This Is Again a Basic Democratic Principle Which Stems from that that all Citizens Are Equal before the Law and the Other One Which Is Very Basic We Can Hope To Have Equality of Quality of Life At Least for Children At Least for Children this Is Possible Even in the Most Radically Capitalistic Society but Often Injustice Is Very Much before Our Noses When We Talk about What Happened in the French Revolution We Say I Mean this Was Completely Ridiculous It Was Obvious that these Things Had To Change I Mean What's So Gross Injustice but It Was Not So Obvious because They Had Lived with this for 1000 Years and They Thought this Was Normal that They Should Pay Taxes to the Lordly Nobles and all Kinds of Crazy Things Today for Example We Have Private Property in the Long Island Sound

I Would Say that I Mentioned for Anything To Be Done in a City Is that's It Make the City More or Less Pleasant To Work to Me that Will Be the Main Measure Anything to a New Building apart some Transport System a Road Does To Make the City More Pleasant To Work or Less Pleasant To Walk the Fact Is that There Is no Such a Thing as a Natural Level of Car Use in a City I Mean if There Was More Space for Cars There Will Be More Cars in London as There Were Less Space for Cars Will Be Less Cars Never Has a City Solved Its Traffic Problems Making Bigger Roads so this Is a Political Decision How Much Space Do We Want To Give to Cars

Sometimes You Need To Get Cars out of a Street All Together People Sometimes Say Oh Here Is To Narrow these Streets so We CanNot Put the Bus System through Here So What We Have To Tell Them Is this Is a Democracy so What Do We Have To Do Is that There Is no Space for Cars no There Is no Space for Buses so this Is Involve Italian Town or this Is in the Netherlands but Let's Imagine a New City Imagine a New City in Asia or in Africa

This Is Wonderful Central Park When Central Park Was Created New York Was Much Poorer and Smaller than Most Developing Country Capitals in the World Today and They Had the Vision and and this Was Not a Garden Made by a King or Something No this Was a Democracy at Work That Thought of Doing this So Let Me Ask You Something for Example Here in Volta We Had a Big Runner a Golf Course of a Private Club Right in the Middle of a Very High-Density Area I Mean Democracy Again Is that Public Good Prevails over Private Interests What Do You Think Is Better for General Happiness To Have 300 , 000 People or 400 , 000 People Use this on a Sunday or Maybe To Have It Maybe 1 , 000

On Intersectionality

A major publishing event, the collected writings of the groundbreaking scholar who "first coined intersectionality as a political framework" (Salon) For more than twenty years, scholars, activists, educators, and lawyers--inside and outside of the United States--have employed the concept of intersectionality both to describe problems of inequality and to fashion concrete solutions. In particular, as the Washington Post reported recently, "the term has been used by social activists as both a rallying cry for more expansive progressive movements and a chastisement for their limitations." Drawing on black feminist and critical legal theory, Kimberlé Crenshaw developed the concept of intersectionality, a term she coined to speak to the multiple social forces, social identities, and ideological instruments through which power and disadvantage are expressed and legitimized. In this comprehensive and accessible introduction to Crenshaw's work, readers will find key essays and articles that have defined the concept of intersectionality, collected together for the first time. The book includes a sweeping new introduction by Crenshaw as well as prefaces that contextualize each of the chapters. For anyone interested in movement politics and advocacy, or in racial justice and gender equity, *On Intersectionality* will be compulsory reading from one of the most brilliant theorists of our time.

Marxist-Feminist Theories and Struggles Today

This vital new collection presents new Marxist-Feminist analyses of Capitalism as a gendered, racialized social formation that shapes and is shaped by specific nature-labour relationships. Leaving behind former overtly structuralist thinking, Marxist-Feminist Theories and Struggles Today interweaves strands of ecofeminism and intersectional analyses to develop an understanding of the relations of production and the production of nature through the interdependencies of gender, class, race and colonial relations. With contributions and analyses from scholars and theorists in both the global North and South, this volume offers a truly international lens that reveals the the vitality of contemporary global Marxist-Feminist thinking, as well as its continued relevance to feminist struggles across the globe.

Critical Race Theory

In the past few years, a new generation of progressive intellectuals has dramatically transformed how law, race, and racial power are understood and discussed in America. Questioning the old assumptions of both liberals and conservatives with respect to the goals and the means of traditional civil rights reform, critical race theorists have presented new paradigms for understanding racial injustice and new ways of seeing the links between race, gender, sexual orientation, and class. This reader, edited by the

principal founders and leading theoreticians of the critical race theory movement, gathers together for the first time the movement's most important essays.

Intersections of Privilege and Otherness in Counselling and Psychotherapy

Intersections of Privilege and Otherness in Counselling and Psychotherapy presents an in-depth understanding of the role of privilege, and of the unconscious experience of privilege and difference within the world of counselling and psychotherapy. To address the absence of the exploration of the unconscious experience of privilege within counselling and psychotherapy, the book not only presents an exploration of intersectional difference, but also discusses the deeper unconscious understanding of difference, and how privilege plays a role in the construction of otherness. It does so by utilising material from both within the world of psychotherapy, and from the fields of post-colonial theory, feminist discourse, and other theoretical areas of relevance. The book also offers an exploration and understanding of intersectionality and how this impacts upon our conscious and unconscious exploration of privilege and otherness. With theoretically underpinned, and inherently practical psychotherapeutic case studies, this book will serve as a guidebook for counsellors and psychotherapists.

