Awarded the Nobel Prize for Literature in 1969, Samuel Beckett's influence on 20th century fiction and drama is immeasurable. Published in conjunction with the RT (Radio Telefís Éireann) Thomas Davis Lecture Series to mark the centenary of Beckett's birth, Samuel Beckett - 100 Years consists of thirteen essays by many of the foremost academics studying Beckett today. Literary luminaries such as John Banville and Anthony Cronin line up alongside philosophers Dermot Moran and Richard Kearney to delve into the psyche of the man responsible for classics such as *Murphy*, *Krapp's Last Tape*, and *Waiting for Godot*, while actors Barry McGovern and Rosemary Pountney describe what makes his works so theatrical. The book is a challenging and serious look at Beckett's work and its impact on literature today.

There are 177 illustrations and each procedure is explained in a step-by-step method using an appropriate illustration. The translation from Japanese to English is, at times, a little quirky but the illustrations make up for any difficulty in understanding what needs to be done! Scientific investigations use a variety of methods, tools, and techniques to revise and produce new knowledge

But, performing laboratories can be dangerous if students are not focused and proper safety precautions are not followed

Let's take a look at some of the most basic rules that should be followed in any school science lab
Tie back long hair. Don't wear baggy clothing or hanging jewelry that can touch heat or chemical sources

Open-toed shoes are not appropriate for the lab. Wear sneakers.

NO FOOD or drinks are allowed during laboratory activities. This includes gum. Wash your hands before and after handling any lab materials

Keep the lab area clean and free of unnecessary books, papers, coats, backpacks, and equipment
Point test tubes that are being heated away from yourself and away from others. Chemicals can splash, boil, or even explode out of a heated tube

Never heat a liquid in a closed container Expanding gases may blow the container apart

Never pick up a container that has been heated using your bare hands. Use tongs if instructed

Never inhale or smell fumes directly from a container. Use a *wafting* motion if instructed to smell.
Properly dispose of waste- never put materials down the sink or in the regular trash without the instruction of your teacher.

Report broken glass to the teacher and do not handle. Never put broken glass into the regular trash can

Lab etiquette is extremely important for the proper functioning of a classroom lab and the safety of yourself and those around you.

Review the rules to prepare yourself for safe and meaningful laboratory experiences!
