Circles of Exclusion

In its early years, Israel's dominant ideology led to public provision of health care for all Jewish citizens-regardless of their age, income, or ability to pay. However, the system has shifted in recent decades, becoming increasingly privatized and market-based. In a familiar paradox, the wealthy, the young, and the healthy have relatively easy access to health care, and the poor, the old, and the very sick confront increasing obstacles to medical treatment. In *Circles of Exclusion*, Dani Filc, both a physician and a human rights activist, forcefully argues that in present-day Israel, equal access to health care is constantly and systematically thwarted by a regime that does not extend an equal level of commitment to the well-being of all residents of Israel, whether Jewish, Israeli Palestinians, migrant workers, or Palestinians in the Occupied Territories. Filc explores how Israel's adoption of a neoliberal model has pushed the system in a direction that gives priority to the strongest and richest individuals and groups over the needs of society as a whole, and to profit and competition over care. Filc pays special attention to the repercussions of policies that define citizenship in a way that has serious consequences for the health of groups of Palestinians who are Israeli citizens-particularly the Bedouins in the unrecognized villages-and to the ways in which this structure of citizenship affects the health of migrant workers. The health care situation is even more dire in the Occupied Territories, where the Occupation, especially in the last two decades, has negatively affected access to medical care and the health of Palestinians. Filc concludes his book with a discussion of how human rights, public health, and economic imperatives can be combined to produce a truly equal health care system that provides high-quality services to all Israelis.

Health and Zionism

The author investigates the political and social forces that influenced Israel's health care system and policy during the early years of state building. Among the struggles Shvarts explores in this penetrating study are the debate over immigration health policy and the Law of Return, enacted in 1950; the battles over universal health care between the Workers' Health Fund and the Israeli government led by prime minister Ben Gurion; the urgent organization of military medical services during wartime; and the contested establishment of renowned civilian medical facilities. These early conflicts have had far-reaching implications that continue to be felt throughout Israeli society. While many European countries successfully established unified, state-run health care systems, Israel's political rivalries and social turbulence gave rise to a m'elange of "sick funds," large and small, public and private, that influence and complicate the delivery of health care to this day. This book sheds light on the major conflicts, leaders, and historic events that shaped the current Israeli health care system, and has relevance to developing health care systems worldwide.

Complementary and Alternative Medicine in Nursing and Midwifery

This book explores the historical, social, political and cultural facets of integration between complementary and alternative medicine and nursing/midwifery. It examines the ever-expanding integration in relation to: the role and conceptualization of the patient the role and responsibilities of different professional healthcare providers (nurses, midwives, alternative therapists, etc) the future provision and approach of nursing and midwifery practice the challenges and opportunities currently facing healthcare systems as a result of integration. This innovative book provides the first critical overview of this important field of health research. It is important reading for medical sociologists, nurses and other health professionals - as well as students in these areas - with an interest in complementary and alternative medicine.

Health for Peace

The book re-examines the customary belief that financing of health care is positively related to health status of population. The belief has survived, despite being fallacious, because health is not generally viewed in its widest connotation; so that resources spent on health do not touch the larger meaning of health. Hence, a non-correlation between the two. The book presents factual and analytical support for this hypothesis of non-correlation. This is done in two stages. Firstly, in terms of the existing politico-economic critique; and secondly by suggesting a holistic view of health three existing paradigms of health—the mechanistic, liberalistic and the politico-economic—have been discussed. From here the book proceeds to build a holistic paradigm of health. The holistic meaning, besides physical fitness, includes a peaceful state of mind and social consciousness, without which society can neither build a genuine health care programme nor ensure positive relationship between health care financing and health status. Such a comprehensive perspective integrates mechanistic, objective as well as subjective determinants of health. In the history of health care, the concept of health has progressively widened, first from purely microscopic to socioscopic and thereafter to culturoscopic dimensions. Holism contains them all—the body, mind, society and the total human personality. The book suggests a holistic health care perspective for promoting health and peace. “This work should lead to wider vision of health, to what the author calls Holistic Health Paradigm....”

