The classic book on systems thinking—with more than half a million copies sold worldwide! "This is a fabulous book... This book opened my mind and reshaped the way I think about investing."—Forbes "Thinking in Systems is required reading for anyone hoping to run a successful company, community, or country. Learning how to think in systems is now part of change-agent literacy. And this is the best book of its kind."—Hunter Lovins In the years following her role as the lead author of the international bestseller, *Limits to Growth*—the first book to show the consequences of unchecked growth on a finite planet—Donella Meadows remained a pioneer of environmental and social analysis until her untimely death in 2001. *Thinking in Systems* is a concise and crucial book offering insight for problem solving on scales ranging from the personal to the global. Edited by the Sustainability Institute's Diana Wright, this essential primer brings systems thinking out of the realm of computers and equations and into the tangible world, showing readers how to develop the systems-thinking skills that thought leaders across the globe consider critical for 21st-century life. Some of the biggest problems facing the world—war, hunger, poverty, and environmental degradation—are essentially system failures. They cannot be solved by fixing one piece in isolation from the others, because even seemingly minor details have enormous power to undermine the best efforts of too-narrow thinking. While readers will learn the conceptual tools and methods of systems thinking, the heart of the book is grander than methodology. Donella Meadows was known as much for nurturing positive outcomes as she was for delving into the science behind global dilemmas. She reminds readers to pay attention to what is important, not just what is quantifiable, to stay humble, and to stay a learner. In a world growing ever more complicated, crowded, and interdependent, *Thinking in Systems* helps readers avoid confusion and helplessness, the first step toward finding proactive and effective solutions.

A compassionate, shame-free guide for your darkest days "A one-of-a-kind book . . . to read for yourself or give to a struggling friend or loved one without the fear that depression and suicidal thoughts will be minimized, medicalized or over-spiritualized."—Kay Warren, cofounder of Saddleback Church What happens when loving Jesus doesn't cure you of depression, anxiety, or suicidal thoughts? You might be crushed by shame over your mental illness, only to be told by well-meaning Christians to "choose joy" and "pray more." So you beg God to take away the pain, but nothing eases the ache inside. As darkness lingers and color drains from your world, you're left wondering if God has abandoned you. You just want a way out. But there's hope. In *I Love Jesus, But I Want to Die*, Sarah J. Robinson offers a healthy, practical, and shame-free guide for Christians struggling with mental illness. With unflinching honesty, Sarah shares her story of battling depression and fighting to stay alive despite toxic theology that made her afraid to seek help outside the church. Pairing her own story with scriptural insights, mental health research, and simple practices, Sarah helps you reconnect with the God who is present in our deepest anguish and discover that you are worth everything it takes to get better. Beautifully written and full of hard-won wisdom, *I Love Jesus, But I Want to Die* offers a path toward a rich, hope-filled life in Christ, even when healing doesn't look like what you expect.

#### A Matter of Trust (Montana Rescue Book #3)

Can you imagine not being able to speak or communicate? The silence, the loneliness, the pain. But, inside you disappear to magical places, and even meet your best friend there. However, most of the time you remain imprisoned within the isolation. Waiting, longing, hoping. Until someone realises your potential and discovers your key, so your unlocking can begin. Now you are free, flying like a wild bird

in the open sky. A voice for the voiceless. Jonathan Bryan has severe cerebral palsy, a condition that makes him incapable of voluntary movement or speech. He was locked inside his own mind, aware of the outside world but unable to fully communicate with it until he found a way by using his eyes to laboriously choose individual letters, and through this make his thoughts known. In *Eye can Write*, we read of his intense passion for life, his mischievous sense of fun, his hopes, his fears and what it's like to be him. This is a powerful book from an incredible young writer whose writing ability defies age or physical disability - a truly inspirational figure. Foreword by Sir Michael Morpurgo A portion of the proceeds from the sale of this book will be donated to Jonathan Bryan's charity, Teach Us Too. <http://www.teachustoo.org.uk/>

Not near as many as there need to be. I've learned everything I can about every damned critter that walks, crawls, or flies, and I'm not gonna let that all be for nothing. ### Birth To Three Matters

