British Media and the Rwandan Genocide

Throughout the 1990s, humanitarian interventionism sat at a crossroads, where ideas about rights and duties within and beyond borders collided with an international reality of civil conflict where the most basic human rights were violated in the most brutal manner. This growing awareness of humanitarian crises has been enabled by a more globalized media which increasingly shapes public perceptions of distant crises, public opinion, and political decision-making. Clarke examines the extent to which the public discourse, and particular concepts, including those of an ethical and legal nature, influenced British newspaper coverage of the 1994 crisis in Rwanda, and, in turn, the extent to which that coverage influenced the British Parliament's response to the crisis. Through his development and application of a broader methodological approach that combines both quantitative and qualitative analyses, the book offers a fuller understanding of the relationship between media coverage, parliamentary debate, and policy formulation, and the central role that the globalized media plays in this process. Integrating ethics,

law and empirical analysis of the media to obtain a more cohesive understanding of the chemistry of the media-public policy nexus, this work will be of interest to graduates and scholars in a range of areas, including Genocide Studies, the Responsibility to Protect, the Media & Politics and International Relations.

Media and Mass Atrocity

When human beings are at their worst – as they most certainly were in Rwanda during the 1994 genocide – the world needs the institutions of journalism and the media to be at their best. Sadly, in Rwanda, the media fell short. *Media and Mass Atrocity* revisits the case of Rwanda, but also examines how the nexus between media and mass atrocity has been shaped by the dramatic rise of social media. It has been twenty-five years since Rwanda slid into the abyss. The killings happened in broad daylight, but many of us turned away. A quarter century later, there is still much to learn about the relationship between the media and genocide, an issue laid bare by the Rwanda tragedy. *Media and Mass Atrocity* revisits the debate over the role of traditional news media in Rwanda, where, confronted by the horrors taking place, international news media, for the most part, turned away, and at times muddled the story when they did pay attention. Hate-media outlets in Rwanda played a role in laying the groundwork for genocide, and then actively encouraged the extermination campaign. The news media not only failed to fully grasp and communicate the genocide, but mostly overlooked the war crimes committed during the genocide and in its aftermath by the Rwandan Patriotic Front. The global media landscape has been transformed since Rwanda. We are now saturated with social media, generated as often as not by non-journalists. Mobile phones are everywhere. And in many quarters, the traditional news media business model continues to recede. Against that backdrop, it is more important than ever to examine the nexus between media and mass atrocity. The book includes an extensive section on the echoes of Rwanda, which looks at the cases of Darfur, the Central African Republic, Myanmar, and South Sudan, while the impact of social media as a new actor is examined through chapters on social media use by the Islamic State and in Syria and in other contexts across the developing world. It also looks at the aftermath of the genocide: the shifting narrative of the genocide itself, the evolving debate over the role and impact of hate media in Rwanda, the challenge of digitizing archival records of the genocide, and the fostering of free and independent media in atrocity's wake. The volume also probes how journalists themselves confront mass atrocity and examines the preventive function of media through the use of advanced digital technology as well as radio programming in the Lake Chad Basin and the Democratic Republic of Congo. *Media and Mass Atrocity* questions what the lessons of Rwanda mean now, in an age of communications so dramatically influenced by social media and the relative decline of traditional news media.

Women and War in Rwanda

Focusing on television media reporting of the 1994 genocide in Rwanda and its aftermath, this book explores how African states directly involved in conflict, western states with geopolitical interests in Africa's Great Lakes region, militia groups, human rights activists and NGOs use gendered media narratives strategically, often engaging in politics of revisionism and denial, to change the behaviour of other actors in the international system. Critically analysing BBC documentary films and news features and drawing on interviews with British, Rwandan and Congolese journalists, filmmakers, political commentators and human rights activists Georgina Holmes argues that documentary films and political discussion programmes are postcolonial contact zones, wherein competing actors perform in an attempt to influence international political decision-making on military and humanitarian intervention and public perceptions of genocide and war. The book breaks new ground in understanding how Rwandan and Congolese women actively engage in producing and shaping international public discourse on genocide and war, despite being depicted as silent, passive victims of conflict. This book is essential reading on the gendered dynamics of media reporting on conflicts and will appeal to anyone with an interest in Feminist Security Studies, Political Communication, Media and Film Studies, African Studies, Genocide Studies and International Relations.

The Media and the Rwanda Genocide

Explores the role of the media in the Rwandan genocide -- within the country and beyond.