Seeing Race Again

Every academic discipline has an origin story complicit with white supremacy. Racial hierarchy and colonialism structured the very foundations of most disciplines' research and teaching paradigms. In the early twentieth century, the academy faced rising opposition and correction, evident in the intervention of scholars including W. E. B. Du Bois, Zora Neale Hurston, Carter G. Woodson, and others. By the mid-twentieth century, education itself became a center in the struggle for social justice. Scholars mounted insurgent efforts to discredit some of the most odious intellectual defenses of white supremacy in academia, but the disciplines and their keepers remained unwilling to interrogate many of the racist foundations of their fields, instead embracing a framework of racial colorblindness as their default position. This book challenges scholars and students to see race again. Examining the racial histories and colorblindness in fields as diverse as social psychology, the law, musicology, literary studies, sociology, and gender studies, *Seeing Race Again* documents the profoundly contradictory role of the academy in constructing, naturalizing, and reproducing racial hierarchy. It shows how colorblindness compromises the capacity of disciplines to effectively respond to the wide set of contemporary political, economic, and social crises marking public life today.

Intersectionality

The concept of intersectionality has become a hot topic in academic and activist circles alike. But what exactly does it mean, and why has it emerged as such a vital lens through which to explore how social inequalities of race, class, gender, sexuality, age, ability and ethnicity shape one another? In this new book Patricia Hill Collins and Sirma Bilge provide a much-needed, introduction to the field of intersectional knowledge and praxis. They analyze the emergence, growth and contours of the concept and show how intersectional frameworks speak to topics as diverse as human rights, neoliberalism, identity politics, immigration, hip hop, global social protest, diversity, digital media, Black feminism in Brazil, violence and World Cup soccer. Accessibly written and drawing on a plethora of lively examples to illustrate its arguments, the book highlights intersectionality's potential for understanding inequality and bringing about social justice oriented change. Intersectionality will be an invaluable resource for anyone grappling with the main ideas, debates and new directions in this field.

The Race Track

Despite the watershed election of Barack Obama and the claims that racial history ended that day, the painful reality of racism in America has been thrust into the headlines over the past year. *The Race Track* dispenses with the myth of post-racial America, explaining not only why race matters more than ever but also how we can fashion 21st-century solutions to combating racial injustice. *The Race Track* champions an intersectional path - pioneered by Kimberle Crenshaw - one that will appeal to people of all races who want to know how to speak the language of racial justice.

Black Identities + White Therapies

This book calls for every counsellor, psychotherapist and counselling psychologist to review their practice to better address the needs of our multi-ethnic, multiracial and multicultural society today. It presents an array of fresh ideas and approaches.

Intersectionality

"Though intersectionality theory has emerged as a highly influential school of thought in ethnic studies, gender studies, law, political science, sociology and psychology, no scholarship to date exists on the evolution of the theory. This book seeks to remedy the gap by attending to the historical, geographical, and cross-disciplinary myopia afflicting current intersectionality scholarship. This comprehensive intellectual history will be an agenda-setting work for the theory"--

Intersectionallies

A handy book about intersectionality that depicts the nuances of identity and embraces difference as a source of community.

Intersectionality as Critical Social Theory

In *Intersectionality as Critical Social Theory* Patricia Hill Collins offers a set of analytical tools for those wishing to develop intersectionality's capability to theorize social inequality in ways that would facilitate social change. While intersectionality helps shed light on contemporary social issues, Collins notes that it has yet to reach its full potential as a critical social theory. She contends that for intersectionality to fully realize its power, its practitioners must critically reflect on its assumptions, epistemologies, and methods. She places intersectionality in dialog with several theoretical traditions—from the Frankfurt school to black feminist thought—to sharpen its definition and foreground its singular critical purchase, thereby providing a capacious interrogation into intersectionality's potential to reshape the world.

Prizewinning historian Estelle B. Freedman brings decades of teaching experience and scholarship to her selections, which span more than five centuries. Moving beyond standard texts by English and American thinkers, this collection features primary source material from around the globe, including short works of fiction and drama, political manifestos, and the work of less well-known writers. Freedman's cogent Introduction assesses the challenges facing feminism, while her accessible, lively commentary contextualizes each piece. The *Essential Feminist Reader* is a vital addition to feminist scholarship, and an invaluable resource for anyone interested in the history of women.

Freedom Seekers

Essential new analysis of capitalism as a gendered, racialized social formation that shapes, and is shaped by, specific nature-labour relationships, with perspectives from the global North and South.

Marxist-feminist Theories and Struggles Today

"Intersectionality intervenes in the field of intersectionality studies: the integrative examination of the effects of racial, gendered, and class power on people's lives. While "intersectionality" circulates as a buzzword, Anna Carastathis joins other critical voices to urge a more careful reading. Challenging the narratives of arrival that surround it, Carastathis argues that intersectionality is a horizon, illuminating ways of thinking that have yet to be realized; consequently, calls to "go beyond" intersectionality are premature. A provisional interpretation of intersectionality can disorient habits of essentialism, categorical purity, and prototypicality and overcome dynamics of segregation and subordination in political movements. Through a close reading of critical race theorist Kimberle Williams Crenshaw's germinal texts, published more than twenty-five years ago, Carastathis urges analytic clarity, contextual rigor, and a politicized, historicized understanding of this widely traveling concept. Intersectionality's roots in social justice movements and critical intellectual projects--specifically Black feminism--must be retraced and synthesized with a decolonial analysis so its radical potential to actualize coalitions can be enacted"--

Intersectionality

As authors and publishers, individuals and collectives, women significantly shaped the modernist movement. While figures such as Virginia Woolf and Gertrude Stein have received acclaim, authors from marginalized communities and those who wrote for mass, middlebrow audiences also created experimental and groundbreaking work. The essays in this volume explore formal aspects and thematic concerns of modernism while also challenging rigid notions of what constitutes literary value as well as the idea of a canon with fixed boundaries. The essays contextualize modernist women's writing in the material and political concerns of the early twentieth century and in life on the home front during wartime. They consider the original print contexts of the works and propose fresh digital approaches for courses ranging from high school through graduate school. Suggested assignments provide opportunities for students to write creatively and critically, recover forgotten literary works, and engage with their communities.

