

Causes And Consequences Of International Conflict Data Methods And Theory Contemporary Security Studies

[#international conflict](#) [#security studies](#) [#conflict analysis](#) [#causes of conflict](#) [#conflict theory](#)

Explore the intricate causes and profound consequences of international conflict, examining cutting-edge data methods and robust theoretical frameworks essential for contemporary security studies.

We continue to upload new lecture notes to keep our collection fresh and valuable.

Thank you for choosing our website as your source of information.

The document International Conflict Causes is now available for you to access.

We provide it completely free with no restrictions.

We are committed to offering authentic materials only.

Every item has been carefully selected to ensure reliability.

This way, you can use it confidently for your purposes.

We hope this document will be of great benefit to you.

We look forward to your next visit to our website.

Wishing you continued success.

This document is highly sought in many digital library archives.

By visiting us, you have made the right decision.

We provide the entire full version International Conflict Causes for free, exclusively here.

Causes and Consequences of International Conflict

Investigation into the causes of international conflict has in many ways formed the central locus of the early work in the scientific investigation of world politics. This edited volume contains the most recent quantitative work in this area, reflecting the current state of the field in the topics addressed, the data utilized and the methods employed. The book is divided into three parts, presenting first some recent contributions to the work on the causes of international conflict, set in the context of realist theories. The second part addresses issues relating to data, methods and cases used to analyze international conflict, while the third part presents some examples of the use of a variety of different methods to answer questions relating to issues which engage international relations scholars today. The chapters focus on a variety of pertinent topics, and include discussions of important innovations in our ability to analyze conflict, such as the introduction of the Militarized Interstate Dispute (MID) data.

The Evolution of International Security Studies

International Security Studies (ISS) has changed and diversified in many ways since 1945. This book provides the first intellectual history of the development of the subject in that period. It explains how ISS evolved from an initial concern with the strategic consequences of superpower rivalry and nuclear weapons, to its current diversity in which environmental, economic, human and other securities sit alongside military security, and in which approaches ranging from traditional Realist analysis to Feminism and Post-colonialism are in play. It sets out the driving forces that shaped debates in ISS, shows what makes ISS a single conversation across its diversity, and gives an authoritative account of debates on all the main topics within ISS. This is an unparalleled survey of the literature and institutions of ISS that will be an invaluable guide for all students and scholars of ISS, whether traditionalist, 'new agenda' or critical.

War, Torture and Terrorism

This book seeks to demonstrate how rules not only guide a variety of practices within international politics but also contribute to the chaos and tension on the part of agents in light of the structures they sustain. Four central themes- practice, legitimacy, regulation, and responsibility- reflect different

dimensions of a rule governed political order. The volume does not provide a single new set of rules for governing an increasingly chaotic international system. Instead, it provides reflections upon the way in which rules can and cannot deal with practices of violence. While many assume that "obeying the rules" will bring more peaceful outcomes, the chapters in this volume demonstrate that this may occur in some cases, but more often than not the very nature of a rule governed order will create tensions and stresses that require a constant attention to underlying political dynamics. This wide-ranging volume will be of great interest to students of International Law, International Security and IR theory.

Conflict After the Cold War

Edited by one of the most renowned scholars in the field, Richard Betts' *Conflict After the Cold War* assembles classic and contemporary readings on enduring problems of international security. Offering broad historical and philosophical breadth, the carefully chosen and excerpted selections in this popular reader help students engage key debates over the future of war and the new forms that violent conflict will take. *Conflict After the Cold War* encourages closer scrutiny of the political, economic, social, and military factors that drive war and peace. New to the Fifth Edition: Original introductions to each of 10 major parts as well as to the book as a whole have been updated by the author. An entirely new section (Part IX) on "Threat Assessment and Misjudgment" explores fundamental problems in diagnosing danger, understanding strategic choices, and measuring costs against benefits in wars over limited stakes. 12 new readings have been added or revised: Fred C. Iklé, "The Dark Side of Progress" G. John Ikenberry, "China's Choice" Kenneth N. Waltz, "Why Nuclear Proliferation May Be Good" Daniel Byman, "Drones: Technology Serves Strategy" Audrey Kurth Cronin, "Drones: Tactics Undermine Strategy" Eyre Crowe and Thomas Sanderson, "The German Threat? 1907" Neville Henderson, "The German Threat? 1938" Vladimir Putin, "The Threat to Ukraine from the West" Eliot A. Cohen, "The Russian Threat" James C. Thomson, Jr., "How Could Vietnam Happen? An Autopsy" Stephen Biddle, "Afghanistan's Legacy" Martin C. Libicki, "Why Cyberdeterrence is Different"

Contemporary Security Studies

Contemporary Security Studies is a uniquely engaging introduction to Security Studies, covering the key theories and contemporary issues in the field.

The Conflict Helix

This is a book on conflict and consensus aimed at the general reader. In active, plain and direct language it makes the seemingly abstract and complex issues simple. Its view of peace is well-rounded, tough-minded, one that well understands the difficult world of social and personal violence and conflict. At its heart is a simple finding: "to wage peace we need to foster freedom." The human race can best achieve that simple aim by "leaving people alone to form their own communities." "The Conflict Helix" avoids the ambiguous in favor of the categorical; the hedged, qualified statement for the direct Rummel presents a series of basic principles, each concerning an aspect of conflict and peace - psychological, interpersonal, societal, international - and each aspect having its own master principle. These principles are not mere organizational props, but are deeply theoretical and empirically fundamental. The volume expresses the core ideas, results and conclusions of Rummel's major, five-volume work on "Understanding Conflict and War." In discarding technical material and focusing on principles and meaning, "The Conflict Helix" presents an executive summary of a lifetime of work in a digestible form. In light of recent events in Europe, Asia and Latin American this work takes on a special poignancy for the developing no less than the industrialized worlds. Hence, this book should be of value to the general reader as well as professionals and advanced students of international politics.

International Law, Security and Ethics

This book examines the different ways in which the laws governing the use of force and the conduct of warfare have become subject to intense scrutiny and contestation since the initiation of the war on terror. Since the end of the Cold War, the nature of security challenges has changed radically and this change has been recognised by the UN, governments and academics around the world. The 911 attacks and the subsequent launch of the 'war on terror' added a new dimension to this debate on the nature and utility of international law due to the demands from some quarters for a change in the laws governing self-defence and humanitarian intervention. This book analyses the nature of these debates and focuses on key issues that have led to the unprecedented contemporary questioning of both the

utility and composition of international law on the use of force as well as the practicability of using force, including handling of 'prisoners' and 'security risks'. It also identifies the sources of division and addresses the capacities of security policy and international law to adapt to the changed international environment. This book will be of much interest to students of international law, war and conflict studies, and IR and Security Studies in general.

Justice, Intervention, and Force in International Relations

This book analyses the problems of current just war theory, and offers a more stable justificatory framework for non-intervention in international relations. The primary purpose of just war theory is to provide a language and a framework by which decision makers and citizens can organize and articulate arguments about the justice of particular wars. Given that the majority of conflicts that threaten human security are now intra-state conflicts, just war theory is often called on to make judgments about wars of intervention. This book aims to critically examine the tenets of just war theory in light of these changes, and formulate a new theory of intervention and just cause. For Michael Walzer, the leading scholar of just war theory, armed humanitarian intervention is permissible only in cases of genocide, ethnic cleansing, widespread massacres, or enslavement. This book shows why this threshold is too restrictive in light of the progressive shift away from interstate conflict as well as the emerging norms of 'sovereignty as responsibility' and the 'responsibility to protect'. Justice, Intervention and Force in International Relations aims to establish a new, stable foundation for non-intervention and a revised threshold for 'just cause'. In addition, this book demonstrates that over-reliance on the just cause category distorts understanding, analysis, and public discussion of the justice or injustice of resorting to war. This new book will be of much interest to students of ethics, security studies, international relations and international law. Kimberley Hudson is Assistant Professor of Political Science at American International College, and has a PhD in International Relations from Brown University.

