LM: "Com'è possibile aprirsi ai valori per raggiungere la consapevolezza di ciò che conta per noi veramente?"

SH: "La mente è orientata alla risoluzione dei problemi: la modalità giudicante della nostra mente, ci insegna ad approcciarci alle cose sulla base del giudizio.

Conosco solo 4 modi per raggiungere la consapevolezza di queste qualità e tutti sono accessibili solo dopo aver "messo un freno" agli eccessi della mente orientata al problem-solving, così da aiutarci a trovare quel tipo di consapevolezza che ci permette di osservare, descrivere e apprezzare.

Ad esempio se stasera dovete vedere un bellissimo tramonto, non vi mettereste a dire "Oh, meraviglioso! Ma forse servirebbe un po' più di blu e non così tanto rosa!": questo tipo di processo basato sul giudizio è quello che utilizziamo per definire risultati e obiettivi, e fa sì che viviamo la vita come un problema da risolvere.

quindi ecco i 4 modi per raggiungere la consapevolezza di queste qualità

LM: "Cosa intendi con flessibilità e inflessibilità psicologica nell'ACT?"

SH: "Sì, utilizziamo il termine flessibilità psicologica e ciò a cui questo termine si riferisce è un insieme di abilità che hanno una direzione positiva

L'ACT è parte di un lavoro molto più ampio che mira a sviluppare la flessibilità psicologica nella

vita umana e che tenta di creare una disciplina scientifica “annidata” nella scienza evolutiva, una scienza comportamentale che sia funzionale e contestuale e che sia in grado di comprendere come funzionano questi processi, come possono essere appresi e diffusi.”