Teaching Modernist Women's Writing in English

In the century after emancipation, the long shadow of slavery left African Americans well short of the freedom promised to them. While sharecropping and debt peonage entrapped Black people in the South, European colonialism had bred a new slavery that menaced the liberty of even more Africans. A core group of Black freedom movement leaders, including Ida B. Wells and W. E. B. Du Bois, followed their nineteenth-century predecessors in insisting that the continuation of racial slavery anywhere put Black freedom on the line everywhere. They even predicted the consequences that ignited the recent nationwide Black Lives Matter movement—the rise of a prison industrial complex and the consequent erosion of African Americans' faith in the criminal justice system. *The Freedom Movement's Lost Legacy: Black Abolitionism since Emancipation* is the first historical account of the Black freedom movement's response to modern slavery in the twentieth century. Keith P. Griffler details how the mainstream international antislavery movement became complicit in the enslavement of Black and brown people across the world through its sponsorship of racist international antislavery law that gave the "new slavery" explicit legal sanction. Black freedom movement activists, thinkers, and organizers did more than call out this breathtaking betrayal of abolitionist principles: they dedicated themselves to the eradication of slavery in whatever forms it assumed on the global stage and developed an expansive vision of human freedom. This timely and important work reminds us that the resurgence of today's Black freedom movements is a manifestation and continuation of the traditions and efforts of these early Black leaders and abolitionists—an important chapter in the history of antislavery and the ongoing Black freedom struggle.

The Freedom Movement's Lost Legacy

The assertion that empathy is an essential characteristic of equity work in higher education demands educators operate from a place of justice, fairness, and inclusive practice. Empathy is a personal quality that allows educators to consider another's perspective to inform the decision-making process about policy, procedures, program and service design, and teaching pedagogy. Thus, engaging empathy in everyday practice supports the potential to create more equitable and inclusive environments as well as standards for serving a diverse student population. *Achieving Equity in Higher Education Using*

Empathy as a Guiding Principle explores what empathy is, how empathy can be developed, and how empathy can be applied in an educator's practice to achieve equity-mindedness and mitigate inequitable student outcomes in and out of the classroom. The book also argues that self-examination and engaging empathy is a way to thoughtfully examine differences and uphold the values of humanity. Covering topics such as intercultural listening and program development, this reference work is ideal for administrators, practitioners, academicians, scholars, researchers, instructors, and students.

Achieving Equity in Higher Education Using Empathy as a Guiding Principle

Drawing on clinical practice, this book explores how the Black feminist idea of intersectionality is vital to all group work practices, including group analysis. Intersectionality enables exploration of power, position, and privilege in group work; this volume is an argument for the 'decolonizing' of therapeutic group training, practice, and institutional traditions. The wide range of contributors discuss the impact of intersectionality on their work within group analysis, from clinical examples to theoretical reflections. Chapters span topics such as leadership, racism, working with survivors of sexual violence, and the experience of being a political refugee. Intersectionality and Group Analysis provides a space to develop clinically relevant theory for the future and includes an accessible introduction to the concepts of intersectionality. This essential text will be key reading for group analysts, other professionals working with and within groups, and readers looking to learn more about enhancing diversity within structures and organizations.

Intersectionality and Group Analysis

In a neoliberal academia dominated by masculine ideals of measurement and performance, it is becoming more important than ever to develop alternative ways of researching and writing. This powerful new book gives voice to non-conforming narratives, suggesting innovative, messy and nuanced ways of organizing the reading and writing of scholarship in management and organization studies. In doing so it spotlights how different methods and approaches can represent voices of inequality and reveal previously silenced topics. Informed by feminist and critical perspectives, this will be an invaluable resource for current and future scholars in management and organization studies and other social sciences.

Researching and Writing Differently

What is the link, if any, between race and disease? How did the term baster as 'mixed race' come to be mistranslated from 'incest' in the Hebrew Bible? What are the roots of racial thinking in South African universities? How does music fall on the ear of black and white listeners? Are new developments in genetics simply a backdoor for the return of eugenics? For the first time, leading scholars in South Africa from different disciplines take on some of these difficult questions about race, science and society in the aftermath of apartheid. This book offers an important foundation for students pursuing a broader education than what a typical degree provides, and a must-read resource for every citizen concerned about the lingering effects of race and racism in South Africa and other parts of the world.

Fault Lines

A new way of thinking about data science and data ethics that is informed by the ideas of intersectional feminism. Today, data science is a form of power. It has been used to expose injustice, improve health outcomes, and topple governments. But it has also been used to discriminate, police, and surveil. This potential for good, on the one hand, and harm, on the other, makes it essential to ask: Data science by whom? Data science for whom? Data science with whose interests in mind? The narratives around big data and data science are overwhelmingly white, male, and techno-heroic. In Data Feminism, Catherine D'Ignazio and Lauren Klein present a new way of thinking about data science and data ethics—one that is informed by intersectional feminist thought. Illustrating data feminism in action, D'Ignazio and Klein show how challenges to the male/female binary can help challenge other hierarchical (and empirically wrong) classification systems. They explain how, for example, an understanding of emotion can expand our ideas about effective data visualization, and how the concept of invisible labor can expose the significant human efforts required by our automated systems. And they show why the data never, ever "speak for themselves." Data Feminism offers strategies for data scientists seeking to learn how feminism can help them work toward justice, and for feminists who want to focus their efforts on the growing field of data science. But Data Feminism is about much more than gender. It is about power,

about who has it and who doesn't, and about how those differentials of power can be challenged and changed.

Data Feminism

This edited book examines how sexuality and sexual identity intersect and interact with other identities and subjectivities – including but not limited to race, religion, gender, social class, ableness, and immigrant or refugee status – to form reinforcing webs of privilege and oppression that can have significant implications for language teaching and learning processes. The authors explore how these intersections may influence the teaching of different languages and how pedagogies can be devised to increase equitable access to language learning spaces. They seek to open the conversation on intersectional issues as they relate to sexuality and language teaching and learning, and provide a conversational space where readers can engage with the notion of intersectionality. This book will be of interest to students and scholars of applied linguistics and language education, gender and LGBTQ+ studies, and sociolinguistics, outlining possible future directions for intersectional research.

