Thomas Currie : The descent of rules: Investigating the cultural evolution & ecology of institutions by

DySoC 258 views 2 years ago 1 hour, 18 minutes - The Center for the Dynamics of Social Complexity is happy to announce a series of free webinars for Spring 2021 on Human ...

Intro

Plan . Institutions and their role in organizing human societies

What do we mean by institutions?

Humans are an extremely cooperative species

Human cooperation: variable, and difficult to achieve

Good and Bad institutions

Different features of socio-political organization tend to be found together in historical and archaeological societies

Socio-political complexity: 'a composite measure of the various roles, institutions, and technologies that enable the coordination of large numbers of people to act in a politically unified manner

Types of evolutionary trends

Has warfare driven the evolution of large-scale, complex organization?

Warfare and the Steppe frontier

Historical Data

We need to test multiple hypotheses Theoretical framework(s)

Main historical pathways in the cultural evolution of institutions supporting economic performance

Modern democratic institutions spread faster to countries more closely related to the USA

How institutions work

Applying an evolutionary approach to address real-world challenges

He is also an associate ...

Game theory spent much of its early days analyzing zero sum games and trying to figure out what's the best strategy.

In such a situation often times the best strategy is very counterintuitive, because it involves flipping a coin or rolling a dice or doing something random.

The nice thing about these random strategies is that they ensure that your opponent can never outthink you.

Explores Linkages Between Communication, Development Planning In India, Literacy, Education, Poverty Alleviation, Health, Population, Human Rights And Development, Environmental Protection, Civil Society And Good Governance. Also Covers World Summit On Sustainable Development. 10 Chapters And 2 Annexures-Glossary And Bibliography.

Communicating in the Information Society

This publication contains a collection of essays which discuss social perspectives on developments in information technology, and has been produced by the United Nations Research Institute for Social Development to mark the first UN World Summit on the Information Society (WSIS). Topics discussed include: gender issues in the information society; community informatics; media developments and democratisation.

Civil Society And The State In Singapore

Set within the context of growing political pluralism and the increasing use of new communication technologies for social mobilisation, the Institute of Policy Studies organised a national conference on civil society in November 2013. This collection of the essays that were presented at or inspired by the conference provides nuanced analyses of the development of the sector in Singapore since the Institute's first such conference held in 1998. The first section of the book discusses the different philosophies and approaches that underpin how civic activists engage with the State; the second section examines some key forces of change that are re-shaping the sector; and, the third section sets out some emerging issues facing it. Combining insights from experts and civic activists themselves, this book proposes an agenda for the future development of the civil society in Singapore.

CIVIL SOCIETY AND THE STATE IN SINGAPORE.

The rise of neo-liberalism and the so-called Washington Consensus have generated a powerful international ideology concerning what constitutes good governance, democratization, and the proper roles of the State and civil society in advancing development. As public spending has declined, the nongovernment sector has benefited very significantly from taking on a service-delivery role. At the same time, NGOs, as representatives of civil society, are a convenient channel through which official agencies can promote political pluralism. But can NGOs simultaneously facilitate governments' withdrawal from providing basic services for all and also claim to represent and speak for the poor and the disenfranchised? The chapters describe some of the tensions inherent in the roles being played by NGOs, and asks whether these organizations truly stand for anything fundamentally different from the agencies on whose largesse they increasingly depend.

Development, NGOS, and Civil Society

How do the communication practices of governments, NGOs and social movements enhance opportunities for citizen-led change? In this incisive book, Thomas Tufte makes a call for a fundamental rethinking of what it takes to enable citizens' voices, participation and power in processes of social change. Drawing on examples ranging from the Indignados movement in Spain to media activists in Brazil, from rural community workers in Malawi to UNICEF's global outreach programmes, he presents cutting-edge debates about the role of media and communication in enhancing social change. He offers both new and contested ideas of approaching social change from below, and highlights the need for institutions – governments and civil society organizations alike – to be in sync with their constituencies. Communication and Social Change provides essential insights to students and scholars of media and communications, as well as anyone concerned with the practices and processes that lead to citizenship, democracy and social justice.

