Ermanno Olmi is one of cinema's great, unsung filmmakers. Emerging onto the Italian art film scene just as the last canonical neo-realist movies were released in the late 1950s and early 1960s, several of Olmi's films, including *Il Posto* (1961), *The Tree of Wooden Clogs* (1978) and *The Legend of the Holy Drinker* (1988), won top prizes at Cannes and Venice. However, the majority of his work has remained unappreciated. This, the first English language book on Olmi, explores the director's style and evolving environmentalism, from his early, institutional short films, made while working at an Italian energy company, to his 19 feature films.

This collection argues that gender must be considered as both an approach to history, and as a reflection of the deep workings of the lived, historical past. The sixteen original essays explore social and cultural expressions of gender in Europe from the fourteenth to the eighteenth centuries. They examine theories and practices of gender in domestic, religious, and political contexts, including

the Reformation, the convent, the workplace, witchcraft, the household, literacy, the arts, intellectual spheres, and cultures of violence and memory. The volume exposes the myriad ways in which gender was actually experienced, together with the strategies used by individual men and women to negotiate resilient patriarchal structures. Overall, the collection opens up new synergies for thinking about gender as a category of historical analysis and as a set of experiences central to late medieval and early modern Europe.

Pontormo's Halberdier has long been controversial. How did scholars come to identify the sitter as Duke Cosimo de' Medici and why is this open to doubt? Who was Francesco Guardi? What was the siege of Florence, and could Pontormo have made this compelling portrait during that time of deprivation and political tumult? In a fascinating piece of historical detective work, Elizabeth Cropper investigates these questions and uncovers new evidence for interpretation. She also analyzes the portrait's relationship to other works by Pontormo, explores the importance for Pontormo of Donatello, Michelangelo, and Andrea del Sarto, and looks into Bronzino's connection with the portrait.

The Life of St Edmund, King & Martyr

On Christmas Eve 1433, the young King Henry VI arrived at the abbey at Bury St Edmunds, one of the largest religious foundations in fifteenth-century England. He remained there until Easter and at the end of his stay was admitted to the abbey's confraternity. To cement the abbey's relationship with the king, abbot William Curteys conceived the idea of commemorating Henry's visit with a "life" of the Anglo-Saxon king, St Edmund, the patron saint of the abbey. The man charged with the task of translating the "life" of St Edmund was John Lydgate, a monk at the abbey and the pre-eminent poet of the fifteenth century. It is hard to overstate the importance of the resulting manuscript, both as a monument to the development of the English language, and for its illustrations - 120 images, forming narrative sequences integrated to form a coherent visual parallel to the text and with a careful fidelity to detail. The completed manuscript that was presented to the young king remained in his library until after his deposition, and although it left royal hands for a time, it reappears in the inventories of the library of Henry VIII. It was acquired by The British Library in 1742. In both the number and quality of its illustrations and in the degree of integration, *The Life of St Edmund, King and Martyr* is unsurpassed.

St Edmund, King and Martyr

The cult of St Edmund was one of the most important in medieval England, and further afield, as the pieces here show.

Saint Edmund: King and Martyr

St. Edmund the Martyr was a Christian martyr and the king of East Anglia in the 9th century. Facts concerning the life of St. Edmund are few and far between, as the kingdom of East Anglia was devastated by the Vikings, who destroyed any contemporary evidence of his reign. A popular cult emerged after Edmund's death, and he was canonised by the Catholic Church sometime in the 10th century. This work, composed by the French monk Abbo, attempts to chronicle his life and acts about a century and a half after his death.

