The United Nations and Freedom of Expression and Information

Maps the UN legal instruments relevant for the protection and promotion of the rights to freedom of expression and information.

Summary Prepared by the Office of the United Nations High Commissioner for Human Rights
in Accordance with Paragraph 15(c) of the Annex to Human Rights Council Resolution 5/1 and
Paragraph 5 of the Annex to Council Resolution 16/21

This is an in-depth analysis of the U.S.-Japan security alliance and its implications for Japan and the Asia-Pacific region. It moves away from the official line that the alliance is a vital aspect of Japan's security policy and introduces issues and arguments that are often overlooked: American security policy has failed to achieve its goals; Japan's interests are not fully served by the alliance; the alliance itself is a source of instability in the region; and the arrangement has placed constraints on Japan's own political development. The author measures current developments in U.S. foreign policy against Japan's role in the region and Japan's own political development. He assesses the consequences of the alliance for the current regional situation in Northeast Asia, looks at future policy options for Japan, and makes the case for a neutralist security policy.

Resolutions and Statements of the United Nations Security Council

The United Nations Compensation Commission (UNCC) is a unique international institution, established by the Security Council in 1991 entrusted with the power of processing and assessing of claims against Iraq arising from the Gulf War and the payment thereof. The UNCC, as a subsidiary organ of the Council, has been created to determine the validity and amount of claims arising on or after August 2, 1990 based upon any direct loss, damage, including environmental damage and depletion of natural resources, to foreign States, nationals or corporations. Iraq, as a consequence of its unlawful invasion and occupation of Kuwait, is liable under international law for the damages incurred. In the seven years since its establishment, the UNCC's major body, the Governing Council, has issued more than forty decisions of a substantive and procedural nature, covering almost all areas of international law in the field of claims. The Panels of Commissioners, the quasi-arbitral bodies of the UNCC, have issued many reports examining a plethora of new as well as old legal issues which have been approved by the Governing Council; and, last but not least, the UNCC has started the payment of the awards. Not only will the UNCC be providing satisfaction to the numerous victims of Iraq's aggression; indeed, its activity will provide useful guidelines for the handling of mass international claims programs in the future. The "Handbook" contains the complete text of the relevant Security Council Resolutions and Reports of the Secretary General, all Governing Council's decisions, a review of the main legal statements by the Panels of Commissioners, a selected bibliography, an index and an introductory essay dealing with the origins of the UNCC, the claims procedure, the substantive rules on State responsibility, the legal basis of the UNCC and its activities and the perspectives of the UNCC.

The Challenges of the U. S. -Japan Military Arrangement

The Responsibility to Protect (R2P) is intended to provide an effective framework for responding to crimes of genocide, ethnic cleansing, war crimes, and crimes against humanity. It is a response to the many conscious-shocking cases where atrocities - on the worst scale - have occurred even during the post 1945 period when the United Nations was built to save us all from the scourge of genocide. The R2P concept accords to sovereign states and international institutions a responsibility to assist peoples who are at risk - or experiencing - the worst atrocities. R2P maintains that collective action should be taken by members of the United Nations to prevent or halt such gross violations of basic human rights. This Handbook, containing contributions from leading theorists, and practitioners (including former foreign ministers and special advisors), examines the progress that has been made in the last 10 years; it also looks forward to likely developments in the next decade.

The Index to Proceedings of the Economic and Social Council is a bibliographic guide to the proceedings and documentation of the Economic and Social Council. This issue covers the 2014 session of the Council including the organizational and substantive session. The Index is divided in two parts comprising the Subject Index and Index to Speeches. The Index is prepared by the Dag Hammarskjöld Library, Department of Public Information, as one of the products of the United Nations Bibliographic Information System (UNBIS).

Department of State Wireless Bulletin

This publication illustrates the 70+ year-long history of the Commission on the Status of Women, which through 62 sessions has consistently advocated for the realization of gender equality and the empowerment of women and enjoyment of their human rights, in an effort to realize the substantive equality of all women and girls, everywhere. In the era of the 2030 and the 17 Sustainable Development Goals, and all States' commitment to leave no one behind and reach those furthest behind first, the Commission has confirmed its leadership role in strengthening, deepening and expanding the global normative framework for gender equality and the empowerment of all women and girls, and monitoring agreed actions.

