Cosmic Challenge

In 1789 the West Indian colony of San Domingo supplied two-thirds of the overseas trade of France. The entire structure of what was arguably the most profitable colony in the world rested on the labour of half a million slaves. In 1791 the waves of unrest inspired by the French Revolution reached across the Atlantic dividing the loyalties of the white population of the island. The brutally treated slaves of Saint Domingo seized at this confusion and rose up in rebellion against masters. In this classic work, CLR James chronicles the only successful slave revolt in history and provides a critical portrait of their leader, Toussaint L'Ouverture, 'one of the most remarkable men of a period rich in remarkable men'.

Ecopoéticas

«Ecopoéticas» se enfoca en la forma imaginativa y creativo simbólica que adopta el lenguaje para el tratamiento de temas ecológicos en los textos poéticos de ocho autores de la España actual. Este acercamiento descarta una mera aproximación descriptiva a la tierra en favor de experimentarla para poder decirla en la «poiesis» o hacer poético. Frente a la tradición ilustrada en la línea baconiana y cartesiana donde la tierra siempre queda supeditada a la cultura y la imaginación a la razón, estos poetas comparten el objetivo de dar voz a la naturaleza, a la materia y a la fisicidad. Sus obras hacen del espacio poemático un ámbito donde poder enlazarse con el entorno, pues entienden que el poema implica un “hacer” en el sentido de crear en el texto el hogar/oikos de la naturaleza.

La Naturaleza se Expresa. Fábulas. Tomo I

Todos los libros sea cual fuere la forma en que se clasifique su obra literaria, siempre han sido escritos por seres humanos. Ustedes preguntarán: ¿Quién más puede escribir un libro? Pero para la ocasión quisiera que imaginaran por primera vez, a la naturaleza o a cualquier creación humana, como a través de un desconocido saber logran expresarse y escribir un libro. Los diferentes temas expondrán una forma de decir para el razonamiento. El diálogo entre sus personajes le darán un sentido de ficción; aunque su argumento descansa en los soportes de una insipiente ciencia que anuncia una nueva era para los terrícolas, donde en verdad tendremos la oportunidad de conocer el diseño de la creación de todo lo existente, será el lenguaje expresado de cada existencia y traducido en nuestro lenguaje de entendimiento. Este libro solo es el reflejo de un transitar científico en busca de una única verdad, soporte conceptual, para aquellos que estén preparados para salir del mundo de burbujas donde vive la humanidad desde su creación hasta nuestros días. Este libro prepara el camino para el florecimiento de una nueva ciencia, resultado de un transcendental descubrimiento científico.

La guía del ecoturismo: o cómo conservar la naturaleza a través del turismo

Tras el éxito alcanzado en su primera edición, publicada en 1999, que le ha convertido en un libro básico de referencia, aparece ahora la segunda edición revisada. Más de 30 páginas nuevas, mayor profundización en algunos temas, y una completa actualización de datos que incluye: nuevas direcciones, páginas web, correos electrónicos, así como toda la información sobre los acontecimientos del "Año Internacional del Ecoturismo 2002." Puede el ecoturismo ser una herramienta de conservación de la naturaleza? Responder a esta pregunta es lo que pretende este libro, así como sentar las bases para el conocimiento de este concepto. Las diferencias entre ecoturismo y turismo sostenible, turismo rural, turismo deportivo, etc., así como las bases para desarrollar un proyecto de ecoturismo, o bien planificar un viaje ecoturístico a cualquier parte del mundo. Se incluyen 15 casos prácticos de ecoturismo internacional, una perspectiva general del ecoturismo mundial así como la situación actual del ecoturismo en España; y anexos importantes como: la "Carta del Turismo Sostenible" (1995), la "Declaración de Quebec sobre el Ecoturismo" (2002) y un listado de las asociaciones de ecoturismo existentes en el mundo.

La naturaleza

La presente obra realiza un completo análisis de la tributación de las explotaciones económicas enclavadas en los espacios naturales protegidos, incidiendo en las particularidades a nivel desgravatorio, previstas en los diferentes tributos estatales y autonómicos. Junto a ello, el autor demuestra que la declaración de un espacio natural protegido, supone —de facto—, la constitución de una servidumbre de conservación a perpetuidad para los propietarios de los terrenos afectados por dicha declaración. Como consecuencia, adviene el denominado «lucro cesante», que será preciso compensar a través de los instrumentos que ofrece el ordenamiento tributario. Este libro se adentra también en el Derecho comparado, analizando las soluciones ofrecidas por legislaciones como la estadounidense, canadiense o argentina, a la hora de privilegiar fiscalmente la protección de terrenos declarados como protegidos. De acuerdo con ello, el autor articula una interesante propuesta de compensación de las explotaciones económicas en los espacios naturales protegidos españoles. Esta obra, interesará especialmente a abogados, asesores, docentes e investigadores dedicados al Derecho medioambiental, y a todas aquellas personas afines a esta disciplina.