Britain's Hidden Role in the Rwandan Genocide

Britaine(tm)s Hidden Role in the Rwandan Genocide examines the role of the United Kingdom as a global elite bystander to the crime of genocide, and its complicity - in violation of international criminal laws - in the Rwandan genocide of 1994. As prevailing accounts confine themselves to the role and actions of the United States and the United Nations, the full picture of Rwanda(tm)s genocide has yet to be revealed. Hazel Cameron demonstrates that it is the unravelling of the criminal role and actions of the British that illuminates a more detailed answer to the question of e~why(tm) the genocide in Rwanda occurred. In this book, she provides a systematic and detailed analysis of the policies of the British Government towards civil unrest in Rwanda throughout the 1990s that culminated in genocide. Utilising documentary evidence obtained as a result of Freedom of Information requests to the Foreign and Commonwealth Office, as well as material obtained through extensive interviews - with British government cabinet members, diplomats, Ambassadors to the United Nations Security Council, prisoners in Rwanda convicted of being leaders and organisers of genocide, and victims and survivors of genocide in Rwanda e" she finds that the actions of the British and French governments, both before and during the Rwandan genocide of 1994, were disassociated from human rights norms. It is suggested herein that the decision-making of the Major government during the period of 1990 e" 1994 was for the advancement of the interrelated goals of maintaining power status and ensuring economic interests in key areas of Africa, inferring a substantial degree of complicity in genocide by omission. That international politics is a strategic game has evidenced itself in the roles played by both the government of the United Kingdom and France in seeking to maximise their respective political and economic interests out with the existing international criminal constraints during the genocide in Rwanda. A micro study of the actions of the French Operation Turquoise reveals their actions to be clearly definable as complicity in genocide by commission. This account of the legal culpability of the powerful within the corridors of government in both London and Paris evidences that these behaviours cannot be conceptualised under existing notions of state crime and this research serves to illuminate the inadequacies and limitations of a concept of state crime in international law as it currently stands and will be of interest to anyone concerned with the misuse of state power.

A People Betrayed

Events in Rwanda in 1994 mark a landmark in the history of modern genocide. Up to one million people were killed in a planned public and political campaign. In the face of indisputable evidence, the Security Council of the United Nations failed to respond. In this classic of investigative journalism, Linda Melvern tells the compelling story of what happened. She holds governments to account, showing how individuals could have prevented what was happening and didn't do so. The book also reveals the unrecognised heroism of those who stayed on during the genocide, volunteer peacekeepers and those who ran emergency medical care. Fifteen years on, this new edition examines the ongoing impact of the 1948 Genocide Convention and the shock waves Rwanda caused around the world. Based on fresh interviews with key players and newly-released documents, A People Betrayed is a shocking indictment of the way Rwanda is and was forgotten and how today it is remembered in the West.

The Development Path Less Traveled

This paper explores some of the key factors behind Rwanda key successes, including unique institution-building that emphasized governance and ownership; aid-fueled and government-led strategic investment in people, infrastructure, and high-yield economic activity; re-establishment and expansion of a domestic tax base; policies to reduce aid dependency by attracting private investment and bolstering exports; and a purposeful strategy to harness the economic power of gender inclusion.

The International Response to Conflict and Genocide

Britain's Hidden Role in the Rwandan Genocide examines the role of the United Kingdom as a global elite bystander to the crime of genocide, and its complicity, in violation of international criminal laws during the Rwandan genocide of 1994. As prevailing accounts confine themselves to the role and actions of the United States and the United Nations, the full picture of Rwanda's genocide has yet to be revealed. Hazel Cameron demonstrates that it is the unravelling of the criminal role and actions of the British that illuminates a more detailed answer to the question of 'why' the genocide in Rwanda occurred. In this book, she provides a systematic and detailed analysis of the policies

of the British Government towards civil unrest in Rwanda throughout the 1990s that culminated in genocide. Utilising documentary evidence obtained as a result of Freedom of Information requests to the Foreign and Commonwealth Office, as well as material obtained through extensive interviews - with British government cabinet members, diplomats, Ambassadors to the United Nations Security Council, prisoners in Rwanda convicted of being leaders and organisers of genocide, and victims and survivors of genocide in Rwanda – the author finds that the actions of the British and French governments, both before and during the Rwandan genocide of 1994, were disassociated from human rights norms. It is suggested herein that the decision-making of the Major government during the period of 1990 – 1994 was for the advancement of the interrelated goals of maintaining power status and ensuring economic interests in key areas of Africa. This account of the legal culpability of the powerful within the corridors of government, in both London and Paris, shows that these behaviours cannot be conceptualised under existing notions of state crime. This book serves to illuminate the inadequacies and limitations of a concept of state crime in international law as it currently stands, and will be of considerable interest to anyone concerned with the misuse of state power.

Britain's Hidden Role in the Rwandan Genocide

Throughout the 1990s, Médecins Sans Frontières (MSF) faced challenges posed by the genocide of Rwandan Tutsis and a succession of outbreaks of political violence in Rwanda and in its neighbours. This book recounts the experiences of the MSF teams working in the field.

Humanitarian aid, genocide and mass killings

In her innovative study of human rights discourse, Lena Khor takes up the prevailing concern by scholars who charge that the globalization of human rights discourse is becoming yet another form of cultural, legal, and political imperialism imposed from above by an international human rights regime based in the Global North. To counter these charges, she argues for a paradigmatic shift away from human rights as a hegemonic, immutable, and ill-defined entity toward one that recognizes human rights as a social construct comprised of language and of language use. She proposes a new theoretical framework based on a global discourse network of human rights, supporting her model with case studies that examine the words and actions of witnesses to genocide (Paul Rusesabagina) and humanitarian organizations (Doctors Without Borders). She also analyzes the language of texts such as Michael Ondaatje's *Anil's Ghost*. Khor's idea of a globally networked structure of human rights discourse enables actors (textual and human) who tap into or are linked into this rapidly globalizing system of networks to increase their power as speaking subjects and, in so doing, to influence the range of acceptable meanings and practices of human rights in the cultural sphere. Khor's book is a unique and important contribution to the study of human rights in the humanities that revitalizes viable notions of agency and liberatory network power in fields that have been dominated by negative visions of human capacity and moral action.

