Using Nursing Theory to Guide Professional Practice

2. Discuss the role of nursing theory to the practice

Grand Theory 2

Conceptual Models

A person under the care of a nurse, a total being with universal, developmental and health deviation needs who is capable of self care

Health involves dynamic life experiences of a human being, which implies continuous adjustment to stressors in the internal and external environment through optimum use of ones resources to achieve maximum potential for daily living

The goal to providing cultural specific and universal nursing care practices in promoting health or wellbeing or to help people to face unfavorable human conditions, illness or death in culturally meaningful

The role of the nurse is to find out and meet the patients immediate need for help

1. "The interpersonal relationship occurs in phases known as preorientation, orientation, working, and termination." 2. "Nursing practice will be guided towards three levels of prevention: primary, secondary, and tertiary." 3. "Human beings are the focus of nursing care, and the goal is health for individuals, families, communities, and the world." 4. "Conservation is guided in four areas: energy, structural integrity, personal integrity, and social integrity."