World Politics and the Challenges for International Security

World politics as a scientific discipline was established during the second half of the 20th century and has gained rapid distribution in many countries. This field of study focuses attention on current political processes as well as the potential of further development. It is essential to analyze world politics to move progress forward while also strengthening international security and the creation of a safer civilization. World politics cannot be understood without the combined knowledge of history, economics, law, social sciences, and psychology. World Politics and the Challenges for International Security describes the global processes in the field of world politics and international security and discusses global problems, global security, and the threats and challenges that currently affect global society. Covering topics such as digital diplomacy, political corruption, and terrorist psychology, this book is essential for political scientists, researchers, policymakers, global leaders, national security officers, diplomats, professors and students of higher education, and academicians.

Intra-State Conflict, Governments and Security

This volume seeks to understand the central role of governments in intra-state conflicts. The book explores how the government in any society plays two pivotal roles: as a deterrent against those who would use violence; and as a potential danger to the society. These roles come into conflict with each other, as those governments that can best deter potential rebels are also those that can do the most harm to their citizens. Therefore, a balance must be achieved, raising difficult tradeoffs for policy-makers. This volume marks a departure from studies of ethnic conflict and civil war in recent years, which have focused on failed states, in considering the idea that governments themselves may be the source of violence. The contributors not only explore the balancing act that governments must perform, but also on the positive and negative roles that the international community can play in these conflicts. In doing so, the book covers a range of cases from both advanced and newer democracies to the most conflict-prone parts of the world.

European Security Governance

This book focuses on the problems of, and prospects for, strengthening the global system of security governance in a manner consistent with the aspirations and practices of the EU. The EU approach to security governance has been successful in its immediate neighbourhood: it has successfully exported its preferred norms and principles to applicant countries, thereby 'pacifying' its immediate neighbourhood and making all of Europe more secure. The EU governance orientation ultimately seeks

to enlarge the European security community and expand the geopolitical area within which armed conflicts are inconceivable, and where state and private actors converge around a set of norms and rules of behaviour and engagement. The EU's success along its immediate boundaries has not yet been replicated on a global scale; it remains an open question whether the EU system of governance can be exported globally, owing to different normative structures (for example, a tolerance of armed conflict or non-democratic governance internally), great-power competition (such as US--China), or ongoing processes of securitization that has made it difficult to find a commonly accepted definition of security. Moreover, the EU system of security governance clashes with the continuing unwillingness of other major powers to cede or pool sovereignty as well as varying preferences for unilateral as opposed to multilateral forms of statecraft. This edited volume addresses both the practical and political aspects of security governance and the barriers to the globalization of the EU system of security governance, particularly in the multipolar post-Cold War era. This book will be of great interest to students of security governance, EU politics, European Security and IR in general. James Sperling is Professor of Political Science at the University of Akron, Ohio, USA. Jan Hallenberg is Professor of Political Science at the Department of Security and Strategic Studies, Swedish National Defence College. Charlotte Wagnsson is Assistant Professor in the Department of Strategic and Security Studies at the Swedish National Defence College.

NATO, Security and Risk Management

This new volume explores the crisis in transatlantic relations and analyses the role of NATO following the collapse of the Soviet Union. The book offers a unified theory of cooperation in the new security paradigm to explain the current state of transatlantic relations and NATO's failure to adequately transform itself into a security institution for the 21st century. It argues that a new preoccupation with risk filled the vacuum left by the collapse of the Soviet Union, and uses the literature of the Risk Society to analyse the strained politics of the North Atlantic community. Using case studies to show how the West has pursued a strategy of risk management, and the effect this has had on NATO's politics, the book argues that a better understanding of how risk affects Western political cohesion will allow policy makers a way of adapting the structure of NATO to make it more effective as a tool for security. Having analysed NATO's recent failings, the book offers a theory for the way in which it can become an active risk manager, through the replacement of its established structure by smaller, ad hoc groupings.

Security Strategies and American World Order

This book analyses security strategies in the American world order, systematically comparing Russian, Middle Eastern and European policies. The main finding is that the loss of relative power has decisive importance for the security strategies of states, but that particular strategies can only be explained when relative power is combined with ideology and the probability of military conflict. Research on the unipolar world order has focused largely on the general dynamics of the system and the actions of the American unipole. By contrast, this book focuses on states that lost out relatively as a consequence of unipolarity, and seeks to explain how this loss has affected their security strategies. Thus, in essence, the book tells 'the other side of the story' about the contemporary world order. In addition, it makes an important theoretical contribution by systematically coupling relative ideology and relative security with relative power and exploring their explanatory value. This book will be of great interest to students of international relations, security studies and foreign policy.

Rethinking Security Governance

This book explores the unintended consequences of security governance actions and explores how their effects can be limited. Security governance describes new modes of security policy that differ from traditional approaches to national and international security. While traditional security policy used to be the exclusive domain of states and aimed at military defense, security governance is performed by multiple actors and is intended to create a global environment of security for states, social groups, and individuals. By pooling the strength and expertise of states, international organizations, and private actors, security governance is seen to provide more effective and efficient means to cope with today's security risks. Generally, security governance is assumed to be a good thing, and the most appropriate way of coping with contemporary security problems. This assumption has led scholars to neglect an important phenomenon: unintended consequences. While unintended consequences do not need to be negative, often they are. The CIA term "blowback," for example, refers to the phenomenon that a long nurtured group may turn against its sponsor. The rise of al Qaeda, which

had benefited from US Cold War policies, is only one example. Raising awareness about unwanted and even paradoxical policy outcomes and suggesting ways of avoiding damage or limiting their scale, this book will be of much interest to students of security governance, risk management, international security and IR. Christopher Daase is Professor at the Goethe University Frankfurt and head of the research department International Organizations and International Law at the Peace Research Institute Frankfurt (PRIF/HSFK). Cornelius Friesendorf is lecturer at the Goethe University Frankfurt and research fellow at the Peace Research Institute Frankfurt (PRIF/HSFK).

Democracy and Security

It has become generally accepted wisdom that democracies do not go to war against each other. However, there are significant differences between democratic states in terms of their approach to war and security policy in general. This edited book offers a broad examination of how democratic preferences and norms are relevant to security policy beyond the decision of whether to go to war. It therefore offers a fresh understanding of state behaviour in the security realm. The contributors discuss such issues as defence policy, air war, cluster bombs, non-lethal weapons, weapons of mass destruction, democratic and non-democratic nuclear weapon states' transparency, and the political and ideological background of the ongoing 'Revolution in Military Affairs'. It has become generally accepted wisdom that democracies do not go to war against each other. However, there are significant differences between democratic states in terms of their approach to war and security policy in general.

The Homeland Security Dilemma

This book explores the paradox of the 'security dilemma' in International Relations, as applied to the post-9/11 context of homeland security. The book's central argument can be summed up by the following counterintuitive thesis: the more security you have, the more security you will need. It argues that enhancing security does not make terrorism more likely, but rather it raises public expectations and amplifies public outrage after subsequent failures. The book contests that this dilemma will continue to shape American, Canadian and British domestic and international security priorities for decades. In exploring the key policy implications resulting from this, the book highlights the difficulty in finding a solution to this paradox, as the most rational and logical policy options are part of the problem. This book will be of interest to students of Homeland Security, Security Studies, US politics, and IR in general.

International Security: A Very Short Introduction

An accessible, succinct introduction to the complicated issues surrounding today's international security considers such factors as climate change, migration, poverty, health and international terrorism while exploring the nature of key debates as reflected by a broad range of international examples. Original.

Causes of War

Written by leading scholars in the field, Causes of War provides the first comprehensive analysis of the leading theories relating to the origins of both interstate and civil wars. Utilizes historical examples to illustrate individual theories throughout Includes an analysis of theories of civil wars as well as interstate wars -- one of the only texts to do both Written by two former International Studies Association Presidents

Cyber-Conflict and Global Politics

This volume examines theoretical and empirical issues relating to cyberconflict and its implications for global security and politics. Taking a multidimensional approach to current debates in internet politics, the book comprises essays by leading experts from across the world. The volume includes a comprehensive introduction to current debates in the field and their ramifications for global politics, and follows this with empirical case studies. These include cyberconflict, cyberwars, information warfare and hacktivism, in contexts such as Sri Lanka, Lebanon and Estonia, the European Social Forum, feminist cybercrusades and the use of the internet as a weapon by ethno-religious and socio-political movements. The volume presents the theoretical debates and case studies of cyberconflict in a coherent, progressive and truly multidisciplinary way. The book will be of interest to students of cyberconflict, internet politics, security studies and IR in general.