Human Rights Discourse in a Global Network

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Global Trends 2040

The Great Lakes region of Africa has seen dramatic changes. After a decade of war, repression, and genocide, loosely allied regimes have replaced old-style dictatorships. *The Path of a Genocide* examines the decade (1986-97) that brackets the 1994 genocide in Rwanda. This collection of essays

is both a narrative of that event and a deep reexamination of the international role in addressing humanitarian issues and complex emergencies. Nineteen donor countries and seventeen multilateral organizations, international agencies, and international nongovernmental organizations pooled their efforts for an in-depth evaluation of the international response to the conflict in Rwanda. Original studies were commissioned from scholars from Uganda, Rwanda, Zaire, Ethiopia, Norway, Great Britain, France, Canada, and the United States. While each chapter in this volume focuses on one dimension of the Rwanda conflict, together they tell the story of this unfolding genocide and the world's response. *The Path of a Genocide* offers readers a perspective in sharp contrast to the tendency to treat a peace agreement as the end to conflict. This is a detailed effort to make sense of the political crisis and genocide in Rwanda and the effects it had on its neighbors.

The Path of a Genocide

The definitive account of the Rwandan genocide--voted Best Book on Africa by Foreign Affairs.

Conspiracy to Murder

The League of Nations occupies a fascinating yet paradoxical place in human history. Over time, it's come to symbolize both a path to peace and to war, a promising vision of world order and a utopian illusion, an artifact of a bygone era and a beacon for one that may still come. As the first experiment in world organization, the League played a pivotal, but often overlooked role in the creation of the United Nations and the modern architecture of global governance. In contrast to conventional accounts, which chronicle the institution's successes and failures during the interwar period, Cottrell explores the enduring relevance of the League of Nations for the present and future of global politics. He asks: What are the legacies of the League experiment? How do they inform current debates on the health of global order and US leadership? Is there a "dark side" to these legacies? Cottrell demonstrates how the League of Nations' soul continues to shape modern international relations, for better and for worse. Written in a manner accessible to students of international history, international relations and global politics, it will also be of interest to graduates and scholars.

The League of Nations

This volume offers systematic analysis of China's growing engagement in global governance institutions over the past three decades. During this period, China has gone from outsider to observer to insider. The volume is based on studies of Chinese involvement in a wide cross section of regimes, including trade, finance, intellectual property rights, foreign aid, and climate change. The contributions show that China's participation in global governance reflects the mutually interactive processes of China's own socialization into the global community and the simultaneous adaptation of global institutions and actors to China's growing activism. Both China and the international system are internally complex. Hence, Chinese engagement varies across economic regimes, yielding different results in terms of Chinese compliance, its influence on regimes, and the extent of cooperation and conflict in addressing challenges in international society. The chapters reveal that China is neither purely a savior nor scofflaw of the global economic system, and while China is a defender of the status quo in some areas, it is a reformer in others, and occasionally a revisionist in still other spheres. A detailed analysis of many areas of global governance, this volume will be essential reading for students and scholars of international relations, Chinese studies and global governance.

Global Governance and China

How has contemporary humanitarianism become the dominant framework for how states construct their moral obligations to non-citizens? To answer this question, this book examines the history of humanitarianism in international relations by tracing the relationship between transnational moral obligation and sovereignty from the 16th century to the present. Whereas existing studies of humanitarianism examine the diffusion of such norms or their transmission by non-state actors, this volume explicitly links humanitarianism to the broader concept of sovereignty. Rather than only focusing on the expansion of humanitarian norms, it examines how sovereignty both challenges and sets limits on them. Humanitarian norms are shown to act just as much to reinforce the logic of sovereignty as they do to challenge it. Contemporary humanitarianism is often described in universalist terms, which suggests that humanitarian activity transcends borders in order to provide assistance to those who suffer. In contrast, this book suggests a more counterintuitive and complex understanding of moral obligation, namely that humanitarian discourse not only provides a framework for legitimate humanitarian action,

but it also establishes the limits of moral obligation. It will be of great interest to a wide audience of scholars and students in international relations theory, constructivism and norms, and humanitarianism and politics.

Moral Obligations and Sovereignty in International Relations

Mageza-Barthel addresses issues of 'global governance' in gender politics through such international frameworks as CEDAW, the Beijing Declaration and Platform for Action, as well as Resolution 1325. These instruments have been brought forth by a transnational women's movement to benefit women and women's rights across the globe. This book shows how these gender norms were introduced, adapted and contested locally at a crucial time of the transformation process underway. Concerned with the interplay of domestic and international politics, it also alludes to the unique circumstances in Rwanda that have led to unprecedented levels of women's political representation.

Do Not Disturb: The Story of a Political Murder and an African Regime Gone Bad

In Rwanda's Genocide, Kingsley Moghalu provides an engrossing account and analysis of the international political brinkmanship embedded in the quest for international justice for Rwanda's genocide. He takes us behind the scenes to the political and strategic factors that shaped a path-breaking war crimes tribunal and demonstrates why the trials at Arusha, like Nuremberg, Tokyo, and the Hague, are more than just prosecutions of culprits, but also politics by other means. This is the first serious book on the politics of justice for Rwanda's genocide. Moghalu tells this gripping story with the authority of an insider, elegant and engaging writing, and intellectual mastery of the subject matter.

