A Complete Guide to Foreign Investment in China

Taiwanese Grammar: A Concise Reference is an unprecedented guide delivering clear, straightforward explanations of Taiwanese grammar while offering insightful comparisons to Mandarin. Designed to be both functional and accessible, the text makes searching for topics quick and easy with fully cross-referenced entries and a comprehensive index. Topics covered range broadly from parts of speech (nouns, verbs, adverbs, etc.) to grammatical topics (aspect, negation, passive voice, etc.) to special topics (terms of address, pronunciation, time, etc.). This text is ideal for self-study and enables students at all levels to learn Taiwanese by building a solid foundation in grammar. Taiwanese (also known as Hokkien, Fookien, Amoy, Southern Min, or Fukienese) along with its variants is spoken by over 40 million people worldwide and is a member of the Chinese language family. Features of this text include:

- Easy-to-use reference guide with cross-referenced entries and a comprehensive index
- 1000+ example sentences using everyday vocabulary rendered in Taiwanese, Mandarin Chinese, and English
- Character script for Taiwanese in accordance with the official selection of Taiwanese Characters by the Taiwanese Ministry of Education (2007)
- Romanization provided for both Taiwanese (Pe h-Me-j+) and Mandarin Chinese (HànyŌ P+ny+n)
- In-depth guide to pronunciation using English approximations and full explanations on rules for changing tones (tone sandhi)

Bury what We Cannot Take

Guide on investment in China: general economic data, business forms for foreign investment and information on taxation of foreign investors. Texts of those tax laws, including customs duties, foreign exchange control, are appended.

Guide to Economic & Technical Cooperation and Investment in China

Taiwan's working class has been shaped by Chinese tradition, by colonialism, and by rapid industrialization. This book defines that class, explores that history, and presents with sensitive honesty the life experiences of some of its women and men. Hill Gates first provides a solid and informative introduction to Taiwan's history, showing how mainland China, Japan, the convulsions of twentieth-century wars, and the East Asian economic expansion interacted in forming Taiwanese urban life. She introduces nine individuals from Taiwan's three major ethnic groups to tell the stories of their lives in their own words. The narrators include a fortuneteller, a woman laborer, and a retired air force mechanic. A former spirit medium and a janitor are among the others who speak.

State Formation in China and Taiwan

From its rise in the 1830s to its pinnacle in the 1930s, the opium trade was a guiding force in the Chinese political economy. Opium money was inextricably bound up in local, national, and imperial finances, and the people who piloted the trade were integral to the fabric of Chinese society. In this book, Peter Thilly narrates the dangerous lives and shrewd business operations of opium traffickers in southeast China, situating them within a global history of capitalism. By tracing the evolution of the opium trade from clandestine offshore agreements in the 1830s, to multi-million dollar prohibition bureau contracts in the 1930s, Thilly demonstrates how the modernizing Chinese state was infiltrated, manipulated, and profoundly transformed by opium profiteers. Opium merchants carried the drug by sea, over mountains, and up rivers, with leading traders establishing monopolies over trade routes and territories and assembling "opium armies" to protect their businesses. Over time, and as their ranks grew, these organizations became more bureaucratized and militarized, mimicking—and then eventually influencing, infiltrating, or supplanting—the state. Through the chaos of revolution, warlordism, and foreign invasion, opium traders diligently expanded their power through corruption, bribery, and direct

collaboration with the state. Drug traders mattered—not only in the seedy ways in which they have been caricatured but also crucially as shadowy architects of statecraft and China's evolution on the world stage.

The 21st Century Maritime Silk Road is a key component of China's Belt and Road Initiative and, as such, can play a crucial role in the development of maritime infrastructure throughout Asia and the Pacific in the coming years. This report, developed with the kind support of Sunny International, looks into the overall impacts of the Maritime Silk Road on tourism and assesses the tourism potential of Maritime Silk Road thematic routes across Asia and beyond. The report shows that cruise tourism, targeted investments in decayed maritime infrastructure and the reutilization of ancient port cities can reinvigorate available heritage, support local communities and help diversify a country's tourism sector.

Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.

The China Investment Guide 1986

The first full history of a great commercial and political center that rose in Asia over almost five centuries.

Chinese Working-Class Lives

This book considers urban development in China, highlighting links between China's history and civilization and the rapid evolution of its urban forms. It explores the early days of urban dwelling in China, progressing to an analysis of residential environments in the industrial age. It also examines China's modern and postmodern architecture, considered as derivative or lacking spiritual meaning or personality, and showcases how China's traditional culture underpins the emergence of China's modern cities. Focusing on the notion of "courtyard spirit" in China, it offers a study of the urban public squares central to Chinese society, and examines the disruption of the traditional Square model and the rise and growth of new architectural models.

