take your white polymer clay

start making the white part of the eyeball

place that on top of your iris

applying the same amount of amount of pressure to every edge

bring in your casting resin

pour the resin

pour both of them into the disposable cup

set a timer for three minutes

pour the resin onto the eyeball

add a little bit of resin

use additional measuring cups like this to dry the eyeballs

smooth it around the surface of the eye

let it sit like that for 24 hours

crack the surface of the eye

using the niosh ovie p95 mask
dilute that paint a little bit with the liquitex flow
shaving a bit of pastel powder off
layer some of that black acrylic paint on the inside
add some watercolor pencil to the lip area
adding some pastel for the eyebrows
flushing underneath that nose in the little divot above the lip
adding tear ducts to the doll
get that depth of color
use a light pink pearl x powder
use eyelash glue to apply

Disruptive Hypotheses

You Haven't Yet Reached a Solution Now the Only Way To Get from Ideas and Solution Is through Running Lots of Small Low-Cost Pilots Seeing What Works Then Finally You've Got To Convince Others You're Expecting To Make the Change whether They're Internal or External Stakeholders That the Advantages of Making Such a Change Are Clear this Is Where Many People Fall Down They Blame You no Regulations They Blame Their Boss They Blame the Board for Not Embracing Change and Their Ideas but People Don't Embrace Change Just because It's New and Innovative Disruption for Disruptions Sake Is Just Annoying It Has To Deliver Value Now the Only Way You're Going To Convince Them of that Value Is by Always Selling Benefits and Not Novelty

If You Want To Start Challenging that You Just Look at another Industry That Also Manages Infant

Oriental Large-Scale Start Applying It There You'D Start To See How Arbitrary some of these Decisions Are like Rental Car Companies for Instance They Manage a Lot of Inventory but Do They Say You Know I'M Sorry George I Know It's 11 : 00 Am and You'Ve Got To Drive to San Francisco but You'Re GonNa Have To Have that Car Back by 12 : 00 Rental Car Companies Have Their Own Set of Interaction Cliches Face-to-Face Interaction with a Service Agent Get You To Complete a Ton of Paperwork Rent Your Cars by the Day this Set of Cliches Is Still Very Much in Play Try Dropping a Car Back after a Physical Depot's Being Closed

We'Re all So Obsessed in Business Running Around Trying To Spot the Big Problems That Need To Be Solved I Bet 98 % of Your Job Is Spent Putting Out Fires the Faster You Can Solve a Problem the Faster You Can Get on the Next Thing on Your To-Do List the Problem with Problems Is They'Re Seductively Clear They'Re Screaming for Your Attention Which Typically Means in Your Organization Problems Are the Only Things Getting any Thinking Attention the Richest Areas for Your Future and the Richest Areas for the Future of the Industry and Innovation Are the Seemingly Unbroken Aspects of the Situation the Areas Where Nothing Appears To Be Wrong

But if You Want To Introduce Deliberate Discontinuity To Break a Pattern of Inertia in Your Organization To Remix or Rethink the Ingredients You Need To Get in the Habit of Not Making Reasonable Predictions but Making Unreasonable Provocations So in Terms of the Remote Control We Would Start Thinking Well Why Not as a Remote Control Even Need a Battery At All and the Difference Is Profound the Whole Point of a Disruptive Hypothesis Is To Give Yourself and Your Organization Permission To Be Wrong Deliberate Permission To Be Wrong at the Start so You Can Get the Organisation in a Position Where You Can See the Right Answer at the End because if You'Re Coming Up with a New Idea New Way of Operating Everyone the Room Is Nodding Their Head and Going Yes Great Idea It Means It's Incremental Means Generic Means Somebody Else Will Be Doing It So You Can Get the Organisation in a Position Where You Can See the Right Answer at the End because if You'Re Coming Up with a New Idea New Way of Operating Everyone the Room Is Nodding Their Head and Going Yes Great Idea It Means It's Incremental Means Generic Means Somebody Else Will Be Doing It Just As Soon So Here Are the Three Techniques Take these Cliches and the First One Is Work Out What You Can Literally Turn on Its Head Think about a Swimmer Kicking Off a Wall on a Swimming Pool as We Saw on the Olympic Swimming As Fast as They Can in the Opposite Direction There's a Timescale Run It Backwards There's a One-Way Relationship between Two Parties Reverse that Relationship We Go Back to the Soda Example We Take for Granted Sodas Your Next Inexpensive

I Can Tell You if You'Re in those Original Focus Groups You Would Have Seen American Consumers Spitting this Product Out on the Floor and if Anyone's Ever Been a Marketing Focus Group You Know if a Customer Spits Your Product Out on the Floor Not a Good Chance of that Getting through the System but They Worked Out How To Take a Disadvantage and Make an Advantage Which Is the Whole Point of an Inversion Hypothesis What Are the Weaknesses in Your Way of Operating at the Moment What Are the Disadvantages all of those Things Can Be Turned into Advantages