Socio-cultural Influences on Health and Health Care

Contraception is an issue of considerable concern to a great many heterosexually active people. Yet the impact of contraceptive technologies in the world today, in particular their implications for kinship, gender relations, and other aspects of social life, receives relatively little scholarly attention. This book brings a new perspective to the study of contraception, by collecting together in one volume leading experts in the fields of contraception, family planning and reproductive health. Contributors look at the social, economic, political and cultural contexts in which contraceptive providers and recipients make decisions about whether and what forms of contraception to use. User perspectives (whether those of recipients or providers of contraceptive services) are taken seriously, as are the perspectives of policy-makers and development experts. With its in-depth, case-study approach, this challenging book will appeal to practitioners and planners in the fields of family planning and reproductive health, as well as to students and academics of applied and medical anthropology, health studies, gender and development studies, or anyone interested in the social, cultural and ethical issues raised by contraceptive technologies.

Contraception across Cultures

This popular book draws on a rich array of ethnographic cases from around the world to demonstrate the complexities of ideas and practices that surround the health of the human body, and how health is impacted by the beliefs and practices of the community. In addition to comprehensive updating and revision throughout the text, this second edition contains expanded materials on the epidemiology of malaria and tuberculosis and further reflections on both doctor-patient communication in contemporary settings and issues on the role of ritual in healing processes. Also, discussions of ethnopsychiatry and "alternative" medicine are expanded. Throughout history and throughout the world today, problems of health, sickness, and medical treatment have been intimately interwoven with social, cultural, and political life generally. Medical anthropology deals with these problems, recognizing the deep connections between cultural patterns, historical change, and life processes. Case studies in this book are drawn from around the world, including: Australia and the Pacific, China, India, Israel, Japan, Korea, Mexico, and the Americas generally. The authors make particular use of materials from their research in Papua New Guinea. This book is intended as a textbook usable for both anthropology courses and courses for medical students. The topics covered include a survey of earlier works in medical anthropology, regimens of bodily treatment, sex and reproduction, medical pluralism, doctor-patient communication, epidemiology, ethnopsychiatry illness and the emotions, and how new diseases have altered the ways in which individuals see themselves and how "traditional" practices alter to accommodate new diseases. This book is part of the Ethnographic Studies in Medical Anthropology Series, edited by Pamela J. Stewart and Andrew Strathern, Department of Anthropology, University of Pittsburgh.

Curing and Healing

This book presents the economic, historical, legal and policy dimensions of the Nonprofit Sector in Israel with a focus on its contribution to the Welfare State and civil society. It then analyzes those findings in the context of major theoretical frameworks of the sector.

The Israeli Third Sector

Family, Law and Politics, Volume II of the Encyclopedia of Women & Islamic Cultures, brings together over 360 entries on women, family, law, politics, and Islamic cultures around the world.

Encyclopedia of Women and Islamic Cultures

This book discusses the predicament of the Israeli peace movement, which, paradoxically, following the launching of the Oslo peace process between Israel and the Palestinians in 1993, experienced a prolonged, fatal decline in membership, activity, political significance, and media visibility. After presenting the regional and national background to the launching of the peace process and a short history of Israeli peace activism, the book focuses on external and internal processes and interactions experienced by the peace movement, after some basic postulates of its agenda were actually, although never explicitly, embraced by the Rabin government. The book concludes that, despite its organizational decline and the zero credit given to it by the policy makers, in retrospect it appears that the movement contributed significantly to the integration of new ideas for possible solutions to the Middle East conflict in the Israeli mainstream political discourse.