The Opium Business

This new edition of Bradt's Taiwan continues to offer some of the most comprehensive coverage available and has been fully updated to reflect all the most recent developments on the ground. Author and long-term resident of Taiwan Steven Crook has been to every corner of the main island and every one of the outlying archipelagos. He has written about Taiwan's cultural and scenic attractions for international newspapers and inflight magazines and he has a keen understanding of what international visitors are likely to enjoy and what they need help with to appreciate. This new edition includes an even greater emphasis on the Taiwanese favourite pastime of local food, as well as increased coverage of increasingly popular east Taiwan and expanded information about the National Palace Museum Southern Branch. Place names and other useful words and phrases (for ordering food and arranging

transport) are presented in Chinese script for convenient communication. Detailed coverage of the capital city Taipei is complemented by a chapter-by-chapter breakdown of the rest of the country, from Hakka Country to Kaohsiung and Pingtung and the minor islands. More than 58% of Taiwan is covered by forest, making the country as interesting for its wildlife and outdoor activities as for its cities and towns. Taroko Gorge, Mount Jade, national parks, beaches and birdwatching, temples and monasteries, peaks and mountains are all covered, along with beguiling islands such as coral Little Liuqiu, saltwater hot springs, the East Rift Valley and popular Lukang. Taiwan is often described as 'more Chinese than China', but in reality it's a complex blend of 18th-century China, ancient Austronesia and 20th-century Japan, with dabs of post-war Americana and an abiding passion for anything that tastes good, wherever it comes from. Bradt's Taiwan is the perfect companion for discovering all of this, written by an expert who knows the country inside out and is well versed in delivering exactly what you need for a successful trip.

Brand New Justice

This important overview explores the connections between Singapore's past with historical developments worldwide until present day. The contributors analyse Singapore as a city-state seeking to provide an interdisciplinary perspective to the study of the global dimensions contributing to Singapore's growth. The book's global perspective demonstrates that many of the discussions of Singapore as a city-state have relevance and implications beyond Singapore to include Southeast Asia and the world. This vital volume should not be missed by economists, as well as those interested in imperial history.

A History of Ayutthaya

Astride the historical maritime silk routes linking India to China, premodern East and Southeast Asia can be viewed as a global region in the making over a long period. Intense Asian commerce in spices, silks, and ceramics placed the region in the forefront of global economic history prior to the age of imperialism. Alongside the correlated silver trade among Japanese, Europeans, Muslims, and others, China's age-old tributary trade networks provided the essential stability and continuity enabling a brilliant age of commerce. Though national perspectives stubbornly dominate the writing of Asian history, even powerful state-centric narratives have to be re-examined with respect to shifting identities and contested boundaries. This book situates itself in a new genre of writing on borderland zones between nations, especially prior to the emergence of the modern nation-state. It highlights the role of civilization that developed along with global trade in rare and everyday Asian commodities, raising a range of questions regarding unequal development, intraregional knowledge advances, the origins of globalization, and the emergence of new Asian hybridities beyond and within the conventional boundaries of the nation-state. Chapters range over the intra-Asian trade in silver and ceramics, the Chinese junk trade, the rise of European trading companies as well as diasporic communities including the historic Japan-towns of Southeast Asia, and many types of technology exchanges. While some readers will be drawn to thematic elements, this book can be read as the narrative history of the making of a coherent East-Southeast Asian world long before the modern period.

An Urban History of China

The Invention of China in Early Modern England describes how several different English communities became aware of China. It begins by describing how early modern intellectuals used the utopian ideal of China to license all kinds of progressive innovation before chronicling how England's growing commerce in southeast Asia radically changed China's representation in the English discourse community. For the new community of English merchants proposing to trade in Chinese goods, China became the seminal example in the growing discourse community of English Orientalism. It was an absolute or arbitrary authoritarian state, associated with crooked business dealings, and cloaked in a rhetoric of secrecy and exclusion—a dangerous exception to the traditions, values, and identities of the emergent English speaking states. Finally, the book points out some of the ways that contemporary

English language sources continue to represent this early modern English thought tradition, labelling the complexities of modern China with analytical vocabulary perhaps better suited to the pressing political anxieties of the seventeenth century.

A panoramic global history of the nineteenth century A monumental history of the nineteenth century, *The Transformation of the World* offers a panoramic and multifaceted portrait of a world in transition. Jürgen Osterhammel, an eminent scholar who has been called the Braudel of the nineteenth century, moves beyond conventional Eurocentric and chronological accounts of the era, presenting instead a truly global history of breathtaking scope and towering erudition. He examines the powerful and complex forces that drove global change during the "long nineteenth century," taking readers from New York to New Delhi, from the Latin American revolutions to the Taiping Rebellion, from the perils and promise of Europe's transatlantic labor markets to the hardships endured by nomadic, tribal peoples across the planet. Osterhammel describes a world increasingly networked by the telegraph, the steamship, and the railways. He explores the changing relationship between human beings and nature, looks at the importance of cities, explains the role slavery and its abolition played in the emergence of new nations, challenges the widely held belief that the nineteenth century witnessed the triumph of the nation-state, and much more. This is the highly anticipated English edition of the spectacularly successful and critically acclaimed German book, which is also being translated into Chinese, Polish, Russian, and French. Indispensable for any historian, *The Transformation of the World* sheds important new light on this momentous epoch, showing how the nineteenth century paved the way for the global catastrophes of the twentieth century, yet how it also gave rise to pacifism, liberalism, the trade union, and a host of other crucial developments.