Intersectional Perspectives on LGBTQ+ Issues in Modern Language Teaching and Learning

This open access book brings together storytelling and self-narrative, creative writing and narrative enquiry to explore a variety of topics in migration from an experiential lens. The volume is hybrid and multi-genre as it contains both scholarly chapters grounded in academic perspectives, as well as personal essays and creative non-fiction. In addition to critical reflections on key migration topics and concepts – like, identity and diversity, integration and agency, transnationalism and return – the scholarly chapters also propose a particular methodology for 'workshopping' migration narratives, and writing about (personal) lived experiences through iterations of scientific reflection, narrative enquiry, and creative imagination. The book explores the potential of a new conceptual paradigm and methodological process to learn more, and also 'differently,' about the migration experience. Finally, this volume asks a bigger question too – how do we define the boundaries of research; is it possible to entirely separate the spatial, temporal and methodological parameters in which projects are developed and pursued; and how can the specifics of these multiple contexts contribute to shaping the knowledge being produced?

Migration and Identity through Creative Writing

This book is a call to action for English and English Language Arts teachers who understand that data are not numbers alone, learning is impossible to quantify, and students are our very best teachers. Writing teacher Angela Stockman shows us how pedagogical documentation—the practice of making learning visible, capturing what is seen and heard, and then interpreting those findings in the company of our students and our colleagues—is a humbling and humane practice that grounds what we think we've come to know in the lived experiences of those we intend to serve. In this rich resource, she offers: processes and protocols for documenting learning and analyzing data; resources and planning tools to help you design and execute your own projects; and a digital documentation notebook that you can download for guidance, inspiration, and examples. With the powerful tools in this book, you'll be inspired to reach students whose needs have been ignored by big data and whose identities have been erased by oppressive forms of assessment and evaluation.

The Writing Teacher's Guide to Pedagogical Documentation

In this book dialogue is used as a research, knowledge-sharing and community-building tool in which participants engage with each other in reflecting upon the perspectives of self and others: challenging, complementing and contradicting each other as critical peers. The book aims to be an enactment of sociological reimagination, as a way to reimagine public conversations that inspire criticality, innovation and multimodality around the intersection of identity (self), language (mediating mechanism) and power (sociocultural domain). Each chapter illustrates the use of dialogue as a participatory research tool as a way in which the sharing of knowledge and the growth of understanding occurs through meaning- and strategy-making processes. Together they present dialogue as an integrative model of self-inquiry and social activism and provide a valuable standpoint to understand the participatory nature of our very effort to question and investigate our sense of self in the world.

Reimagining Dialogue on Identity, Language and Power

This authoritative Guide provides 41 summaries of important theories used for research in HRM. Each entry clearly defines a theory, provides insight into the development of the theory, demonstrates the application of the theory to HRM, and discusses areas where the theory could be applied in future research projects. Additionally, the two introductory chapters overview HRM in relation to theory, and explain the importance of theory in research and issues to consider when using theory.

A Guide to Key Theories for Human Resource Management Research

In the modern world, ideology is prominent in elite educational journalism. Because of this, for many audiences, it is not apparent what is a myth and what is fact. For time immemorial, journalism has striven to reconcile these challenges. *Perspectives on Critical Race Theory and Elite Media* uses the tools of critical theory and critical race theory to critique how journalism now resides in something other than reporting facts and considers how elite media instantiates a new understanding of a complicated world. Covering key topics such as segregation, equity, media dissemination, and religious language, this premier reference source is ideal for sociologists, industry professionals, researchers, academicians, scholars, instructors, and students.

Perspectives on Critical Race Theory and Elite Media

This third edition of *Current Approaches in Drama Therapy* offers a revised and updated comprehensive compilation of the primary drama therapy methods and models that are being utilized and taught in the United States and Canada. Two new approaches have been added, *Insight Improvisation* by Joel Gluck, and the *Miss Kendra Program* by David Read Johnson, Nisha Sajjani, Christine Mayor, and Cat Davis, as well as an established but not previously recognized approach in the field, *Autobiographical Therapeutic Performance*, by Susana Pendzik. The book begins with an updated chapter on the development of the profession of drama therapy in North America, followed by a chapter on the current state of the field written by the editors and Jason Butler. Section II includes the 13 drama therapy approaches, and Section III includes the three related disciplines of Psychodrama and Sociodrama, Playback Theatre, and Theatre of the Oppressed that have been particularly influential to drama therapists. This highly informative and indispensable volume is structured for drama therapy training programs. It will continue to be useful as a basic text of drama therapy for both students and seasoned practitioners, including mental health professionals (such as counselors, clinical social workers, psychologists, creative arts therapists, occupational therapists), theater and drama teachers, school counselors, and organizational development consultants.

Advocating for a more welcoming world involves respecting the human dignity and fundamental rights of all individuals, regardless of their place of origin or immigration status. This perspective offers a powerful insight into the dynamics of social justice across borders.

Many Voices, One Nation explores U.S. history through a powerful collection of artifacts and stories from America's many peoples. Sixteen essays, composed by Smithsonian curators and affiliated scholars, offer distinctive insight into the peopling of the United States from the Europeans' North American arrival in 1492 to the near present. Each chapter addresses a different historical era and considers what quintessentially American ideals like freedom, equality, and belonging have meant to Americans of all backgrounds, races, and national origins through the centuries. Much more than just an anthology, this book is a vibrant, cohesive presentation of everyday objects and ideas that connect us to our history and to one another. Using these objects and personal stories as a transmitter, the book invites readers to hear the voices of our many voices, and contemplate the complexity of our one nation. The stories and artifacts included in this volume bring our seemingly disparate pasts together to inspire possibilities for a shared future as we constantly reinterpret our *e pluribus unum* – our nation of many voices.

