Sort of Forever

"The talented Warner has previously explored the themes of friendship and change, but never more powerfully or effectively than in this piercing novel. Driven almost exclusively by dialogue, her narrative focuses on the necessarily metamorphosing relationship between the often needy 12-year-old Cady and her normally independent, feisty best friend, Nana, who is dying of cancer."--"Publishers Weekly, " starred review.

Nana's Girl

Samantha O'Connor knows life can be short. She has known that since she was eleven years old. That's when her beloved Nana died from breast cancer. And as a nurse in Denver General's busy Emergency Department she sees people get a wake up call every day. On Halloween, she gets her own wake up call when she has a horrible car accident and ends up back in the ER dressed as Goldilocks. While recovering at her parents' house, she finds an old box of presents from Nana. It has her huge old teddy bear, a charm bracelet, her blue haired Flatsy doll, and a little black patent leather purse in it. She also finds a letter from Nana written just before she died and a caricature of herself as "Nana's Girl." This reminds Sam of who she really is. Using that as her motivation, she creates a To Do List for her life. *Nana's Girl* is for all who have lost someone they loved dearly, especially those who have lost someone to breast cancer. Nana never got any treatment for her breast cancer. I can only guess how she must have suffered. She never told anyone. I am sure she didn't want anyone to worry. And I am sure she didn't want to go to the hospital. She always said she hated them. She thought people died there. I don't know if treatment would have helped Nana then. That was a different time. I do know that it does help

many now. It is my hope to prevent even one more person from suffering. Although Nana's Girl stems from my Nana, the story, characters and places are fictional. It was too personal to tell otherwise, and I would never have finished with any dry pages. All profits from sale of Nana's Girl will be donated to The Breast Cancer Foundation at www.bcrfcure.org in loving memory of Katherine Mahan.

Cancer Party!

When Sara Olsher was diagnosed with cancer at the age of 34, her first thought was how to tell her six-year-old daughter without scaring her. Cancer Party! is the result of that conversation and experience. It is the book Sara wished she could have snuggled up on the couch and read with her child. Cancer Party! is a little bit science, a little bit silly, and a lot straightforward. Keeping it simple, Cancer Party! uses bright illustrations to show how cells divide, work, and what happens when a cell gets confused and turns into cancer. Aimed at families with kids ages 4 to 10, Cancer Party! helps families address the physical impact cancer treatment has on a patient and their child, helps kids understand what to expect, and assures them that cancer isn't their fault. "But every once in awhile, one of the cells forgets what its job is. It can't remember what to do! It's so confused. And since it doesn't know what else to do, it decides to have a PARTY." Cancer Party! is the perfect book for families that want to explain what cancer actually is, and applies to mothers, fathers, grandparents, and many types of cancer, including breast cancer, colon cancer, blood cancers such as leukemia, and bone cancers. It aims to empower kids with knowledge, which is proven to help kids through traumatic situations. Sara Olsher is the founder of Mighty + Bright, which helps families through hard things like divorce, cancer, and other major changes using visual magnetic calendars and daily charts. Based on decades of research about emotional intelligence and how to talk to kids so they actually learn, Mighty + Bright's calendars have helped hundreds of families through some of the hardest times in their lives.

The Praeger Handbook on Women's Cancers

Written by experts in psycho-oncology, this book synthesizes the findings of the latest research on women's cancers to empower women to make informed choices about treatment options. Each year, hundreds of thousands of women are diagnosed with cancer in the United States alone. The total number affected is larger still, comprising siblings, parents, partners, and children of these women. In this single-volume work, an international team of experts address the physical, medical, and psychological matters that are triggered by a diagnosis of having a form of "women's cancer"—breast, cervical, endometrial, gestational, ovarian, uterine, vaginal, and vulvar being some of the more common. The handbook examines and explains each type of women's cancer, covering the specifics of incidence, diagnosis, treatment options, and more, providing an up-to-date guide for women and their families to assist in making informed choices about their treatment options. The book includes personal accounts from women who survived cancers and beat their emotional challenges, addresses myths versus realities regarding women's cancers, and covers relevant, related topics such as race, sexual orientation, religion, and cancer coping. Special attention is given to the impact of women's cancers on relationships, intimacy, and body image, as well as psychological factors such as anxiety, depression, and fear.