Communication and Social Change

Most major development NGOs dedicate significant resources to advocacy. Many also work to inform and shape public opinion, whether through advertising or fundraising, or through education programmes. They argue that fundamental change is not achieved until the policy environment is right, and cannot be sustained without a ground-swell of support for reform. In recent years, however, advocacy work has come under increasing criticism. NGOs are challenged on the grounds of: * legitimacy - whom do they represent, and to whom are they accountable? * effectiveness - what practical impact does high-level advocacy have on the lives of people living in poverty, and who is to judge this? * role -

should NGOs try to combine funding and advocacy, or do these demand different kinds of South-North relationship? * strategy - are NGOs too easily seduced by agencies like the World Bank or by the corporate sector? When does constructive engagement with these powerful bodies turn into co-option by them? As international grassroots advocacy is becoming more vocal, thanks to new communication technologies, what is the appropriate role for Northern NGOs?

Development and Advocacy

Activists and academics look back over ten years of 'politics from below', and ask whether it is merely the critical gaze upon the concept that has changed – or whether there is something genuinely new about the way in which civil society is now operating.

Global Civil Society 2012

Setting out to explore critically the way civil society has entered development thinking, policy and practice as a paradigmatic concept of the 21st century, Howell (development studies, U. of Sussex) and Pearce (Latin American politics, U. of Bradford) trace the historical path leading to the encounter between the ideas of development and civil society in the late 1980s and how donors have translated these into development policy and programs. They find that there are competing normative visions, which have deep roots in Western European political thought, about the role of civil society in relation to the state and market both among donors and within the societies where donors are operating. This leads to donors playing a major role in shaping the character of service provision. They also argue that their study exposes the hitherto unexplored power of the market, as opposed to solely the state, to distort donor programs. c. Book News Inc.

Civil Society & Development

This book investigates how nongovernmental organizations can become stronger advocates for citizens and better representatives of their interests. Sabine Lang analyzes the choices that NGOs face in their work for policy change between working in institutional settings and practicing public advocacy that incorporates constituents' voices.

NGOs, Civil Society, and the Public Sphere

This book is a collection of 12 essays on three interrelated themes of Nation, Civil Society and Social Movements organized in three parts each having four chapters.

Nation, Civil Society and Social Movements

In recent years civil society has been seen as a key route for democracy promotion and solving development 'problems' in low-income countries. However, the very concept of civil society is deeply rooted in European traditions and values. In pursuing civil society reform in non-Western countries, many scholars along with well-meaning international agencies and donor organisations fail to account for non-Western values and historical experiences. Civil Society in the Global South seeks to redress this balance by offering diverse accounts of civil society from the global South, authored by scholars and researchers who are reflecting on their observations of civil society in their own countries. The countries studied in the volume range from across Africa, Latin America, Asia and the Middle East to give a rich account of how countries from the global south conceptualise and construct civil society. The book demonstrates how local conditions are often unsuited to the ideal type of civil society as delineated in Western values, for instance in cases where numerous political, racial and ethnic sub-groups are 'fighting' for autonomy. By disentangling local contexts of countries from across the global South, this book demonstrates that it is important to view civil society through the lens of local conditions, rather than viewing it as something that needs to be 'discovered' or 'manufactured' in non-Western societies. Civil Society in the Global South will be particularly useful to high-level students and scholars within development studies, sociology, anthropology, social policy, politics, international relations and human geography.

Persuasive Presentations

With contributions from experts on democracy promotion, this volume examines civil society development and external civil society promotion in post-socialist Europe. It focuses on countries with a

failed or deficient process of democratic consolidation looking at unintended consequences of external democracy promotion on civil society development.

Media Literacy Project for Pre-University Students

Can non-governmental organisations contribute to more socially just, alternative forms of development? Or are they destined to work at the margins of dominant development models determined by others? Addressing this question, this book brings together leading international voices from academia, NGOs and the social movements. It provides a comprehensive update to the NGO literature and a range of critical new directions to thinking and acting around the challenge of development alternatives. The book's originality comes from the wide-range of new case-study material it presents, the conceptual approaches it offers for thinking about development alternatives, and the practical suggestions for NGOs. At the heart of this book is the argument that NGOs can and must re-engage with the project of seeking alternative development futures for the world's poorest and more marginal. This will require clearer analysis of the contemporary problems of uneven development, and a clear understanding of the types of alliances NGOs need to construct with other actors in civil society if they are to mount a credible challenge to disempowering processes of economic, social and political development.

