Dutch and Flemish Flower Pieces (2 vols in case)

This richly illustrated book provides an overview of all known Dutch and Flemish artists up to the nineteenth century, who painted or drew flower pieces, or else made prints of them.

Besler Florilegium

Consists of plates collected together in Besler's Hortus Eystettensis, a gardening book first published in 1613. Among the botanic gardens ... that of the Bishop of Eichstätt on the Willibaldsburg was outstanding; the Bishop ordered drawings of the flowers and plants to be made. Long considered one of the most ambitious and splendid books on ornamental flowering plants. Reproductions are in full colour and in the original size. With full notes and commentary on each plant in a new English translation.

A Garden Eden. Masterpieces of Botanical Illustration

Art meets science in this far-reaching catalogue of botanical illustration. Drawn from the vaults of the National Library of Vienna, these exquisite color reproductions range from 6th-century manuscripts to 19th-century masterpieces and celebrate both the skill of botanical artists and the abundance of natural flora.

Examining the resurgent interest in painting and the proliferation of new digital media in recent years, this generously illustrated book delineates painting's complex relationship with information technology. In a survey that begins in the mid-twentieth century, long before the birth of the Internet, this book traces painting's capacity to digest and transform other media, even as its own legitimacy has been questioned. Featuring the work of numerous renowned artists, from Sigmar Polke to Nicole Eisenman and from Cy Twombly to Amy Sillman, the book examines how painting has addressed digital technology as it relates to human experience and perception, and includes three in-depth essays and additional texts by influential thinkers from the field. Comprehensive and lavishly illustrated, the book presents a wide range of works that reconsider the assumed opposition of the digital and the analog, the human and the technological, arguing that painting has served as a means to represent - and even enact - new media. This book affirms the ongoing vitality of the medium of painting in the midst of a digital world.

A must-have for botanical art enthusiasts and Maria Sibylla Merian fans, this gorgeous collection of frameable reproductions is blooming with color and meticulous detail. More than three centuries after Maria Sibylla Merian established herself as a scientific trailblazer--and after more than two centuries of obscurity--the work of this pioneering naturalist and artist is being rediscovered. Merian's work, *The New Book of Flowers*, raised the artistic standards of natural history illustration. Published in 1675, the book employed impeccable botanic accuracy with artistic expression. In it, Merian moved away from traditional methods that favored single illustrations and instead composed her studies to explore the relationships between flowers and insects. This poster book draws its nearly two dozen illustrations from *The New Book of Flowers*. Exquisitely reproduced, each illustration reveals the exacting detail and luminous colors that are the hallmark of Merian's work. Perfect for close study as well as decoration, this treasury of botanical delight will help brighten any room--and inspire anyone drawn to the beautiful world of flowers.

Created during Alexander von Humboldt's historic expedition to the Americas and Cuba, these intricate and delicately tinted prints record his revolutionary findings as he traveled through jungles, across rivers, and over mountainous terrain.

"Durer's drawings and watercolours show the artist at his most accessible, revealing his techniques and the masterly use of his media. No woodcut engravers, printers or apprentices come between Durer and the viewer. This contributes to the particular fascination of such sheets as *The Large Piece of Turf* or *Hare*. The introductory essay, portraying Durer as a passionate observer of his surroundings and an exceptionally gifted artist, is followed by thirty-five, high-quality reproductions of his most popular drawings and watercolours."--Jaquette

Nature's Artist

This delightful and ingenious pop-up book traces a caterpillar's evolution from lowly cocoon to magnificent winged butterfly. Along the way we find cunning insects hidden in the grass, inchworms munching their way through a jungle of leaves, and a floral paradise where the newly hatched butterfly makes its home. Intricately constructed with the dazzling color and delicate details that have become UG's trademark, this book also tells young readers one of nature's most basic stories.