Singapore in Global History

Freshly presents world history through its oceans and seas in uniquely wide-ranging, original chapters by leading experts in their fields.

History Without Borders

Over the past two decades, Singapore has advanced rapidly towards becoming a both a global city-state and a key nodal point in the international economic sphere. These developments have caused us to reassess how we understand this changing nation, including its history, population, and geography, as well as its transregional and transnational experiences with the external world. This collection spans several disciplines in the humanities and social sciences and draws on various theoretical approaches and methodologies in order to produce a more refined understanding of Singapore and to reconceptualize the challenges faced by the country and its peoples.

The Invention of China in Early Modern England

This book is a collection of ethnographies of transnational migration and border crossings in Asia. Interdisciplinary in scope, it addresses issues of mobility and Diaspora from various vantage points. Unique to this volume is an emphasis of studying globalisation from below, privileging the narratives and views of "people on the move" – or the transnational underclass – and their sense of belonging to places and communities. The collection is further distinguished by its focus on the sources of authority and the social configurations that are created in the intersections between legality and illegality across Asia. Though previous studies on transnational flows have deconstructed the notion of nation-states as having fixed political boundaries, and have engaged in spaces beyond the nation-states, seldom has an entire region, Asia, been privileged in one integrated volume. We emphasize hitherto marginalized debates that have significant policy relevance. Other than a serious academic interest from lecturers and students, we are confident that book will be of significant interest for development practitioners and NGOs.

China's Provinces

The book discusses invasive-species problems in agriculture, forests and aquatic ecosystems, highlighting the invasive mechanisms and management of the selected invasive species. Biological invasion has become a serious global ecological and economic problem that deserves particular attention from both government officials and scientists. This volume focuses on three key scientific areas: 1) population establishment and spreading mechanisms of the selected invasive species; 2) ecology adaptation, population growth, expansion and evolution of invasive species; and 3) impact of bio-invasion on the ecosystem structure and function at community and ecosystem levels. The presented research will result in techniques for better management of invasive species.

This book comprises high-quality refereed research papers presented at the Third International Conference on Computer Science, Engineering and Education Applications (ICCSEE2020), held in Kyiv, Ukraine, on 21–22 January 2020, organized jointly by National Technical University of Ukraine “Igor Sikorsky Kyiv Polytechnic Institute”, National Aviation University, and the International Research Association of Modern Education and Computer Science. The topics discussed in the book include state-of-the-art papers in computer science, artificial intelligence, engineering techniques, genetic coding systems, deep learning with its medical applications, and knowledge representation with its applications in education. It is an excellent source of references for researchers, graduate students, engineers, management practitioners, and undergraduate students interested in computer science and their applications in engineering and education.

Reframing Singapore

This open access book presents multidisciplinary research on the cultural history, ethnic connectivity, and oceanic transportation of the ancient Indigenous Bai Yue (百越) the prehistoric maritime region of southeast China and southeast Asia. In this maritime Frontier of China, historical documents demonstrate the development of the “barbarian” Bai Yue and Island Yi (夷) and their cultural interaction with the northern Huaxia (华夏) early Chinese civilization within the geopolitical order of the “Central State-Four Peripheries Barbarians-Four Seas”. Archaeological typologies of the prehistoric remains reveal a unique cultural tradition dominantly originating from the local Paleolithic age and continuing to early Neolithization across this border region. Further analysis of material culture from the Neolithic to the Early Iron Age proves the stability and resilience of the indigenous cultures even with the migratory expansion of Huaxia and Han (汉) from north to south. Ethnographical investigations of aboriginal heritage highlight their native cultural context, seafaring technology and navigation techniques, and their interaction with Austronesian and other foreign maritime ethnicities. In a word, this manuscript presents a new perspective on the unique cultural landscape of indigenous ethnicities in southeast China with thousands of years’ stable tradition, a remarkable maritime orientation and overseas cultural hybridization in the coastal region of southeast China.

Transnational Flows and Permissive Polities

The bestselling author of "An Unexpected Light" conducts a fascinating journey through the cultural and artistic landscape of Iran, both past and present. 15 halftones. Two 16-page photo inserts.