Crónicas de lo efímero

Esta tesis doctoral viene definida por su transversalidad, puesto que recoge los múltiples aspectos que influyen y se relacionan con el turismo desarrollado en el espacio rural. Defiende igualmente la conveniencia de incrementar y dar mayor protagonismo a la formación en materia de turismo rural sostenible en los ciclos superiores que componen la Familia Profesional de Hostelería y Turismo. Por un lado, se recoge todo un estudio sobre el turismo en el medio rural: sus comienzos, factores de desarrollo, conceptualización, modalidades, líneas potenciales de futuro, etc., así como la necesidad de la inclusión del concepto de sostenibilidad, insoslayable para su crecimiento. Por otro lado, y como reflejo de los años de su labor profesional, la autora realiza un exhaustivo análisis de los contenidos de turismo rural existentes en los diseños curriculares de los ciclos formativos superiores de la Familia Profesional de Hostelería y Turismo -tanto de la anterior Ley de Ordenación General del Sistema Educativo como en la actual Ley Orgánica de Educación-, en la que es docente desde hace más de veinte años. Este trabajo de investigación, contando con el criterio de profesionales del sector, docentes en estos ciclos formativos y expertos universitarios, viene a corroborar la idoneidad de aumentar los contenidos en materia de turismo rural sostenible en dichos ciclos superiores en un bloque único de materia, de cara a mejorar la formación de los alumnos y a favorecer su futuro laboral, puesto que es este un sector con gran potencial de crecimiento en el que el factor de calidad en el servicio es indispensable. Proyecto y diseño de áreas verdes facilita la realización y el desarrollo de proyectos paisajistas, en relación con la jardinería y las áreas naturales, conceptos que agrupamos bajo la denominación común de áreas verdes. Es una obra de amplio contenido, que trata sobre las materias generales que se deben manejar para resolver este tipo de proyectos, desde su concepción, hasta la puesta en marcha. En la introducción, se delimita el concepto y alcance de los proyectos, a la vez que se esbozan unas ideas básicas y una metodología para abordarlos y se da especial importancia a los informes agronómicos, como elemento fundamental para hacer un planteamiento correcto del proyecto. El diseñador de áreas verdes debe disponer de conocimientos adecuados para la conformación de los espacios, así como para estructurarlos armónicamente, creando las composiciones ornamentales más adecuadas para cada circunstancia de diseño. Para ello es importante conocer las características generales de las plantas, su papel en el diseño y su comportamiento general. Todos estos conceptos, olvidados lamentablemente en muchos proyectos, se analizan detalladamente en los diferentes capítulos. Por último, se tratan los conceptos básicos que se deben resolver desde el punto de vista de la ingeniería como los pavimentos, el riego y el drenaje. Los elementos duros, especialmente los pavimentos, se tratan con mayor profundidad, no olvidando su diseño universal, es decir, su adaptación a cualquier tipo de usuario. En lo referente al riego, se esbozan las ideas generales de cómo se debe concebir esta técnica para un consumo eficiente de un recurso escaso como es el agua. Se facilita un listado exhaustivo, compuesto por cerca de dos mil especies botánicas utilizadas en jardinería, con su coeficiente de especie, para facilitar los cálculos de necesidades de agua de riego. El libro contiene gran cantidad de gráficos e imágenes, seleccionados para una mejor comprensión de las diferentes materias. La obra está dirigida a personas con interés en el diseño de áreas verdes y aquellos estudiantes y profesionales que tengan relación con la agronomía, el urbanismo y el paisajismo. Manuel Muncharaz Pou es Ingeniero Agrónomo. Entre los años 1975 y 1980 desarrolló su actividad profesional en la empresa privada. El trabajo de las Actividades en el Medio Natural se presenta como un medio idóneo para el desarrollo de las habilidades motrices básicas como pilar básico de la Educación Física en la Escuela. Dadas las características de los contenidos, nos permite abordar de una manera integrada la Educación en Valores y los Temas Transversales del currículo en los distintos niveles educativos. Para facilitar la labor del lector, el libro está estructurado en propuestas integrales que expertos de toda la geografía española han desarrollado en sus diferentes ámbitos con resultados satisfactorios. Podemos destacar a modo de ejemplo como acercar estos contenidos a los centros educativos a través de los juegos de reto y aventura, las posibilidades de desarrollo en horario extraescolar con propuestas que van desde la acampada, las escuelas municipales, los viajes de turismo deportivo y ecológico hasta la creación de espacios para el trabajo en los centros de enseñanza, así como la necesidad de una formación específica que garantice un trabajo adecuado.