Grandma Kathy Has Cancer

Cancer is a very frightening and mysterious disease from which children are often sheltered because parents are uncertain as to how to deal with it. The message it conveys is one of hope, love, and caring. Colleen Buckley resides in New Jersey with her husband. She has two married children and two grandchildren; she has been a nurse for over 25 years. Cancer is no stranger to Colleen, who has lost her father, her grandmother, and two of her sister-in-laws to this disease. Her husband, mother, and another sister-in-law are cancer survivors. Colleen's inspiration for this book has been her sister, Kathy's, ongoing fight with ovarian cancer. Colleen is currently working on a second children's book about cancer. Kim Sponaule has illustrated "The Adventures of Beatrice" books and the "Anna Banana" and "Corey's Story" series for young readers. She resides in Salem County, NJ with her husband Jerry, son Josh and feisty little westie, Casey.

Now, several years later, Author Morgan wants to help other families find the courage and strength to get through their own breast cancer battle, or any other type of cancer. She chronicles the fears of the realities and the unknowns, the shift from a happy-go-lucky family to a family with many tears, the family's disagreements for medical care, the various medical options available and finally she shares the family's plan to work together as a team to help her sister through this battle. *My Sister Has Breast Cancer!* is a heartfelt, touching and informative compilation of Author Morgan's journal entries, which she maintained through her family's own battle with breast cancer. Christine Morgan's book will inspire and comfort the reader through any crisis. Christine is a busy woman with a large and close-knit family, who works in many different arenas to help others. Her main interest is in women's health issues. Cancer Changes Some Things, But Not Everything

When someone has cancer, it can change a lot of things about that person. Cancer can change the way someone looks and feels; it can even change some of the things someone does. But there is one thing that cancer can never change: cancer can never change love. Gaining insight from her own mother's battle with cancer, author Dana Romanello-Flynn shows what day-to-day life can be like for the child of a parent with cancer. That struggle can be one of the most unsettling things a child can face, and in that situation it is important to focus on hope and life. *Cancer Changes Some Things, But Not Everything* is told from the perspective of a daughter whose mother has cancer. Embedded within her story are little things that can be helpful and inspire hope in children as they support their parents on their own cancer journeys. A portion of the proceeds from the sale of this book will be donated to support the research efforts of the Lustgarten Foundation to find a cure for pancreatic cancer. JOURNEYS OF MASTER WIZARD FARANGU (III)

Bile duct cancer, also known as cholangiocarcinoma, starts in a bile duct. To understand this cancer, it helps to know about the bile ducts and what they normally do. The bile ducts are a series of thin tubes that go from the liver to the small intestine. Their main job is to allow a fluid called bile to go from the liver and gallbladder into the small intestine, where it helps digest the fats in food. Different parts of the bile duct system have different names. In the liver it begins as many tiny tubes (called ductules). The ductules come together to form small tubes called ducts. These merge into larger ducts and then into the left and right hepatic ducts. All of these ducts within the liver are called intrahepatic bile ducts. The left and right hepatic ducts exit the liver and join to form the common hepatic duct in an area called the hilum. Lower down, the gallbladder (a small organ that stores bile) is joined to the common hepatic duct by a small duct called the cystic duct. This combined duct is called the common bile duct. The common bile duct passes through part of the pancreas before it joins with the pancreatic duct and empties into the first part of the small intestine (the duodenum) at the ampulla of Vater.

Introducción

Hay que despertarse antes de levantarse.

Después de despertarte...

Puedes pensar que levantarse de la cama es algo fácil.

Tienes que levantarte con el pie derecho

Después de mirarme al espejo

Hay que ducharse todos los días

Hay que mirarse al espejo dos veces

Después de cada comida, hay que lavarse los dientes.

Llevo un palillo de dientes para limpiarme los dientes cuando estoy en el restaurante

Costar un ojo de la cara: muy caro.

No me la pongo directamente.

Aparte de lavarme los dientes y ponerme crema hidratante en la cara

Me pongo peluca

A veces me pongo un sombrero.
