### The French Fifth Republic at Fifty

Addresses essential questions about the determinants and dynamics of the French political system and of its institutions, dispelling the stereotypical view of it as an exceptional model of politics.

### The Presidents of the French Fifth Republic

In the French Republic political leadership is normally provided by the presidency, albeit from a very narrow constitutional base. This volume examines the strengths and weaknesses of that leadership as well as the way that executive power has been established in the republican context.

### Comparative Policy Agendas

This book summarizes recent advances in the work on agenda-setting in a comparative perspective. The book first presents and explains the data-gathering effort undertaken within the Comparative Agendas Project over the past ten years. Individual country chapters then present the research undertaken within the many national projects. The third section illustrates the possibilities and directions for new research in comparative public policy using the data presented in this book. All the data used and discussed in the book is moreover publicly available. The book represents a significant contribution to the study of comparative public policy. By introducing a unified research infrastructure it opens up new possibilities for both empirical and theoretical research in this area.

### France's Political Institutions at 50

Fifty years after the creation of the Fifth Republic, French politics is undergoing profound changes. The election of Nicolas Sarkozy has announced a general review of the French political system. A special committee – the comité constitutionnel – is currently drafting a catalogue of potential reforms. Debates focus on issues like presidentialization, parliamentary scrutiny of the executive or the creation of a popular initiative to trigger constitutional review of given legislative texts. These discussions reflect long-standing trends in the Fifth Republic. This volume aims at analysing those trends and at outlining the major perspectives for future development. In particular it puts the French political system in comparative perspectives and provides in-depth analysis of the evolution of the major political institutions and their relations. The volume argues that substantial reforms have helped to partially reshape French politics. Yet, it also shows that the fundamental characteristics of semi-presidential government have stood firm. The question is whether current debates and subsequent reforms are likely to alter the current pattern. This book was published as a special issue of West European Politics.

### The Oxford Handbook of French Politics

The Oxford Handbook of French Politics provides a comprehensive and comparative overview of the French political system through the lens of political science. The Handbook is organized into three parts: the first part identifies foundational concepts for the French case, including chapters on republicanism and social welfare; the second part focuses on thematic large-scale processes, such identity, governance, and globalization; while the third part examines a wide range of issues relating to substantive politics and policy, among which are chapters on political representation, political culture, social movements, economic policy, gender policy, and defense and security policy. The volume brings together established and emerging scholars and seeks to examine the French political system from a comparative perspective. The contributors provide a state-of-the-art review both of the comparative

scholarly literature and the study of the French case, making *The Oxford Handbook of French Politics* an invaluable resource for anyone interested in the foundations of contemporary political life in France.

#### The Statesman's Yearbook 2024

Accounts of public intellectuals in France and French feminism have focused on a specific set of women thinkers overlooking some major women intellectuals. This book aims redresses this balance by studying these forgotten intellectuals creating a cultural and theoretical re-evaluation of the gendered phenomenon of the public intellectual in France.

#### Women Intellectuals in Post-68 France

Now in its 152nd edition, *The Statesman's Yearbook* continues to be the reference work of choice for accurate and reliable information on every country in the world. Covering political, economic, social and cultural aspects, the Yearbook is also available online for subscribing institutions: [www.statesman-yearbook.com](http://www.statesman-yearbook.com).

#### The Statesman's Yearbook 2016

Now in its 150th edition, *The Statesman's Yearbook* continues to be the reference work of choice for accurate and reliable information on every country in the world. Covering political, economic, social and cultural aspects, the Yearbook is also available online for subscribing institutions: [www.statesman-yearbook.com](http://www.statesman-yearbook.com).