Biological Invasions and Its Management in China

This book is the first comprehensive work on Chinese covered bridges study, covering fields of human geography, historical buildings, and transportation. It includes more than 300 covered bridges of ancient and modern China, researching and analyzing their historical evolutions, architectural technologies and aesthetic values. And it, for the first time, divides Chinese covered bridges into “six covered bridge belts” and fills the academic gaps. This book presents an informative and splendid tour into covered bridges, illustrated and full of humanist consciousness. It targets on audience who works in transportation, human geography, historical buildings and Chinese traditional culture with its significant value both in academy and art.

The Rough Guide to Taiwan

In *Eighteen Lectures on Dunhuang*, Professor Rong Xinjiang provides a reliable, yet accessible, overview of the discovery of the Dunhuang manuscripts, the emergence of the field of Dunhuang studies and its contribution to scholarship both in China and the West.

The Prehistoric Maritime Frontier of Southeast China

In the early 20th century, tanned skin was associated with good health. However, people began to protect themselves against potential overexposure to avoid sunburns. Around 1945, the first sunscreen products became available. In the years to follow, a vast number of different sunscreen filters and frameworks regulating filter substances and preparations, and methods characterizing sunscreen products were developed. The perception regarding the tasks of sunscreen products changed several times - initially it was promoted as a lifestyle product, then as a skin cancer preventive means, and more recently also for anti-aging. Different purposes and the widespread use of these products have led to myriad studies and a wealth of information. In this volume, the editors present a current collection of information analyzing and discussing issues related to sunscreen products and their use. These include challenges regarding the ideal sunscreen product including filter selection and formulation issues, measurement methods, performance characterization, safety, and regulatory issues. Further papers address topics related to the use of sunscreen products in everyday life, in vulnerable cohorts and outdoor workers. Controversial topics such as environmental effects of sunscreen products and the risks and benefits of UV radiation in the context of skin cancer, vitamin D and cardiovascular and metabolic health are also covered.

Mirrors of the Unseen

Lord Amherst's diplomatic mission to the Qing Court in 1816 was the second British embassy to China. The first led by Lord Macartney in 1793 had failed to achieve its goals. It was thought that Amherst had better prospects of success, but the intense diplomatic encounter that greeted his arrival ended badly. Amherst never appeared before the Jiaqing emperor and his embassy was expelled from Peking on the day it arrived. Historians have blamed Amherst for this outcome, citing his over-reliance on the advice of his Second Commissioner, Sir George Thomas Staunton, not to kowtow before the emperor. Detailed analysis of British sources reveal that Amherst was well informed on the kowtow issue and made his own decision for which he took full responsibility. Success was always unlikely because of irreconcilable differences in approach. China's conduct of foreign relations based on the tributary system required submission to the emperor, thus relegating all foreign emissaries and the rulers they represented to vassal status, whereas British diplomatic practice was centred on negotiation and Westphalian principles of equality between nations. The Amherst embassy's failure revised British assessments of China and led some observers to believe that force, rather than diplomacy, might be required in future to achieve British goals. The Opium War of 1840 that followed set a precedent for foreign interference in China, resulting in a century of 'humiliation'. This resonates today in President Xi Jinping's call for 'National Rejuvenation' to restore China's historic place at the centre of a new Sino-centric global order.

Covered Bridges in China

Life can take a man many places. Born in disputed Israel, fostered in Middle America, and then finally driven into Rising China-Ray Hecht takes journey after journey as he tries to figure it all out. He goes down many paths from the years 1982 to 2019, attempting and failing at new identities with each passing decade: artist, filmmaker, journalist, and author. Told in simple lines and crude forms, Ray's graphic memoir *Always Goodbye* rushes through the milestones of a person's life with harsh sincerity. Follow along these memories of a man's travels across the globe as he tries to find himself, always saying goodbye but then reconnecting all over again, as many times as it takes...

El Monstruo

John Ross has been living in the old colonial quarter of Mexico City for the last three decades, a rebel journalist covering Mexico and the region from the bottom up. He is filled with a gnawing sense that his beloved Mexico City's days as the most gargantuan, chaotic, crime-ridden, toxically contaminated urban stain in the western world are doomed, and the monster he has grown to know and love through a quarter century of reporting on its foibles and tragedies and blight will be globalized into one more McCity. *El Monstruo* is a defense of place and the history of that place. No one has told the gritty, vibrant histories of this city of 23 million faceless souls from the ground up, listened to the stories of those who have not been crushed, deconstructed the Monstruo's very monstrosity, and lived to tell its secrets. In *El Monstruo*, Ross now does.