'Richly documented and convincingly presented' -- New Society Mods and Rockers, skinheads, video nasties, designer drugs, bogus asylum seekers and hoodies. Every era has its own moral panics. It was Stanley Cohen's classic account, first published in the early 1970s and regularly revised, that brought the term 'moral panic' into widespread discussion. It is an outstanding investigation of the way in which the media and often those in a position of political power define a condition, or group, as a threat to societal values and interests. Fanned by screaming media headlines, Cohen brilliantly demonstrates how this leads to such groups being marginalised and vilified in the popular imagination, inhibiting rational debate about solutions to the social problems such groups represent. Furthermore, he argues that moral panics go even further by identifying the very fault lines of power in society. Full of sharp insight and analysis, *Folk Devils and Moral Panics* is essential reading for anyone wanting to understand this powerful and enduring phenomenon. Professor Stanley Cohen is Emeritus Professor of Sociology at the London School of Economics. He received the Sellin-Glueck Award of the American Society of Criminology (1985) and is on the Board of the International Council on Human Rights. He is a member of the British Academy.

By 1926, it seemed that John R. Brinkley's experimental rejuvenation cure—transplanting goat glands into aging men—had taken the nation by storm. Never mind that "Doc" Brinkley's medical credentials were shaky at best and that he prescribed medication over the airwaves via his high-power radio stations. To most in the medical field, he was a quack. But to his many patients and listeners, he was a brilliant surgeon, a savior of their lost manhood and youth. His rogue radio stations, XER and its successor XERA, eventually broadcast at an antenna-shattering 1,000,000 watts and not only were a megaphone for Brinkley's lucrative quackery but also hosted an unprecedented number of then-unknown country musicians and other guests. The Bizarre Careers of John R. Brinkley tells the story of the infamous "Goat Gland Doctor"—a controversial medical charlatan, groundbreaking radio impresario, and prescient political campaigner—and recounts his amazing rags-to-riches-to-rags career. A master manipulator and skilled con artist, Brinkley left behind a patchwork of myths and unreliable personal accounts that many writers have merely perpetuated—until now. Alton Lee brings Brinkley's infamous legacy to the forefront, exploring how he ruthlessly exploited the sexual frustrations of aging men and the general public's antipathy toward medical doctors. Lee leaves no stone unturned in this account of a man who changed the course of American institutions forever.

### The Couple on Maple Drive

Mutual-fund superstar Peter Lynch and author John Rothchild explain the basic principles of the stock market and business in an investing guide that will enlighten and entertain anyone who is high-school age or older. Many investors, including some with substantial portfolios, have only the sketchiest idea of how the stock market works. The reason, say Lynch and Rothchild, is that the basics of investing—the fundamentals of our economic system and what they have to do with the stock market—aren't taught in school. At a time when individuals have to make important decisions about saving for college and 401(k)

retirement funds, this failure to provide a basic education in investing can have tragic consequences. For those who know what to look for, investment opportunities are everywhere. The average high-school student is familiar with Nike, Reebok, McDonald's, the Gap, and the Body Shop. Nearly every teenager in America drinks Coke or Pepsi, but only a very few own shares in either company or even understand how to buy them. Every student studies American history, but few realize that our country was settled by European colonists financed by public companies in England and Holland—and the basic principles behind public companies haven't changed in more than three hundred years. In *Learn to Earn*, Lynch and Rothchild explain in a style accessible to anyone who is high-school age or older how to read a stock table in the daily newspaper, how to understand a company annual report, and why everyone should pay attention to the stock market. They explain not only how to invest, but also how to think like an investor.