Peace Operations and International Criminal Justice

This new volume provides the first thorough examination of the involvement of peace enforcement soldiers in the detention of indicted war criminals. The book firstly addresses why peace enforcement missions need to be involved in detaining indicted war criminals. This discussion includes an analysis of how the securing of justice and transitional justice is incorporated into the UN's approach to peace-building. It also explores IFOR's, SFOR's and KFOR's activities aimed at detaining indicted war criminals, before turning to an analysis of how the detaining of indicted war criminals is incorporated into peace enforcement doctrines, mandates and rules of engagement. The book then outlines the mechanisms that need to be established in order to enable peace enforcers to effectively arrest war criminals in the areas where they are deployed. It concludes with a discussion of the prospects for the involvement of peace enforcement soldiers in the detention of indicted war criminals, and of what lessons future peace enforcement missions can learn from the experience of IFOR, SFOR and KFOR.

Globalization and Defence in the Asia-Pacific

This edited volume examines the impact of globalisation on the economies, security policies and military-industrial complexes of the Asia-Pacific region. The work is structured into three main parts. The first explores globalization and its general effects on the policy-making of the nation-state; the second section looks at how globalisation affects a country's threat perception and defence posture within the specific context of the Asia-Pacific region; while the third explores how it impacts on a state's allocation of resources to defence, and how economic globalization affects the defence industry, with specific reference to the procurement policies and practices of different states across the Asia-Pacific.

America, the EU and Strategic Culture

This book provides a provocative analysis of relations between Europe and America during the tempestuous years 1998-2004. Analysing EU foreign policy, it concludes that the lessons learnt in interacting with America have been crucial in shaping the emerging EU strategic culture. The book challenges established orthodoxy regarding the sui generis nature of the European Union. Through detailed case-studies, it shows how the US influenced decisions during the formative years of the EU foreign and security policy: during the 1999 Kosovo war, the EU and NATO enlargement processes, and the 2003 Iraq crisis. However, the book argues that although policy ends may be lead by the US, the EU is growing increasingly confident in selecting distinctively 'European' means to achieve these goals. These findings have important implications for understanding both the EU as a foreign policy actor and of the EU-US partnership at the start of the 21st century.

Militancy and Violence in West Africa

This volume provides a systematic and cross-regional analysis of radicalisation, militancy and violence in West Africa. Concern about terrorism in, or from, West Africa, has been recognised in academic research, and the adoption of militarised approaches to addressing it questioned. However, the basis for that questioning – the need to investigate factors such as the historical and socio-economic roots of militancy – is not developed, nor is it substantiated in existing studies. The significant impact of religiously motivated radicalisation and violence in West Africa upon international security makes it essential to understand the issues of militancy and violence in the region. In this volume, the authors draw upon empirical research in West Africa to develop understanding in these areas. Over the course of several chapters written by leading experts in the field, the book successfully blends historical and conceptual analysis with new empirical research gathered from focus group discussions and research interviews. Each of these core studies is structured around five interrelated issues: tracing the antecedents of radicalisation; monitoring trends; identifying actors; anticipating possibilities; and analysing the strength of existing preventive mechanisms. This book will be of much interest to students of African security, African politics, radicalisation, political Islam, war and conflict studies and security studies in general.

Russian Energy Policy and Military Power

This book examines the interplay between energy policy and security policy under Vladimir Putin, and his drive to re-establish Russia's 'greatness'. Assessing the internal contradictions of this policy, the book argues that Russia's desire to strengthen its role of 'energy security' provider is undermined by its inability to secure growth in production of oil and gas. Further, the pressing demand to channel more resources into the military-industrial complex clashes with the growing need to invest in the energy complex, and the priority granted to strategic forces deprives the conventional forces of strike power

and strategic mobility. In conclusion, the author anticipates how these contradictions could be resolved, and suggests three short scenarios for Russia's continuing transition in the next decade. This book will be of interest to students of Russian politics, European politics and international security.

Private Contractors and the Reconstruction of Iraq

Private Contractors and the Reconstruction of Iraq examines the controversial role of military contractors in the reconstruction of Iraq. When 'Operation Iraqi Freedom' was launched in March 2003, few, if any, of the Coalition's political leaders could have envisaged that within a few months the number of private contractors engaged to keep the troops supplied would exceed their actual combat strength. This alternative 'army' was not only to become the largest assemblage of contractors in living memory to accompany a military force into a war zone, but was also responsible for a fundamental transformation of how military logistics were delivered. This book explains how and why the US and UK governments became so dependent upon military contractors during the war in Iraq. It also examines the ramifications this new dependency will have on future military operations, as the conflict in Iraq has shown that private contractors are now indispensable to the attainment of both the military and political objectives of war. Finally, the book discusses what advantages and disadvantages these companies have brought to the reconstruction of Iraq, and what lessons need to be learned from this experience. This book will be of great interest to students of military and strategic studies, Middle Eastern politics and international security, and as well as policymakers and military professionals. Christopher Kinsey is a lecturer in international security at King's College London, Defence Studies Department, at the Joint Services Command and Staff College, Shrivenham. His previous publications include *Corporate Soldiers and International Security: The Rise of Private Military Companies* (Routledge: 2006)

Transatlantic Relations in the 21st Century

This book offers an overview of the interface between European integration, transatlantic relations, and the 'rise of the rest' in the early 21st century. The collapse of the Soviet bloc opened up an era in which the drivers and perceived benefits of the US alliance among European countries have become more variegated and shifting. The proposition that the US remains at once an 'indispensable' and 'intolerable' nation in Europe is a key concept in the alliance, as the US remains inextricably tied to the continent through economic, military and cultural links. This work examines this complex subject area from many angles, including an analysis of the historical and cultural contexts of America's relations with Europe, as well as a discussion of the politics of transatlantic affairs which utilises evidence gleaned from a series of case-studies. In the concluding chapters, the author assesses the likelihood that the West can entrench its global dominance in the realms of "soft" and "hard" power, and by effecting a "controlled reform" that will see multilateral structures open up to emerging powers. This book will be of great interest to students of European Politics, EU integration, transatlantic relations, US foreign policy/diplomacy, International Security and IR in general.

America and Iraq

This edited volume provides an overview on US involvement in Iraq from the 1958 Iraqi coup to the present-day, offering a deeper context to the current conflict. Using a range of innovative methods to interrogate US foreign policy, ideology and culture, the book provides a broad set of reflections on past, present and future implications of US-Iraqi relations, and especially the strategic implications for US policy-making. In doing so, it examines several key aspects of relationship such as: the 1958 Iraqi Revolution; the impact of the 1967 Arab-Israeli War; the impact of the Nixon Doctrine on the regional balance of power; US attempts at rapprochement during the 1980s; the 1990-91 Gulf War; and, finally, sanctions and inspections. Analysis of the contemporary Iraq crisis sets US plans against the 'reality' they faced in the country, and explores both attempts to bring security to Iraq, and the implications of failure.

Military Transformation and Strategy

This book explores the idea of a 'revolution in military affairs' (RMA), which underpins the transformational agenda of the US military, and examines its implications for smaller states. The strategic studies literature on the RMA tends to be American-centric and directed towards the strategic problems of the US military. This volume seeks to fill the gap in the literature and establish an intellectual framework that can assist other, smaller powers in their respective approaches to this issue. The book does so in three main sections; Part I focuses on questions of transformations in strategy and war; Part II explores

transformations in operations; while Part III examines possible impediments to an RMA. This book will be of much interest to students of Military Studies, Asian Studies, Strategic Studies and International Relations in general.