Rwanda's Genocide

The CNN Effect examines the relationship between the state and its media, and considers the role played by the news reporting in a series of 'humanitarian' interventions in Iraq, Somalia, Bosnia, Kosovo and Rwanda. Piers Robinson challenges traditional views of media subservience and argues that sympathetic news coverage at key moments in foreign crises can influence the response of Western governments.

This is an open access book. 2023 9th International Conference on Humanities and Social Science Research (ICHSSR 2023) will be held on April 21-23, 2022 in Beijing, China. Except that, ICHSSR 2023 is to bring together innovative academics and industrial experts in the field of Humanities and Social Science Research to a common forum. We will discuss and study about EDUCATION, SOCIAL SCIENCES AND HUMANITIES, INTERDISCIPLINARY STUDIES and other fields. ICHSSR 2022 also aims to provide a platform for experts, scholars, engineers, technicians and technical R & D personnel to share scientific research achievements and cutting-edge technologies, understand academic development trends, expand research ideas, strengthen academic research and discussion, and promote the industrialization cooperation of academic achievements. The conference sincerely invites experts, scholars, business people and other relevant personnel from universities, scientific research institutions at home and abroad to attend and exchange! The conference will be held every year to make it an ideal platform for people to share views and experiences in financial innovation and economic development and related areas.

Rwanda

Uses unique field data to offer a rigorous explanation of how Rwanda's genocide occurred and why Rwandans participated in it.

Africa in International Politics

This work shows that not only is inclusionary governance possible, but that the essential legal foundation is already in place; all that is required is the compliance of nations with their obligations under international human rights law, and the centuries-old, nation-state-dominated, war-oriented "balance of power" will be gone forever. Achieving Inclusionary Governance is an essential starting point for any study or project that aims to pursue, in today's globalized environment, the democratic tradition on its historically mandated way to realizing the political, civil, and socioeconomic rights of all people. Published under the Transnational Publishers imprint.

The Path to Genocide in Rwanda

Why was the UN a bystander during the Rwandan genocide? Do its sins of omission leave it morally responsible for the hundreds of thousands of dead? Michael Barnett, who worked at the U.S. Mission to the United Nations from 1993 to 1994, covered Rwanda for much of the genocide. Based on his first-hand experiences, archival work, and interviews with many key participants, he reconstructs the history of the UN's involvement in Rwanda. In the weeks leading up to the genocide, the author documents, the UN was increasingly aware or had good reason to suspect that Rwanda was a site of crimes against humanity. Yet it failed to act. Barnett argues that its indifference was driven not by incompetence or cynicism but rather by reasoned choices cradled by moral considerations. Employing a novel approach to ethics in practice and in relationship to international organizations, Barnett offers an unsettling possibility: the UN culture recast the ethical commitments of well-intentioned individuals, arresting any duty to aid at the outset of the genocide. Barnett argues that the UN bears some moral responsibility for the genocide. Particularly disturbing is his observation that not only did the UN violate its moral responsibilities, but also that many in New York believed that they were "doing the right thing" as they did so. Barnett addresses the ways in which the Rwandan genocide raises a warning about this age of humanitarianism and concludes by asking whether it is possible to build moral institutions.

Achieving Inclusionary Governance: Advancing Peace and Development in First and Third World Nations

What can we do to prevent more atrocities from happening in the future, and to stop the ones that are happening right now? That the World May Know tells the powerful and moving story of the successes and failures of the modern human rights movement. Drawing on firsthand accounts from fieldworkers around the world, the book gives a painfully clear picture of the human cost of confronting inhumanity in our day.

Eyewitness to a Genocide

"The 1994 genocide in Rwanda, which followed the death of President Habyarimana, was one of the worst humanitarian disasters of the twentieth century. Beamed into the living rooms of the West, it shamed both African and global leaderships. As wars in the Congo continue to tear apart the region, this book examines how the politics that led to the 1994 genocide continue to be played out in the international media. Drawing on a range of African and international primary sources, Georgina Holmes argues that the media represents a site within which political and military actors can influence narratives

about war and genocide, and breaks new ground in analyzing the role of gender in the conflict. This book is essential reading on the gendered dynamics of conflict and genocide in Rwanda and the Democratic Republic of Congo and will appeal to anyone with an interest in Gender Studies, Media and Film Studies, African Studies and International Relations"--Provided by publisher.

That the World May Know

Conspiracy to Murder is a gripping account of the Rwandan genocide, one of the most appalling events of the twentieth century. Linda Melvern's damning indictment of almost all the key figures and institutions involved amounts to a catalogue of failures that only serves to sharpen the horror of a tragedy that could have been avoided.

Women and War in Rwanda

This Handbook provides in one volume an authoritative and independent treatment of the UN's seventy-year history, written by an international cast of more than 50 distinguished scholars, analysts, and practitioners. It provides a clear and penetrating examination of the UN's development since 1945 and the challenges and opportunities now facing the organization. It assesses the implications for the UN of rapid changes in the world - from technological innovation to shifting foreign policy priorities - and the UN's future place in a changing multilateral landscape. Citations and additional readings contain a wealth of primary and secondary references to the history, politics, and law of the world organization. This key reference also contains appendices of the UN Charter, the Statute of the International Court of Justice, and the Universal Declaration of Human Rights.