This expansive Handbook guides readers through a multi-layered landscape of the interpretations and uses of transdisciplinary thinking and practices worldwide. It advances understanding of the strengths and limits of transdisciplinary research in the context of societal power relations, institutional structures and social inequalities. This title contains one or more Open Access chapters.

Handbook of Transdisciplinarity: Global Perspectives

We are living through the wrack of the White Male. As the compact between social hierarchy, inherited privilege, and race (reinforced by gender and other normative categories) shows signs of buckling, his rage and resentment threaten us all. For he is a thing possessed: possessed by his own love of possession, and born to a sense that the world belongs to him and him alone. The spoils of oppression lie coiled inside him, a glut he can't digest, and murder beckons behind the respect that he conceives of as his due." A hybrid of critical essay and memoir, and *Rough Notes to Erasure* contributes to a growing body of work that wrestles with the tacit and embodied nature of privilege and prejudice, and it contributes not only via argument but also through style. Taking inspiration from feminist/queer poetics and what Fred Moten calls "the black avant-garde," these rough notes address the remainder that gets lost in explicit argument, which is the flesh. Where privilege roils through history, and empire whets the appetites. But also where the world catches on its own fractalization by thought, feeling, and desire; and language recovers, for a moment or two, the power to entangle us with our mother tongue.

Rough Notes to Erasure

Social justice, inclusion, and person-centredness are the cornerstones of occupational therapy but despite this, the experiences and inequities faced by Black and minoritised populations in health and social care often go unseen and unattended in occupational therapy practice. This timely book provides a compendium of global insights into the inequities faced by Black and minoritised groups in health and social care and considers how key changes in occupational therapy practice and education can redress disparities. Each contributor is active in the occupational therapy community and is incredibly well placed to provide guidance and practical suggestions on how to create sustainable, antiracist practice and disrupt the current status quo. Invaluable to occupational therapy professional bodies, academics, and students alike, this expansive collection of voices is essential reading for those looking to redress the imbalance of power caused by racism.

The Routledge Handbook of Ecofeminism and Literature explores the interplay between the domination of nature and the oppression of women, as well as liberatory alternatives, bringing together essays from leading academics in the field to facilitate cutting-edge critical readings of literature. Covering the main theoretical approaches and key literary genres of the area, this volume includes: • Examination of ecofeminism through the literatures of a diverse sampling of languages, including Hindi, Chinese, Arabic, and Spanish; native speakers of Tamil, Vietnamese, Turkish, Slovene, and Icelandic. • Analysis of core issues and topics, offering innovative approaches to interpreting literature, including: activism, animal studies, cultural studies, disability, gender essentialism, hegemonic masculinity, intersectionality, material ecocriticism, postcolonialism, posthumanism, postmodernism, race, and sentimental ecology. • Surveys key periods and genres of ecofeminism and literary criticism, including chapters on Gothic, Romantic, and Victorian literatures, children and young adult literature, mystery, and detective fictions, including interconnected genres of climate fiction, science fiction, and fantasy, and distinctive perspectives provided by travel writing, autobiography, and poetry. This collection explores how each of ecofeminism's core concerns can foster a more emancipatory literary theory and criticism, now and in the future. This comprehensive volume will be of great interest to scholars and students of literature, ecofeminism, ecocriticism, gender studies, and the environmental humanities.

In these times of rapid change, including a global pandemic, educational leaders need tools and frameworks that can adapt to evolving shifts in real time. What might happen if a leadership framework could make sense of this complexity in ways that are humane, ethical, culturally responsive, and multifaceted? This book examines how a flux leadership mindset and corresponding tools promote the conditions for educational change that uplift stakeholders and generate contextualized data during emergency situations. The educational leaders at the heart of this book employed a flux leadership tool through a process called "rapid-cycle inquiry," which allows for collaborative inquiries to take

place in real time to answer tough questions and surface stories that are often silenced in times of sudden change. Featuring narratives of what happened to schools during COVID-19, Flux Leadership introduces a generative framework for agile, responsive, anti-racist, trauma-informed, healing-centered leadership for times of crisis and beyond. Book Features: Provides a framework and set of real-time strategies for leaders to engage in critical leadership practice and crisis leadership with attention to equity. Addresses vital school and district-based leadership issues in various contexts, including reflexivity, identity, positionality, racial literacy, brave space leadership, equity-focused professional development, and critical collaboration. Covers a range of vantage points and intersectional social identities in succinct, accessible, and pragmatic ways. Creates a new approach for leaders to get at context and drive homegrown metrics that speak back to and challenge top-down metrics in schools and districts.

Many of us grew up exploring fascinating worlds--in books, films, and, most importantly, our imaginations--places filled with mythological characters and magical landscapes where we had stunning experiences punctuated by the harmless pleasures that any child's mind can conjure. These worlds sometimes end up in our childhood fictions, which have in turn shaped countless imaginations and childhood adventures. The essays in this book attempt to comprehend the worlds of children's progressive fiction--from how they are created to how they affect readers. This book explores what happens when speculative genres (fantasy, horror, and science fiction) and imaginative spaces collide headlong with the realities and surrealities of modern childhood. It moves back and forth between Oz, Wonderland, Redwall and Fear Street, and explores series such as Nancy Drew, Inkheart, The Mortal Instruments, the Miss Peregrine series and more. Many of these works feature children who must save the day--to stop the bad guy, kill the monster, complete the quest and rescue adults--leading us to wonder if fantastic spaces in children's progressive fiction are really helping kids prepare to save the world rather than helping them temporarily escape it.

Roads to Decolonisation: An Introduction to Thought from the Global South is an accessible new textbook that provides undergraduate students with a vital introduction to theory from the Global South and key issues of social justice, arming them with the tools to theorise and explain the social world away from dominant Global North perspectives. Arranged in four parts, it examines key thinkers, activists and theory-work from the Global South; theoretical concepts and socio-historical conditions associated with 'race' and racism, gender and sexuality, identity and (un)belonging in a globalised world and decolonisation and education; challenges to dominant Euro-American perspectives on key social justice issues, linking decolonial discourses to contemporary case studies. Each chapter offers an overview of key thinkers and activists whose work engages with social justice issues, many of whom are under-represented or left out of undergraduate humanities and social sciences textbooks in the North. This is essential reading for students of the humanities and social sciences worldwide, as well as scholars keen to embed Southern thought in their curricula and pedagogical practice.