Colores de la Vida

"Each page captures a sense of wonder, of the vibrancy of color, the imagination of the artist, the name of the hue. Colors take life in this small picture book, perfect for small hands, in an astonishing pairing of visual intimacy and artistic joy that make this one of the most distinctive recent books on color—in English or otherwise." —Papertigers.org This book truly did take a village of artists, scattered all around mountain villages in the beautiful state of Oaxaca. Fifteen in fact! Go to our website to see who carved what lovely animal. And, please, imagine the adventurous Cindy Weill traipsing from village to village in search of these wonderful artisans. Este libro tomó el trabajo de toda una comunidad de artistas, esparcidos por los pueblos de las montañas del hermoso estado de Oaxaca. Tomó quince artistas, de hecho! Ve a nuestro sitio para ver quien esculpió cada bonito animal. Y, por favor, imagina a la intrépida Cindy Weill paseando de pueblo a pueblo en búsqueda de estos maravillosos artesanos y artesanas.

Wave Energy Conversion

Wave energy, together with other renewable energy resources is expected to provide a small but significant proportion of future energy requirements without adding to pollution and global warming. This practical and concise reference considers alternative application methods, explains the concepts behind wave energy conversion and investigates wave power activities across the globe. Explores the potential of using the power generated by waves as a natural energy resource Considers the power transfer systems needed to do this, and looks at the environmental impacts

Finish This Book

Dear Reader, One dark and stormy night, I found some strange scattered pages abandoned in a park... I collected and assembled them, trying to solve the mystery of this unexpected discovery, and I am now passing the task on to you. This title helps you continue the research and provide the content.

Disney & His Worlds

This work provides an overview of the Disney organization, in particular the theme parks and their significance for contemporary culture. The author examines topics such as Walt Disney's life and how his biography has been constructed, the Disney Company in the years after his death and various writings about the Disney theme parks. He raises important issues about the parks such as: whether they are harbingers of postmodernism; the significance of consumption at the parks; and the

representation of past and future. The discussion of theme parks links with the presentation of Disney's biography and his organization by showing how central economic and business considerations have been in their development and how the significance of these considerations is typically marginalized in order to place an emphasis on fantasy and magic.

Age of discrepancies

"The first exhibition to offer a critical assessment of the artistic experimentation that took place in Mexico during the last three decades of the twentieth century. The exhibition carefully analyzes the origins and emergence of techniques, strategies, and modes of operation at a particularly significant moment of Mexican history, beginning with the 1968 Student Movement, until the Zapatista uprising in the State of Chiapas. The show includes work by a wide range of artists, including Francis Alys, Vicente Rojo, Jimmie Durham, Helen Escobedo, Julio Galán, Felipe Ehrenberg, José Bedia, Guillermo Gómez-Peña, Francisco Toledo, Carlos Amorales, Melanie Smith, and Alejandro Jodorowsky, among many others. The edition is illustrated with 612 full-color plates of the art produced during these last three decades of the twentieth century reflect the social, political and technical developments in Mexico and ranged from painting and photography to poster design, installation, performance, experimental theatre, super-8 cinema, video, music, poetry and popular culture like the films and ephemeral actions of 'Panic' by Alejandro Jodorowsky, Pedro Friedeberg's pop art, the conceptual art, infrarealists and urban independent photography, artists books, the development of contemporary political photography, the participation of Mexican artists in Fluxus in the seventies and the contribution of Ulises Carrión to the international artist book movement and popular rock music, the pictorial battles of the eighties and the emergence of a variant of neo-conceptual art in 1990. The exhibition is curated by Olivier Debrouse, Pilar García de Garmenos, Cuauhtémoc Medina, Álvaro Vázquez Mantecón"--Provided by vendor.

Antigua California

This Spanish Borderlands classic recounts Jesuit colonization of the Old California, the peninsula now known as Baja California.

In Search of an Inca

This book examines how people in the Andean region have invoked the Incas to question and rethink colonialism and injustice.

Understanding Leisure

First published in 1989. Understanding Leisure is a readable introductory analysis of the key elements in the study of leisure. This includes leisure concepts and dimensions of leisure, its activity forms, participants, provision, and leisure futures, leisure and social theory. A collaborative work of six authors, Understanding Leisure is a textbook which introduces the reader to the interrelated dimensions of leisure in contemporary society and aims to provide them with guidelines for further study. Exercises and discussion topics are included at the end of each chapter to enable the reader to apply general theory to particular examples. The text contains seven chapters covering all aspects of the study of leisure. Starting with a critical evaluation of different concepts of leisure it progresses through an analysis of the relationship between leisure both to play and work and the diverse forms of leisure such as recreation, hobbies, crafts and education. There then follows a perspective on leisure participation, an analysis of the spatial dimensions of leisure and how relative land values can affect access to leisure. The historical context of leisure provision and the changing relationship between public and private sector is then examined which provides insights into the future of leisure, based on forecasts and theories of social change. The book ends with a discussion of how contemporary social theory contributes to an understanding of leisure. Understanding Leisure will be valuable reading for undergraduate degree courses in Leisure Studies. It will also be useful background reading for post graduate study in Leisure and Recreational Management and Tourism as well as for leisure professionals in both the commercial and public sectors.