Conspiracy to Murder

Rules for the World provides an innovative perspective on the behavior of international organizations and their effects on global politics. Arguing against the conventional wisdom that these bodies are little more than instruments of states, Michael Barnett and Martha Finnemore begin with the fundamental insight that international organizations are bureaucracies that have authority to make rules and so exercise power. At the same time, Barnett and Finnemore maintain, such bureaucracies can become obsessed with their own rules, producing unresponsive, inefficient, and self-defeating outcomes. Authority thus gives international organizations autonomy and allows them to evolve and expand in ways unintended by their creators. Barnett and Finnemore reinterpret three areas of activity that have prompted extensive policy debate: the use of expertise by the IMF to expand its intrusion into national economies; the redefinition of the category "refugees" and decision to repatriate by the United Nations High Commissioner for Refugees; and the UN Secretariat's failure to recommend an intervention during the first weeks of the Rwandan genocide. By providing theoretical foundations for treating these organizations as autonomous actors in their own right, *Rules for the World* contributes greatly to our understanding of global politics and global governance.

The Oxford Handbook on the United Nations

The scope of Security and International Affairs research has expanded tremendously since the end of the Cold War to include topics beyond the realm of war studies or military statecraft. The field—once devoted solely to the study of conventional military and nuclear security issues—has diversified to include foci often considered nontraditional, including peace and conflict, political, economic, environmental, and human security. In this exciting new volume, McGann has undertaken a quantitative and qualitative study of SIA think tanks, looking at global and regional trends in their research. He argues that the end of the Cold War marked a fundamental shift within the field of defense and security studies among think tanks and academics. Tracking the evolution of security as understood by researchers and policymakers is vital as the world follows the path of the Four Mores: more issues, more actors, more competition, and more conflict. As we move forward into a world of rapid change and ubiquitous uncertainty, think tanks will only become more prominent and influential. The volume concludes with an assessment of the future of Security and International Affairs studies and raises the possibility of a return to a traditional security focus driven by recent events in Europe and the Middle East. This will be an important resource for students and scholars of security studies, global governance, and think tanks.

"The origins of this project date back to a 2007 symposium, 'Local justice : global mechanisms and local meanings in the aftermath of mass atrocity, ' held at Rutgers University--Newark [N.J.] ... Several participants later presented papers in a session at the July 2007 meeting of the International Association of Genocide Scholars, which was held in Bosnia and Herzegovina."--Acknowledgments.

Global Trends and Transitions in Security Expertise

The track record of military rapid response mechanisms, troops on standby, ready to be deployed to a crisis within a short time frame by intergovernmental organizations, remains disappointing. Yet, many of the obstacles to multinational actors launching a rapid and effective military response in times of crisis are largely similar. This book is the first comprehensive and comparative contribution to explore and identify the key factors that hamper and enable the development and deployment of multinational rapid response mechanisms. Examining lessons from deployments by the AU, the EU, NATO, and the UN in the Central African Republic, Mali, Somalia and counter-piracy in the Horn of Africa, the contributors focus upon the following questions: Was there a rapid response to the crises? By whom? If not, what were the major obstacles to rapid response? Did inter-organizational competition hinder responsiveness? Or did cooperation facilitate responsiveness? Bringing together leading scholars working in this area offers a unique opportunity to analyze and develop lessons for policy-makers and for theorists of inter-organizational relations. This work will be of interest to scholars and students of peacebuilding, peacekeeping, legitimacy and international relations.

Transitional Justice

Providing a comprehensive overview of two centuries of international civil servants and international secretariats, this book reveals how international secretariats have emerged and evolved, focusing on both structures (international public administrations) and the practitioners (international civil servants). Reinalda explores the history and development of international secretariats and international civil servants, starting with the Congress of Vienna (1814–1815), when the first international organization was established in the form of a river commission for the navigation of the Rhine. Charting the development of international secretariats through the nineteenth century – the League of Nations, the United Nations, and the United Nations System with its many specialized agencies, the author explains why NATO (North Atlantic Treaty Organization) and the OECD (Organisation for Economic Co-operation and Development) have strong, rather than weak, international secretariats, and shines a light on the registries of international courts and tribunals. The book fills a gap in the literature by exploring the full evolution of international secretariats, covering global and continental developments as well as regional integration practices around the world. Secretariats have become the leading actors in multilateral diplomacy particularly for dealing with complex issues, and this book will be of interest to all scholars of global governance and practitioners working for a range of international organizations.

The Message of the Missionary

"This volume covers the period from the end of the Neolithic era to the beginning of the seventh century of our era. This lengthy period includes the civilization of Ancient Egypt, the history of Nubia, Ethiopia, North Africa and the Sahara, as well as of the other regions of the continent and its islands."--Publisher's description