Educational Television in India

This valuable resource offers a wealth of practical and conceptual guidance to all those engaged in struggles for social justice around the world. It explains in accessible language and painstaking detail how to deploy and to understand the tools of media and communication in advancing the goals of social, cultural, and political change. A stand-out reference on a vital topic of primary international concern, with a rising profile in communications and media research programs Multinational editorial team and global contributors Covers the history of the field as well as integrating and reconceptualising its diverse perspectives and approaches Provides a fully formed framework of understanding and identifies likely future developments Features a wealth of insights into the critical role of digital media in development communication and social change

Civil Society in the Global South

On the premise that to be able to define and confer meaning is a critical step toward democratic empowerment, Sosale accounts for the struggle to establish selected meanings and ideologies surrounding communication and development during this particular time period in recent history. Concluding with a look at the postdevelopment era and new media, she reviews some new paths to development and their implications for the future of communication and social change in developing societies."--BOOK JACKET.

Foreign Television and Indian Youth

With original contributions from an international team of well-known experts, media activists, and promising young scholars, this comprehensive volume examines community media from theoretical, empirical, historical, and practitioner perspectives. Organized thematically, this collection explores the intersection between community media and issues of democratic theory and the public sphere, cultural politics and social movement theory, neoliberal communication policy and media reform efforts, as well as media activism and international solidarity building. Foregrounding the relationship between symbolic and material relations of power in an increasingly interdependent world, this collection examines the role of alternative, independent, and community-based media in the global struggle for communicative democracy. Understanding Community Media explores a wide range of media forms and practice. Each essay considers the particular and distinctive ways local populations make use of various technologies for purposes of community communication. Taken together, this distinctive collection provides an incisive and timely analysis of the relationship between media and society, technology and culture, and communication and community. * Features more than 35 original, cutting-edge essays * Provides a comprehensive overview of community media around the world including essays on women's video collectives in India, indigenous radio in Colombia, street newspapers in Canada, and independent media in Nigeria. * Makes a timely and important contribution to a burgeoning sub-field of media and cultural studies.

Civil Society and Democracy Promotion

Concepts of social capital play a well-established role in a number of academic disciplines and continue to grow in popularity in the discourses of the sciences, as well as those of civil society and social practice. As an element that is fundamental and constitutive of various forms of societal coexistence and wellbeing, social capital apparently generates positive effects. However, it also contributes to inequalities and unequal distribution of power, and is, consequently, a rather controversial subject. This collection of essays represents reflections and case studies from all over the world. They step out of well-known paths of discourse and discuss the phenomenon of social capital in manifold ways and from new perspectives. In addition to rethinking social capital theoretically and methodologically, the authors focus especially on issues and challenges of its practical application. The contributions come from researchers and practitioners of different backgrounds including sciences such as sociology, philosophy, social geography, economics, health studies, history, interpersonal communication studies and cultural studies, as well as social practice in development aid. The volume will appeal to a broad audience from diverse disciplines, both academic and practical.

Can NGOs Make a Difference?

This volume brings together a range of different specialists in the arts and cultural industries, as well as international academics and public intellectuals, to explore how media and communication practices for social change are currently being reconfigured in both conceptual and rhetorical terms.

The Handbook of Development Communication and Social Change

This publication contains essays by representatives of civil society organizations. The Office for Disarmament Affairs is publishing this publication within the context of General Assembly resolution 65/81 on the United Nations Disarmament Information Programme and Resolution 65/77 on the United Nations study on disarmament and non-proliferation education. This material is being made available in order to further an informed debate on topical issues of arms limitation, disarmament and security.

Communication, Development and Democracy

This provocative book takes a new approach toward understanding the uneven flows of global communications, focusing on areas of the state, the market, and society. Wielding a political-economic view of communication and culture, this international group of authors follows interesting developments, from communication NGOs in Africa to affirmative action in India's information technology job market. Other cases spotlight China, Singapore, Venezuela, Palestine, Arab nations, Ghana, Canada, the United States, Russia, and the European Union. Theoretically driven and empirically grounded, *Global Communications* avoids alarmist or celebratory approaches.