#### The Statesman's Yearbook 2014

Sarkozy came to power promising radical political and social change while simultaneously developing a presidential persona that melded the public and the personal under the glare of media attention, unparalleled in the French Fifth Republic. This volume provides a detailed analysis of the fit between his ambitions and the outcomes of his presidency

#### The Sarkozy Presidency

This volume provides an analytical framework that links welfare states to party systems, combining recent contributions to the comparative political economy of the welfare state and insights from party and electoral politics

#### Welfare Democracies and Party Politics

Despite efforts to normalize its post-colonial relationship and the downsizing of its permanent military presence, France remains a sought-after security provider in Africa. This book uncovers individual and collective motivations that drive French foreign and security policy in Africa. It explains French interventionism by drawing on actors' subjective perceptions of reality and seeks to answer why French decision-makers are ready to accept the considerable risks and costs involved in guaranteeing the security of African countries. Adopting an actor-centric constructivist ontology, the author traces the emergence and subsequent development of ideas throughout the decision-making processes that led to Operation Serval in Mali and Operation Sangaris in the Central African Republic.

#### Contemporary French Security Policy in Africa

Notwithstanding its contemporary critics, political representation remains at the core of democratic politics. Based on a comparative research project that gathered data from observations, surveys, experiments and expert interviews, this book examines the process and the quality of political representation in France and Germany from a dual perspective. First, it analyzes MPs' behavior during their district activities. Second, it investigates the perceptions and evaluations of the represented, the French and German citizens. In ten chapters different facets of MPs' activities as well as citizens' attitudes are comparatively investigated. The book is relevant for Politics scholars and practitioners at national parliaments to better understand representative democracies, and it may also contribute to improve representation itself.

#### Political Representation in France and Germany

Explains the adoption, diffusion of, and resistance to gender quotas in politics, corporate boards and public administration across Europe.

### Transforming Gender Citizenship

This unique work reveals how the denial of race as a social category maintains and reproduces systematic racism in contemporary France. Léonard offers an in-depth analysis of contentious issues in society, revealing how color-blind racism is at the centre of social inequality in France.

### Racial Diversity in Contemporary France

This cross-national analysis of Islamophobia looks at these questions in an innovative, even-handed way, steering clear of politically-correct clichés and stereotypes. It cautions that Islamophobia is a serious threat to European values and norms, and mus

### Xenophobia and Islamophobia in Europe

Comparative Politics is a series for researchers, teachers, and students of political science that deals with contemporary government and politics. Global in scope, books in the series are characterized by a stress on comparative analysis and strong methodological rigour. The series is published in association with the European Consortium for Political Research. For more information visit: [www.ecprnet.eu](http://www.ecprnet.eu) The series is edited by Emilie van Haute, Professor of Political Science, Université libre de Bruxelles; Ferdinand Müller-Rommel, Director of the Center for the Study of Democracy, Leuphana University; and Susan Scarrow, John and Rebecca Moores Professor of Political Science, University of Houston. How can we explain the evolution of legislatures in Western Europe? This book analyses ninety procedural reforms which restructured control over the plenary agenda and committee power in Britain, France, Sweden, and Germany between 1866 and 2015. Legislatures evolve towards one of two procedural ideal types: talking (where governments control the agenda) or working legislatures (with powerful committees). All else being equal, legislators' demand for mega-seats on legislative committees triggers the evolution of working legislatures. If, however, legislators fail to centralize agenda control in response to anti-system obstruction, legislative procedures break down. Rather than a decline of legislatures, talking legislatures accordingly indicate the resilience of legislative democracy. In conclusion, the book shows the causal nexus between procedural reforms and (legislative) democracy.

### Parliaments in Time

This book provides a systematic account of the changing priorities, procedures and practices of French NGOs active in overseas development work. It explores whether French NGOs are eschewing wider trends in the Northern NGO sector and uses Resource Dependence theory and a case study of NGO field-work in Cameroon to shed light on these actors.