UNESCO General History of Africa, Vol. I, Abridged Edition

Des quatre éléments qui structurent notre imaginaire social, l'eau est sans doute le plus fondamental - origine de toute chose et ultime égalisateur. L'histoire des techniques et, plus précisément, l'histoire de l'urbanisation occidentale possèdent un excellent révélateur avec les problèmes multiples liés à cette gestion de l'eau. A cet égard, mythe et histoire matérielle et sociale mêlent leurs reflets dans le miroir que constitue le réseau hydrographique urbain. Miroir complexe, multiple dont les images s'organisent selon une logique à plusieurs entrées : militaire, économique, technique, politique, symbolique - une logique temporelle aussi qui met en évidence des époques cruciales. Au Bas-Empire romain, le premier réseau recèle des ordres sacrés, puis l'étang chimérique des oublis noie les vestiges de cette colonisation. L'artisanat se développe, du Xe au XIIe siècle, selon la dentelle de ces " petites Venise " que constituent les nouvelles villes passionnées de leur hygiène - étuves, hôpitaux, égouts - et économes de leur énergie moulins. Au XVIe siècle, l'eau stagne et s'endort ; l'homme, perméable à ce microclimat saturé de vapeurs, s'alanguit alors dans la contemplation du corps mort. La putréfaction gagne et la désurbanisation l'accompagne : la ville se perd dans ses miasmes. La révolution industrielle qui promeut les valeurs du grand air, de l'hygiène active rend à l'eau sa puissance : la nouvelle chimie, l'hydraulique, la poliorcétique favorisent une vision minérale, purifiée des problèmes... L'eau s'est réveillée et coule, propre et contrôlée, tandis que les tourbes urbaines et les égouts s'enfoncent et disparaissent. Sommes-nous conscients de toutes les charges symboliques qui conditionnent encore notre environnement ? De ce continuuel dialogue de l'histoire et du mythe dans nos réalités les plus quotidiennes ? Cette lecture d'une lignée technique essentielle, la technologie de l'eau, sur un espace géographique déterminé, par un historien-ingénieur, nous propose un très riche carrefour de volontés planificatrices urgentes et de rêveries millénaires.

Les temps de l'eau

A history of Africa from the 16th to the 18th centuries, this study concentrates on the continuing evolution of African states and cultures, the increase in external trade, and the consequences of the slave trade. The series is co-published in Africa with seven publishers, in the United States and Canada by the University of California Press, and in association with the UNESCO Press.

Africa from the Sixteenth to the Eighteenth Century

The hardcover edition of volume 8 was published in 1994. This paperback edition is the eighth and final volume to be published in the UNESCO General History of Africa. Volume 8 examines the period from 1935 to the present, and details the role of African states in the Second World War and the rise of postwar Africa. This is one of the most important books in the entire series, and as such, it is an unabridged paperback.

Africa Since 1935

Perkins, a former chief economist at a Boston strategic-consulting firm, confesses he was an "economic hit man" for 10 years, helping U.S. intelligence agencies and multinationals cajole and blackmail foreign leaders into serving U.S. foreign policy and awarding lucrative contracts to American business.

Confessions of an Economic Hit Man

From the arrival of the first men in Greece to the fall of the Mycenaean palace-town in the thirteenth century B.C., this work captures the essential qualities of each period of pre-classical civilization: the slow development of the Neolithic culture, the rich and original Early Bronze Age, the fruitful yet tragic encounter between Minoans and Mycenaean Empire. The legacy of Mycenaean religion and art is reviewed, including material found in excavated palaces and their stored wealth of frescoes, carved ivories, silver and gold jewelry, vases, and bronze weapons. The author deals with the invasions of Greece, the growth of a Greek language and some of the problems of Linear B, and the impact of Crete and the East upon the mainstream of Greek development.

Greece in the Bronze Age

We are living in a stressful world, yet despite our familiarity with the notion, stress remains an elusive concept. In *The Age of Stress*, Mark Jackson explores the history of scientific studies of stress in the modern world. In particular, he reveals how the science that legitimates and fuels current anxieties about stress has been shaped by a wide range of socio-political and cultural, as well as biological, factors: stress, he argues, is both a condition and a metaphor. In order to understand the ubiquity and impact of stress in our own times, or to explain how stress has commandeered such a central place in the modern imagination, Jackson suggests that we need to comprehend not only the evolution of the medical science and technology that has gradually uncovered the biological pathways between stress and disease in recent decades, but also the shifting social, economic, and cultural contexts that have invested that scientific knowledge with meaning and authority. In particular, he argues, we need to acknowledge the manner in which enduring concerns about the effects of stress on mental and physical health are the product of broader historical preoccupations with the preservation of personal and political, as well as physiological, stability.

The Age of Stress

Studies the distinctive culture of the Mycenaeans, examining the architectural, engineering and artistic achievements of this civilization which dominated the pre-Classical era of Greek history.

The Mycenaeans

This book re-establishes the relevance of mainstream anthropological (and sociological) approaches to development processes and simultaneously recognizes that contemporary development ought to be anthropology's principal area of study. Professor de Sardan argues for a socio-anthropology of change and development that is a deeply empirical, multidimensional, diachronic study of social groups and their interactions. The Introduction provides a thought-provoking examination of the principal new approaches that have emerged in the discipline during the 1990s. Part I then makes clear the complexity of social change and development, and the ways in which socio-anthropology can measure up to the challenge of this complexity. Part II looks more closely at some of the leading variables involved in the development process, including relations of production; the logics of social action; the nature of knowledge; forms of mediation; and 'political' strategies.

Anthropology and Development

This book brings together eleven contributions by authors from all parts of the world who have examined the notion of responsibility in their respective countries. In the first part Edith Sizoo presents a comparative analysis of those texts which reflect a rich variety of worldviews and traditions: harmony with the earth and relational ethics in the Maori culture of New Zealand, juridical approach in France, responsibility in Confucian thinking in China, individualism in the face of collective duty in the United States, duty and responsibility on the shores of the Congo, responsibility in Arab Islamic culture, encountering the sense of responsibility in Germany... This book thus presents an intercultural vision of responsibility that is all the more interesting because the final texts are the outcome of an intense dialogue between the authors. This exchange enhanced a more explicit expression of their respective points of view, thus making these more accessible to people from other cultural backgrounds.

