Introduction of 8051 Microcontroller Architecture

Question 2 Intel 8051 Follows Which Architecture

8051 Is Harvard Architecture Question 3 What Is the Difference between Harvard Architecture and Von Neumann Architecture

Question 4 8051 Was Developed Using Which Technology Answer

Question Five Why 8051 Is Called 8-Bit Microcontroller

Question 6 What Is the Width of Data Bus

Question 8 Lists out the Features of 8051

Question 12 How Much Total External Data Memory That Can Be Interfaced to the 8051

Question 13 What Is Special Function Registers Sfr

Microprocessor and Microcontroller Interview Questions - Microprocessor and Microcontroller Interview Questions by Engineering Funda 4,015 views 1 year ago 6 minutes, 33 seconds - This video includes **interview questions**, based Microprocessor and **Microcontroller**,; You can learn all the basics from following ...

Microprocessor & Microcontroller

What is microprocessor? Ans: It is a program controlled semiconductor device (IC), which fetches, Decodes and execute instructions.

What is the function of stack pointer? Ans: Stack pointer is the 16 bit register 1.It indicates the top location of stack memory. 2.While executing the interrupt and subroutine program it uses the microprocessor stack pointer.

5 What is assembler? Ans: An assembler translates a file of assembly language statements into a file of binary Machine instructions Hex code and binary data. It also checks syntax error of the assembly language.

7 What is the function of SID and SOD pin? Ans SID pin- SID pin is used by the microprocessor to accept one bit data under software control. SOD pin-SOD pin is used by microprocessor to transmit one bit data under software control.

What is assembly language? Ans: Assembly language is the symbolic representation of a computer's binary

What is the difference between assembly language and high level language? Ans: The assembly language requires an assembler for the process of conversion. The assembly language is a machine dependent type of language. It makes use of the mnemonic codes for operation Code Occupy less memory area.

What are the main function of linker? Ans: The linker performs three tasks: Searches the program libraries to find library routines used by the program, Determines the memory locations that code from each module will occupy and relocates it instructions by adjusting absolute references. Resolves references among files.

15 What is compiler? Ans: A compiler is software which converts high level language into its equivalent machine language. A compiler will take a program as one & compile it.

What do you mean by RAM? Ans: RAM the RAM is also called type of memory. It allows programmer to read write data

Explain the types of memory? Ans: There are two types of memory Primary memory. - Primary memory of a computer also known as its main memory is used to hold pieces of program, instruction, and data. Secondary memory. Secondary memory of a computer is known as auxiliary memory is used to take care of the limitation of primary memory.

What are tri-state devices and why they are essential in a bus oriented system? Ans: Tri state logic devices have three states (0, 1 and high impedance), When the enable maybe active high or active low line is activated, the device works. The disabled enable line makes the device at high Impedance state and it is disconnected from the circuit. For example see the tri stated inverter in the figure shown. In microcomputer system the peripherals are connected in parallel between address bus and data bus. Because of tri stated interfacing devices, peripherals do not load the system buses.

What do you mean by embedded system? Ans: A specialized computer system that is part of a larger system or machine. Typically, an embedded system is housed on a single microprocessor board with the programs stored in ROM. Virtually all cars etc utilize embedded operating system, but many are so specialized that the entire logic can be implemented as a single program

What is debugging? Ans: Debugging is a kind of process by which in any program used Instructions & content of Register are checked & logical error can be found

What do you mean by flag register? Ans: The Flag register is a Special Purpose Register which shows the The flag becomes set or reset after arithmetic and logical operation.

What is subroutine in microprocessor? Ans: The subroutine in the microprocessor is a sequence of program instructions code that performs a particular task. This is packaged as a unit and used in a particular task when needed. A subroutine is a unit which is used in multiple times in different
What is Pipelining in Microprocessor? Ans: The pipelining is an advance microprocessor technique or procedure. This is worked when the second task work before the first task. This technique used simultaneously at many processing task stages. This is helped to improve task performance. There have 5 stages of working; Instruction Fetch, Instruction Decode, Instruction Execute, Memory Access, write back Instruction

What is mnemonics? Ans: The mnemonic in the microprocessor is acronym/abbreviation, for operation. It is used mnemonics in instruction code to make easy and suitable coding.

What is dual core microprocessor? Ans: The dual-core is CPU with two cores or processors in an integrated circuit. Each processor has own cache and controller. The dual-processor has two separate modules and they linked together into a single chip.

What do you mean by RISC and CISC architecture of microprocessor? Ans: RISC Processor: -Reduced Instruction Set Computer. It is designed to reduce the execution time by simplifying the instruction set of the computer CISC Processor: - Complex Instruction Set Computer. It is designed to minimize the number of instructions per program, ignoring the number of cycles per instruction

What do you mean by little endian and big endian concept? Ans: Big-endian is an order in which the "big end" (most significant value in the sequence) is stored first, at the lowest storage address. Little-endian is an order in which the little end (least significant value in the sequence) is stored first.

How to refill air conditioner by R22 (video 32) - How to refill air conditioner by R22 (video 32) by Dahren Zana 5,175,749 views 6 years ago 8 minutes, 6 seconds - How to refill **air conditioner**, by R22.