### French NGOs in the Global Era

Corporate Governance has become a major topic of interest for both academics and policy-makers in recent years. The advent of major financial scandals in the early 2000s (Enron, WorldCom, Ahold, Parmalat) was followed by turmoil in the financial markets at the end of the decade. The increased power of finance was a common factor singled out in the development of these events - especially shareholder value oriented institutional investors - across advanced capitalist economies. Will the pressures of financial market globalization force companies to converge on a shareholder-based model of corporate governance? In *Contingent Capital* Michel Goyer highlights the importance of the institutional context in which companies are embedded, focusing on the divergence in the allocation of capital by shareholder-value oriented institutional investors in Europe's two largest non-liberal market economies: France and Germany. The major difference between these two economies is that France has proven to be twice as attractive to short-term, impatient shareholders with a short-term horizon as compared to Germany - a disparity that disappears for investors with a longer-term term horizon. These empirical findings highlight the importance of providing a sophisticated differentiation between different categories of institutional investors in order to assess the impact associated with the greater prominence of finance. Goyer points to the importance of firm-level institutional arrangements in the process by which companies coordinate their activities as the key variable for understanding the investment allocation of impatient investors. The implication is that the governing of corporations is

not about whether or not strategies of shareholder value are being adopted - but rather what types of strategies of shareholder value are being pursued.

### Contingent Capital

This book develops and tests a typology of local state-society relations. To deliver such a comparative study on institutionalized relations between local government and societal actors at the municipal level in Europe, the book identifies and classifies country-specific patterns of these institutionalized governance networks. This work explores the diversity within these institutionalized networks, approaching it from a strong comparative perspective that is anchored on a new typology allowing a more robust analysis of the identifiable patterns. It is a study with appeal to scholars and students of local government, public administration and political science as well as to those pursuing this debate and implementing similar agendas as practitioners.

### Close Ties in European Local Governance

"This remarkable volume shows the diversity of social and public contributions made by political scientists across Europe. The range of advisory roles is impressive and encouraging for colleagues concerned about the difference they can make in the world. It deserves to be used by academics and practitioners who seek to praise and defend the importance of political science research." - Claire A. Dunlop, University of Exeter, UK "This book provides unique insights into how political scientists engage in policy advice and how their advisory roles vary across Europe. This variation reflects variations and trends in European policy advisory systems-a must-read for every political scientist and anyone interested in better understanding policy advisory systems." -Thurid Hustedt, Hertie School of Governance, Berlin "Political scientists usually observe policymaking, but this book demonstrates that they also become involved in that process. Using qualitative and quantitative data the authors provide an interesting and timely account of the role of political scientists in advising governments and shaping policy. This is a very welcome addition to the literature on policy advice." - B. Guy Peters, University of Pittsburgh, USA This open access book centres on the advisory roles of political scientists in Europe. Based on a cross-national survey, the book offers a comparative analysis of the viewpoints and activities of university-based political scientists on external engagement. Political scientists in Europe appear more extrovert as academics than sometimes thought. In their professional functioning they engage in delivering knowledge and advice to all kinds of stakeholders in the policy process. This volume contains twelve in-depth country studies where different trends are visible, from political regime change to pressure for impact of academic work. The findings from this comparative analysis may inform our orientation on interaction between academics and their social and political environment, and what this means for education and training in university programs in political science. Marleen Brans is Professor at the KU Leuven Public Governance Institute, Belgium. Arco Timmermans is Professor of Public Affairs at Leiden University, the Netherlands.

### The Advisory Roles of Political Scientists in Europe

"It's often claimed that future wars will be fought over water. But while international water conflict is rare, it's common between sub-national jurisdictions like states and provinces. Drawing on cases in the United States, China, India, and France, this book explains why these sub-national water conflicts occur - and how they can be prevented"--

### Subnational Hydropolitics

Radical right-wing populist parties, such as Geert Wilders' Party for Freedom, Marine Le Pen's National Front or Nigel Farage's UKIP, are becoming increasingly influential in Western European democracies. Their electoral support is growing, their impact on policy-making is substantial, and in recent years several radical right-wing populist parties have assumed office or supported minority governments. Are these developments the cause and/or consequence of the mainstreaming of radical right-wing populist parties? Have radical right-wing populist parties expanded their issue profiles, moderated their policy positions, toned down their anti-establishment rhetoric and shed their extreme right reputations to attract more voters and/or become coalition partners? This timely book answers these questions on the basis of both comparative research and a wide range of case studies, covering Austria, Belgium, Denmark, Finland, France, the Netherlands, Norway, Switzerland, and the United Kingdom. Analysing the extent to which radical right-wing populist parties have become part of mainstream politics, as well as the factors and conditions which facilitate this trend, this book is essential reading for students and

scholars working in European politics, in addition to anyone interested in party politics and current affairs more generally.