State, Foreign Operations, and Related Programs Appropriations for 2015

The United Nations Security Council has primary responsibility for maintaining international peace and security. In discharging its powers it must act in accordance with the Purposes and Principles of the UN, and observe the rules governing voting and procedure established in the Organisation's Charter. The Council adopts mandatory resolutions that may establish obligations for members and non-members, and such obligations trump conflicting obligations originating from any other international agreement. Member States must cooperate with the Organisation and among themselves, in the implementation of any action prescribed by the Council against States whose behaviour the Council considers an act of aggression, or a threat to, or breach of, international peace and security. This book analyses resistance to Security Council resolutions and puts forward a theory of lawful resistance. Sufyan Droubi takes a positivist approach to the UN Charter regarding it as a constitution. Special emphasis is placed on the construction of the Charter's meaning through the practice of both organs and Members of the UN and on the need to enhance the effectiveness of the Organization with due respect to the rule of law. The book proposes that nonviolent resistance to a mandatory resolution of the Security Council, on grounds that the latter is incompatible with the Charter or *jus cogens* norms, may be considered lawful under the Charter if some elements are present. In exploring a number of case studies of individual and collective State resistance to mandatory Council resolutions, the book proposes that resistance may function as a rudimentary instrument of accountability and protection of the Charter and *jus cogens*, in the absence of more mature mechanisms of judicial review. The book will be of excellent use and interest to scholars and students of constitutional international law and international relations.

American Foreign Policy, Current Documents

Why do some states resist entering into international treaty regimes while others demonstrate eagerness to participate? Drawing on United Nations treaty ratification data from three different issue areas - arms control, environment and human rights - this volume focuses on the United States and China to study the participation patterns of democracies and non-democracies in international treaty regimes.

Resolutions of the United Nations Security Council

Following the rise of Islamic fundamentalism, Muslim nations have been placed in the spotlight of international debate; the prevailing understanding is that democracy and Islam are fundamentally incompatible. This verdict is particularly damning in light of the trend in International Law which, since the collapse of communism in Eastern Europe, has equated democracy with human rights. Yet, a thorough analysis of the debate, taking into account the historical and theoretical bases of liberal democracy the cultural, legal, and political development of Islam, and the extent to which the politics of Islamic countries represents the politics of Islam reveals that democracy and Islam are, in fact, fundamentally compatible. In practice, Islamic Law can be applied alongside developments in democratic representations and human rights.

The Oxford Handbook of the Responsibility to Protect

With its comprehensive coverage of political and security matters, human rights issues, economic and social questions, legal issues, and administrative and budgetary matters, the Yearbook of the United Nations stands as the authoritative reference work on the annual activities and concerns of the Organization. Fully indexed, the Yearbook includes all major General Assembly, Security Council and Economic and Social Council resolutions and decisions, uniquely placing them in a narrative context of United Nations consideration, deliberation and action. This sixty-eighth volume presents the work of the United Nations in dealing with recurring conflicts with severe humanitarian consequences including in the Syrian Arab Republic, where more than 12 million people were in need of basic food, clothing and shelter. The volume also highlights the Organization's rapid response to an escalatory global health emergency—the Ebola virus disease outbreak across West Africa. It documents the Organization's coordination of policy discussions to finalize a global sustainable development agenda, with the security of future generations as the core concern; and its efforts to rebuild societies emerging from conflict while keeping the fragile peace in other places. It further details the entry into force of the landmark Arms Trade Treaty, the missile downing of a passenger airliner in the midst of a geopolitical crisis in eastern Ukraine, and securing international human rights and humanitarian law and prosecuting abusers.

Index to Proceedings of the Economic and Social Council 2014

The book analyzes how the administrations of Ronald Reagan, George H.W. Bush, Bill Clinton, and George W. Bush used force in response to incidents of international terrorism - providing comparison between each of the administrations as they grappled with the evolving nature and role of terrorism in the United States and abroad.

A Short History of the Commission on the Status of Women

This new Handbook is a comprehensive examination of the rich and complex issues of nuclear proliferation in the early 21st century. The future of the decades-long effort to prevent the further spread of weapons of mass destruction is at a crossroads today. If international nonproliferation efforts are to be successful, an integrated, multi-tiered response will almost certainly be necessary. A serious, thorough, and clear-eyed examination of the range of threats, challenges, and opportunities facing the international community is a necessary first step. This Handbook, which presents the most up-to-date analysis and policy recommendations on these critical issues by recognized, leading scholars in the field, intends to provide such an examination. The volume is divided into three major parts: Part I presents detailed threat assessments of proliferation risks across the globe, including specific regions and countries. Part II explains the various tools developed by the international community to address these proliferation threats. Part III addresses the proliferation risks and political challenges arising from nuclear energy production, including potential proliferation by aspiring states and nonstate groups. This Handbook will be of great interest to students and practitioners of nuclear proliferation, arms control, global governance, diplomacy, and global security and IR general.