Development, Ngos And Civil Society

This title was first published in 2002. In this age of globalization, nongovernmental organizations (NGOs) and other civil society movements and coalitions have become vastly more diverse and influential. This informed text explores the crucial role that efficient, skilful use of information and communications technology and news media has played in increasing the influence and enhancing the work of civil society organizations. Rich in case study material, it examines NGOs and other civil society organizations in the policy fields of development, security, international law, human rights and humanitarian action. In addition, the book examines the relationship between civil society and intergovernmental institutions such as the United Nations, the World Trade Organization and the G7/G8. Scholars, analysts and practitioners in fields ranging from politics and economics through international law and information studies will find this book indispensable.

Understanding Community Media

This book examines the central role media and communication play in the activities of Non-Governmental Organizations (NGOs) around the globe, how NGOs communicate with key publics, engage stakeholders, target political actors, enable input from civil society, and create participatory opportunities. An international line-up of authors first discuss communication practices, strategies, and media uses by NGOs, providing insights into the specifics of NGO programs for social change goals and reveal particular sets of tactics NGOs commonly employ. The book then presents a set of case studies of NGO organizing from all over the world—ranging from Sudan via Brazil to China – to illustrate the particular contexts that make NGO advocacy necessary, while also highlighting successful initiatives

to illuminate the important spaces NGOs occupy in civil society. This comprehensive and wide-ranging exploration of global NGO communication will be of great interest to scholars across communication studies, media studies, public relations, organizational studies, political science, and development studies, while offering accessible pieces for practitioners and organizers.

Rethinking Social Capital

This volume is a collection of original essays prepared by colleagues, collaborators, and former students on the occasion of Helmut K. Anheier's 65th birthday and retirement from the University of Heidelberg. An internationally recognized pioneer of nonprofit and civil society studies, Anheier focused his work on providing clarity around (1) civil society, local and global, observing its origins and trajectory and developing theories to explain it; (2) the nonprofit sector and institutions within and extending from it, including nonprofit organizations, philanthropy and social investment; and (3) culture as it relates to democracy and back to civil society. The essays in this volume refer to these concepts and position them in the context of developments over the last two to three decades. The volume is arranged in three sections. The first section comprises essays that elucidate concepts and probe theories in the field. The second section presents chapters discussing current global challenges and trends in the focal areas. The third and final section then comprises country and regional case studies illustrating important aspects of the global challenges or theoretical issues of the two preceding sections. A fascinating and up-to-date overview of key issues and trends in civil society and nonprofit research by an international collection of eminent scholars in these fields, this book will be attractive to civil society and nonprofit sector researchers as well as a broader academic community of political scientists, sociologists, economists, and cultural experts.

Reclaiming the Public Sphere

The third sector, or the voluntary, civic sector of society, is taking on increasing prominence in the face of retrenchment, austerity, and decreasing confidence in government. This book is the first to offer an up-close look at the relationship between active citizenship and civil society and how that relates to third-sector activities. Drawing on a wide range of theory and case studies, the book explores questions of social connectedness, changing forms of political engagement, and the increasing complexity of the social and environmental problems that the third sector confronts. It will be invaluable for theorists, scholars, and organizers.

Civil Society and Disarmament 2012

The world of international non-governmental organisations (INGOs) has dramatically changed during the last two decades. The author critically analyses the engagement of INGOs within the contemporary international development landscape, enabling readers to further understand INGOs involvement in the politics of social change.

Global Communications

What roles can and should governments play in communication policymaking? How are communication policies related to welfare politics? With the rapid globalization of commerce and culture and the increasing recognition of information as an economic resource, the grounds for defending the welfare state have shifted. Communication policy is now more widely understood as social policy. Communication, Citizenship, and Social Policy examines issues of communication technology, neoliberal economic policies, public service media, media access, social movements and political communication, the geography of communication, and global media development and policy, among others, and shows how progressive policymakers must use these bases to confront more directly the debates on contemporary welfare theory and politics.

Civil Society in the Information Age

The Handbook of Global Media and Communication Policy offers insights into the boundaries of this field of study, assesses why it is important, who is affected, and with what political, economic, social and cultural consequences. Provides the most up to date and comprehensive collection of essays from top scholars in the field Includes contributions from western and eastern Europe, North and Central America, Africa and Asia Offers new conceptual frameworks and new methodologies for mapping the contours of emergent global media and communication policy Draws on theory and empirical research

to offer multiple perspectives on the local, national, regional and global forums in which policy debate occurs

Global Perspectives on NGO Communication for Social Change

Communication for Development is about dialogue, participation and the sharing of knowledge and information among people and institutions. The 9th UN Roundtable (Rome, September 2004), focused on "Communication and sustainable development" and addressed three key inter-related themes that are central to this issue: Communication in Research, Extension and Education; Communication for Natural Resource Management; and Communication for isolated and Marginalized Groups. The selection of key note papers presented in this publication offers views and perspectives that contribute to these themes.