Responsibility and Cultures of the World

In this book Christopher Pines demonstrates that Karl Marx conceived of ideology as false consciousness. He shows how the different meanings of false consciousness found in the writings of Marx and Engels reflect the influence of the views of the Baconian-French Enlightenment and of Hegelian Feuerbachian philosophies. Pines argues that, for Marx, the diverse senses of false consciousness all generally denote a social consciousness that takes certain false things to be true regarding matters of significance to class-divided societies.

Ideology and False Consciousness

Meet the new Lou! She's thirteen years old, so it's time to stop mooning over the guy who used to be the guy next door. Instead she's heading for a dreamy seaside village with her friends Mina, Mary Emily, and Karen. Let the boy hunt begin! But the first cute boy she spots is Tristan, the guy next door himself! It's the perfect opportunity to rekindle their romance. So why is Lou giving Tristan the cold shoulder? And why can't Tristan strike up a conversation that doesn't end with his foot in his mouth? It doesn't help that Mary Emily is making the moves on Tristan herself. And things get really messy when Lou's mom shows up with a surprise: Lou's old pal Paul! But Paul is just a friend, nothing more, right?

The Population Problem in Egypt

Drawing on historical records of women's varying experiences as litigants, accused criminals, or witnesses, this book offers critical insight into women's legal status in nineteenth-century Canada. In an effort to recover the social and political conditions under which women lobbied, rebelled, and in some cases influenced change, *Petticoats and Prejudice* weaves together forgotten stories of achievement and defeat in the Canadian legal system. Expanding the concept of "heroism" beyond its traditional limitations, this text gives life to some of Canada's lost heroines. Euphemia Rabbitt, who resisted an attempted rape, and Clara Brett Martin, who valiantly secured entry into the all-male legal profession, were admired by their contemporaries for their successful pursuits of justice. But Ellen Rogers, a prostitute who believed all women should be legally protected against sexual assault, and Nellie Armstrong, a battered wife and mother who sought child custody, were ostracized for their ideas and demands. Well aware of the limitations placed upon women advocating for reform in a patriarchal legal system, Constance Backhouse recreates vivid and textured snapshots of these and other women's courageous struggles against gender discrimination and oppression. Employing social history to illuminate the reproductive, sexual, racial, and occupational inequalities that continue to shape women's encounters with the law, *Petticoats and Prejudice* is an essential entry point into the gendered treatment of feminized bodies in Canadian legal institutions. This book was co-published with The Osgoode Society for Canadian Legal History.

The Perfect Summer

Why do design? What is design for? These are forward-looking questions for a creative discipline that seems more slippery to define than ever. In a world of dwindling natural resources, exhausted social and political systems, and an overload of information there are many urgent reasons to reimagine the design discipline, and there is a growing need to look at design education. Learning and unlearning should become part of an on-going educational practice. We need new proposals for how to organise society, how to structure our governments, how to live with, not against, the planet, how to sift fact from fiction, how to relate to each other, and frankly, how to simply survive. The 4th Istanbul Design Biennial, and this publication *Design as Learning* ask: can design and design education provide these critical ideas and strategies? -- Back cover.

Borders and National Space in East-Central Europe

"Divisé en cinq parties, l'ouvrage traite de la transformation de la voie navigable pendant un siècle, entre 1850 et 1950, puis aborde la construction navale et les types de navires, la circulation maritime, le monde maritime des Grands Lacs et reprend enfin une étude approfondie des arrière-pays, de leur développement et des horizons maritimes, déjà amorcée dans le précédent volume ##Le Saint-Laurent et les Grands Lacs au temps de la voile, 1608-1850##." (cf. quatrième de couverture). [SDM].

Petticoats and Prejudice - Women's Press Classics

Imprisoned in English argues that in the present English-dominated world, social sciences and the humanities are locked in a conceptual framework grounded in English and that scholars need to break away from this framework to reach a more universal, culture-independent perspective on things human.

Design as Learning

This is the first translation into English in its entirety of Marcel Proust's *Pastiches et Mélanges*, published by Gaston Gallimard in 1919. The first part, *Pastiches*, contains nine literary parodies about a fraudster, Henri Lemoine, who claimed to be able to manufacture diamonds. The pastiches are in the manner of Balzac, Flaubert, Sainte-Beuve, Henri de Régnier, Michelet, Émile Faguet, Renan and the Goncourt brothers. The second part, *Mélanges*, consists of four sections: the destruction of cathedrals in the First World War, the separation of church and state, a drama about madness, and Proust's love of reading. Proust is best known for writing *À la recherche du temps perdu* (variously translated as *Remembrance of Things Past* and *In Search of Lost Time*), widely considered to be the greatest novel of the twentieth century. The *Melody beneath the Words* is the first translation into English in its entirety of Marcel Proust's *Pastiches et Mélanges*, published by Gaston Gallimard in 1919. The first part, *Pastiches*, contains nine literary parodies about a fraudster, Henri Lemoine, who claimed to be able to manufacture diamonds. The pastiches are in the manner of Balzac, Flaubert, Sainte-Beuve, Henri de Régnier, Michelet, Émile Faguet, Renan and the Goncourt brothers. "The" Oedipus Judaicus

But he does not overlook the tensions the movement encountered with the real politics of the day, including the militarism that led up to World War I, the rise of extreme strains of nationalism in Germany and Japan before World War II, and the bipolar rivalries of the Cold War.