Saint Edmund King and Martyr

Life of St. Edmund

In this meticulously researched book, James Boniface Mackinlay provides a detailed account of the life and legacy of Saint Edmund, a ninth-century king of East Anglia who was martyred for his Christian beliefs. Drawing on original manuscripts and other historical sources, Mackinlay offers readers a fascinating glimpse into the world of medieval England and the enduring legacy of one of its most revered saints. Saint Edmund King and Martyr

Relics and Writing in Late Medieval England uncovers a wide-ranging medieval discourse that had an expansive influence on English literary traditions. Drawing from Latin and vernacular hagiography, miracle stories, relic lists, and architectural history, this study demonstrates that, as the shrines of England's major saints underwent dramatic changes from c. 1100 to c. 1538, relic discourse became important not only in constructing the meaning of objects that were often hidden, but also for canonical authors like Chaucer and Malory in exploring the function of metaphor and of dissembling language. Robyn Malo argues that relic discourse was employed in order to critique mainstream religious practice, explore the consequences of rhetorical dissimulation, and consider the effect on the socially disadvantaged of lavish expenditure on shrines. The work thus uses the literary study of relics to address issues of clerical and lay cultures, orthodoxy and heterodoxy, and writing and reform.

The Cult of St Edmund in Medieval East Anglia

A groundbreaking assessment of the use medieval English history-writers made of saints' lives.

Saint Edmund King and Martyr

Reassess medieval literature and the relationship between writers and power in England by arguing that major works commissioned by or written for a succession of Lancastrians--Henry IV, Henry V, Henry VI, and Prince Edward--reveal that John Gower, Thomas Hoccleve, John Lydgate, and John Fortescue were not propagandists.

Relics and Writing in Late Medieval England

The Oxford History of Life-Writing: Volume 1: The Middle Ages' explores the richness and variety of life writing in the Middle Ages, ranging from Anglo-Latin lives of missionaries, prelates, and princes to high medieval lives of scholars and visionaries to late medieval lives of authors and laypeople.

Anglo-Saxon Saints Lives as History Writing in Late Medieval England

The study of medieval literature has experienced a revolution in the last two decades, which has reinvigorated many parts of the discipline and changed the shape of the subject in relation to the scholarship of the previous generation. 'New' texts (laws and penitentials, women's writing, drama records), innovative fields and objects of study (the history of the book, the study of space and the body, medieval masculinities), and original ways of studying them (the Sociology of the Text, performance studies) have emerged. This has brought fresh vigour and impetus to medieval studies, and impacted significantly on cognate periods and areas. *The Oxford Handbook of Medieval Literature in English* brings together the insights of these new fields and approaches with those of more familiar texts and methods of study, to provide a comprehensive overview of the state of medieval literature today. It also returns to first principles in posing fundamental questions about the nature, scope, and significance of the discipline, and the directions that it might take in the next decade. The Handbook contains 44 newly commissioned essays from both world-leading scholars and exciting new scholarly voices. Topics covered range from the canonical genres of Saints' lives, sermons, romance, lyric poetry, and heroic

poetry; major themes including monstrosity and marginality, patronage and literary politics, manuscript studies and vernacularity are investigated; and there are close readings of key texts, such as *Beowulf*, *Wulf and Eadwacer*, and *Ancrene Wisse* and key authors from Ælfric to Geoffrey Chaucer, Langland, and the Gawain Poet.

An exploration of the use of images in Middle English texts, tracing out what can be deduced of a theory of language.

