The Romance of Madame Tussaud's

The earliest information we have concerning Madame Tussaud is that she was born in Switzerland on the 7th of December, 1760, and was the only child of Joseph and Marie Grosholtz. Her mother was the daughter of a Swiss clergyman. She married on the 20th of October, 1795, François Tussaud, who, it appears, was her junior by seven years. We are able to trace his family back as far as 1630, when his great-great-grandfather, one Denis Tusseaud—for that is how he spelt his name—was born. There is documentary evidence that Denis was brought from Burgundy to Mâcon in 1631, his family also coming from Burzy, close by, in 1658. His descendants lived at Mâcon for more than a century, their occupation being generally that of workers in metal. The great-grandfather of François was Henry Tusseaud (1684-1717), and his grandfather's name was Claude (1716-1767). François' father (1744-1786) was the first of the family to adopt the present spelling of the name, although we find that various members of the family^[viii] used the forms Tussot, Tusseau, Tuissiaud, Tussiaut, Tusseaut, Tussiau, or Thusseaud. Madame Tussaud's marriage does not appear to have been a happy one, for we learn that in 1800—two years before she came to England—she separated from her husband, of whom we hear nothing further, although he is known to have been living in Paris in the lifetime of his grandsons. The foundress of the famous Exhibition had two sons, Joseph and Francis. Francis (1800-1873) had several sons, the eldest of whom, Joseph Randall (1831-1892), who was a student and exhibitor at the Royal Academy, was the father of the author of this book. Mr. John Theodore Tussaud was born in Kensington on the 2nd of May, 1858, and at the age of six was sent to St. Charles's College, London, where he came under the influence of Cardinal Manning, who took a keen personal interest in his welfare.

Madame Tussaud

The story of a woman whose work inspired one of London's greatest attractions. Born in Strasbourg, the young Marie Tussaud learned her skills from her mother's employer, Philippe Curtius. In 1780 she became tutor to King Louis XVI's sister and for eight years prior to the Revolution lived at the court in Versailles. In Paris throughout the Revolution, she was often in extreme danger. Incredibly, she was forced to make death masks from the decapitated heads of her friends who fell to the guillotine. In 1802, she opened her first exhibition at the Lyceum theatre in London. With modelled figures such as Napoleon and Josephine and other notables from the Revolution, her exhibition was very popular. She also had the guillotine blade that severed Marie Antoinette's head. For the next 26 years Madame Tussaud toured England and Scotland with her Waxwork Exhibition, until she established her base in Baker Street in 1835. She had always had a "separate room"

Madame Tussaud

Madame Tussaud is a name known all over the world. The queue to her exhibition is a landmark. Such is its phenomenal success, it has eclipsed the woman who started it all. But Marie Tussaud led a remarkable life. With grit and audacity she overcame reversals of fortune and built an extraordinary spectacle. Of lowly birth and uncertain paternity, Marie became apprentice to a charismatic showman in Paris who taught her the art of wax modelling. They plied their trade among a colourful cast of 'Italian singers, pastry cooks, restaurant keepers, marionettes, acrobats, giants, dwarves, ferocious beasts'. In her memoir she also claimed friendship with royals and revolutionaries including Marie Antoinette and Voltaire. But, as a born entrepreneur, did Marie's flair for publicity extend to moulding her own story? After the Revolution, she came to England and took her show on the road. She pursued the punishing lifestyle of the travelling show for many years and secured a lasting reputation in the Dickensian world

of 19th century popular entertainment. More than a biography, this captivating cultural history plunges the reader into popular culture of the past; the escapist delights of canine cabaret, living skeletons, phantasmagoria and of course waxworks. It reveals a truth that Madame Tussaud understood and harnessed from the outset - the mass-market appeal of glamour and gore is enduring and universal.

Madame Tussaud & Sons' Exhibition Catalogue, Containing Biographical & Descriptive Sketches of the Distinguished Characters which Compose Their Exhibition & Historical Gallery

A “meticulously researched and deftly written biography” of the woman behind the famed wax museums, and their origins in the era of the French Revolution (Midwest Book Review). Madame Marie Tussaud is known worldwide for the chain of wax museums she started over two hundred years ago. Less known is that her original wax models were often of the famous and infamous people she personally knew during and after the French Revolution. These were people like Voltaire, Robespierre, and Napoleon—people who changed the world. Even more, the wax figures were depicted in scenes drawn from the horrors she experienced during the reign of terror in Paris during her early adult years. This book shows how the traumatic and cataclysmic experiences of Madame Tussaud's early life became part of her legacy. She created a succession of scenes in wax, telling events as she personally experienced them. Her wax sculptures were visceral. She made them herself, at times from the living person's head and at other times from the recently guillotined head of a former houseguest. As a result, people were drawn to her wax displays because they were the most intense way of experiencing those events themselves. This is the story not only of a unique artist, but of how one of history's bloodiest events influenced her life and work.