Le Saint-Laurent et les Grands Lacs au temps de la vapeur, 1850-1950

This book is the first comprehensive account of the International Labour Organization's 100-year history. At its heart is the concept of global social policy, which encompasses not only social policy in its national and international dimensions, but also development policy, world trade, international migration and human rights. The book focuses on the ILO's roles as a key player in debates on poverty, social justice, wealth distribution and social mobility subjects and as a global forum for addressing these issues. The study puts in perspective the manifold ways in which the ILO has helped structure these debates and has made – through its standard-setting, technical cooperation and myriad other activities – practical contributions to the world of work and to global social policy.

Since its landmark publication in 1980, the original history has sold more than 1.7 million copies. More than a successful book, it triggered a revolution in the way history is told, displacing the official versions with their emphasis on great men in high places to chronicle events as they were lived, from the bottom up. Historians Howard Zinn and Paul Buhle and cartoonist Mike Konopacki have collaborated to retell, in vibrant graphic form, a most immediate and relevant chapter of *A People's History of American Empire*: the story of America's ever-growing role on the world stage. Narrated by Zinn, this version opens with the events of 9/11 and then tracks back to explore the cycles of US expansionism from Wounded Knee to Iraq, while taking in World War I, Central America, Vietnam, and the Iranian revolution. The book also follows the story of Zinn, the son of poor Jewish immigrants, from his childhood in the Brooklyn slums

to his role as one of America's leading historians. Shifting from world-shattering events to one family's small revolutions, this is a classic ground-level history of America in a dazzling new form.

Science Policy and Development

Eco-Warriors was the first in-depth look at the people, actions, history and philosophies behind the "radical" environmental movement. Focusing on the work of Earth First!, the Sea Shepherds, Greenpeace, and the Animal Liberation Front, among others, Rik Scarce told exciting and sometimes frightening tales of front-line warriors defending an Earth they see as being in environmental peril. While continuing to study these movements as a Ph.D. student, Scarce was jailed for contempt of court for refusing to divulge his sources to prosecutors eager to thwart these groups' activities. In this updated edition, Scarce brings the trajectory of this movement up to date—including material on the Earth Liberation Front—and provides current resources for all who wish to learn more about one of the most dynamic and confrontational political movements of our time. Literate, captivating, and informative, this is also an ideal volume for classes on environmentalism, social movements, or contemporary politics.

Pastiches Et Melanges by Marcel Proust

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

History of New France

Written in 1969, this provides an evaluation of global resources and the projection of population pressure beyond the limits of the ecosystem unless we change our priorities and adjust to global planning for managing our development.

The Future of the World Economy

Land Tenure in African Agrarian Systems argues that proposals for sweeping changes in African agricultural land tenure are misconceived. Colonial administrators, African elites, and foreign aid donors have historically viewed the variety of indigenous landholding systems as obstacles to increased agricultural production and to economic progress in general, believing that only private land ownership will provide the investment security necessary for agricultural efficiency. This volume contends that privatization is not the panacea for Africa's agrarian ills, and that any solutions must take into account critical social dynamics that influence how productive resources are acquired, used, contested, and underutilized. Editors Thomas J. Bassett and Donald E. Crummey bring together experts with a variety of perspectives on land tenure issues throughout sub-Saharan Africa. Whether focusing at the level of household, community, or nation, these case studies describe how land access, control, and management are embedded in social, political, and economic structures that fluctuate and change over time. They examine these embedded systems closely to illuminate the relationship between landholding patterns and agricultural output, stressing throughout that land tenure is a political process. The contributors, an international group of scholars in the areas of land tenure, geography, African studies, anthropology, history, and political science, call for pragmatism and respect for the flexibility of indigenous tenure systems, while also addressing the complicated issues of state intervention, socioeconomic differentiation, and the social relations of production. By looking at the social and political processes behind the struggles over productive resources, Land in African Agrarian Systems advances the debate over the land question and agricultural performance in Africa and counters the arguments of the powerful forces pushing for privatization.

Cultural Internationalism and World Order

In modern life, technology is everywhere. Yet as a concept, technology is a mess. In popular discourse, technology is little more than the latest digital innovations. Scholars do little better, offering up competing definitions that include everything from steelmaking to singing. In *Technology: Critical History of a Concept*, Eric Schatzberg explains why technology is so difficult to define by examining its three thousand year history, one shaped by persistent tensions between scholars and technical practitioners. Since the time of the ancient Greeks, scholars have tended to hold technicians in low esteem, defining technical practices as mere means toward ends defined by others. Technicians, in contrast, have repeatedly pushed back against this characterization, insisting on the dignity, creativity, and cultural

worth of their work. The tension between scholars and technicians continued from Aristotle through Francis Bacon and into the nineteenth century. It was only in the twentieth century that modern meanings of technology arose: technology as the industrial arts, technology as applied science, and technology as technique. Schatzberg traces these three meanings to the present day, when discourse about technology has become pervasive, but confusion among the three principal meanings of technology remains common. He shows that only through a humanistic concept of technology can we understand the complex human choices embedded in our modern world.