The Israeli Peace Movement

The Routledge Handbook of International Critical Social Work is a companion volume to the Routledge Handbook of Critical Social Work. It brings together world-leading scholars in the field to provide additional, in-depth and provocative consideration of alternative and progressive ways of thinking about social work. Critical social work is increasingly involved in a global conversation, and as a subfield of social work it is rapidly becoming an interdisciplinary field in its own right and promoting novel forms of political activism. The Handbook showcases the global influences and path-breaking ideas of critical social work and examines the different stances taken on important political and ethical issues. It provides the first complete survey of the vibrant field of critical social work in a rich international context. This definitive volume is one of the most comprehensive source books on crucial social work that is available on the international stage and an essential guide for anyone interested in the politics of social work. The Handbook is divided into seven sections • Thinking the Political • Politics and the Ruins of Neoliberalism • Negotiating the State: Resistance, Protest and Dissent • Race, Bordering Practices and Migrants • Post Colonialism, Subaltern and the Global South • Critical Feminism, Sexuality and

Gender Politics • Posthumanism, Pandemics and Environment The Handbook is comprised of 46 newly written chapters (and one reprint) which concentrate on differences between European and American contributions in this field as well as explicitly identifying the significance of critical social work in the context of Latin America. It provides a further vital trajectory of intellectual practice theory via interdisciplinary discussion of areas such as biopolitics, critical race theory, boundaries of gender and sexuality, queer studies, new conceptions of community, issues of public engagement, racism and Roma people, ecological feminism, environmental humanities and critical animal studies. The Handbook is an innovative and authoritative guide to theory and method as they relate to policy issues and practice and focus on the primary debates of today in social work from a critical perspective, and will be required reading for all students, academics and practitioners of social work and related professions.

The Routledge Handbook of International Critical Social Work

A comprehensive survey of women's issues within art therapy. Leading international practitioners discuss topics such as assertiveness, empowerment, sexuality and childbirth, as well as issues around class, race and age.

Feminist Approaches to Art Therapy

Examines the growing popularity of alternative medicine as a personal health care option.

Research Grants Index

Monthly, with annual cumulations. Comprehensive, current index to periodical medical literature intended for use of practitioners, investigators, and other workers in community medicine who are concerned with the etiology, prevention, and control of disease. Citations are derived from MEDLARS tapes for Index medicus of corresponding date. Arrangement by 2 sections, i.e., Selected subject headings, and Diseases, organisms, vaccines. No author index.

Negotiating the Holistic Turn

This visionary work explores the sensitive balance between the personal and private aspects of grief, the social and cultural variables that unite communities in bereavement, and the universal experience of loss. Its global journey takes readers into the processes of coping, ritual, and belief across established and emerging nations, indigenous cultures, and countries undergoing major upheavals, richly detailed by native scholars and practitioners. In these pages, culture itself is recognized as formed through many lenses, from the ancestral to the experiential. The human capacity to mourn, endure, and make meaning is examined in papers such as: Death, grief, and culture in Kenya: experiential strengths-based research. Death and grief in Korea: the continuum of life and death. To live with death: loss in Romanian culture. The Brazilian ways of living, dying, and grieving. Death and bereavement in Israel: Jewish, Muslim, and Christian perspectives. Completing the circle of life: death and grief among Native Americans. It is always normal to remember: death, grief, and culture in Australia. The World of Bereavement will fascinate and inspire clinicians, providers, and researchers in the field of death studies as well as privately-held professional training programs and the bereavement community in general.

Qualitative pain research: Capturing and integrating cultural, social and linguistic data

Poverty. Lack of social support. Limited access to education. High risk for health problems. Indigenous communities face an inordinate number of hardships. But when children have special needs, these problems multiply exponentially, making existing difficulties considerably worse. School-Parent Collaborations in Indigenous Communities: Providing Services for Children with Disabilities begins with an in-depth overview of indigenous experience and psychology, and situates disabilities within the contexts of indigenous communities and education services. The pilot study at the core of the book, conducted among the Bedouins of southern Israel, shows this knowledge in action as special education personnel engage parents in interventions for their children. Going beyond facile concepts of cultural sensitivity, the model recasts professionals as cultural mediators between school and family. This practice-oriented information has the potential to improve not only the well-being of children and families, but of the greater community as well. Featured in the coverage: Unique characteristics of indigenous communities and children with disabilities. Psychological models of reactions to disability. Benefits of multidisciplinary

teams. Factors affecting collaboration between indigenous parents of children with disabilities and school professionals. Core principles of indigenously attuned collaboration. An extended case study on collaboration between parents of children with disabilities and school professionals in a Bedouin community. School-Parent Collaborations in Indigenous Communities is a breakthrough resource for researchers, graduate students, and professionals working with special needs children in child and school psychology, international and comparative education, social work, cross-cultural psychology, public health, and educational psychology.