The Oxford History of Life-writing

The saints were the superheroes and the celebrities of medieval England, bridging the gap between heaven and earth, the living and the dead. A vast body of literature evolved during the middle ages to ensure that everyone, from kings to peasants, knew the stories of the lives, deaths and afterlives of the saints. However, despite its popularity and ubiquity, the genre of the Saint's Life has until recently been little studied. This collection introduces the canon of Middle English hagiography; places it in the context of the cults of saints; analyses key themes within hagiographic narrative, including gender, power, violence and history; and, finally, shows how hagiographic themes survived the Reformation. Overall it offers both information for those coming to the genre for the first time, and points forward to new trends in research. The Grove Encyclopedia of Medieval Art and Architecture offers unparalleled coverage of all aspects of art and architecture from Medieval Western Europe, from the 6th century to the early 16th century. Drawing upon the expansive scholarship in the celebrated Grove Dictionary of Art and adding hundreds of new entries on topics not previously covered, as well as fully updated and expanded entries and bibliographies, The Grove Encyclopedia of Medieval Art and Architecture offers students, researchers, and the general public a reliable, up-to-date, and convenient resource covering this field of major importance in the development of Western history and international art and architecture. The Encyclopedia offers scholarly material on Medieval art in intelligent, well-written, and informative articles, each of which is followed by a bibliography to support further research. These include a mixture of shorter, more factual articles and larger, multi-section articles tracing the development of the arts in major regions. There are articles on all subject areas in Medieval art including biographies of major artists, architects and patrons; countries, cities, and sites; cultures and styles (Anglo-Saxon art, Carolingian art, Coptic art, Early Christian art, Romanesque, Gothic, Insular art, Lombard art, Merovingian art, Ottonian art, and Viking art); ivories, books and illuminated manuscripts, metalwork, architecture, painting, tapestries, sculpture, mosaics, reliquaries, and more. Part of the acclaimed Grove Art family of print encyclopedias, The Grove Encyclopedia of Medieval Art and Architecture is lavishly illustrated with more than 460 halftones and 170 color plates. The 6 volumes are organized into a cohesive A-Z format, with a comprehensive index.

Images of Language in Middle English Vernacular Writings

"Seeking Sanctuary" explores a curious aspect of premodern English law: the right of felons to shelter in a church or ecclesiastical precinct, remaining safe from arrest and trial in the king's courts ... Although for decades after 1400 sanctuary-seeking was indeed fairly rare, the evidence in the legal records shows the numbers of felons seeing refuge in churches began to climb again in the late fifteenth century and reached its peak in the period between 1525 and 1535."-- Back cover.

A Companion to Middle English Hagiography

A sweeping, authoritative, and entertaining history of the Christian cult of the saints from its origin to the Reformation. From its earliest centuries, one of the most notable features of Christianity has been the veneration of the saints—the holy dead. This ambitious history tells the fascinating story of the cult of the saints from its origins in the second-century days of the Christian martyrs to the Protestant Reformation. Robert Bartlett examines all of the most important aspects of the saints—including miracles, relics, pilgrimages, shrines, and the saints' role in the calendar, literature, and art. The book explores the

central role played by the bodies and body parts of saints, and the special treatment these relics received. From the routes, dangers, and rewards of pilgrimage, to the saints' impact on everyday life, Bartlett's account is an unmatched examination of an important and intriguing part of the religious life of the past—as well as the present.

Seeking Sanctuary

Discussing medieval and early modern 'disembodied heads' this collection questions the why and how of the primacy of the head in the bodily hierarchy during the premodern period. On the basis of beliefs, mythologies and traditions concerning the head, they come to an 'cultural anatomy' of the head.

Why Can the Dead Do Such Great Things?

Capitalizing upon the enduring fascination with decapitation in European culture, this collection examines--through a variety of critical lenses--the recurring "roles/rolls" of severed human heads in the medieval and early modern imagination.

ST EDMUND KING & MARTYR

Britain of the fifteenth century was rife with social change, religious dissent, and political upheaval. Amid this ferment lived John Capgrave—Austin friar, doctor of theology, leading figure in East Anglian society, and noted author. Nowhere are the tensions and anxieties of this critical period, spanning the close of the medieval and the dawn of early modern eras, more eloquently conveyed than in Capgrave's works. John Capgrave's *Fifteenth Century* is the first book to explore the major themes of Capgrave's writings and to relate those themes to fifteenth-century political and cultural debates. Focusing on Capgrave's later works, especially those in English and addressed to lay audiences, it teases out thematic threads that are closely interwoven in Capgrave's Middle English oeuvre: piety, intellectualism, gender, and social responsibility. It refutes the still-prevalent view of Capgrave as a religious and political reactionary and shows, rather, that he used traditional genres to promote his own independent viewpoint on some of the most pressing controversies of his day, including debates over vernacular theology, orthodoxy and dissent, lay (and particularly female) spirituality, and the state of the kingdom under Henry VI. The book situates Capgrave as a figure both in the vibrant literary culture of East Anglia and in European intellectual history. John Capgrave's *Fifteenth Century* offers a fresh view of orthodoxy and dissent in late medieval England and will interest students of hagiography, religious and cultural history, and Lancastrian politics and society.