#### Folk Devils and Moral Panics

Finding balance in life is a goal many of us strive to achieve. Whether it's through a healthy diet, exercise regimen, state of mind, relationship, or other activity (or all of the above), we spend our days trying to be, and become, our best selves. But what happens when all that focus starts to dominate our lives? When our desire for "perfect health" trumps everything else, perhaps without us even realizing it? What happens when our solution starts becoming the problem? These are questions that author and popular blogger Jordan Younger faced when she decided that her extreme, plant-based lifestyle just wasn't working in favor of her health anymore--and questions that you may be facing too. In *Breaking Vegan*, Jordan reveals how obsessive "healthy" dieting eventually led her to a diagnosis of orthorexia, or a focus on healthy food that involves other emotional factors and ultimately becomes dysfunctional, even dangerous. In candid detail, Jordan shares what it was like to leave veganism, the downfall of her desire to achieve nutritional perfection, and how she ultimately found her way to recovery. In addition to this, Jordan outlines an "anti-diet," whole-foods-based eating plan featuring more than 25 recipes to help inspire others to find similar balance in their own lives. *Breaking Vegan* is about tolerance and forgiveness. And ultimately, forging one's own path toward happiness.

Trieste Publishing has a massive catalogue of classic book titles. Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that this would occur with one of our books. Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality, but also providing value to every one of our readers. Generally, Trieste books are purchased singly - on demand, however they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates.

American Book Publishing Record

Excerpt from Safety First for Little Folks: First Steps in Civics This little book is, the author believes, fully in accord with the times in its aim and spirit, which is to further good citizenship; civic betterment; cleanliness; economy; the conservation of human life, happiness, and efficiency, both of one's self and of others; and to assist in reducing to some degree the terrible waste of life, limb, and effort resulting

from thoughtlessness and carelessness. Child hood is the appropriate time for teaching the virtue of carefulness, thoughtfulness, helpfulness, and consideration for others. A reasonable care for one's own safety and well-being is an essential element for proper helpfulness to others. Any teaching of selfish disregard for the safety of others has been avoided. Thanks are due to the various municipal departments of New York City, to the Brooklyn Rapid Transit Co., to Walter H. Bennett, State Fire Marshal of Illinois, and to Dr. B. B. Mosher, of Brooklyn, for photographs used in the book. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. ### School Safety

The vast majority of our country is entirely unknown to us because we are banned from setting foot on it. By law of trespass, we are excluded from 92 per cent of the land and 97 per cent of its waterways, blocked by walls whose legitimacy is rarely questioned. But behind them lies a story of enclosure, exploitation and dispossession of public rights whose effects last to this day. The Book of Trespass takes us on a journey over the walls of England, into the thousands of square miles of rivers, woodland, lakes and meadows that are blocked from public access. By trespassing the land of the media magnates, Lords, politicians and private corporations that own England, Nick Hayes argues that the root of social inequality is the uneven distribution of land. Weaving together the stories of poachers, vagabonds, gypsies, witches, hippies, ravers, ramblers, migrants and protesters, and charting acts of civil disobedience that challenge orthodox power at its heart, The Book of Trespass will transform the way you see the land.

### Safety First for Little Folks

A novel of the friendships and woes of two couples, which tells the story of their lives in lyrical, evocative prose by one of the finest American writers of the late 20th century. When two young couples meet for the first time during the Great Depression, they quickly find they have much in common: Charity Lang and Sally Morgan are both pregnant, while their husbands Sid and Larry both have jobs in the English department at the University of Wisconsin. Immediately a lifelong friendship is born, which becomes increasingly complex as they share decades of love, loyalty, vulnerability and conflict. Written from the perspective of the aging Larry Morgan, Crossing to Safety is a beautiful and deeply moving exploration of the struggle of four people to come to terms with the trials and tragedies of everyday life. With an introduction by Jane Smiley.

Using real life stories from his twenty-five years of service with the Metropolitan Police, John Sutherland invites us beyond the cordon tape to bear witness to all he has seen. In doing so, he offers a hopeful vision for how we can tackle some of the biggest challenges facing society today. Includes a new Afterword on policing during the Covid-19 pandemic