Punishment, Justice and International Relations

This book examines the international political order in the post-Cold War era, arguing that this order has become progressively more punitive. This is seen as resulting from both a human-rights regime that emphasizes legal norms and the aggressive policies of the United States and its allies in the 'War on Terror'. While punishment can play a key role in creating justice in a political system, serious flaws in the current global order militate against punishment-enforcing global norms. The book argues for the necessary presence of three key concepts - justice, authority and agency - if punishment is to function effectively, and explores four practices in the current international system: intervention, sanctions, counter-terrorism policy, and war crimes tribunals. It concludes by suggesting ways to revise the current global political structure in order to enable punitive practices to play a more central role in creating a just world order. This book will be of much interest to students of International Law, Political Science and International Relations.

Women and Political Violence

This book directly challenges the stereotype that women are inherently peaceable by examining female combatants' involvement in ethno-national conflicts. Drawing upon empirical case studies of Sri Lanka and Northern Ireland, this study explores the ways in which women have traditionally been depicted. Whereas women have predominantly been seen as victims of conflict, this book acknowledges the reality of women as active combatants. Indeed, female soldiers/irregulars are features of most modern conflicts, and particularly in ethno-nationalist violence – until now largely ignored by mainstream scholarship. Original interview material from the author's extensive fieldwork addresses why, and how, some women choose to become violently engaged in nationalist conflicts. It also highlights the personal / political costs and benefits incurred by such women. This book provides a valuable insight into female combatants, and is a significant contribution to the literature. This book will be of great interest to students of political violence, ethnic conflict, gender studies and international relations in general.

Multipolarity in the 21st Century

This book seeks to help shape the debate surrounding power and polarity in the twenty-first century, both by assessing the likelihood of US decline and by analysing what each of the so-called 'rising powers' can do. As the twenty-first century moves out of its first decade, American supremacy continues to generate intense debate about the nature, quality and sustainability of US power. At the same time, significant developments in four rising powers - China, Russia, India and the European Union – have provoked analysts to ask whether multipolarity is a realistic prospect. Multipolarity in the 21st Century assesses the likelihood of a multipolar world developing, either by a marked US decline and or by the ability of these putative 'rivals' to continue to rise to the level necessary to be credibly considered a superpower. Written by a combination of emerging scholars and recognised experts, this volume will provide a timely and authoritative analysis of one of the most controversial and compelling security debates of the twenty-first century. This book will be of much interest to students of Security Studies, Foreign Policy and International Relations in general.

Theory of International Politics

Forfatterens mål med denne bog er: 1) Analyse af de gældende teorier for international politik og hvad der heri er lagt størst vægt på. 2) Konstruktion af en teori for international politik som kan råde bod på de mangler, der er i de nu gældende. 3) Afprøvning af den rekonstruerede teori på faktiske hændelsesforløb.

Clinton's Foreign Policy

This volume is a detailed account of President Clinton's foreign policy during 1992-2000, covering the main substantive issues of his administration, including Iraq, Bosnia and Kosovo. The book emphasizes Clinton's adaptation of the elder Bush's 'New World Order' outlook and his relationship to the younger Bush's 'Americanistic' foreign policy. In doing so, it discusses in detail such key policy areas as foreign economic policy; humanitarian interventionism; policy towards Russia and China,

and towards European and other allies; defence priorities; international terrorism; and peacemaking. Overall, the author judges that Clinton managed to develop an American foreign policy approach that was appropriate for the domestic and international conditions of the post-Cold War era. This book will be of great interest to students of Clinton's administration, US foreign policy, international security and IR in general. John Dumbrell is Professor of Government at Durham University. He specialises in the study of US foreign policy.

Economic Interdependence and International Conflict

The claim that open trade promotes peace has sparked heated debate among scholars and policy-makers for centuries. Until recently, however, this claim remained untested and largely unexplored. *Economic Interdependence and International Conflict* clarifies the state of current knowledge about the effects of foreign commerce on political-military relations and identifies the avenues of new research needed to improve our understanding of this relationship. The contributions to this volume offer crucial insights into the political economy of national security, the causes of war, and the politics of global economic relations. Edward D. Mansfield is Hum Rosen Professor of Political Science and Co-Director of the Christopher H. Browne Center for International Politics at the University of Pennsylvania. Brian M. Pollins is Associate Professor of Political Science at Ohio State University and a Research Fellow at the Mershon Center.

Security and International Relations

Presents security studies as a branch of international relations theory, providing a valuable new survey of the subject.

What Causes War?

Now in a thoroughly revised and updated edition, this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war. For each theory, Greg Cashman examines the arguments and counterarguments, considers the empirical evidence and counterevidence generated by social-science research, looks at historical applications of the theory, and discusses the theory's implications for restraining international violence. Among the questions he explores are: Are humans aggressive by nature? Do individual differences among leaders matter? How might poor decision making procedures lead to war? Why do leaders engage in seemingly risky and irrational policies that end in war? Why do states with internal conflicts seem to become entangled in wars with their neighbors? What roles do nationalism and ethnicity play in international conflict? What kinds of countries are most likely to become involved in war? Why have certain pairs of countries been particularly war-prone over the centuries? Can strong states deter war? Can we find any patterns in the way that war breaks out? How do balances of power or changes in balances of power make war more likely? Do social scientists currently have an answer to the question of what causes war? Cashman examines theories of war at the individual, substate, nation-state, dyadic, and international systems level of analysis. Written in a clear and accessible style, this interdisciplinary text will be essential reading for all students of international relations.

Conflict, Peace, Security and Development

Whilst classical approaches linked development with peace, security has become central to understandings of both war and peacetime. This book uniquely reflects on how to deal with the convergence of war and peace in the context of global economic and geo-political development. It addresses methodological challenges in contemporary approaches to conflict, violence, security peace and development. Two dominant contemporary approaches are selected for debate on methodologies and ethical choices: rational choice and identity-based theorizing. The chapters are arranged as dialogues around contending approaches, to better understand how the inter-locking fields of violent conflict, peace, development and security can be researched and understood. The book considers how theoretical and methodological approaches relate to different ethical and political choices, including around engagement and intervention in the four interwoven fields. Theoretical, methodological and ethical issues emerge from the critical reviews of academic discourses and case-study based chapters from across the world, including Sri Lanka, Ghana, Colombia and Rwanda. This book is an invaluable resource for postgraduate students and researchers in Development Studies, Conflict Studies, Peace Studies and Security Studies.

Russia's Foreign Security Policy in the 21st Century

This book examines Russia's external security policy under the presidencies of Vladimir Putin, Dmitry Medvedev and beyond. The Russian Federation has developed from a neglected regional power into a self-declared resurgent superpower. Russia's background in the former Soviet Union as well as close ties with the upcoming new powers of China and India served as spring-boards towards regaining an influential status in the world. Simultaneously, Moscow developed an assertive policy towards the West and unwilling neighbours, culminating in August 2008 in an armed conflict with Georgia. Reviewing this decade of Russian international security policy, this work analyses security documents, military reforms and policy actions towards friends and foes, such as the USA and NATO, to provide an assessment of the future security stance of the Kremlin. This book will be of much interest to students of Russian politics and foreign policy, European politics and Security Studies and IR in general.

The Palgrave Encyclopedia of Peace and Conflict Studies

This encyclopaedia provides a comprehensive overview of major theories and approaches to the study of peace and conflict across different humanities and social sciences disciplines. Peace and conflict studies (PCS) is one of the major sub-disciplines of international studies (including political science and international relations), and has emerged from a need to understand war, related systems and concepts and how to respond to it afterward. As a living reference work, easily discoverable and searchable, the Palgrave Encyclopedia of Peace and Conflict Studies offers solid material for understanding the foundational, historical, and contemporary themes, concepts, theories, events, organisations, and frameworks concerning peace, conflict, security, rights, institutions and development. The Palgrave Encyclopaedia of Peace and Conflict Studies brings together leading and emerging scholars from different disciplines to provide the most comprehensive and up-to-date resource on peace and conflict studies ever produced.