El libro Patrimonio cultural y Marketing Digital constituye una contribución de enorme relevancia a los nuevos desafíos que presenta hoy en día conectar con el turista o visitante cultural. Este libro es una respuesta a la transformación que está experimentando el Patrimonio cultural y el marketing por la aplicación de las Tecnologías de la Información y la Comunicación (TIC). En la actualidad, los destinos turísticos culturales (los yacimientos arqueológicos, los museos, o los bienes patrimoniales en general) deben diferenciarse por la generación de contenidos a través del uso de las nuevas herramientas tecnológicas (las aplicaciones móviles, la realidad virtual o aumentada, etc.) y metodologías constructivistas, con el fin de dar respuesta a los nuevos patrones de comportamiento del visitante y a las demandas del turista 2.0. Desde un enfoque multidisciplinar, un seleccionado equipo de especialistas en la materia analiza aspectos clave que están marcando los cambios conductuales y de actitud en los consumidores culturales. Resultado de ello, en este libro, se ofrecen cinco grandes apartados: el marketing -y neuromarketing-, el turismo, la realidad virtual, los museos y la educación patrimonial o didáctica del Patrimonio cultural. La finalidad de todo ello es conectar con el turista 2.0 y, al mismo tiempo, preservar los recursos patrimoniales naturales y culturales logrando un turismo sostenible.

Proyecto y diseño de áreas verdes

La conservación de la naturaleza es un compromiso de todos. Es un vínculo maravilloso entre nosotros, con nuestras capacidades y logros como colectividad, y el mundo que nos rodea. Las 131 cuestiones abordadas en este libro quieren ayudar a reforzarlo. En su faceta académica, busca ser un complemento a los manuales y libros de texto sobre Biología de la Conservación (la ciencia que estudia la forma de preservar los seres vivos y evitar su extinción). Pero, además, pretende ser útil a los profesionales de la conservación, que encontrarán aquí mucho de los asuntos con los que conviven en su vida laboral. Puede ser también atrayente para todas aquellas personas sensibles a los desafíos ambientales de hoy, naturalistas, amantes del aire libre, colectivos sociales, artistas, que con ánimo de documentarse lo utilicen a la manera del apartado “Preguntas más frecuentes” de un manual de instrucciones al uso. A Felipe Domínguez Lozano le gustan las plantas y el campo, es botánico con vocación conservacionista. Imparte clases sobre estos asuntos en la Facultad de Biología de la Universidad Complutense de Madrid. Guiado por el viejo lema “conocer para conservar”, ha investigado y trabajado para la conservación de la biodiversidad en instituciones de dentro y fuera del país.

Ornitología y conservación de la naturaleza hoy

Entre una gran diversidad de materias, Henry Lefebvre se ocupó particularmente de los problemas de la urbanización y el territorio, presentando a la ciudad como el corazón de la insurrección estética contra lo cotidiano. La producción del espacio, incisiva y clarividente, es su principal obra filosófica, y estudiosos de muchos ámbitos diferentes llevaban años esperando su traducción. En ella, Lefebvre valora la importancia del espacio, que es siempre político (pues su construcción es siempre una lucha de poderes, incluso desde lo cotidiano), y pretende reconciliar el espacio mental (el espacio de los

filósofos) y el espacio real (las esferas físicas y sociales donde vivimos). En el curso de su análisis, Henri Lefebvre alterna consideraciones metafísicas e ideológicas sobre el significado del espacio, con la vivencia de éste en la vida cotidiana del hogar y la ciudad. Busca, en otras palabras, tender un puente entre los ámbitos de la teoría y la práctica, entre lo mental y lo social, entre la filosofía y la realidad. Para ello recurre al arte, la literatura, la arquitectura y la economía, además de proporcionar un poderoso antídoto contra las teorías y métodos estériles y ofuscantes, típicos de gran parte de la reciente filosofía continental.