Disembodied Heads in Medieval and Early Modern Culture

The *Oxford History of Poetry in English* is designed to offer a fresh, multi-voiced, and comprehensive analysis of 'poetry': from Anglo-Saxon culture through contemporary British, Irish, American, and Global culture, including English, Scottish, and Welsh poetry, Anglo-American colonial and post-colonial poetry, and poetry in Canada, Australia, New Zealand, the Caribbean, India, Africa, Asia, and other international locales. The series both synthesizes existing scholarship and presents cutting-edge research, employing a global team of expert contributors for each of the fourteen volumes. This volume explores the developing range of English verse in the century after the death of Chaucer in 1400, years that saw both change and consolidation in traditions of poetic writing in English in the regions of Britain. Chaucer himself was an important shaping presence in the poetry of this period, providing a stimulus

to imitation and to creative expansion of the modes he had favoured. In addition to assessing his role, this volume considers a range of literary factors significant to the poetry of the century, including verse forms, literary language, translation, and the idea of the author. It also signals features of the century's history that were important for the production of English verse: responses to wars at home and abroad, dynastic uncertainty, and movements towards religious reform, as well as technological innovations such as the introduction of printing, which brought influential changes to the transmission and reception of verse writing. The volume is shaped to include chapters on the contexts and forms of poetry in English, on the important genres of verse produced in the period, on some of the fifteenth-century's major writers (Lydgate, Hoccleve, Dunbar, and Henryson), and a consideration of the influence of the verse of this century on what was to follow.

Heads Will Roll

The fighting bishop or abbot is a familiar figure to medievalists and much of what is known of the military organization of England in this period is based on ecclesiastical evidence. Unfortunately the fighting cleric has generally been regarded as merely a baron in clerical dress and has consequently fallen into the gap between military and ecclesiastical history. This study addresses three main areas: which clergy engaged in military activity in England, why and when? By what means did they do so? And how did others understand and react to these activities? The book shows that, however vivid such characters as Odo of Bayeux might be in the historical imagination, there was no archetypal militant prelate. There was enormous variation in the character of the clergy that became involved in warfare, their circumstances, the means by which they pursued their military objectives and the way in which they were treated by contemporaries and described by chroniclers. An appreciation of the individual fighting cleric must be both thematically broad and keenly aware of his context. Such individuals cannot therefore be simply slotted into easy categories, even (or perhaps especially) when those categories are informed by contemporary polemic. The implications of this study for our understanding of clerical identity are considerable, as the easy distinction between clerics acting in a secular or ecclesiastical capacity almost entirely breaks down and the legal structures of the period are shown to be almost as equivocal and idiosyncratic as the literary depictions. The implications for military history are equally striking as organisational structures are shown to be more temporary, fluid and 'political' than had previously been understood.

The Oxford History of Poetry in English

A collection from Early English literature relating to the martyrdom of St. Edmund.

The Church at War: The Military Activities of Bishops, Abbots and Other Clergy in England, c. 900–1200

