Teaching History 11-18 is a comprehensive introduction to teaching, learning and assessing history in secondary schools. Drawing on cutting edge research and practice, it draws together recent thinking in teaching and learning in history, teaching and learning in secondary education more generally and classroom-based research to provide a radical re-thinking of the practices of teaching and learning about the past at the beginning of the twenty-first century. At the core of the book is a focus on diversity and its implications: the diversity of classrooms in English schools, cultural diversity and pluralism in accounts of the past, and the diversity of pedagogic and communicative strategies at the disposal of teachers. The book is realistic about the challenges: a precarious place in the curriculum, pupil disaffection, bitter ideological debates about the purpose, place and status of history, but offers a forward-looking rationale for the centrality of the past in debates about identity, social cohesion and persona and social education.

Teaching History 11 - 18

This is an interesting trivia book about world history.

Holt World History: The Human Journey

"This innovative textbook demystifies the subject of world history through a diverse range of case studies. Each chapter looks at an event, person, or place commonly included in comprehensive textbooks, from prehistory to the present and from across the globe ? from the Kennewick Man to gladiators and modern-day soccer and globalization ? and digs deeper, examining why historians disagree on the subject and why their debates remain relevant today. By taking the approach of 'unwrapping the textbook,' David Eaton reveals how historians think, making it clear that the past is not nearly as tidy as most textbooks suggest. Provocative questions like whether ancient Greece was shaped by contact with Egypt provide an entry point into how history professors may sharply disagree on even basic narratives, and how historical interpretations can be influenced by contemporary concerns. By illuminating these historiographical debates, and linking them to key skills required by historians, World History through Case Studies shows how the study of history is relevant to a new generation of students and teachers."--