Air conditioner (split)

Connect the blue here

Then connect the yellow hose

Close the red valve and open the blue valve

Now turn on the vacuum motor

Now connect yellow hose to the bottle

To expel the air in the yellow hose

Open the bottle gas (R22)

When the compressor starts then open the valve

Every 30 to 40 close the valve and open it

Then open the cover

This is the valve and this is the wires valve

Get out this wire from capacitor (after the compressor start)

the valve return to cool mode then you can start to put gas (R22)

I used refrigerator motor to put high pressure air to find the leak

installing a split air conditioner system

the wall mount

measure the distance between the holes of the wall

use a five millimeter masonry drill with a bosch hammer

prepare to drill the 65 millimeter hole in the wall

use a long masonry drill to pre-drill

start making the hole little by little

making sure the inner and outer holes are matching

connect all cables and wires to the indoor units

lay all the cables out

connecting the coolant lines to the inside unit

tighten the connections with the adapter and the torque

secure the insulation

hang the unit on the wall bracket plate

use some insulating foam

attached properly onto the wall the first 90 degree elbow

push the pipes over the bundle one after the other

cut a hole in the pipe

mark the holes for the bracket

put the outer unit on the bracket

run a separate wire from the house fuse box

close the wire terminal and the wall cord cover

hold the entire connector on the unit with a wrench

press onto the valve with a little piece of wire

turn the valve open

turn on the power with the separate fuse

Split Air Conditioner Installation Step By Step (2023) | Actual Installation Cost - Split Air Conditioner

Installation Step By Step (2023) | Actual Installation Cost by A2Z Home Gadgets 1,248,667 views 11

months ago 15 minutes - In this video I will be showing how both indoor and outdoor **AC**, units are installed, installation cost, best **AC**, in 2023. Should you ...

How is the outdoor AC Unit installed?

How is core cutting done

Installing the Indoor AC unit

How is the copper tube connected from indoor ac unit to outdoor ac unit

Connecting the copper tube to outdoor unit and testing for any leakage

Working of a LG AC and the noise it makes

Total Installation Cost for an AC

Should we go for a 3 star or 5 star AC

Why did I choose LG AC?

HVAC Duct Design: Manual D, Fittings, Friction Rate, Pressure Loss, & Static Pressure w/ Alex

Meaney - HVAC Duct Design: Manual D, Fittings, Friction Rate, Pressure Loss, & Static Pressure

w/ Alex Meaney by Home Performance 72,058 views 9 months ago 40 minutes - We're back again with my **HVAC design**, calculations trainer Alex Meaney (<https://MeanHVAC.com>), to talk about duct

design, ...

Cleanroom HVAC Design Webinar - Cleanroom HVAC Design Webinar by TitusHVAC 126,966 views 8 years ago 41 minutes - Mr. Wei Sun, president of Engsysco, covers a variety of topics in the Cleanroom **HVAC Design**, Webinar. Learning points include ...

Intro

Learning Points

What is a Cleanroom?

Cleanroom Standards in U.S. (Previous US Federal Standard and Current ISO Standards)

ISO 14644 Standard Classifications - Occupancy States

Pharmaceutical Grades vs. Classifications

Microbial Contamination - Limits In Operation

Other Standards, Guidelines & Certifications

Airborne Particulates

Particle Sources & Control

Airborne Particle Physical Controls

Microbiological Contamination & Control

Typical Ceiling Filter Coverage

Demand-Based Flow Control

Room Airflow Patterns

Cleanroom Floor Arrangements

Pressurization

Why Do Particles Migrate (Exchange) Between Cleanroom and Adjacent Area(s)?

Particle Net Gain/Loss through Migration

Pressure Differential Criteria (Pressure Differential (AP) Across Cleanroom Envelope)

Particle Migration Control (Room Pressure Control)

Traditional Rules-of-Thumb Design Methods

Dynamic Particle Migration Control

Analogy Between Filter and Airlock Performance

HVAC Diagrams

Pressurized Plenum (Fan Tower) Arrangement

Fan Filter Units (FFU) Arrangement

How This Desert City Stays Cool With An Ancient Air Conditioning System - How This Desert City Stays Cool With An Ancient Air Conditioning System by Leaf of Life 1,214,289 views 9 months ago 4 minutes, 18 seconds - This is a Bâdgir an ancient **air conditioner**, invented around the eighth century AD. Despite using no electricity, it has a cooling ...

Cleanroom Air Conditioning HVAC Systems - Cleanroom Air Conditioning HVAC Systems by Air Innovations, Inc. 231,325 views 3 years ago 30 seconds - Learn more about Air Innovations cleanroom **HVAC**, system capabilities: ...

Discover the Essence of HVAC Design: (2023 Updated,11+ Hours of Expert Instruction) - Discover the Essence of HVAC Design: (2023 Updated,11+ Hours of Expert Instruction) by SM Techno MEP Training Services 10,628 views 6 months ago 11 hours, 41 minutes - Course Title: Introduction to **HVAC**, Systems Course Duration: Typically offered as a semester-long course Course Description: ...

Midea air conditioners professional and fast installation on GUAM - Midea air conditioners professional and fast installation on GUAM by AEL&L Air Conditioning Services 1,661,878 views 2 years ago 3 minutes, 4 seconds - •Our technicians are at your service 7 days a week from 8:30 am to 5:00 pm (the last order at 3:00 pm). •Our client service ...

Ductless Mini Split AC Systems - How They Work - Ductless Mini Split AC Systems - How They Work by ComfortUp 340,830 views 8 years ago 58 seconds - Ductless mini split technology has come a very long way in the past 10 years. Energy efficient systems now far exceed the ...
