen, David Stanley, Mike Saks, Veronica Bishop, Tyrone Goh. With a foreword by Tony Butterworth.

The Heart of Business

There is a crisis in Leadership. "Harvard Business Review" recently stated that business executives are least likely to contribute to society. Self-serving leadership has eroded our confidence with wide-spread scandals, significant layoffs, and insane executive bonuses. Loyalty seems to be a one-way street! What is the solution? "The Art of Servant Leadership" provides a prophetic voice in overcoming the craziness within business and a guidebook on how any public or private company can achieve its true purpose in this world. Interwoven with the principles of servant leadership is a story of how one CEO transformed his international communications company to exist for the sake of others. About the Author Tony Baron is president of the Servant Leadership Institute, a division of Datron World Communications, headquartered in Vista, California. He holds a double doctorate in psychology and theology and serves as adjunct professor in pastoral theology and leadership development at Fuller Theological Seminary and Azusa Pacific University. Dr. Baron teaches, trains, and consults with corporate and church leaders around the world on how to live for the sake of others. He has authored four previous books. An ordained Anglican priest, Dr. Baron is board certified in forensic medicine and is a diplomate of the American board of Psychological Specialties.

Leadership for Nursing and Allied Health Care Professions

Where other books tell you about emotional intelligence, this book provides the roadmap to put it in action. Includes case for EQ, background, and detailed explanation of the Six Seconds EQ Model and how to use it to improve leadership -- and a free code to test your EQ strengths online. Using stories and data from his work around the world with organizations such as the US Marine Corps, Schlumberger, and FedEx, Freedman provides a practical guide to this critical topic. At the Heart of Leadership delivers a compelling case for leaders to attend to their own and their people's emotions as a critical asset for optimal performance. Then it shows you how. You'll learn the Six Seconds EQ Model, a practical three-step process to become more effective with emotions -- plus use the code in the back of the book for a free assessment of your EQ strengths. This book will show you how to lead more effectively by engaging your own and your people's emotions.

The Art of Servant Leadership

An in-depth exploration of the complexities--and perhaps audacity--of naming the unnameable. Almost forty contributors from all Jewish denominations and from around the world wrestle with Avinu Malkeinu and the linguistic and spiritual conundrum it presents, asking, "How do we name God altogether, without recourse to imagery that defies belief?"

At the Heart of Leadership

In this daring blend of Jewish theology, science and Process Thought, theologian Rabbi Bradley Shavit Artson explores our actions through Judaism and the sciences as dynamically interactive and mutually informative.