Social Action

This book provides an insight into the historical changes and present-day circumstances that have influenced, and continue to influence, the development and future of civil society. Civil society organisations (CSOs) play a crucial role in international development, however their impact on policy and practice is limited by a range of shifts across their political, social and financial landscapes. *Barriers to Effective Civil Society Organisations* is divided into three parts addressing each of these shifts in turn, and places particular emphasis on civil society actors linked not only by political constraints, but also by ethnic and cultural diversities that are crucial markers of political and social identity. This book draws on case studies from across Latin America, Africa, MENA and Ireland to highlight how CSOs in these countries are shaped by, and react to, shifting challenges. Reflecting on solutions for the sector, the authors provide an understanding of the various 'self-accommodation' policies and techniques employed by CSOs in order to continue their services and increase their credibility across global contexts. Aimed at researchers, policy makers and CSO/NGO workers looking to better understand the current state and future of the sector from the perspective of emerging scholars working in these regions, and in the Global South in particular, this innovative book is a celebration of the important work of CSOs and a reaffirmation of their right to sit at the policy table.

Civil Society: Concepts, Challenges, Contexts

Contemporary theorising about globalisation processes has only recently come to acknowledge the crucial role of media systems, a theme long familiar to researchers within communications. Thus this volume situates media forms and processes as central foci of globalisation processes and gives communications researchers a chance to respond to the theories often devised by those without any intimate involvement in communications theory or practice. The responses are loud and varied. The first half of the book clusters theoretical critiques and embellishments of globalisation theory as well as offers some alternative theoretical models for examining current communications and cultural practices in the unfolding new world system. Considerable attention is paid to unpacking notions of a "transnational public sphere"

Challenging The Third Sector

Northern governments and NGOs are increasingly convinced that civil society will enable people in developing countries to escape the poverty trap. A growing amount of resources are following. Yet how is this kind of assistance different from other modes of intervention? This volume presents in-depth case studies of projects in Peru, Kenya, Hungary and Sri Lanka and it gives detailed policy recommendations intended to improve the effectiveness and appropriateness of future projects.

International NGO Engagement, Advocacy, Activism

'Informative and useful.' Development and Change Until recently, most civil society organizations (CSOs) operated at national or local levels. However, new global organizations and networks are increasingly emerging. This book examines what CSOs can achieve, and the barriers they face, when they break national boundaries and sectoral moulds and work with others in global networks. A series of case studies of CSO initiatives reveal how transnational action can yield impressive results in changing policies and public attitudes. The diverse range of CSOs studied includes consumer groups, trade unions, the anti-globalization protest movement, the World Social Forum, Jubilee 2000 and others. All reveal a remarkably similar array of practical challenges, from structure and leadership issues to

governance dilemmas. The book offers practical guidance to those engaged with CSOs and contributes to academic enquiry about civil society.

Communication, Citizenship, and Social Policy

This volume is unique because of its focus on small states. There are many studies on civil society and social movements, but none that specifically deal with this category of countries. As is well known, small states have particular characteristics, including a limited ability to reap the benefits of economies of scale, a high degree of exposure to forces outside their control, and the proximity of politicians to the voters, often leading to clientelistic relationships and patronage networks. The small island developing states have the additional problem of high environmental vulnerability, with some also dealing with disproportionate ecological footprints. These factors have a bearing on the organization and performance of civil society organizations and social movements, as explained in several chapters of this book. The volume is organized in three parts, dealing with aspects of civil society and social movements in small states in the political, social and environmental spheres, respectively. Various definitions of civil society are proposed in the chapters, but most authors associate the term with organized groups, operating in the interest of citizens, independently of government and commercial business, including various forms of non-governmental organizations (NGOs). Civil society also encompasses social movements, which are considered to be loosely organized collective campaigns in pursuit of social goals. These two terms are sometimes used interchangeably; however, some authors argue that social movements tend to engage in 'contentious politics' including protests, while NGOs engage through more organized and institutional routes.