The Challenge of Tourism Carrying Capacity Assessment

Planning and management for tourism growth is becoming essential in the context of sustainable development. Particularly so since many tourist destinations are facing severe pressures from tourist flows and activities. Such pressures are evidenced in terms of dysfunctions (congestion, environmental

degradation, etc) which ultimately affect the attraction and competitiveness of tourism destinations. The development of tourism should be considered in accordance with sustainability principles. In this context respecting the capacity of the local system to sustain growth becomes a key challenge. This book examines the use of various tools to define, measure and evaluate tourism carrying capacity (TCC) - a tool aiming to impose limits for entering certain tourist destinations or using certain activities. Drawing on case studies from France, Spain, Italy, Greece, the UK, the Netherlands, Ireland, Belgium, Austria, Germany and Finland, it presents practical experiences of implementing TCC in various tourist destinations (i.e. historic towns, coastal zones, islands, etc). It draws conclusions regarding the measurement and implementation of TCC assessment and provides further guidelines towards a comprehensive methodological framework for assessing tourism sustainability in the future.

Plazas

PLAZAS: LUGAR DE ENCUENTROS, 5th Edition, is a two- or three-semester introductory Spanish program designed to support and enhance your students' language learning experience. PLAZAS transports your students to a Spanish-speaking country or region for an authentic and personalized cultural language-learning experience. Culture is embedded into every page of PLAZAS, giving your students an appreciation of different cultural practices and perspectives. Thanks to an exclusive partnership with the National Geographic Society, the fifth edition facilitates multi-modal interactions with cultural information in new and revised sections. The program's pedagogy continues to be firmly rooted in the research of the National Standards for Foreign Language Learning, or the Five Cs--Communication, Cultures, Connections, Comparisons, and Communities. The new A explorar! section draws upon all five standards in an engaging manner while previewing the content of the lesson. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Letters to Sartre

Simone de Beauvoir and Jean-Paul Sartre formed one of the most famous literary couples of the twentieth century. Their relationship took on the quality of legend and served as a model of openness and honesty for countless men and women. Sartre was revered during his lifetime as a paradigm of the modern philosophe and intellectual, but since de Beauvoir's death in 1986, her literary reputation has threatened to eclipse Sartre's. Her work *The Second Sex* is, by any standard, one of the most important and influential books of the twentieth century. When these private and revealing letters were published in France in 1990, they caused a storm of controversy. Here de Beauvoir tells Sartre everything, tracing the extraordinary complications of their triangular love life. These letters reveal de Beauvoir not only as manipulative and dependent, but also as vulnerable, passionate, jealous, and committed. This reissue of a New York Times Notable Book will inspire philosophers, writers, and lovers of literature for decades to come.

In the Maw of the Earth Monster

As portals to the supernatural realm that creates and animates the universe, caves have always been held sacred by the peoples of Mesoamerica. From ancient times to the present, Mesoamericans have made pilgrimages to caves for ceremonies ranging from rituals of passage to petitions for rain and a plentiful harvest. So important were caves to the pre-Hispanic peoples that they are mentioned in Maya hieroglyphic writing and portrayed in the Central Mexican and Oaxacan pictorial codices. Many ancient settlements were located in proximity to caves. This volume gathers papers from twenty prominent Mesoamerican archaeologists, linguists, and ethnographers to present a state-of-the-art survey of ritual cave use in Mesoamerica from Pre-Columbian times to the present. Organized geographically, the book examines cave use in Central Mexico, Oaxaca, and the Maya region. Some reports present detailed site studies, while others offer new theoretical understandings of cave rituals. As a whole, the collection validates cave study as the cutting edge of scientific investigation of indigenous ritual and belief. It confirms that the indigenous religious system of Mesoamerica was and still is much more terrestrially focused than has been generally appreciated.

Resisting McDonaldization

George Ritzer's McDonaldization thesis argued that contemporary life is succumbing to the standardization, flexibility and practicability of fast-food service. This book brings together specially commissioned papers by leading social and cultural analysts to engage in a critical appraisal of the thesis. The contributors discuss the roots of the thesis, the rationalization of late modern life, the effects of increasing cultural commodification, the continuing prominence of American cultural and economic imperialism and the impact of globalization on social and cultural life. The strengths and weaknesses of the McDonaldization thesis are clearly evaluated and the irrational consequences of rationalization are pinpointed and critically

Electron Microscopy and Analysis 2001

Electron microscopy is now a mainstay characterization tool for solid state physicists and chemists as well as materials scientists. Electron Microscopy and Analysis 2001 presents a useful snapshot of the latest developments in instrumentation, analysis techniques, and applications of electron and scanning probe microscopies. The book is ideal for materials scientists, solid state physicists and chemists, and researchers in these areas who want to keep abreast of the state of the art in the field.