Roads to Decolonisation

This book is guided through the powerful ideological frameworks of culture and social reproduction and looks specifically to the role of schooling as a vehicle for catalysing change.

The Tiger Assignment

Janine's kidnapping by a group of hoodlums sets a flurry of events in relation to her rescue. Her mother's quest of getting her back and unharmed leads her to Jemz. Their 1st meeting leaves her with doubts about his well claimed capabilities until after his brief martial arts demonstration. Jemz suddenly finds himself facing a formidable opponent from the likes of The Cat (who never smiles), Charlie (The Mountain Man), Joodah "Dreadlocks" and ultimately The Boss - a super martial arts machine. This proves to be a tall order, forcing him to apply every trick in the book. The following rescue mission is full

of attacks, counter-attacks, real-time humor and tense moments coupled with near failures. Will Jemz succeed?

Assignment--Tiger Devil

From a New York Times–bestselling author, a doctor travels to a colony planet with her animal assistants and stumbles upon a criminal conspiracy. Dr. Shona Taylor takes on a new assignment on a new space colony, and discovers a chilling reality behind a picture perfect planet . . . What price for paradise? Jardindor is, by most estimates, a new Eden: from the number of trees to the exact spacing of every lamppost and garden, the alien planet is perfection, a totally controlled terraformed world on the outreaches of colonized space. When Dr. Shona Taylor receives her posting as physician to the settlers on Jardindor, she packs up her family—children and medical menagerie, as well as Chirwl, the alien otter—expecting a very serene six months. But the people of Jardindor are guarding more than their perfect world. They're hiding a dark secret, and as Shona learns more about her new hosts and their strange fascination with animals, her new job turns into a nightmare.

There exists a wealth of information about inquiry and about science, technology, engineering, and mathematics (STEM), but current research lacks meaningfully written, thoughtful applications of both topics. Cases on Inquiry through Instructional Technology in Math and Science represents the work of many authors toward meaningful discourse of inquiry used in STEM teaching. This book presents insightful information to teachers and teacher education candidates about using inquiry in the real classroom, case studies from which research suggests appropriate uses, and tangible direction for creating their own inquiry based STEM activities. Sections take the reader logically through the meaning of inquiry in STEM teaching, how to use technology in modern classrooms, STEM projects which successfully integrate inquiry methodology, and inquiry problem solving within STEM classrooms with the aim of creating activities and models useful for real-world classrooms.

Fluent aphasia is a language disorder that follows brain damage, causing difficulty in finding the correct words and structuring sentences. Speakers also experience problems in understanding language, severely impairing their ability to communicate. In this informative study Susan Edwards provides a detailed description of fluent aphasia, by drawing widely on research data, and by comparing fluent aphasia with other types of aphasia as well as with normal language. She discusses evidence that the condition affects access to underlying grammatical rules as well as to the lexicon, and explores the relationship between language and the brain, the controversy over aphasia syndromes, the assessment of aphasia via standardized tests, and the analysis of continuous speech data. Extensive examples of aphasic speech are given, and the progress of one fluent aphasic speaker is discussed in detail. Written by an internationally renowned expert, this book will be invaluable to linguists and practitioners alike.

Jim Bartlett is a very reliable and unique professional killer for hire in the U.S. His clientele consist of mob bosses, who employ him to kill criminals, businessmen and politicians. During the Vietnam War, Bartlett was told by his commanding officer that he was "either a natural-born killer or natural-born soldier." His experience with killing led him to his career. After 29 years, Bartlett was feeling a change within himself because of his desire to be safe and secure with the woman he loved. Soon he decides to retire and on his own terms. He realizes his biggest challenge might not be the next assignment but how to retire on a tropical island with her. The problem is most hit men don't retire; they either go to jail or get killed. When a mob attorney contacts him for an assignment, Bartlett realizes this will be his last. At first, it appears to be a simple hit, until a series of unexpected events make it his most difficult yet. The story culminates with a series of surprise endings for many of the main characters who find themselves either dead, under indictment with their careers ruined or safe and secure. About the Author: John W. Gemmer resides in Syracuse and is a native resident of Indiana. For nine years, John was fortunate enough to spend part of his retirement years in Naples and Orlando, Florida. He is an Indiana University graduate and was a member of the U.S. Naval forces from 1968-1972. He served on the USS Harold J. Ellison DD 864 and worked for SACLANT, a NATO command. John spent the majority of his professional years as publisher of The Goshen (IN) News, a daily community newspaper. Gemmer had a kidney transplant on Dec. 28, 2010. In his spare time, he enjoys boating and jet skiing with family and friends, target shooting as well as reading and watching crime and drama movies. John is an avid Notre Dame, NFL and NBA fan. He has one daughter and is a proud grandfather of four.

Loss of biodiversity is among the greatest problems facing the world today. Conservation and the Genetics of Populations gives a comprehensive overview of the essential background, concepts, and tools needed to understand how genetic information can be used to conserve species threatened with extinction, and to manage species of ecological or commercial importance. New molecular techniques, statistical methods, and computer programs, genetic principles, and methods are becoming increasingly useful in the conservation of biological diversity. Using a balance of data and theory, coupled with basic and applied research examples, this book examines genetic and phenotypic variation in natural populations, the principles and mechanisms of evolutionary change, the interpretation of genetic data from natural populations, and how these can be applied to conservation. The book includes examples from plants, animals, and microbes in wild and captive populations. This second edition contains new chapters on Climate Change and Exploited Populations as well as new sections on genomics, genetic monitoring, emerging diseases, metagenomics, and more. One-third of the references in this edition were published after the first edition. Each of the 22 chapters and the statistical appendix have a Guest Box written by an expert in that particular topic (including James Crow, Louis Bernatchez, Loren Rieseberg, Rick Shine, and Lisette Waits). This book is essential for advanced undergraduate and graduate students of conservation genetics, natural resource management, and conservation biology, as well as professional conservation biologists working for wildlife and habitat management agencies. Additional resources for this book can be found at: www.wiley.com/go/allendorf/populations.