In the Butterfly Garden

A compact edition of Joseph Banks' extraordinary botanical engravings of flora discovered on Captain Cook's first voyage. Joseph Banks accompanied Captain Cook on his first voyage around the world from 1768 to 1771. A gifted and wealthy young naturalist, Banks collected exotic flora from Madeira, Brazil, Tierra del Fuego, the Society Islands, New Zealand, Australia, and Java, bringing back over 1,300 species that had never been seen or studied by Europeans. On his return, Banks commissioned over 700 engravings. Known collectively as Banks' Florilegium, they are some of the most precise and exquisite examples of botanical illustration ever created. The Florilegium was never published in Banks' lifetime, and it was not until 1990 that a complete set in color was issued under the direction of the British Museum. It is from these prints that the new compact edition of Joseph Banks' Florilegium is selected, as directed by David Mabberley, who has provided expert botanical commentaries. Art historian Mel Gooding sets the works in context while an afterword by Joe Studholme describes the history of modern printing. Joseph Banks' Florilegium is not only a great work of science, but also a major achievement in collaborative Enlightenment art and a volume of outstanding beauty.

Rediscover the drawings of Albrecht Dürer, one of the most prominent Renaissance artists, known as an incomparable painter and draughtsman with a keen eye for the natural world. During his lifetime, Dürer found tremendous success as a painter and printmaker, taking commissions from prominent figures such as Frederick the Wise and Holy Roman Emperor Maximilian I. His drawings and studies reveal his interest in human proportions, anatomy, and perspective. Featured in this book are Dürer's drawings from the Albertina Museum's preeminent collection including family portraits, studies of animals and plants, and studies of the human body. This book showcases more than 100 of Dürer's drawings including Hare, Self Portrait at the Age of 13, and Melencolia I, along with paintings and prints. Featuring scholarly essays and beautifully reproduced works, this book shows the reader not only how important Dürer's drawings are to his own oeuvre, but also how he helped drawing become an appreciated medium in its own right.

This stunning volume delves into the extraordinary illustrated notebooks of Alexander von Humboldt's journeys through the Americas, which reveal the graphic musings of an intrepid explorer, a writer and philosopher, and the father of the environmental movement. At the dawn of the 19th century, the Prussian explorer Alexander von Humboldt was granted permission to charter an expedition to Spain's colonies in the New World. Over the course of five years, Humboldt would travel to the Orinoco and Amazon rivers, predict the agricultural and commercial potential of Cuba, climb higher in the Andes than anyone before him, and acknowledge the achievements of the ancient indigenous American civilizations. And he recorded it all in a series of diaries. On occasion of the 250th anniversary of Humboldt's birth, the drawings from these diaries are now available in a large format, slip-cased edition. Structured thematically, the 450 illustrations have been painstakingly reproduced, complete with handwritten notes, ink stains and water spots. Humboldt drew everything he saw--Incan ruins, electric eels, the transit of Mercury, silver mines, and ocean currents. In addition to being remarkably well preserved, these drawings offer tremendous insight into Humboldt's prescient observations. Featuring commentary by a renowned expert on Humboldt's work, this breathtaking volume will bring to life one

of history's most accomplished thinkers, while providing fascinating reading for anyone interested in history and nature.

The amazing story of the life and work of the renowned botanical artist Maria Sibylla Merian is told alongside her beautiful illustrations of butterflies in this charming and elegant book. A woman ahead of her time, Maria Sibylla Merian (1647–1717) was an intrepid explorer, naturalist, scholar, as well as a magnificent artist. This lovely, impeccably designed book tells Merian's incredible life story alongside colorful reproductions of her engravings and watercolors of the butterflies she encountered during her lifetime in Germany and the Netherlands, and her seminal trip to the Dutch colony of Surinam. The book recounts Merian's monumental expedition, her work as an advocate for the slave laborers of Surinam, and her important studies of the anatomy and life cycle of the butterfly. Author Boris Friedewald employs Merian's favorite insect as a metaphor for the artist's own pioneering evolution from budding entomologist to educator, activist, and artist. A visual treasure as well as a satisfying read, this exquisite volume is the perfect gift for anyone interested in Merian's amazing life and groundbreaking body of work.