### Crossing to Safety

This book is the first practical, hands-on guide that shows how leaders can build psychological safety in their organizations, creating an environment where employees feel included, fully engaged, and encouraged to contribute their best efforts and ideas. Perhaps the leader's most challenging task is to increase intellectual friction while decreasing social friction. When this doesn't happen and it becomes emotionally expensive to say what you truly think and feel, that lack of psychological safety triggers the self-censoring instinct, shuts down learning, and blocks collaboration and creativity. Timothy R. Clark, a former CEO, Oxford-trained social scientist, and organizational consultant, provides a research-based framework to help leaders transform their organizations into sanctuaries of inclusion and incubators of innovation. When leaders cultivate psychological safety, teams and organizations progress through four successive stages. First, people feel included and accepted; then they feel safe to learn, contribute, and finally, challenge the status quo. Clark draws deeply on psychology, philosophy, social science, literature, and his own experiences to show how leaders can, and must, set the tone and model the ideal behaviors—as he says, “you either show the way or get in the way.” This thoughtful and pragmatic guide demonstrates that if you banish fear, install true performance-based accountability, and create a nurturing environment that allows people to be vulnerable as they learn and grow, they will perform beyond your expectations.

This powerful nonfiction picture book explores wildlife crossings around the world and how they are helping save thousands of animals every day. Around the world, bridges, tunnels, and highways are constantly being built to help people get from one place to another. But what happens when construction spreads over, under, across, and through animal habitats? Thankfully, groups of concerned citizens, scientists, engineers, and construction crews have come together to create wildlife crossings to help keep animals safe. From elk traversing a wildlife bridge across a Canadian interstate to titi monkeys using rope bridges over a Costa Rican road to salamanders creeping through tiny tunnels beneath a Massachusetts street, young readers are certain to be delighted and inspired by these ingenious solutions that are saving the lives of countless wild animals.

### Cross-Pollination

The subjects of Salman Rushdie's collection of non-fiction range from The Wizard of Oz, U2, India and Indian writing, the death of Princess Diana, and football, to twentieth-century writers including Angela Carter, Arthur Miller, Edward Said, J. M. Coetzee and Arundhati Roy. In a central section, 'Messages from the Plague Years', Rushdie focuses on the fight against the Iranian fatwa, presenting texts both personal and political, which show for the first time how it was to live through those days. Rushdie's columns for the New York Times confront current issues - Kashmir, Northern Ireland, Kosovo, Islam and the West - as well as lighter topics such as reality TV, sport and sleaze. The book ends with the lectures that give it its title - Rushdie's exploration of the theme of frontiers: crossing them, breaking taboos, and - in the light of September 11 - the world of permeable frontiers in which we all live.

### Continuous Provision - Personal and Thinking Skills

At the crossroads between international relations and anthropology, The Migrant Passage analyzes how people from El Salvador, Honduras, and Guatemala navigate the dangerous and uncertain clandestine journey across Mexico to the United States. However much advance planning they do, they survive the journey through improvisation. Central American migrants improvise upon social roles and physical objects, leveraging them for new purposes along the way. Over time, the accumulation of individual journeys has cut a path across the socioeconomic and political landscape of Mexico, generating a social and material infrastructure that guides future passages and complicates borders. Tracing the survival strategies of migrants during the journey to the North, The Migrant Passage shows how their mobility reshapes the social landscape of Mexico, and the book explores the implications for the future of sovereignty and the nation-state. To trace the continuous renewal of the transit corridor, Noelle Brigden draws upon over two years of in-depth, multi-sited ethnographic fieldwork along human smuggling routes from Central America across Mexico and into the United States. In so doing, she shows the value of disciplinary and methodological border crossing between international relations and anthropology, to understand the relationships between human security, international borders, and clandestine transnationalism.

Discover the amazing true story of P-22, the wild cougar living in Los Angeles, in this inspiring picture book. P-22, the famed "Hollywood Cougar," was born in a national park near Los Angeles, California. When it was time for him to leave home and stake a claim to his own territory, he embarked on a perilous journey—somehow crossing sixteen lanes of the world's worst traffic—to make his home in LA's Griffith Park, overlooking the famed Hollywood sign. But Griffith Park is a tiny territory for a mountain lion, and P-22's life has been filled with struggles. Residents of Los Angeles have embraced this brave cougar as their own and, along with the scientists monitoring P-22, raised money to build a wildlife bridge across Highway 101 to help cougars and other wildlife safely expand their territories and build new homes—ensuring their survival for years to come.