ACTIVIDADES EN EL MEDIO NATURAL

Las aportaciones recogidas en este volumen presentan un interés indudable en el momento actual, entre otras cosas por la notable importancia que los Espacios Naturales Protegidos han adquirido en España en las dos últimas décadas y la manifiesta escasez de estudios rigurosos sobre el conjunto del país. La expansión de la protección de espacios de alto valor ecológico ha sido tan rápida, y sus consecuencias tan espectaculares en los años precedentes, que resulta imprescindible hacer balance de las iniciativas emprendidas, los logros alcanzados, las dificultades que han surgido y los grandes retos a que se enfrentan estos espacios en un futuro inmediato.

Essays on the Literary Baroque in Spain and Spanish America

A lo largo de los siglos XIX y XX las sociedades y los espacios rurales cantábricos han experimentado profundos y, en ocasiones, contrastados cambios como consecuencia de su proceso de incorporación y adaptación a la economía de mercado. La presente compilación de trabajos sobre estos temas reúne las intervenciones de veinte especialistas de diferentes lugares y disciplinas científicas.

El gobierno de la naturaleza en la ciudad

A detailed study that examines the architecture of Fernando Martínez Sanabria (b. Spain, lived and worked in Colombia since 1938- d. 1991) throughout two of his most recognized residential projects in terms of formal aesthetics: the houses Wilkie (1962) and Calderón (1963). The author uses these residential projects to better understand what is defined as organic architecture, a term invented by architect, Frank Lloyd Wright (1867-1959) to describe modern architecture, a practice that combines nature, function and beautiful design.

DXT Formación deportiva La naturaleza esconde una inmensidad de formas de trabajo, para la utilización de espacios, el disfrute personal y colectivo, descubrimiento de nuevas tendencias, superación personal, etc. Es algo que siempre va estar ahí, pero que puede desaparecer si no aprendemos a interactuar, a respetar, a convivir y a experimentar con ella. Una de las fórmulas para

disfrutar con la naturaleza es el desarrollo a través del movimiento, la indagación, experimentación. Nosotros como educadores, no podemos dejar la oportunidad de descubrir esta esencia mediante la actividad física y el deporte en el medio natural. Las actividades en la naturaleza se han desarrollado y evolucionado de tal forma, que cada vez hay más interés en practicar y experimentar este tipo de actividades por sus características propias de libertad, búsqueda de nuevas emociones, adrenalina, trabajo en equipo, etc. En la actualidad, hay un mayor interés por explorar, practicar e innovar nuevas tendencias en el medio natural que originan una inquietud que se debe satisfacer a la sociedad. Los espacios para la práctica de estas actividades han ido emergiendo muy rápidamente entre nosotros, y ya pueden ser protagonistas muy cerca de nosotros. Podemos encontrarnos espacios específicos de juego en los parques y jardines cercanos a nuestros hogares, plazas, colegios, en centros comerciales, polideportivos, etc. Estos espacios y su aprovechamiento son los contenidos de este libro, que explican cómo utilizar estos espacios como contenidos de enseñanza.

The long-awaited final volume of the trilogy by Patrick Leigh Fermor. A Time of Gifts and Between the Woods and the Water were the first two volumes in a projected trilogy that would describe the walk that Patrick Leigh Fermor undertook at the age of eighteen from the Hook of Holland to Constantinople. 'When are you going to finish Vol. III?' was the cry from his fans; but although he wished he could, the words refused to come. The curious thing was that he had not only written an early draft of the last part of the walk, but that it predated the other two. It remains unfinished but The Broken Road - edited and introduced by Colin Thubron and Artemis Cooper - completes an extraordinary journey.

Teaching Writing in Kindergarten

In the twenty years since this book was first published, our nation's communities - from urban centers to rural and small communities dotting our landscape - have had their foundations rocked to the core. Yet, despite the economic, social, and cultural challenges they have experienced, communities all across our country are showing their resilience by reinventing themselves. This is especially true for many of rural and small communities whose persistence and self-determination show the same creativity, the same grit, the same shared values that brought them into existence. One of the ways these communities are doing this is by engaging in community making through the arts. The arts invite us to tell our story and listen to the story of others. As we work together and celebrate our community creativity, the arts bring people of all ages, genders, races, religions, and economic backgrounds together for the common good of reconnecting with each other and celebrating who we are as individuals and communities. Community arts provide a new gathering place, a cultural and spiritual touchstone that is a source of community revitalization and neighborhood revival. I believe our rural and small communities are creating the map our nation is searching for that will help us navigate the challenges awaiting all of us as we work together rebuilding the front porch of America.