Cárdenas Compromised is a political and institutional history of Mexico's urban and rural labor in the Yucatán region during the regime of Lázaro Cárdenas from 1934 to 1940. Drawing on archival materials, both official and popular, Fallaw combines narrative, individual case studies, and focused political analysis to reexamine and dispel long-cherished beliefs about the Cardenista era. For historical, geographical, and ethnic reasons, Yucatán was the center of large-scale land reform after the Mexican Revolution. A long-standing revolutionary tradition, combined with a harsh division between a powerful white minority and a poor, Maya-speaking majority, made the region the perfect site for Cárdenas to experiment by launching an ambitious top-down project to mobilize the rural poor along ethnic and class lines. The regime encouraged rural peasants to form collectives, hacienda workers to unionize, and urban laborers to strike. It also attempted to mobilize young people and women, to challenge Yucatán's traditional, patriarchal social structure, to reach out to Mayan communities, and to democratize the political process. Although the project ultimately failed, political dialogue over Cárdenas's efforts continues. Rejecting both revisionist (anti-Cárdenas) and neopopulist (pro-Cárdenas) interpretations, Fallaw overturns the notion that the state allowed no room for the agency of local actors. By focusing on historical connections across class, political, and regional lines, Fallaw transforms ideas on Cardenismo that have long been accepted not only in Yucatán but throughout Mexico. This book will appeal to scholars of Mexican history and of Latin American state formation, as well as to sociologists and political scientists interested in modern Mexico.

Cárdenas Compromised

First published in 1968, Carlos Fuentes's controversial novel *A Change of Skin* tells the story of four persons who drive from Mexico City to Veracruz one Palm Sunday. The Driver of the car is Franz, an ex-Nazi, and with him is his young Mexican lover Isabel, the talented but failed poet Javier, and his embittered wife, Elizabeth. There is a fifth person as well--the Narrator. Through him we discover that all the characters are searching for some real value in their lives: love for Elizabeth, creating in the case of Javier, experience for Isabel, and redemption for Franz.

A Change of Skin

A novel about love's labors lost at once hilarious and heartrending, "Loving Pedro Infante" unravels the fictions people weave to justify loving the wrong mate, and confirms Denise Chavez's reputation as one of the most vibrant Chicana storytellers.

Loving Pedro Infante

How can we help poor people earn more from their knowledge rather than from their sweat and muscle alone? This book is about increasing the earnings of poor people in poor countries from their innovation, knowledge, and creative skills. Case studies look at the African music industry; traditional crafts and ways to prevent counterfeit crafts designs; the activities of fair trade organizations; biopiracy and the commercialization of ethnobotanical knowledge; the use of intellectual property laws and other tools to protect traditional knowledge. The contributors' motivation is sometimes to maintain the art and culture of poor people, but they recognize that except in a museum setting, no traditional skill can live on unless it has a viable market. Culture and commerce more often complement than conflict in the cases reviewed here. The book calls attention to the unwritten half of the World Trade Organization's Agreement on the Trade Related Aspects of Intellectual Property (TRIPS). TRIPS is about knowledge that industrial countries own, and which poor people buy. This book is about knowledge that poor people in poor countries generate and have to sell. It will be of interest to students and scholars of international trade and law, and to anyone with an interest in ways developing countries can find markets for cultural, intellectual, and traditional knowledge.

What follows is a new edition of the second in a series of three books providing an account of the mathematical development of demography. The first, *Introduction to the Mathematics of Population* (Addison-Wesley, 1968), gave the mathematical background. The second, the original of the present volume, was concerned with demography itself. The third in the sequence, *Mathematics Through Problems* (with John Beekman; Springer Verlag, 1982), supplemented the first two with an ordered sequence of problems and answers. Readers interested in the mathematics may consult the earlier book, republished with revisions by Addison-Wesley in 1977 and still in print. There is no overlap in subject matter between *Applied Mathematical Demography* and the *Introduction to the Mathematics of Population*. Three new chapters have been added, dealing with matters that have come recently into the demographic limelight: multi-state calculations, family demography, and heterogeneity. vii PREFACE This book is concerned with commonsense questions about, for instance, the effect of a lowered death rate on the proportion of old people or the effect of abortions on the birth rate. The answers that it reaches are not always commonsense, and we will meet instances in which intuition has to be adjusted to accord with what the mathematics shows to be the case.