Marie

Millions have visited the museums that bear her name, yet few know much about Madame Tussaud. A celebrated artist, she had both a ringside seat at and a cameo role in the French Revolution. A victim and survivor of one of the most tumultuous times in history, this intelligent, pragmatic businesswoman has also had an indelible impact on contemporary culture, planting the seed of our obsession with celebrity. In *Madame Tussaud*, Kate Berridge tells this fascinating woman's complete story for the first time, drawing upon a wealth of sources, including Tussaud's memoirs and historical archives. It is a grand-scale success story, revealing how with sheer graft and grit a woman born in 1761 to an eighteen-year-old cook overcame extraordinary reversals of fortune to build the first and most enduring worldwide brand identified simply by reference to its founder's name: Madame Tussaud's.

The Manors of Suffolk: Notes on Their History and Devolution;

This book offers a systematic study of the emergence and early development of compound nouns in first language acquisition from a cross-linguistic and typological perspective. The language sample is both genealogically and typologically diversified, ranging from languages rich in compounds, such as German, Saami, Estonian and Finnish, to languages poor in compounds, such as French. Some of them differ in compound richness according to genres of adult-directed speech in contrast to child-directed speech and thus also child speech, like Russian, Lithuanian and especially Greek. Differences in the delimitation and transition between compounds and phrases and in the distribution of subtypes of compounds in these languages involve great typological variety and thus different tasks for children acquiring them. The eleven languages investigated in the volume and the common methodology of longitudinal collection of spontaneous speech data concerning the interaction between children and their caretakers or peers, supplemented by lexical typology as a new means of cross-linguistic comparison of language acquisition, allow new generalizations and make the volume a unique contribution.

Visitation of England and Wales

The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, *Yvain*, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. *Yvain* is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

A true account of a turning point in medieval history that shaped the modern world, from “a superb storyteller” and the author of *When Jesus Became God* (Los Angeles Times). Europe was in the long slumber of the Middle Ages, the Roman Empire was in tatters, and the Greek language was all but forgotten—until a group of twelfth-century scholars rediscovered and translated the works of Aristotle. The philosopher’s ideas spread like wildfire across Europe, offering the scientific view that the natural world, including the soul of man, was a proper subject of study. The rediscovery of these ancient ideas would spark riots and heresy trials, cause major upheavals in the Catholic Church—and also set the stage for today’s rift between reason and religion. Aristotle’s *Children* transports us back to this pivotal moment in world history, rendering the controversies of the Middle Ages lively and accessible, and allowing us to understand the philosophical ideas that are fundamental to modern thought. “A superb storyteller who breathes new life into such fascinating figures as Peter Abelard, Albertus Magnus, St. Thomas Aquinas, Roger Bacon, William of Ockham and Aristotle himself.” —Los Angeles Times “Rubenstein’s lively prose, his lucid insights and his crystal-clear historical analyses make this a first-rate study in the history of ideas.” —Publishers Weekly

The Manors of Suffolk; Notes on Their History and Devolution, with Some Illustrations of the Old Manor Houses

Education is a challenging subject for anarchists. Many are critical about working within a state-run education system that is embedded in hierarchical, standardized, and authoritarian structures. Numerous individuals and collectives envision the creation of counterpublics or alternative educational sites as possible forms of resistance, while other anarchists see themselves as “saboteurs” within the public arena—believing that there is a need to contest dominant forms of power and educational practices from multiple fronts. Of course, if anarchists agree that there are no blueprints for education, the question remains, in what dynamic and creative ways can we construct nonhierarchical, anti-authoritarian, mutual, and voluntary educational spaces? Contributors to this edited volume engage readers in important and