Research Awards Index

A collection of studies in bioethics and society that goes beyond conventional medical ethics and suggests political, socio-legal, and empirical analysis.

Sociological Abstracts

The present work will discuss relevant theoretical frameworks and applications pertaining to enabling resilience within the risk, crisis and disaster management domain. The contributions to this book focus on resilience thinking along 4 broad themes: Urban Domain; Cyber Domain; Organizational/Social domain; and Socio-ecological domain. This book would serve as a valuable reference for courses on risk, crisis and disaster management, international development, social innovation and resilience. This will be of particular interest to those working in the risk, crisis and disaster management domain as it will provide valuable insights into enabling resilience. This book will be well positioned to inform disaster management professionals, policy makers and academics on strategies and perspectives regarding disaster resilience.

Current Bibliography of Epidemiology

The biopsychosocial study of Arab Americans yields compelling insights into innovative theoretical and applied initiatives. In the context of a growing population of Arab Americans, coupled with the current tenure of xenophobia and exposed structural racism in the US, clinical and community practitioners must be attuned to their clients of Arab ancestry, whose experiences, development, and health concerns are distinctly different than that of their White counterparts. This second edition, with its uniquely interwoven sections of culture, psychosocial development, and health and disease, provides a rich overview of timely, critical topics. The audience for the text includes counselors, social workers, psychologists, nurses, psychiatrists, sociologists, and any other public and mental health practitioners, researchers, and policy makers who work with and on behalf of clients and patients of Arab descent. The authors represent a team of leading experts spanning disciplines of sociology, clinical mental health, and community public health. "This edition draws on leading experts in Arab American health and sociology who document the complexity of this population's immigration and acculturation experience. It offers critical and current research that speaks to the centrality of context and diversity in treating Americans of Arab descent. Contributors explore the complex and limited racial framework within which Arabs in the U.S. form their identities, and the impact of structural racism on their lives and health. This collection offers practitioners much needed insights on a population often hidden or rendered invisible by data limitations, and yet misrepresented by cultural stereotypes." Helen Hatab Samhan, Former Executive Director, Arab American Institute/Foundation. "Nassar, Ajrouch, Hakim-Larson, and Dallo's breakthrough work in the area of culturally competent health care has been inspiring across interdisciplinary fields and to the communities they serve. Their work on Arab American health issues, in particular, has greatly improved clinical practice at the community and national levels. I heartily recommend taking the time to become familiar with their important body of work and this latest text." Ismael Ahmed, Former Michigan State Director of Health and Human Services.

The World of Bereavement

New genetic technologies cut across a range of public regulatory domains and private lifeworlds, often appearing to generate an institutional void in response to the complex challenges they pose. As a result, a number of new social formations are being developed to legitimate public engagement and avoid the perceived democratic deficit that may result. Papers in this volume discuss a variety of these manifestations in a global context, including: genetic data banks committees of inquiry non-governmental organisations (NGOs) national research laboratories. These institutions, across both health and agriculture, are explored in such diverse locations as Amazonia, China, Finland, Israel, the UK and the USA. This volume exhibits a clear thematic coherence around the impact of

the new genetics and their associated technologies on new social formations, and the case studies included have a significant international focus, showing a balance between theoretical and empirical approaches in this rapidly changing field. This innovative new volume will be of interest to postgraduates and professionals in the fields of sociology, social anthropology, science and technology studies, and environmental studies.