International Security Studies

This new textbook provides students with a comprehensive and accessible introduction to the subject of security studies, with a strong emphasis on the use of case studies. In addition to presenting the major theoretical perspectives, the book examines a range of important and controversial topics in modern debates, covering both traditional military and non-military security issues, such as proliferation, humanitarian intervention, food security and environmental security. Unlike most standard textbooks, the volume also offers a wide range of case studies – including chapters on the USA, China, the Middle East, Russia, Africa, the Arctic, the Middle East, Europe and Latin America – providing detailed analyses of important global security issues. The 34 chapters contain pedagogical features such as textboxes, summary points and recommended further reading and are divided into five thematic sections: Conceptual and Theoretical Military Security Non-Military Security Institutions and Security Case Studies This textbook will be essential reading for all students of security studies and highly recommended for students of critical security studies, human security, peace and conflict studies, foreign policy and International Relations in general.

Causes and Consequences of International Conflict

Investigation into the causes of international conflict has in many ways formed the central locus of the early work in the scientific investigation of world politics. This edited volume contains the most recent quantitative work in this area, reflecting the current state of the field in the topics addressed, the data utilized and the methods employed. The book is divided into three parts, presenting first some recent contributions to the work on the causes of international conflict, set in the context of realist theories. The second part addresses issues relating to data, methods and cases used to analyze international conflict, while the third part presents some examples of the use of a variety of different methods to answer questions relating to issues which engage international relations scholars today. The chapters focus on a variety of pertinent topics, and include discussions of important innovations in our ability to analyze conflict, such as the introduction of the Militarized Interstate Dispute (MID) data.

The Evolution of International Security Studies

International Security Studies (ISS) has changed and diversified in many ways since 1945. This book provides the first intellectual history of the development of the subject in that period. It explains

how ISS evolved from an initial concern with the strategic consequences of superpower rivalry and nuclear weapons, to its current diversity in which environmental, economic, human and other securities sit alongside military security, and in which approaches ranging from traditional Realist analysis to Feminism and Post-colonialism are in play. It sets out the driving forces that shaped debates in ISS, shows what makes ISS a single conversation across its diversity, and gives an authoritative account of debates on all the main topics within ISS. This is an unparalleled survey of the literature and institutions of ISS that will be an invaluable guide for all students and scholars of ISS, whether traditionalist, 'new agenda' or critical.

War, Torture and Terrorism

This book seeks to demonstrate how rules not only guide a variety of practices within international politics but also contribute to the chaos and tension on the part of agents in light of the structures they sustain. Four central themes- practice, legitimacy, regulation, and responsibility- reflect different dimensions of a rule governed political order. The volume does not provide a single new set of rules for governing an increasingly chaotic international system. Instead, it provides reflections upon the way in which rules can and cannot deal with practices of violence. While many assume that "obeying the rules" will bring more peaceful outcomes, the chapters in this volume demonstrate that this may occur in some cases, but more often than not the very nature of a rule governed order will create tensions and stresses that require a constant attention to underlying political dynamics. This wide-ranging volume will be of great interest to students of International Law, International Security and IR theory.

Conflict After the Cold War

Edited by one of the most renowned scholars in the field, Richard Betts' *Conflict After the Cold War* assembles classic and contemporary readings on enduring problems of international security. Offering broad historical and philosophical breadth, the carefully chosen and excerpted selections in this popular reader help students engage key debates over the future of war and the new forms that violent conflict will take. *Conflict After the Cold War* encourages closer scrutiny of the political, economic, social, and military factors that drive war and peace. New to the Fifth Edition: Original introductions to each of 10 major parts as well as to the book as a whole have been updated by the author. An entirely new section (Part IX) on "Threat Assessment and Misjudgment" explores fundamental problems in diagnosing danger, understanding strategic choices, and measuring costs against benefits in wars over limited stakes. 12 new readings have been added or revised: Fred C. Iklé, "The Dark Side of Progress" G. John Ikenberry, "China's Choice" Kenneth N. Waltz, "Why Nuclear Proliferation May Be Good" Daniel Byman, "Drones: Technology Serves Strategy" Audrey Kurth Cronin, "Drones: Tactics Undermine Strategy" Eyre Crowe and Thomas Sanderson, "The German Threat? 1907" Neville Henderson, "The German Threat? 1938" Vladimir Putin, "The Threat to Ukraine from the West" Eliot A. Cohen, "The Russian Threat" James C. Thomson, Jr., "How Could Vietnam Happen? An Autopsy" Stephen Biddle, "Afghanistan's Legacy" Martin C. Libicki, "Why Cyberdeterrence is Different"

Contemporary Security Studies

Contemporary Security Studies is a uniquely engaging introduction to Security Studies, covering the key theories and contemporary issues in the field.

The Conflict Helix

This is a book on conflict and consensus aimed at the general reader. In active, plain and direct language it makes the seemingly abstract and complex issues simple. Its view of peace is well-rounded, tough-minded, one that well understands the difficult world of social and personal violence and conflict. At its heart is a simple finding: "to wage peace we need to foster freedom." The human race can best achieve that simple aim by "leaving people alone to form their own communities." "The Conflict Helix" avoids the ambiguous in favor of the categorical; the hedged, qualified statement for the direct Rummel presents a series of basic principles, each concerning an aspect of conflict and peace - psychological, interpersonal, societal, international - and each aspect having its own master principle. These principles are not mere organizational props, but are deeply theoretical and empirically fundamental. The volume expresses the core ideas, results and conclusions of Rummel's major, five-volume work on "Understanding Conflict and War." In discarding technical material and focusing on principles and meaning, "The Conflict Helix" presents an executive summary of a lifetime of work in a digestible form. In light of recent events in Europe, Asia and Latin American this work

takes on a special poignancy for the developing no less than the industrialized worlds. Hence, this book should be of value to the general reader as well as professionals and advanced students of international politics.

International Law, Security and Ethics

This book examines the different ways in which the laws governing the use of force and the conduct of warfare have become subject to intense scrutiny and contestation since the initiation of the war on terror. Since the end of the Cold War, the nature of security challenges has changed radically and this change has been recognised by the UN, governments and academics around the world. The 9/11 attacks and the subsequent launch of the 'war on terror' added a new dimension to this debate on the nature and utility of international law due to the demands from some quarters for a change in the laws governing self-defence and humanitarian intervention. This book analyses the nature of these debates and focuses on key issues that have led to the unprecedented contemporary questioning of both the utility and composition of international law on the use of force as well as the practicability of using force, including handling of 'prisoners' and 'security risks'. It also identifies the sources of division and addresses the capacities of security policy and international law to adapt to the changed international environment. This book will be of much interest to students of international law, war and conflict studies, and IR and Security Studies in general.

Justice, Intervention, and Force in International Relations

This book analyses the problems of current just war theory, and offers a more stable justificatory framework for non-intervention in international relations. The primary purpose of just war theory is to provide a language and a framework by which decision makers and citizens can organize and articulate arguments about the justice of particular wars. Given that the majority of conflicts that threaten human security are now intra-state conflicts, just war theory is often called on to make judgments about wars of intervention. This book aims to critically examine the tenets of just war theory in light of these changes, and formulate a new theory of intervention and just cause. For Michael Walzer, the leading scholar of just war theory, armed humanitarian intervention is permissible only in cases of genocide, ethnic cleansing, widespread massacres, or enslavement. This book shows why this threshold is too restrictive in light of the progressive shift away from interstate conflict as well as the emerging norms of 'sovereignty as responsibility' and the 'responsibility to protect'. Justice, Intervention and Force in International Relations aims to establish a new, stable foundation for non-intervention and a revised threshold for 'just cause'. In addition, this book demonstrates that over-reliance on the just cause category distorts understanding, analysis, and public discussion of the justice or injustice of resorting to war. This new book will be of much interest to students of ethics, security studies, international relations and international law. Kimberley Hudson is Assistant Professor of Political Science at American International College, and has a Phd in International Relations from Brown University.

World Politics and the Challenges for International Security

World politics as a scientific discipline was established during the second half of the 20th century and has gained rapid distribution in many countries. This field of study focuses attention on current political processes as well as the potential of further development. It is essential to analyze world politics to move progress forward while also strengthening international security and the creation of a safer civilization. World politics cannot be understood without the combined knowledge of history, economics, law, social sciences, and psychology. World Politics and the Challenges for International Security describes the global processes in the field of world politics and international security and discusses global problems, global security, and the threats and challenges that currently affect global society. Covering topics such as digital diplomacy, political corruption, and terrorist psychology, this book is essential for political scientists, researchers, policymakers, global leaders, national security officers, diplomats, professors and students of higher education, and academicians.