Throughout his life photographer Jim Naughten has been fascinated with the natural world. As a child, he collected fossils he found near his home in Dover. Now a renowned photographer, Naughten has started to experiment with stereography and has turned to his boyhood interest, gaining access to the archives of some of the world's most prestigious natural history museums. This gorgeously produced book contains fifty images of marine life, reptiles, mammals, birds and primates photographed expressly for viewing through a stereoscope, which is included with the book. Stereoscopy was invented in 1839 to study and explain binocular vision. Having two eyes allows humans to determine distance and depth and stereoscopy shows a left- and right-eye view from a slightly different angle, as we see things in day-to-day life. Looking through the stereo viewer, readers will see the specimens as three-dimensional objects. As the images jump off the page, their incredible details become apparent—delicate bat wings, the spiraling skeleton of a python, the almost mythic form of a leafy sea dragon. A foreword by Martin Barnes of the Victoria and Albert Museum, London offers an assessment of the work while essays on the specimens themselves and the history of stereoscopy provide rich background to this photographic technology, and to Naughten's achievement in bringing to life a world that seamlessly melds the past and present.

One of our greatest writers about the sea has written an engrossing story of one of history's most legendary maritime explorers. Patrick O'Brian's biography of naturalist, explorer and co-founder of Australia, Joseph Banks, is narrative history at its finest. Published to rave reviews, it reveals Banks to be a man of enduring importance, and establishes itself as a classic of exploration. "It is in his description of that arduous three-year voyage [on the ship Endeavor] that Mr. O'Brian is at his most brilliant. . . . He makes us understand what life within this wooden world was like, with its 94 male souls, two dogs, a cat and a goat."—Linda Colley, New York Times "An absorbing, finely written overview, meant for the general reader, of a major figure in the history of natural science."—Frank Stewart, Los Angeles Times "[This book is] the definitive biography of an extraordinary subject."—Robert Taylor, Boston Globe "His skill at narrative and his extensive knowledge of the maritime history . . . give him a definite leg up in telling this . . . story."—Tom Clark, San Francisco Chronicle

Visit over forty of Ireland's most beautiful gardens without moving from your armchair with this stunning book, ranging from the grand old demesnes of the Anglo-Irish ascendancy to the intensely personal creations of passionate plantsmen and garden makers. Visitors to Ireland are often surprised at the 'palm trees' that make so many gardens look as if they belong in a holiday postcard. How can such exotics survive on an island that is as far north as the prairies of Canada and the pine forests of Siberia? The answer lies in the tail of the Gulf Stream - the North Atlantic Drift - which wraps around this green land on the western edge of Europe. Its warm and watery embrace bestows the renowned 'soft' climate that allows those palm trees (in fact, New Zealand cordylines) to make their homes here - along with tree ferns from Australia and bananas from Japan. Plants from colder regions, including rhododendrons, primulas and all manner of alpine, are equally happy. So, with a range of plants that runs from the subtropical to the subarctic, and a landscape that varies from gently pastoral to savagely rugged, the aptly named Emerald Isle has some of the most romantic and interesting gardens in the world. The result of a lifetime visiting, considering and writing about gardens in Ireland, and several years of dedicated photography, this is a truly comprehensive exploration of a fascinating subject.

Prismacolor Premier Tips for Adult Colorists - and a Color Along! - Prismacolor Premier Tips for Adult Colorists - and a Color Along! by Tiny Worlds of Wonder 51,688 views 4 years ago 42 minutes - Hi,, friends! Today I'm stopping in to share some of my favorite tips for using Prismacolor Premier pencils in adult **coloring books**,.

do a quick tutorial about prismacolor pencils

start on a brand new page

generalize your color theme for the whole page

starting to lay out a page

block in lightly my various color values

lay in some light color values here in the front

keep my layers extremely light

create some shadow here around the edges

sort of blend those colors out a little bit

roughing up the tip a little

visualize some contrast here on the darkest areas

start adding your lowlights

bring just a little more dark tone over to the edge

add a little more dark tone

putting the layer of your lightest color over the darker

add just a little more of my darkest color

work a little on my darkest shadow under the lip

take just a little color off the bottom

adding a little bit more of a red purple

keep the top edge of this fairly light