John Lydgate wrote the 'Lives of Ss Edmund & Fremund' at the request of his abbot, William Curteys, to commemorate the stay of the young King Henry VI at the Benedictine abbey of Bury St Edmunds from Christmas Eve 1433 to shortly after Easter 1434 when Henry was received into confraternity. The work survives in thirteen manuscripts or fragments, and BL MS Harley 2278, on which the present edition of the 'Lives of Ss Edmund & Fremund' is based, was the copy of the poem presented to Henry VI, probably before 1444. The 'Lives' consists of a prologue, the Life of St Edmund as books one and two, the Life of St Fremund as book three, a concluding prayer to St Edmund, an envoy, and an address to Henry VI. The volume also presents the three texts that make up the 'Extra Miracles of St Edmund' which are found in four of the later manuscripts of the 'Lives' and independently in one manuscript. This edition of the 'Lives of Ss Edmund & Fremund' is the first to establish the text on the basis of the readings of all the manuscripts, and is also the first to include the 'Extra Miracles'. The edited texts are followed by a commentary, textual notes, a glossary of proper names, and a selective glossary.

Life of St. Edmund of Canterbury

The Oxford History of Life-Writing: Volume 1: The Middle Ages explores the richness and variety of life-writing from late Antiquity to the threshold of the Renaissance. During the Middle Ages, writers from Bede to Chaucer were thinking about life and experimenting with ways to translate lives, their own and others', into literature. Their subjects included career religious, saints, celebrities, visionaries, pilgrims, princes, philosophers, poets, and even a few 'ordinary people.' They relay life stories not only in chronological narratives, but also in debates, dialogues, visions, and letters. Many medieval biographers relied on the reader's trust in their authority, but some espoused standards of evidence that seem distinctly modern, drawing on reliable written sources, interviewing eyewitnesses, and cross-checking their facts wherever possible. Others still professed allegiance to evidence but nonetheless freely embellished and invented not only events and dialogue but the sources to support them. The first book devoted to life-writing in medieval England, The Oxford History of Life-Writing: Volume 1: The Middle Ages covers major life stories in Old and Middle English, Latin, and French, along with such Continental classics as the letters of Abelard and Heloise and the autobiographical Vision of Christine de Pizan. In addition to the life stories of historical figures, it treats accounts of fictional heroes, from Beowulf to King Arthur to Queen Katherine of Alexandria, which show medieval authors experimenting with, adapting, and expanding the conventions of life writing. Though Medieval life writings can be challenging to read, we encounter in them the antecedents of many of our own diverse biographical forms-tabloid lives, literary lives, brief lives, revisionist lives; lives of political figures, memoirs, fictional lives, and psychologically-oriented accounts that register the inner lives of their subjects.

Corolla Sancti Eadmundi = the Garland of Saint Edmund, King and Martyr - Primary Source Edition

This collection re-evaluates the work of fifteenth-century poet John Lydgate in light of medieval material culture. Top scholars in the field unite here with critical newcomers to offer fresh perspectives on the function of poetry on the cusp of the modern age, and in particular on the way that poetry speaks to the heightened relevance of material goods and possessions to the formation of late medieval identity and literary taste. Advancing in provocative ways the emerging fields of fifteenth-century literary and cultural study, the volume as a whole explores the role of the aesthetic not only in late medieval society but also in our own.

Corolla Sancti Eadmundi

St Dunstan of Canterbury (909-88) was the central figure in the development of English church and society after the death of King Alfred. Douglas Dales traces Dunstan's life beginning with his education at the great monastery of Glastonbury of which he became abbot. He was a central figure at the court of the kings of Wessex but was banished, partly because of his hostility to the king's mistresses, and went to exile in Flanders. After his return he was appointed Archbishop of Canterbury. During the twenty-eight years of his primacy he carried out one of the major developments of the century, the reformation of the monasteries. This book aims to examine him not merely as a prelate and royal advisor, but to see other aspects of his life: his skills as a craftsman caused him to be adopted as the patron saint of goldsmiths; some of his work as calligrapher and artist survives to this day; the coronation service which he drew up still lies at the heart of this service for English monarchs today; he was famed for his musical skills; above all, the sanctity of his name and the fame of his miracles kept Dunstan's memory alive. Douglas Dales' re-examination of the life and times of Dunstan sets his achievements against the social and religious background of the day, at a time when new forces were emerging that would shape the future of England and the English Church for centuries to come.