### Radical Right-Wing Populist Parties in Western Europe

Preface : black girl in Paris -- Introduction : North African origins in and of the French Republic -- Growing up French? : education, upward mobility, and connections across generations -- Marginalization and middle-class blues : race, Islam, the workplace, and the public sphere -- French is, french ain't : boundaries of French and Maghrebin identities -- Boundaries of difference : cultural citizenship and transnational blackness -- Conclusion : sacrificed children of the Republic? -- Methodological appendix : another outsider : doing race from/in another place

### Citizen Outsider

Systematically exploring the consequences of the global financial crisis, this text focuses primarily on the impact on policy and politics. It asks how governments responded to the challenges that the crisis has posed, and the policy and political impact of the combination of both the crisis itself and these responses.

### The Consequences of the Global Financial Crisis

Gender Equality and Policy Implementation in the Corporate World takes a unique approach to the issue of gender equality in corporations in the 21st century. It examines the implementation of specific policies that seek to promote women's presence on corporate boards in 15 democracies in Western and Central Eastern Europe, North America, and Australasia through the lens of the Gender Equality Policy in Practice Approach. The thirteen empirically rich country chapters by leading country experts and two separate comparative chapter answer core questions. How were policies adopted and implemented? Did they achieve any degree of success that would allow for real and lasting equality? What were the politics of the pursuit of corporate gender equality across the 15 countries? What worked and did not work and why? What are the lessons to be drawn from these experiences? The findings of the book show that policy implementation does matter, but that in this last bastion of male domination, policies have had more success in increasing women's numbers over challenging gender-biased norms that block women of all cultural and socio-economic backgrounds from gaining real power on boards. The path-breaking study shows that the reasons for this slow change are highly complex and case specific, in the details of each policy mix. While progress has been slow in coming, it has still been made even in these challenging times. Future policy success, the book concludes, is in the hands of men and women willing to come forward to overcome these well entrenched obstacles.

### Gender Equality and Policy Implementation in the Corporate World

This timely research handbook offers a systematic and comprehensive examination of the election laws of democratic nations. Through a study of a range of different regimes of election law, it illuminates the disparate choices that societies have made concerning the benefits they wish their democratic institutions to provide, the means by which such benefits are to be delivered, and the underlying values, commitments, and conceptions of democratic self-rule that inform these choices.

### Comparative Election Law

Global governance is no longer a matter of state cooperation or bureaucratic politics. Since the end of the cold war, advocacy groups have proliferated and enjoyed increasing access to global governance institutions such as the European Union, World Trade Organization, and the United Nations climate conferences. This book seeks to push theories of interest groups and international non-governmental organizations forward. It argues that the advocacy group effects on global governance institutions are best understood by examining how groups use and shape domestic and global political opportunity structures. Chapters examine how, when, and why domestic and global political opportunity structures shape advocacy group effects in global governance, across global institutions, levels of government, advocacy organizations, issue areas, and over time. As special interests are becoming increasingly involved in global governance, we need to better understand how advocacy organizations may impact global public goods provision.

### Advocacy Group Effects in Global Governance

As a field of scholarship, gender and politics has exploded over the last fifty years and is now global, institutionalized, and ever expanding. The Oxford Handbook of Gender and Politics brings to political science an accessible and comprehensive overview of the key contributions of gender scholars to the study of politics and shows how these contributions produce a richer understanding of politics and societies. Like the field it represents, the handbook has a broad understanding of what counts as political and is based on a notion of gender that highlights masculinities as well as femininities, thereby moving feminist debates in politics beyond the focus on women. It engages with some of the key aspects of political science as well as important themes in gender and feminist research (such as sexuality and body politics), thereby forging a dialogue between gender studies in politics and mainstream political science. The handbook is organized in sections that look at sexuality and body politics; political economy; civil society; participation, representation and policymaking; institutions, states and governance as well as nation, citizenship and identity. The Oxford Handbook of Gender and Politics contains and reflects the best scholarship in its field.