Dos mundos, a best-selling program for Introductory Spanish known for its exceptional progressive activities, made its name as an innovative pioneer in Beginning Spanish. Today, it has maintained the spirit of innovation through many successful editions and continues to be implemented in numerous beginning Spanish language classes across the nation with outstanding results. Based on the communicative approach, Dos mundos stresses the use of engaging activities in a natural and spontaneous classroom atmosphere. The Actividades de comunicacion play a primary role in Dos mundos, since the core of the program is communication. These activities include fresh, practical ideas from the field of second-language teaching. In this research-based approach to learning language, the development of communicative language skills is the central goal, with formal grammar presentation and practice at the service of communication. To this end, the grammar explanations and exercises on the blue pages at the end of each chapter are designed for quick reference and ease of study. Additionally, cultural content is integrated throughout each chapter. The new Conozca section on each chapter opener gives an introduction of the country or region of focus, including information about holidays, foods, famous people, and important cities. Ventanas culturales readings focus on community, customs, and daily life while Ventanas al pasado readings focus on aspects of the social, cultural, or political history of the

Spanish-speaking world The Enlace readings explore literature, music, and cinema, and the Lecturas present topics such as sports and leisure activities.

From Contention to Democracy addresses a crucial aspect of contemporary societies: the role of social movements for political and social change. The volume gathers together essays written by prominent social theorists who have been asked to reflect on the relationship between movements and processes of social, political and cultural change. Three broad types of movement-change nexus are distinguished and discussed: incorporation, transformation, and democratization. The chapters in this book all point to the place of social movements in relation to these three processes of change, while discussing the history and well-known events of social movements. Individual occurrences such as the protest of French students in 1968 or Chilean shantytown dwellers are examined. The final essay looks ahead, wondering: what is the future of social movements?

The 2020 edition of The State of World Fisheries and Aquaculture has a particular focus on sustainability. This reflects a number of specific considerations. First, 2020 marks the twenty-fifth anniversary of the Code of Conduct for Responsible Fisheries (the Code). Second, several Sustainable Development Goal indicators mature in 2020. Third, FAO hosted the International Symposium on Fisheries Sustainability in late 2019, and fourth, 2020 sees the finalization of specific FAO guidelines on sustainable aquaculture growth, and on social sustainability along value chains. While Part 1 retains the format of previous editions, the structure of the rest of the publication has been revised. Part 2 opens with a special section marking the twenty fifth anniversary of the Code. It also focuses on issues coming to the fore, in particular, those related to Sustainable Development Goal 14 and its indicators for which FAO is the “custodian” agency. In addition, Part 2 covers various aspects of fisheries and aquaculture sustainability. The topics discussed range widely, from data and information systems to ocean pollution, product legality, user rights and climate change adaptation. Part 3 now forms the final part of the publication, covering projections and emerging issues such as new technologies and aquaculture biosecurity. It concludes by outlining steps towards a new vision for capture fisheries. The State of World Fisheries and Aquaculture aims to provide objective, reliable and up-to-date information to a wide audience – policymakers, managers, scientists, stakeholders and indeed everyone interested in the fisheries and aquaculture sector.

A leading figure in cultural studies worldwide, Néstor García Canclini is a Latin American thinker who has consistently sought to understand the impact of globalization on the relations between Latin America, Europe, and the United States, and among Latin American countries. In this book, newly available in English, he considers how globalization is imagined by artists, academics, migrants, and entrepreneurs, all of whom traverse boundaries and, at times, engage in conflicted or negotiated multicultural interactions. García Canclini contrasts the imaginaries of previous migrants to the Americas with those who live in transnational circuits today. He integrates metaphor and narrative, working through philosophical, anthropological, and socioeconomically grounded interpretations of art, literature, crafts, media, and other forms of expression toward his conclusion that globalization is, in important ways, a collection of heterogeneous narratives. García Canclini advocates global imaginaries that generate new strategies for dealing with contingency and produce new forms of citizenship oriented toward multiple social configurations rather than homogenization. This edition of Imagined Globalization

includes a significant new introduction by George Yúdice and an interview in which the cultural theorist Toby Miller and García Canclini touch on events including the Arab Spring and Occupy Wall Street.

This new work surveys how rapid changes taking place at the start of the twenty-first century in social, cultural, political and economic domains impact on sexuality, health and human rights. The relationships between men, women and children are changing quickly, as are traditional family structures and gender norms. What were once viewed as private matters have become public, and an array of new social movements – transgender, intersex, sex worker, people living with HIV – have come into the open. The book is split into three sections: Global ‘Sex’ Wars – discusses the notion of sexualities, its political landscapes internationally, and the return of religious fervour and extremism Epistemological Challenges and Research Agendas – examines modern ‘scientific’ understandings of sexuality, its history and the way in which AIDS has drawn attention to sexuality The Promises and Limits of Sexual Rights – discusses human rights approaches to sexuality, their strengths and limitations and new ways of imagining erotic justice Offering a unique framework for understanding this new world, set in the context of the major theoretical debates of recent decades, this book will be of interest to professionals, advocates and policy researchers and is suitable for a wide range of courses covering areas such as gender studies, human sexuality, public health and social policy.