Intra-State Conflict, Governments and Security

This volume seeks to understand the central role of governments in intra-state conflicts. The book explores how the government in any society plays two pivotal roles: as a deterrent against those who would use violence; and as a potential danger to the society. These roles come into conflict with each other, as those governments that can best deter potential rebels are also those that can do the most harm to their citizens. Therefore, a balance must be achieved, raising difficult tradeoffs for

policy-makers. This volume marks a departure from studies of ethnic conflict and civil war in recent years, which have focused on failed states, in considering the idea that governments themselves may be the source of violence. The contributors not only explore the balancing act that governments must perform, but also on the positive and negative roles that the international community can play in these conflicts. In doing so, the book covers a range of cases from both advanced and newer democracies to the most conflict-prone parts of the world.

European Security Governance

This book focuses on the problems of, and prospects for, strengthening the global system of security governance in a manner consistent with the aspirations and practices of the EU. The EU approach to security governance has been successful in its immediate neighbourhood: it has successfully exported its preferred norms and principles to applicant countries, thereby 'pacifying' its immediate neighbourhood and making all of Europe more secure. The EU governance orientation ultimately seeks to enlarge the European security community and expand the geopolitical area within which armed conflicts are inconceivable, and where state and private actors converge around a set of norms and rules of behaviour and engagement. The EU's success along its immediate boundaries has not yet been replicated on a global scale; it remains an open question whether the EU system of governance can be exported globally, owing to different normative structures (for example, a tolerance of armed conflict or non-democratic governance internally), great-power competition (such as US--China), or ongoing processes of securitization that has made it difficult to find a commonly accepted definition of security. Moreover, the EU system of security governance clashes with the continuing unwillingness of other major powers to cede or pool sovereignty as well as varying preferences for unilateral as opposed to multilateral forms of statecraft. This edited volume addresses both the practical and political aspects of security governance and the barriers to the globalization of the EU system of security governance, particularly in the multipolar post-Cold War era. This book will be of great interest to students of security governance, EU politics, European Security and IR in general. James Sperling is Professor of Political Science at the University of Akron, Ohio, USA. Jan Hallenberg is Professor of Political Science at the Department of Security and Strategic Studies, Swedish National Defence College. Charlotte Wagnsson is Assistant Professor in the Department of Strategic and Security Studies at the Swedish National Defence College.

NATO, Security and Risk Management

This new volume explores the crisis in transatlantic relations and analyses the role of NATO following the collapse of the Soviet Union. The book offers a unified theory of cooperation in the new security paradigm to explain the current state of transatlantic relations and NATO's failure to adequately transform itself into a security institution for the 21st century. It argues that a new preoccupation with risk filled the vacuum left by the collapse of the Soviet Union, and uses the literature of the Risk Society to analyse the strained politics of the North Atlantic community. Using case studies to show how the West has pursued a strategy of risk management, and the effect this has had on NATO's politics, the book argues that a better understanding of how risk affects Western political cohesion will allow policy makers a way of adapting the structure of NATO to make it more effective as a tool for security. Having analysed NATO's recent failings, the book offers a theory for the way in which it can become an active risk manager, through the replacement of its established structure by smaller, ad hoc groupings.

Security Strategies and American World Order

This book analyses security strategies in the American world order, systematically comparing Russian, Middle Eastern and European policies. The main finding is that the loss of relative power has decisive importance for the security strategies of states, but that particular strategies can only be explained when relative power is combined with ideology and the probability of military conflict. Research on the unipolar world order has focused largely on the general dynamics of the system and the actions of the American unipole. By contrast, this book focuses on states that lost out relatively as a consequence of unipolarity, and seeks to explain how this loss has affected their security strategies. Thus, in essence, the book tells 'the other side of the story' about the contemporary world order. In addition, it makes an important theoretical contribution by systematically coupling relative ideology and relative security with relative power and exploring their explanatory value. This book will be of great interest to students of international relations, security studies and foreign policy.

Rethinking Security Governance

This book explores the unintended consequences of security governance actions and explores how their effects can be limited. Security governance describes new modes of security policy that differ from traditional approaches to national and international security. While traditional security policy used to be the exclusive domain of states and aimed at military defense, security governance is performed by multiple actors and is intended to create a global environment of security for states, social groups, and individuals. By pooling the strength and expertise of states, international organizations, and private actors, security governance is seen to provide more effective and efficient means to cope with today's security risks. Generally, security governance is assumed to be a good thing, and the most appropriate way of coping with contemporary security problems. This assumption has led scholars to neglect an important phenomenon: unintended consequences. While unintended consequences do not need to be negative, often they are. The CIA term "blowback," for example, refers to the phenomenon that a long nurtured group may turn against its sponsor. The rise of al Qaeda, which had benefited from US Cold War policies, is only one example. Raising awareness about unwanted and even paradoxical policy outcomes and suggesting ways of avoiding damage or limiting their scale, this book will be of much interest to students of security governance, risk management, international security and IR. Christopher Daase is Professor at the Goethe University Frankfurt and head of the research department International Organizations and International Law at the Peace Research Institute Frankfurt (PRIF/HSFK). Cornelius Friesendorf is lecturer at the Goethe University Frankfurt and research fellow at the Peace Research Institute Frankfurt (PRIF/HSFK).

Democracy and Security

It has become generally accepted wisdom that democracies do not go to war against each other. However, there are significant differences between democratic states in terms of their approach to war and security policy in general. This edited book offers a broad examination of how democratic preferences and norms are relevant to security policy beyond the decision of whether to go to war. It therefore offers a fresh understanding of state behaviour in the security realm. The contributors discuss such issues as defence policy, air war, cluster bombs, non-lethal weapons, weapons of mass destruction, democratic and non-democratic nuclear weapon states' transparency, and the political and ideological background of the ongoing 'Revolution in Military Affairs'. It has become generally accepted wisdom that democracies do not go to war against each other. However, there are significant differences between democratic states in terms of their approach to war and security policy in general.

The Homeland Security Dilemma

This book explores the paradox of the 'security dilemma' in International Relations, as applied to the post-9/11 context of homeland security. The book's central argument can be summed up by the following counterintuitive thesis: the more security you have, the more security you will need. It argues that enhancing security does not make terrorism more likely, but rather it raises public expectations and amplifies public outrage after subsequent failures. The book contests that this dilemma will continue to shape American, Canadian and British domestic and international security priorities for decades. In exploring the key policy implications resulting from this, the book highlights the difficulty in finding a solution to this paradox, as the most rational and logical policy options are part of the problem. This book will be of interest to students of Homeland Security, Security Studies, US politics, and IR in general.

International Security: A Very Short Introduction

An accessible, succinct introduction to the complicated issues surrounding today's international security considers such factors as climate change, migration, poverty, health and international terrorism while exploring the nature of key debates as reflected by a broad range of international examples. Original.

Causes of War

Written by leading scholars in the field, Causes of War provides the first comprehensive analysis of the leading theories relating to the origins of both interstate and civil wars. Utilizes historical examples to illustrate individual theories throughout Includes an analysis of theories of civil wars as well as interstate wars -- one of the only texts to do both Written by two former International Studies Association Presidents

Cyber-Conflict and Global Politics

This volume examines theoretical and empirical issues relating to cyberconflict and its implications for global security and politics. Taking a multidimensional approach to current debates in internet politics, the book comprises essays by leading experts from across the world. The volume includes a comprehensive introduction to current debates in the field and their ramifications for global politics, and follows this with empirical case studies. These include cyberconflict, cyberwars, information warfare and hacktivism, in contexts such as Sri Lanka, Lebanon and Estonia, the European Social Forum, feminist cybercrusades and the use of the internet as a weapon by ethnoreligious and socio-political movements. The volume presents the theoretical debates and case studies of cyberconflict in a coherent, progressive and truly multidisciplinary way. The book will be of interest to students of cyberconflict, internet politics, security studies and IR in general.