Handbook of Clinical and Experimental Neuropsychology

The relentless loss of biodiversity is among the greatest problems facing the world today. The third edition of this established textbook provides an updated and comprehensive overview of the essential background, concepts, and tools required to understand how genetics can be used to conserve species, reduce threat of extinction, and manage species of ecological or commercial importance. This edition is thoroughly revised to reflect the major contribution of genomics to conservation of populations and species. It includes two new chapters: "Genetic Monitoring" and a final "Conservation Genetics in Practice" chapter that addresses the role of science and policy in conservation genetics. New genomic techniques and statistical analyses are crucial tools for the conservation geneticist. This accessible and authoritative textbook provides an essential toolkit grounded in population genetics theory, coupled with basic and applied research examples from plants, animals, and microbes. The book examines genetic and phenotypic variation in natural populations, the principles and mechanisms of evolutionary change, evolutionary response to anthropogenic change, and applications in conservation and

management. Conservation and the Genomics of Populations helps demystify genetics and genomics for conservation practitioners and early career scientists, so that population genetic theory and new genomic data can help raise the bar in conserving biodiversity in the most critical 20 year period in the history of life on Earth. It is aimed at a global market of applied population geneticists, conservation practitioners, and natural resource managers working for wildlife and habitat management agencies. It will be of particular relevance and use to upper undergraduate and graduate students taking courses in conservation biology, conservation genetics, and wildlife management.

The Last Assignment

This book is a series of remembrances and vignettes of a 1950 high school class who were born during the Great Depression and spent their childhoods during World War II. Memories of these events are included in sections on the Great Depression and World War II. Stories are included from those serving in the Korean and Vietnam wars. The book ends with a legacy section in which we ponder what our accomplishments over the last half-century may mean for the future.

Conservation and the Genetics of Populations

This story is not about Japan. It is about all people. It is about tragedy and fear. It is about courage. It is about love, and it is about growth. It is about doing the right thing. It is written in English, but the setting is Western Manchuria early in World War II. The pilots of the Japanese forces are facing their first combat against top notch Russian pilots. They apply their training but find that actual combat is not what the books described. They find comfort in the arms of the women that provide relief for a price. Manchuria + Mongolia. Russia + Japan. Buddhism + Christianity + Islam. Occupation + Oppression. The Worlds Oldest Profession + Sympathy and Humanity. Add them all together and you get: A compelling story of a young man thrown into a stark reality. He must grow quickly and learn the hard way. From the fear and danger to: The Tigers Den

Agent-based models simulate large-scale social systems. They assign behaviors and activities to "agents" (individuals) within the population being modeled and then allow the agents to interact with the environment and each other in complex simulations. Agent-based models are frequently used to simulate infectious disease outbreaks, among other uses. RTI used and extended an iterative proportional fitting method to generate a synthesized, geospatially explicit, human agent database that represents the US population in the 50 states and the District of Columbia in the year 2000. Each agent is assigned to a household; other agents make up the household occupants. For this database, RTI developed the methods for • generating synthesized households and persons • assigning agents to schools and workplaces so that complex interactions among agents as they go about their daily activities can be taken into account • generating synthesized human agents who occupy group quarters (military bases, college dormitories, prisons, nursing homes). In this report, we describe both the methods used to generate the synthesized population database and the final data structure and data content of the database. This information will provide researchers with the information they need to use the database in developing agent-based models. Portions of the synthesized agent database are available to any user upon request. RTI will extract a portion (a county, region, or state) of the database for users who wish to use this database in their own agent-based models.

This new, expanded textbook describes all phases of a modern compiler: lexical analysis, parsing, abstract syntax, semantic actions, intermediate representations, instruction selection via tree matching, dataflow analysis, graph-coloring register allocation, and runtime systems. It includes good coverage of current techniques in code generation and register allocation, as well as functional and object-oriented languages, that are missing from most books. In addition, more advanced chapters are now included so that it can be used as the basis for a two-semester or graduate course. The most accepted and successful techniques are described in a concise way, rather than as an exhaustive catalog of

every possible variant. Detailed descriptions of the interfaces between modules of a compiler are illustrated with actual C header files. The first part of the book, Fundamentals of Compilation, is suitable for a one-semester first course in compiler design. The second part, Advanced Topics, which includes the advanced chapters, covers the compilation of object-oriented and functional languages, garbage collection, loop optimizations, SSA form, loop scheduling, and optimization for cache-memory hierarchies.

"Like many 18-year-olds who sign up to serve with the U.S. Navy, Petersen was looking for adventure when he enlisted. The difference between him and the average kid of 1950, when he enlisted, was that Petersen was African American. At the time military opportunities were limited for blacks, so it was remarkable that Petersen, revealed here as an intense go-getter, was admitted to the highly competitive naval aviation cadet program. He would go on to become the first African American pilot, then flag officer, then three-star general in the deeply conservative Marine Corps. Assisted by veteran biographer Phelps, Petersen relates his personal and career trajectory from wide-eyed kid to seasoned combatant. Although the presentation at times is overly detailed, with recollections of Petersen's acquaintances sprinkled liberally throughout. This work offers valuable insight into the evolution of both the military and the society at large through the experience of one man and his family. It's hard not to wince when Petersen describes being stopped for impersonating a military officer at a time when blacks in the service were presumed to be enlisted men. Other anecdotes are more benign, such as the time a puzzled young Korean woman tried to wipe the color from his face. To Petersen's credit, he includes much commentary from his first wife, Ellie, who is candid about the toll of being married to an ambitious pioneer. Through her, readers see the mettle of that rare breed of social groundbreakers." — Publishers Weekly