Resisting United Nations Security Council Resolutions

The Index to Proceedings of the General Assembly is a bibliographic guide to the proceedings and documentation of the General Assembly. This issue covers the seventy-third session of the Assembly including its Main and ad hoc committees. The Index is prepared by the Dag Hammarskjöld Library, Department of Global Communications, as one of the products of the United Nations Bibliographic Information System.

Universal Declaration of Human Rights

Consisting of 192 Member States, the United Nations was founded in 1945 to maintain international peace and security; to develop friendly relations among nations based on the respect for the principle of equal rights and self-determination of peoples; to achieve international cooperation in solving problems of an economic, social, cultural, or humanitarian character; and encouraging respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language, or religion. Just how successful the UN has been in maintaining these goals is covered in *The A to Z of the United Nations*. Author Jacques Fomerand provides a comprehensive dictionary of nearly 900 cross-referenced entries on the UN's various committees and organizations, its leaders, terms, policies, and major events in which the UN took part. Supplementing the dictionary entries are a chronology, an introduction, a bibliography, and appendixes, which include a reproduction of the UN's Charter and the Universal Declaration of Human Rights, as well as a list of the Member States and when they joined.

State Participation in International Treaty Regimes

The official monthly record of United States foreign policy.

United Nations Resolutions Series 1

On the seventy-fifth anniversary of the United Nations, the world has faced its biggest shared test since the Second World War in the coronavirus disease (COVID-19) pandemic. Yet while our welfare, and indeed the permanence of human life, depend on us working together, international cooperation has never been harder to achieve. This report answers a call from UN Member States to provide recommendations to advance our common agenda and to respond to current and future challenges. Its proposals are grounded in a renewal of the social contract, adapted to the challenges of this century, taking into account younger and future generations, complemented by a new global deal to better protect the global commons and deliver global public goods. Through a deepening of solidarity—at the national level, between generations, and in the multilateral system—Our Common Agenda provides a path forward to a greener, safer and better future.

Democracy in Islamic and International Law

Official Records of the Resolutions and Decisions of the Economic and Social Council for Organizational and Resumed Organizational and Substantive and Resumed Substantive Sessions of 2014.

Yearbook of the United Nations 2014

Displacement caused by climate change is an area of growing concern. With current rises in sea levels and changes to the global climate, it is an issue of fundamental importance to the future of many parts of the world. This book critically examines whether States have obligations to protect people displaced by climate change under international refugee law, international human rights law, and the international law on statelessness. Drawing on field work undertaken in Bangladesh, India, and the Pacific island States of Kiribati and Tuvalu, it evaluates whether the phenomenon of 'climate change-induced displacement' is an empirically sound category for academic inquiry. It does so by examining the reasons why people move (or choose not to move); the extent to which climate change, as opposed to underlying socio-economic factors, provides a trigger for such movement; and whether traditional international responses, such as the conclusion of new treaties and the creation of new institutions, are appropriate solutions in this context. In this way, the book queries whether flight from habitat destruction should be viewed as another facet of traditional international protection or as a new challenge requiring more creative legal and policy responses. law, and the international law on statelessness. Drawing on

Presidential Policies on Terrorism

The third edition of this successful text highlights new international trends toward global governance, nation-building, and human development, while also assessing the extraordinary challenges confronting the United Nations at this critical moment in international affairs, not least being the ubiquity of conflict in Africa, the Middle East, and Europe, and the global threats of disease, climate change, and the retreat from multilateralism by the great powers. A comprehensive guide to the world body's institutions, procedures, policies, specialized agencies, historic personalities, initiatives, and involvement in world affairs, *The New United Nations* is organized thematically, blending both

topical and chronological explanations, making reference to current scholarly terms and theories. New to this edition: Fully updated chapters and a new Introduction, including discussion of the Paris Climate Change Agreement, the world's response to COVID-19, and the revival of ultranationalism and great-power rivalry. New sections on the theory and practice of neoliberalism and populism, the UN's use of the "Responsibility to Protect" in the Middle East, the Arab Spring, and multifaceted roles in the developing world, especially in Africa. Updated analysis of twenty-first-century challenges to collective security, including in Syria and, particularly, in Ukraine. Unique special section on the student Model United Nations experience. Coverage of the UN's efforts to implement the Sustainable Development Goals. eResources with supportive materials and documents.