challenging issues in the area of anarchism and education. From Francisco Ferrer's modern schools in Spain and the Work People's College in the United States, to contemporary actions in developing "free schools" in the U.K. and Canada, to direct-action education such as learning to work as a "street medic" in the protests against neoliberalism, the contributors illustrate the importance of developing complex connections between educational theories and collective actions. Anarchists, activists, and critical educators should take these educational experiences seriously as they offer invaluable examples for potential teaching and learning environments outside of authoritarian and capitalist structures. Major themes in the volume include: learning from historical anarchist experiments in education, ways that contemporary anarchists create dynamic and situated learning spaces, and finally, critically reflecting on theoretical frameworks and educational practices. Contributors include: David Gabbard, Jeffery Shantz, Isabelle Fremeaux & John Jordan, Abraham P. DeLeon, Elsa Noterman, Andre Pusey, Matthew Weinstein, Alex Khasnabish, and many others.

Venture into New York City's Lower East Side in the late 19th century with the incorrigible miscreants of the Catastrophe Orchestra. Drug-addled, pugilistic, and benevolent, they run a free clinic and experiment with the music of machines. The underside of the city is laid bare in this collection. The Orchestra itself provides only the bookends for five seasonals, a distinctly Victorian genre of short fiction that has been given new life in these pages. Street brawls and gangs, mechanical mothers, slaughterhouses and circuses, magicians and orphanages, laborers and strikes, the Catastrophe Orchestra has seen it all. Five seasonals, a backstory, and two groundbreaking steampunk essays are herein collected.

Haydn's Bible dictionary

Imagine that you are living in a country that does not recognize you as a citizen in spite of the fact that your people have maintained a continuous existence there for several centuries. If that was not enough of a traumatic experience, consider that because of your racial, ethnic and religious identity other ethnic groups that are fighting the brutal military regime in your country for their self-determination and human rights consider you as "settlers" from a neighboring country. It must be your worst nightmare when you realize that half of your people (almost 2 million) have been forced to take asylum or refuge outside, and you may be the next in line to seek a way out of this living hell of xenophobia, discrimination, intolerance, racism and bigotry. The victims are the Rohingya people of Burma (Myanmar). Because of

their religion, race, ethnicity, color and language they are the most discriminated and persecuted people in our planet. Some argue that they are also one of the most forgotten. The Myanmar military regime has denied their citizenship rights, claiming that they are illegal settlers from nearby Bangladesh who have moved into Arakan during the British occupation of Burma in the 19th century. Is there any truth to such allegations? Does the military junta apply the same litmus test against all ethnic and religious groups in matters of citizenship? What is the basis for a nation's claim to self-determination? Must a people wander in the wilderness for two millennia and suffer repeated persecution, humiliation and genocide to qualify? How about the rights of a minority community to survive with their culture and traditions intact? Do they need to be 'children' of a 'higher' God to qualify? What makes the children of a 'lesser' God to be forgotten and denied the same treatment and privilege that was granted hitherto to other nations? For much of its history, Burma has been ruled by military. As has once again been demonstrated recently they are brutal, savage and tyrannical. They have ignored people's verdict in the election and imprisoned leaders and workers of the democracy movement. They cannot be guarantors or protectors of human rights of anyone, let alone religious and ethnic minorities. Do you know that the Rohingyas - face cruel restriction on marriage and those married without government authorization are paraded naked on the streets? - Are restricted from traveling outside their villages? - Have no legal right to own land or property? - Are restricted from getting education, finding work, getting medical and health care? - Are subjected to land confiscation, forced eviction and destruction of homes, offices, schools, mosques, shops, etc., and face religious persecution on a daily basis? - Are victims of staged riots, forced starvation, arbitrary taxation, extortion, arrest, torture and extra-judicial killings? - Are forced to do slave labor for establishment of government infrastructure, new Buddhist settlements, pagodas and monasteries on evicted lands with the government intent of changing the landscape and demography of Arakan? - Are forced to convert to Buddhism &/or worship Buddha? Do you know that when it comes to the Rohingya people, the Burmese government doesn't uphold any of the Articles of the Universal Declaration of Human Rights? Nothing can excuse us from the criminal silence that we practice in not voicing our concern about the plight of the Rohingya people. "The Forgotten Rohingya" makes a strong case for mobilizing concerned citizens of our globe to ease their sufferings. The author analyzes origin of the Rohingya people and offers ideas to solve their problem. The author also discusses problems of xenophobia and racism, which are so rampant in this country of many races, ethnicities and religions. He also analyzes the role of Daw Suu Kyi and failure of Burma's orange revolution.