The Tiger's Den

Every night, Zack is plagued by bizarre recurring nightmares—what if his dream world is trying to tell him something? Zack has never fit in with the rest of his family, and for as long as he can remember, he has experienced strange nightmares of a shadowy man. His therapist, Nancy, says these dreams are his subconscious mind's way of trying to reveal something, but Zack isn't so sure. After all, what could nightmares filled with tigers and apple orchards possibly mean? Luckily, he has the beautiful new girl at school to take his mind off his troubles. For his final assignment in art class, Zack is tasked with showing the darkest depths of his soul, and he knows that his nightmares are the perfect subject for a painting. But when a long-repressed memory from his childhood suddenly surfaces, Zack's life is thrown into turmoil, and he discovers everything he thought about his family is based on a lie. Zack must finally confront his past before he can have a future free of the secret that haunts him.

1990 Census of Population and Housing: Census geography

Waiting for the end of the school day, Linny, Tuck, and Ming-Ming receive an assignment to travel the world and help a tiger in trouble.

1990 Census of Population and Housing

From Book's Preface: Contains summary population totals for the United States, Puerto Rico, and the Island areas and for major race groups and an overview of political, statistical, and technological context in which the census took place. Describes preparations for the census, including lessons learned from the 1990 census, consultations with governmental and other data users, recommendations from the National Academy of Sciences and other advisory groups, and the plans for and results of census tests conducted between 1992 and 1998. Summarizes the history of each question on the short and long forms, the response categories, data uses, and any associated editing, allocation, and coding instructions. Reviews evaluations and recommendations from the 1990 program, the decision to use paid advertising in Census 2000, developing and implementing an integrated marketing strategy, components of the partnership program, and a series of special initiatives. Describes the organization and distribution of regional census centers and local census offices, the hiring and training of temporary field staff, the hardware and software used to track and assess census progress, and the different components of the enumeration process. Summarizes the decision to hire contractors to conduct data capture and manage the data capture centers, the hardware and software used to capture census data,

the headquarters tabulation process, identification and deletion of duplicates, editing and imputation, intermediate data files, and the creation of the 100 percent and sample detail files. Covers such topics as data collection and tabulation geography, mapping, creating and updating the census address list, data products and their dissemination, the experimental and evaluation programs, legislation, litigation, the debate over sampling, and the census in Puerto Rico and the Island Areas.

Surface Transportation: Competitive Grant Programs Could Benefit from Increased Performance Focus and Better Documentation of Key Decisions

"We live together under the thick canopy, each searching for the other; the same leeches and mosquitoes that feed on our blood feed on his blood." John Edmund Delezen felt a kinship with the people he was instructed to kill in Vietnam; they were all at the mercy of the land. His memoir begins when he enlisted in the Marine Corps and was sent to Vietnam in March of 1967. He volunteered for the Third Force Recon Company, whose job it was to locate and infiltrate enemy lines undetected and map their locations and learn details of their status. The duty was often painful both physically and mentally. He was stricken with malaria in November of 1967, wounded by a grenade in February of 1968 and hit by a bullet later that summer. He remained in Vietnam until December, 1968. Delezen writes of Vietnam as a man humbled by a mysterious country and horrified by acts of brutality. The land was his enemy as much as the Vietnamese soldiers. He vividly describes the three-canopy jungle with birds and monkeys overhead that could be heard but not seen, venomous snakes hiding in trees and relentless bugs that fed on men. He recalls stumbling onto a pit of rotting Vietnamese bodies left behind by American forces, and days when fierce hunger made a bag of plasma seem like an enticing meal. He writes of his fallen comrades and the images of war that still pervade his dreams. This book contains many photographs of American Marines and Vietnam as well as three maps.

The Tiger

Discusses the various species of tigers and their behavior and examines how they have become endangered through habitat loss, hunting, research, and captivity.

From the author of *What the Body Remembers*, an extraordinary story of love and espionage, cultural tension and displacement, inspired by the life of Noor Inayat Khan (code name "Madeleine"), who worked against the Occupation after the Nazi invasion of France. When Noor Khan's father, a teacher of mystical Sufism, dies, Noor is forced to bow, along with her mother, sister and brother, to her uncle's religious literalism and ideas on feminine propriety. While at the Sorbonne, Noor falls in love with Armand, a Jewish musician. Though her uncle forbids her to see him, they continue meeting in secret. When the Germans invade in 1940, Armand persuades Noor to leave him for her own safety. She flees with her family to England, but volunteers to serve in a special intelligence agency. She is trained as a radio operator for the group that, in Churchill's words, will "set Europe ablaze" with acts of sabotage. She is then sent back to Occupied France. Unwavering courage is what Noor requires for her assignment and her deeply personal mission — to re-unite with Armand. As her talisman, she carries her grandmother's gift, an heirloom tiger claw encased in gold. The novel opens in December 1943. Noor has been imprisoned. She begins writing in secret, tracing the events that led to her capture. When Germany surrenders in 1945, her brother Kabir begins his search through the chaos of Europe's Displaced Persons camps to find her. In its portrayal of intolerance, *The Tiger Claw* eerily mirrors our own times, and progresses with moments of great beauty and white-knuckle tension towards a moving and astonishing denouement. Excerpt from *The Tiger Claw* December moved in, taking up residence with Noor in her cell, and freezing the radiator. Cold coiled in the bowl of her pelvis, turning shiver to quake as she lay beneath her blanket on the cot. Above, snow drifted against the glass and bars. Shreds of thoughts, speculations, obsessions ... some glue still held her fragments together. The flap door clanged down. "Herr Vogel..." The rest, in rapid German, was senseless. Silly hope reared inside; she reined it in. The guard placed something on the thick, jutting tray, something invisible in the dingy half-light. Soup probably. She didn't care. She heard a clunk and a small swish. Yes, she did.