Peace Operations and International Criminal Justice

This new volume provides the first thorough examination of the involvement of peace enforcement soldiers in the detention of indicted war criminals. The book firstly addresses why peace enforcement missions need to be involved in detaining indicted war criminals. This discussion includes an analysis of how the securing of justice and transitional justice is incorporated into the UN's approach to peace-building. It also explores IFOR's, SFOR's and KFOR's activities aimed at detaining indicted war criminals, before turning to an analysis of how the detaining of indicted war criminals is incorporated into peace enforcement doctrines, mandates and rules of engagement. The book then outlines the mechanisms that need to be established in order to enable peace enforcers to effectively arrest war criminals in the areas where they are deployed. It concludes with a discussion of the prospects for the involvement of peace enforcement soldiers in the detention of indicted war criminals, and of what lessons future peace enforcement missions can learn from the experience of IFOR, SFOR and KFOR.

Globalization and Defence in the Asia-Pacific

This edited volume examines the impact of globalisation on the economies, security policies and military-industrial complexes of the Asia-Pacific region. The work is structured into three main parts. The first explores globalization and its general effects on the policy-making of the nation-state; the second section looks at how globalisation affects a country's threat perception and defence posture within the specific context of the Asia-Pacific region; while the third explores how it impacts on a state's allocation of resources to defence, and how economic globalization affects the defence industry, with specific reference to the procurement policies and practices of different states across the Asia-Pacific.

America, the EU and Strategic Culture

This book provides a provocative analysis of relations between Europe and America during the tempestuous years 1998-2004. Analysing EU foreign policy, it concludes that the lessons learnt in interacting with America have been crucial in shaping the emerging EU strategic culture. The book challenges established orthodoxy regarding the sui generis nature of the European Union. Through detailed case-studies, it shows how the US influenced decisions during the formative years of the EU foreign and security policy: during the 1999 Kosovo war, the EU and NATO enlargement processes, and the 2003 Iraq crisis. However, the book argues that although policy ends may be lead by the US, the EU is growing increasingly confident in selecting distinctively 'European' means to achieve these goals. These findings have important implications for understanding both the EU as a foreign policy actor and of the EU-US partnership at the start of the 21st century.

Militancy and Violence in West Africa

This volume provides a systematic and cross-regional analysis of radicalisation, militancy and violence in West Africa. Concern about terrorism in, or from, West Africa, has been recognised in academic research, and the adoption of militarised approaches to addressing it questioned. However, the basis for that questioning – the need to investigate factors such as the historical and socio-economic roots of militancy – is not developed, nor is it substantiated in existing studies. The significant impact of religiously motivated radicalisation and violence in West Africa upon international security makes it essential to understand the issues of militancy and violence in the region. In this volume, the authors draw upon empirical research in West Africa to develop understanding in these areas. Over the course of several chapters written by leading experts in the field, the book successfully blends historical

and conceptual analysis with new empirical research gathered from focus group discussions and research interviews. Each of these core studies is structured around five interrelated issues: tracing the antecedents of radicalisation; monitoring trends; identifying actors; anticipating possibilities; and analysing the strength of existing preventive mechanisms. This book will be of much interest to students of African security, African politics, radicalisation, political Islam, war and conflict studies and security studies in general.

Russian Energy Policy and Military Power

This book examines the interplay between energy policy and security policy under Vladimir Putin, and his drive to re-establish Russia's 'greatness'. Assessing the internal contradictions of this policy, the book argues that Russia's desire to strengthen its role of 'energy security' provider is undermined by its inability to secure growth in production of oil and gas. Further, the pressing demand to channel more resources into the military-industrial complex clashes with the growing need to invest in the energy complex, and the priority granted to strategic forces deprives the conventional forces of strike power and strategic mobility. In conclusion, the author anticipates how these contradictions could be resolved, and suggests three short scenarios for Russia's continuing transition in the next decade. This book will be of interest to students of Russian politics, European politics and international security.

Private Contractors and the Reconstruction of Iraq

Private Contractors and the Reconstruction of Iraq examines the controversial role of military contractors in the reconstruction of Iraq. When 'Operation Iraqi Freedom' was launched in March 2003, few, if any, of the Coalition's political leaders could have envisaged that within a few months the number of private contractors engaged to keep the troops supplied would exceed their actual combat strength. This alternative 'army' was not only to become the largest assemblage of contractors in living memory to accompany a military force into a war zone, but was also responsible for a fundamental transformation of how military logistics were delivered. This book explains how and why the US and UK governments became so dependent upon military contractors during the war in Iraq. It also examines the ramifications this new dependency will have on future military operations, as the conflict in Iraq has shown that private contractors are now indispensable to the attainment of both the military and political objectives of war. Finally, the book discusses what advantages and disadvantages these companies have brought to the reconstruction of Iraq, and what lessons need to be learned from this experience. This book will be of great interest to students of military and strategic studies, Middle Eastern politics and international security, and as well as policymakers and military professionals. Christopher Kinsey is a lecturer in international security at King's College London, Defence Studies Department, at the Joint Services Command and Staff College, Shrivenham. His previous publications include *Corporate Soldiers and International Security: The Rise of Private Military Companies* (Routledge: 2006)

Transatlantic Relations in the 21st Century

This book offers an overview of the interface between European integration, transatlantic relations, and the 'rise of the rest' in the early 21st century. The collapse of the Soviet bloc opened up an era in which the drivers and perceived benefits of the US alliance among European countries have become more variegated and shifting. The proposition that the US remains at once an 'indispensable' and 'intolerable' nation in Europe is a key concept in the alliance, as the US remains inextricably tied to the continent through economic, military and cultural links. This work examines this complex subject area from many angles, including an analysis of the historical and cultural contexts of America's relations with Europe, as well as a discussion of the politics of transatlantic affairs which utilises evidence gleaned from a series of case-studies. In the concluding chapters, the author assesses the likelihood that the West can entrench its global dominance in the realms of "soft" and "hard" power, and by effecting a "controlled reform" that will see multilateral structures open up to emerging powers. This book will be of great interest to students of European Politics, EU integration, transatlantic relations, US foreign policy/diplomacy, International Security and IR in general.

America and Iraq

This edited volume provides an overview on US involvement in Iraq from the 1958 Iraqi coup to the present-day, offering a deeper context to the current conflict. Using a range of innovative methods to interrogate US foreign policy, ideology and culture, the book provides a broad set of reflections on past, present and future implications of US-Iraqi relations, and especially the strategic implications for

US policy-making. In doing so, it examines several key aspects of relationship such as: the 1958 Iraqi Revolution; the impact of the 1967 Arab-Israeli War; the impact of the Nixon Doctrine on the regional balance of power; US attempts at rapprochement during the 1980s; the 1990-91 Gulf War; and, finally, sanctions and inspections. Analysis of the contemporary Iraq crisis sets US plans against the 'reality' they faced in the country, and explores both attempts to bring security to Iraq, and the implications of failure.

Military Transformation and Strategy

This book explores the idea of a 'revolution in military affairs' (RMA), which underpins the transformational agenda of the US military, and examines its implications for smaller states. The strategic studies literature on the RMA tends to be American-centric and directed towards the strategic problems of the US military. This volume seeks to fill the gap in the literature and establish an intellectual framework that can assist other, smaller powers in their respective approaches to this issue. The book does so in three main sections; Part I focuses on questions of transformations in strategy and war; Part II explores transformations in operations; while Part III examines possible impediments to an RMA. This book will be of much interest to students of Military Studies, Asian Studies, Strategic Studies and International Relations in general.

Punishment, Justice and International Relations

This book examines the international political order in the post-Cold War era, arguing that this order has become progressively more punitive. This is seen as resulting from both a human-rights regime that emphasizes legal norms and the aggressive policies of the United States and its allies in the 'War on Terror'. While punishment can play a key role in creating justice in a political system, serious flaws in the current global order militate against punishment-enforcing global norms. The book argues for the necessary presence of three key concepts - justice, authority and agency - if punishment is to function effectively, and explores four practices in the current international system: intervention, sanctions, counter-terrorism policy, and war crimes tribunals. It concludes by suggesting ways to revise the current global political structure in order to enable punitive practices to play a more central role in creating a just world order. This book will be of much interest to students of International Law, Political Science and International Relations.