#### The Oxford Handbook of Gender and Politics

Over the last twenty years, the role of national parliaments in EU affairs has gained considerable academic attention. Much of the literature, however, has focused on parliamentary scrutiny and control in EU affairs. What tends to be generally overlooked is that the parliamentary communication function is at least as important in EU politics as the control function. Democratic legitimacy depends on a vibrant public debate on political solutions and alternatives to allow citizens to make informed political (electoral) choices and to exercise democratic control. Within the EU, it is precisely the opacity of policy-making processes and the lack of public discourse that have been defined as core problems of democratic legitimacy. Here, parliaments have the potential to provide an ideal arena for the deliberation of important European issues and thus to help overcome the much-lamented distance between European policy processes and the citizens. Yet, despite parliaments' central relevance for the legitimacy of European politics, the parliamentary communication function remains so far under researched. The volume aims at filling this gap by providing both qualitative and quantitative comparative data on various communication efforts by national parliaments. This book was originally published as a special issue in the Journal of Legislative Studies.

#### Parliamentary Communication in EU Affairs

Now in its 147th edition, The Statesman's Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world. Covering political, economic, social and cultural aspects, the Yearbook is an essential resource.

### The Statesman's Yearbook 2013

Paul Smith examines how the Senate has attempted, since 1958, to locate itself within the French (semi-) presidential system, how it asserts its place in relation to the President, Government and National Assembly and how it has sought, in recent years, to develop an autonomous and particular sense of identity.

### The Senate of the Fifth French Republic

This volume offers perspective on modern French society and culture through thematic chapters on topics ranging from geography to popular culture. Ideal for students and general readers, this book includes insightful, current information about France's past, present, and future. France is the country most visited by international tourists. Aside from clichéd images of baguettes and the Eiffel Tower, however, what is French society and culture really like? Modern France is organized into thematic chapters covering the full range of French history and contemporary daily life. Chapter topics include: geography; history; government and politics; economy; religion and thought; social classes and ethnicity; gender, marriage, and sexuality; education; language; etiquette; literature and drama; art and architecture; music and dance; food; leisure and sports; and media and popular culture. Each chapter contains an overview of the topic and alphabetized entries on examples of each theme. A detailed historical timeline covers prehistoric times to the presidency of Emmanuel Macron. Special appendices offer profiles of a typical day in the life of representative members of French society, a glossary, key facts and figures about France, and a holiday chart. The volume will be useful for readers looking for specific topical information and for those who want to develop an informed perspective on aspects of modern France.

### Modern France

Now in its 151st edition, The Statesman's Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world. McDonnell Douglas created the F-15 Eagle as an air superiority fighter.

The F-15E uses the ACES II (Advanced Concept Ejection Seat) system.

The F-15E Strike Eagle's multi-sensor Sniper targeting pod improves self-targeting.

Flying through canyons trains the F-15E Strike Eagle pilots for low-level interdiction missions.

The armor system consists of steel, ceramic composite, and depleted uranium armor.

The M110 Semi-Automatic Sniper System (M110 SASS) fires 7.62×51mm NATO rounds.

7 Signs You're Living In The Past - 7 Signs You're Living In The Past by Psych2Go 217,864 views 3 years ago 3 minutes, 54 seconds - Are you **living**, in the **past**,? Do you live your life longing for the time you've lost, fixated on a certain person or memory you can ...

Intro

You hold on to grudges

You blame yourself for everything.

You lose yourself in nostalgia

You wonder about what could've been

You reject new opportunities.

You're not looking forward to anything.

You don't have any plans for the future.