Routledge Handbook of Nuclear Proliferation and Policy

"Written largely by a group of young scholars of diverse backgrounds, the essays reflect views and voices that are not always heard above the Anglo-American din. The volume provides a resource for scholars and policymakers alike, enriching the current debate and making more fruitful the international dialogue between North and South."--BOOK JACKET.

Index to Proceedings of the General Assembly 2018/2019, Part I - Subject Index

In *The Blood of Abraham*, originally published in 1985 with updates to the afterword in 1993 and 2007, President Carter explains his understanding of the Middle East and seeks to provide an enlightening and reconciling vision for greater peace in the region.

The A to Z of the United Nations

The massive intentional destruction of cultural heritage during the 1992-1995 Bosnian War targeting a historically diverse identity provoked global condemnation and became a seminal marker in the discourse on cultural heritage. It prompted an urgent reassessment of how cultural property could be protected in times of conflict and led to a more definitive recognition in international humanitarian law that destruction of a people's cultural heritage is an aspect of genocide. Yet surprisingly little has been published on the subject. This wide-ranging book provides the first comprehensive overview and critical analysis of the destruction of Bosnia-Herzegovina's cultural heritage and its far-reaching impact. Scrutinizing the responses of the international community during the war (including bodies like UNESCO and the Council of Europe), the volume also analyses how, after the conflict ended, external agendas impinged on heritage reconstruction to the detriment of the broader peace process and refugee return. It assesses implementation of Annex 8 of the Dayton Peace Agreement, a unique attempt to address the devastation to Bosnia's cultural heritage, and examines the treatment of war crimes involving cultural property at the International Criminal Tribunal for the former Yugoslavia (ICTY). With numerous case studies and plentiful illustrations, this important volume considers questions which have moved to the foreground with the inclusion of cultural heritage preservation in discussions of the right to culture in human rights discourse and as a vital element of post-conflict and development aid.

Our Common Agenda - Report of the Secretary-General

This book investigates the potential need for an international convention on forests and establishes a multifunctional concept of forests as a cornerstone for international forest regulation. Accordingly, it examines a variety of international instruments pertaining directly or indirectly to forests and explores their entangled, fragmented nature. While contending that the lack of consistency in international law impedes the development of a stand-alone international forest convention, at the same time it argues that the lessons learned from fragmentation as well as from the history of forest discourse on the international level open up new options for the regulation of forests in international law, based on (new) concepts of coordination and cooperation.

Resolutions and Decisions of the Economic and Social Council

This book examines the changing roles of Afghani women in the aftermath of the overthrow of the oppressive Taliban regime in 2001. It describes the success of women in the workforce, and evaluates how their achievements have come about in a nation that struggles to overcome years of poverty, corruption, regional conflicts, and the overwhelming destruction of war. The book also covers the unique health challenges faced by women and families living in Afghanistan, focusing on recent developments in maternal and reproductive health care, the lingering problems associated with food shortages, and the improved availability of local emergency services and basic health care. Finally, the work evaluates the impact of the 2005 resurgence of the Taliban on women and girls.

Climate Change, Forced Migration, and International Law

This work explains why the two U.N. development programs for Africa in the 1980s and 1990s, UNPAAERD and UNNADAF, failed. It argues that institutional weaknesses of the U.N. and constraints imposed by the world economic order contributed to the failure of these programs.

The New United Nations

Tehran's willingness to pause aspects of its nuclear program may offer opportunities to stroke regime concerns about the potential costs of moving forward. Since halting its crash nuclear weapons program in 2003, the Islamic Republic has pursued a cautious hedging strategy that has enabled it to become an advanced nuclear threshold state, while also avoiding a military confrontation with the United States and Israel. Yet Iran's willingness to pause aspects of its nuclear program in order to ease pressure—and in turn to pursue more urgent objectives—may help Washington constrain Tehran's nuclear ambitions by amplifying its concerns about the potential risks and costs of proliferating. In this Policy Focus, military analyst Michael Eisenstadt surveys the evolution of Iran's nuclear hedging strategy and suggests ways for the United States, along with its allies and partners, to shape the regime's proliferation calculus with the goal of preventing an Iranian breakout and a nuclearized Middle East.