Women and Political Violence

This book directly challenges the stereotype that women are inherently peaceable by examining female combatants' involvement in ethno-national conflicts. Drawing upon empirical case studies of Sri Lanka and Northern Ireland, this study explores the ways in which women have traditionally been depicted. Whereas women have predominantly been seen as victims of conflict, this book acknowledges the reality of women as active combatants. Indeed, female soldiers/irregulars are features of most modern conflicts, and particularly in ethno-nationalist violence – until now largely ignored by mainstream scholarship. Original interview material from the author's extensive fieldwork addresses why, and how, some women choose to become violently engaged in nationalist conflicts. It also highlights the personal / political costs and benefits incurred by such women. This book provides a valuable insight into female combatants, and is a significant contribution to the literature. This book will be of great interest to students of political violence, ethnic conflict, gender studies and international relations in general.

Multipolarity in the 21st Century

This book seeks to help shape the debate surrounding power and polarity in the twenty-first century, both by assessing the likelihood of US decline and by analysing what each of the so-called 'rising powers' can do. As the twenty-first century moves out of its first decade, American supremacy continues to generate intense debate about the nature, quality and sustainability of US power. At the same time, significant developments in four rising powers - China, Russia, India and the European Union – have provoked analysts to ask whether multipolarity is a realistic prospect. Multipolarity in the 21st Century assesses the likelihood of a multipolar world developing, either by a marked US decline and or by the ability of these putative 'rivals' to continue to rise to the level necessary to be credibly considered a superpower. Written by a combination of emerging scholars and recognised experts, this volume will provide a timely and authoritative analysis of one of the most controversial and compelling security debates of the twenty-first century. This book will be of much interest to students of Security Studies, Foreign Policy and International Relations in general.

Theory of International Politics

Forfatterens mål med denne bog er: 1) Analyse af de gældende teorier for international politik og hvad der heri er lagt størst vægt på. 2) Konstruktion af en teori for international politik som kan kan råde bod på de mangler, der er i de nu gældende. 3) Afprøvning af den rekonstruerede teori på faktiske hændelsesforløb.

Clinton's Foreign Policy

This volume is a detailed account of President Clinton's foreign policy during 1992-2000, covering the main substantive issues of his administration, including Iraq, Bosnia and Kosovo. The book emphasizes Clinton's adaptation of the elder Bush's 'New World Order' outlook and his relationship to the younger Bush's 'Americanistic' foreign policy. In doing so, it discusses in detail such key policy areas as foreign economic policy; humanitarian interventionism; policy towards Russia and China, and towards European and other allies; defence priorities; international terrorism; and peacemaking. Overall, the author judges that Clinton managed to develop an American foreign policy approach that was appropriate for the domestic and international conditions of the post-Cold War era. This book will be of great interest to students of Clinton's administration, US foreign policy, international security and IR in general. John Dumbrell is Professor of Government at Durham University. He specialises in the study of US foreign policy.

Economic Interdependence and International Conflict

The claim that open trade promotes peace has sparked heated debate among scholars and policy-makers for centuries. Until recently, however, this claim remained untested and largely unexplored. Economic Interdependence and International Conflict clarifies the state of current knowledge about the effects of foreign commerce on political-military relations and identifies the avenues of new research needed to improve our understanding of this relationship. The contributions to this volume offer crucial insights into the political economy of national security, the causes of war, and the politics of global economic relations. Edward D. Mansfield is Hum Rosen Professor of Political Science and Co-Director of the Christopher H. Browne Center for International Politics at the University of Pennsylvania. Brian M. Pollins is Associate Professor of Political Science at Ohio State University and a Research Fellow at the Mershon Center.

Security and International Relations

Presents security studies as a branch of international relations theory, providing a valuable new survey of the subject.

What Causes War?

Now in a thoroughly revised and updated edition, this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war. For each theory, Greg Cashman examines the arguments and counterarguments, considers the empirical evidence and counterevidence generated by social-science research, looks at historical applications of the theory, and discusses the theory's implications for restraining international violence. Among the questions he

explores are: Are humans aggressive by nature? Do individual differences among leaders matter? How might poor decision making procedures lead to war? Why do leaders engage in seemingly risky and irrational policies that end in war? Why do states with internal conflicts seem to become entangled in wars with their neighbors? What roles do nationalism and ethnicity play in international conflict? What kinds of countries are most likely to become involved in war? Why have certain pairs of countries been particularly war-prone over the centuries? Can strong states deter war? Can we find any patterns in the way that war breaks out? How do balances of power or changes in balances of power make war more likely? Do social scientists currently have an answer to the question of what causes war? Cashman examines theories of war at the individual, substate, nation-state, dyadic, and international systems level of analysis. Written in a clear and accessible style, this interdisciplinary text will be essential reading for all students of international relations.

Conflict, Peace, Security and Development

Whilst classical approaches linked development with peace, security has become central to understandings of both war and peacetime. This book uniquely reflects on how to deal with the convergence of war and peace in the context of global economic and geo-political development. It addresses methodological challenges in contemporary approaches to conflict, violence, security peace and development. Two dominant contemporary approaches are selected for debate on methodologies and ethical choices: rational choice and identity-based theorizing. The chapters are arranged as dialogues around contending approaches, to better understand how the inter-locking fields of violent conflict, peace, development and security can be researched and understood. The book considers how theoretical and methodological approaches relate to different ethical and political choices, including around engagement and intervention in the four interwoven fields. Theoretical, methodological and ethical issues emerge from the critical reviews of academic discourses and case-study based chapters from across the world, including Sri Lanka, Ghana, Colombia and Rwanda. This book is an invaluable resource for postgraduate students and researchers in Development Studies, Conflict Studies, Peace Studies and Security Studies.

Russia's Foreign Security Policy in the 21st Century

This book examines Russia's external security policy under the presidencies of Vladimir Putin, Dmitry Medvedev and beyond. The Russian Federation has developed from a neglected regional power into a self-declared resurgent superpower. Russia's background in the former Soviet Union as well as close ties with the upcoming new powers of China and India served as spring-boards towards regaining an influential status in the world. Simultaneously, Moscow developed an assertive policy towards the West and unwilling neighbours, culminating in August 2008 in an armed conflict with Georgia. Reviewing this decade of Russian international security policy, this work analyses security documents, military reforms and policy actions towards friends and foes, such as the USA and NATO, to provide an assessment of the future security stance of the Kremlin. This book will be of much interest to students of Russian politics and foreign policy, European politics and Security Studies and IR in general.

The Palgrave Encyclopedia of Peace and Conflict Studies

This encyclopaedia provides a comprehensive overview of major theories and approaches to the study of peace and conflict across different humanities and social sciences disciplines. Peace and conflict studies (PCS) is one of the major sub-disciplines of international studies (including political science and international relations), and has emerged from a need to understand war, related systems and concepts and how to respond to it afterward. As a living reference work, easily discoverable and searchable, the Palgrave Encyclopedia of Peace and Conflict Studies offers solid material for understanding the foundational, historical, and contemporary themes, concepts, theories, events, organisations, and frameworks concerning peace, conflict, security, rights, institutions and development. The Palgrave Encyclopaedia of Peace and Conflict Studies brings together leading and emerging scholars from different disciplines to provide the most comprehensive and up-to-date resource on peace and conflict studies ever produced.

International Security Studies

This new textbook provides students with a comprehensive and accessible introduction to the subject of security studies, with a strong emphasis on the use of case studies. In addition to presenting the major theoretical perspectives, the book examines a range of important and controversial topics in modern

debates, covering both traditional military and non-military security issues, such as proliferation, humanitarian intervention, food security and environmental security. Unlike most standard textbooks, the volume also offers a wide range of case studies – including chapters on the USA, China, the Middle East, Russia, Africa, the Arctic, the Middle East, Europe and Latin America – providing detailed analyses of important global security issues. The 34 chapters contain pedagogical features such as textboxes, summary points and recommended further reading and are divided into five thematic sections: Conceptual and Theoretical Military Security Non-Military Security Institutions and Security Case Studies This textbook will be essential reading for all students of security studies and highly recommended for students of critical security studies, human security, peace and conflict studies, foreign policy and International Relations in general.