Cumulated Index Medicus

The way people think and act politically is not set in stone. People can and do change the fundamental cultural contours of their political situation. Their political culture does not only restrict imagination and action - it is also a resource for political creativity and invention. In *Reinventing Political Culture*, this resource is uncovered and explored. Analyzed as a tension between the power of culture and the culture of power, the concept of political culture is reinvented and applied to understanding the practice of people transforming their own political culture in very different circumstances. Three instances of such reinvention are closely examined: one historic, during the twilight of the Soviet empire; one actively in process and actively opposed, 'the Obama revolution'; and one an apparent distant dream, the power of culture and the culture of power that would avoid 'the clash of civilizations' in the Middle East. In accessible and engaging prose, Goldfarb clearly and forcefully presents students and scholars of sociology, comparative politics, and cultural studies with an original position on political culture, showing how the political cultures of our times pose not only grave dangers, but also opportunities for creative alternatives.

School-Parent Collaborations in Indigenous Communities

The focus on Latinos in the United States has generally overlooked key social-economic-political dimensions that are not only growing in importance, but may ultimately hold an important key to how well this group does in the immediate and distant future in the country. The approximate ten-year period since this text's initial publication has witnessed an increase in scholarship and new social-political-economic developments regarding this population group. *Social Work with Latinos, Second Edition* captures these advances and adds to the existing body of work in this area. In particular, this revised edition provides an up-to-date demographic profile; identifies the rewards and challenges for the development of social work interventions focused on Latinos; includes a conceptual foundation from which to develop social work strategies for outreach, engagement, service-provision, and evaluation; features a series of case illustrations to highlight how cultural competency/humility can unfold to better reach this population group; grounds the Latino experience within a social, economic, cultural, and political context; and provides recommendations for social work education, research and practice.

Bioethics and Biopolitics in Israel

A two volume encyclopedia set that examines the legacy, impact, and contributions of Muslim Americans to U.S. history.

Disaster Management: Enabling Resilience

Minorities face particular social strains, and these are often manifested in their overall mental health. In Israel, just under a quarter of the citizens are Arab Palestinians, yet very little has been published exploring the spectrum of mental health issues prevalent in this population. The work collected here draws on the first-hand experience of experts working with Israeli Palestinians to highlight the problems faced by service users, their families, and their communities. Palestinians in Israel face unique social, gender, and family-related conditions that also need reliable research and assessment. *Mental Health and Palestinian Citizens in Israel* offers research and observation on three central topics: socio-cultural determinants of mental health, mental health needs, and mental health service utilization. From suicidal behaviors and addiction to generational trauma and the particular concerns of children and the elderly, this broad and careful collection of research opens new dialogues on treatment, prevention, and methods for providing the best possible care to those in need.

Biopsychosocial Perspectives on Arab Americans

This agenda setting text explores a broad range of value perspectives and their impact on and contribution to social work thinking on ethics. Including new perspectives, such as Islam, and drawing

on international contributors, this is essential reading for all social work students studying ethics and values.

New Genetics, New Social Formations

The twenty-first century has witnessed disaffection and protest across Eurasia and West Asia, triggering debates questioning the state of governance as well as looking at a redefinition of the 'arc of crisis.' By and large, there have been two major viewpoints, one which emphasises the aspect of 'failed states' and the other that focuses on technology as the prime instigator and motivator for the protests. Even as the Arab Uprisings are commonly acknowledged as an upshot of a succession of protests as well as the "colour revolutions" across Eurasia and West Asia, the after effects have been incessant with the Maidan in Ukraine and intermittent protests in Turkey. The causative factors have been as diverse as climate change and its adverse impact, economic inequalities fed by a process of globalisation which caters to certain sections of society, social grievances of marginalised sections who feel politically, socially or culturally deprived and a general failure to address critical issues in an apt way. While the nature of the protests has been as varied as the reaction of authorities to the protest, there has been a tendency to review the replication of the protests across states in the region. The world today is increasingly observing and partaking in local and global acts of protest and solidarity that entail visual, aural, and behavioural articulations by demonstrators as effective ways of making claims, reclaiming spaces, and condemning invasive situations. The volume analyses relations between the state and such protests by exploring the construction of protest movements, and probing the background, nature and specificity of dissent. Protest movements and counter-movements have been examined and analysed. The purpose is to understand and interpret the moments and episodes associated with movements, capturing, disseminating and transmuting the images and symbols of protest. Chapters in the volume enquire about and debate on whether contemporary protesters are consolidating upon and intensifying prior repertoires of dissent.

