Reflexions Upon Ridicule, Or, What It Is That Makes a Man Ridiculous, and the Means to Avoid It

Arguing for the importance of wit beyond its use as a literary device, Roger D. Lund outlines the process by which writers in Restoration and eighteenth-century England struggled to define an appropriate role for wit in the public sphere. He traces its unpredictable effects in works of philosophy, religious pamphlets, and legal writing and examines what happens when literary wit is deliberately used to undermine the judgment of individuals and to destabilize established institutions of church and state. Beginning with a discussion of wit's association with deception, Lund suggests that suspicion of wit and the imagination emerges in attacks on the Restoration stage, in the persecution of The Craftsman, and in criticism directed at Thomas Hobbes's *Leviathan* and works by writers like the Earl of Shaftesbury, Thomas Woolston, and Thomas Paine. Anxieties about wit, Lund shows, were in part responsible for attempts to suppress new communal venues such as coffee houses and clubs and for the Church's condemnation of the seditious pamphlets made possible by the lapse of the Licensing Act in 1695. Finally, the establishment's conviction that wit, ridicule, satire, and innuendo are subversive rhetorical forms is glaringly at play in attempts to use libel trials to translate the fear of wit as a metaphorical transgression of public decorum into an actual violation of the civil code.

Reflexions Upon Ridicule; Or, What It Is That Makes a Man Ridiculous; And the Means to Avoid It. Wherein Are Represented the Different Manners and Characters of Persons of the Present Age;

The collapse of the supposedly 'civilized' German nation into the 'barbarism' of Hitler's Third Reich has cast a long shadow over interpretations of German culture and society. In the remarkable work of Norbert Elias, himself a refugee from Nazi Germany, a deep concern with the distinctiveness of 'the Germans' is linked with an ambitious attempt to work out more general relations between broad historical processes – patterns of state formation, changing social structures – and the character of the individual self, as evidenced in changing thresholds of shame and embarrassment. In critical engagement with Elias's notion of the 'civilizing process', the essays collected here explore moments of excess and transgression, moments when the very boundaries of 'civilization' are both constructed and challenged. Inter-disciplinary contributions – on topics ranging from medieval laughter, cursing and swearing, through to music, the bourgeois self, and aspects of modern violence – highlight the complexity of inter-relations between the individual imagination and creativity, on the one hand, and the brute facts of political power and social structural inequalities, on the other; and develop new insights into the changing patterns of culture and society in Germany from the Middle Ages to the present.

Reflexions Upon Ridicule; Or, What It Is That Makes a Man Ridiculous; And the Means to Avoid It. Wherein Are Represented the Different Manners and Characters of Persons of the Present Age. ... the Fifth Edition. of 2;

Arguments about the place and practice of the duel in early modern England were widespread. The distinguished intellectual historian Markku Peltonen examines this debate, and show how the moral and ideological status of duelling was discussed within a much larger cultural context of courtesy, civility and politeness. The advocates of the duel, following Italian and French examples, contended that it maintained and enhanced politeness; its critics by contrast increasingly severed duelling from civility, and this separation became part of a vigorous attempt in the late seventeenth century and beyond to redefine civility, politeness and indeed the nature and evolution of Englishness. To understand the duel is to understand much more fully some crucial issues in the cultural and ideological history of Stuart England, and Markku Peltonen's study will thus engage the attention of a very wide audience of historians and cultural and literary scholars.