Reinventing Political Culture

This book explores the politics, institutional dynamics, and outcomes of neoliberal restructuring in Israel. It puts forward a bold proposition: that the very creation of a neoliberal political economy may be largely a state project. Correspondingly, it argues that key political conflicts surrounding the realization of this project may occur within the state. Neoliberal restructuring and the institutionalization of permanent austerity are dependent on reconfigured power relations between state actors and are manifested in a new institutional architecture of the state. This architecture, in turn, is the context in which efforts to change social and employment policies play themselves out. The volume frames the coming of neoliberalism in Israel as a set of concrete and far-reaching changes in the power and modes of operation of the key players in the political economy. These changes undermined and neutralized veto players and enabled the ascendance of two state agencies - the Ministry of Finance and the Central Bank - which gained greatly augmented authority and autonomy. These reconfigurations were set in motion by state initiatives that combined punctuated and incremental change. The volume comprises case studies of changes in specific social and labor market policies, revealing a close elective affinity between programmatic neoliberal changes on the one hand, and on the other the proactive drive of the Ministry of Finance to enhance its control over public spending and policy design. The book explores successful neoliberal reforms but also reforms that were blocked, undermined, or overturned by opposition, emphasizing the importance of reformers' capacity to translate temporary achievements into entrenched strategic advantages.

Social Work with Latinos

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery

system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

Encyclopedia of Muslim-American History

The Israeli Memory Struggle analyzes changes in Israeli perspectives of its history and identity through the 1990s. This particular decade of Israeli history was characterized by significant cultural clashes and vigorous debates over Jewish-Israeli history, identity, literature, and, not the least, the peace process between Israel and the Palestinians. The book provides thought provoking perspectives on issues related to the so-called post-Zionism debates and the globalization of Israeli society through the 1990s. It critically investigates the new Israeli historians, prominent authors of the 1990s, diasporic philosophy, and Israel's 50th anniversary in 1998 in the shape of the TV documentary, Tekumah. Finally, the book discusses new tendencies in Israeli culture that are suggestive to Jewish-Israeli identity in the age of globalization.

Alternative Press Index

The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals (Einstein), institutions and disciplines (Mathematics), general themes (Romantic Science) and central concepts (Paradigm and Fact). The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn.

Mental Health and Palestinian Citizens in Israel

The nonviolent ways orthodox religious groups achieve social power and influence: a "brilliant" study of four movements in the US and abroad (Wendell Bell, Yale University). Gold Medal Winner, Independent Publisher Book Awards Claiming Society for God focuses on common strategies used by religiously orthodox (what some would call "fundamentalist") movements around the world. Rather than using armed struggle or terrorism, as much of post-9/11 thinking suggests, these movements use a patient, under-the-radar strategy of taking over civil society. Claiming Society for God tells the stories of the Muslim Brotherhood in Egypt, the Sephardi Torah Guardians or Shas in Israel, Comunione e Liberazione in Italy, and the Salvation Army in the United States, showing how these movements, grounded in a communitarian theology, are building massive grassroots networks of religiously based social service agencies, hospitals and clinics, rotating credit societies, schools, charitable organizations, worship centers, and businesses. These networks are already being called states within states, surrogate states, or parallel societies, and in Egypt brought the Muslim Brotherhood to control of parliament and the presidency. This bottom-up, entrepreneurial strategy is aimed at making religion the cornerstone of society. "Sociology at its very best...professionally researched and analyzed, both pragmatic and theoretical, overwhelmingly convincing, and an important corrective to a lot of current beliefs...a great read—fascinating from beginning to end."—Wendell Bell, Yale University, author of Foundations of Futures Studies
