Introducing Kant

Immanuel Kant laid the foundations of modern Western thought. Every subsequent major philosopher owes a profound debt to Kant's attempts to delimit human reason as an appropriate object of philosophical enquiry. And yet, Kant's relentless systematic formalism made him a controversial figure in the history of the philosophy that he helped to shape. Introducing Kant focuses on the three critiques of Pure Reason, Practical Reason and Judgement. It describes Kant's main formal concepts: the relation of mind to sensory experience, the question of freedom and the law and, above all, the revaluation of metaphysics. Kant emerges as a diehard rationalist yet also a Romantic, deeply committed to the power of the sublime to transform experience. The illustrated guide explores the paradoxical nature of the pre-eminent philosopher of the Enlightenment, his ideas and explains the reasons for his undiminished importance in contemporary philosophical debates.

Introducing Kant

A comprehensive introduction to the work of Immanuel Kant, the pre-eminent philosopher of the Enlightenment.

Introducing Continental Philosophy

What makes philosophy on the continent of Europe so different and exciting? And why does it have such a reputation for being 'difficult'? Continental philosophy was initiated amid the revolutionary ferment of the 18th century, philosophers such as Kant and Hegel confronting the extremism of the time with theories that challenged the very formation of individual and social consciousness. Covering the great philosophers of the modern and postmodern eras – from Nietzsche, Heidegger, Derrida and Deleuze right to up Agamben and Žižek – and philosophical movements from German idealism to deconstruction and feminism – Christopher Kul-Want and Piero brilliantly elucidate some of the most thrilling and powerful ideas ever to have been discussed.

Introducing Nietzsche

Here is a book that reflects the diversity of this great 19th century thinker.

Introducing Game Theory

When should you adopt an aggressive business strategy? How do we make decisions when we don't have all the information? What makes international environmental cooperation possible? Game theory is the study of how we make a decision when the outcome of our moves depends on the decisions of someone else. Economists Ivan and Tuvana Pastine explain why, in these situations, we sometimes cooperate, sometimes clash, and sometimes act in a way that seems completely random. Stylishly brought to life by award-winning cartoonist Tom Humberstone, Game Theory will help readers understand behaviour in everything from our social lives to business, global politics to evolutionary biology. It provides a thrilling new perspective on the world we live in.

Introducing Hegel

INTRODUCING guide to the hugely influential German thinker. Georg Wilhelm Friedrich Hegel is one of the greatest thinkers of all time. No other philosopher has had such a profound impact on the ideas and political events of the 20th century. Hegel's influential writings on philosophy, politics, history and art are parts of a larger systematic whole. They are also among the most difficult in the entire literature of philosophy. Introducing Hegel guides us through a spectacular system of thought which aimed to make sense of history. The book also provides new perspectives on contemporary postmodern debates about 'metanarratives' (Lyotard) and the 'end of history' (Fukuyama). It is an ideal introduction to this crucial figure in the history of philosophy, and is indispensable for anyone trying to understand such key modern thinkers as Marx, Lacan, Satre and Adorno.

Kant: A Very Short Introduction

Kant is arguably the most influential modern philosopher, but also one of the most difficult. Roger Scruton tackles his exceptionally complex subject with a strong hand, exploring the background to Kant's work and showing why the Critique of Pure Reason has proved so enduring. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Introducing Ethics

What are the acceptable limits of scientific investigation and genetic engineering, the rights and wrongs of animal rights, euthanasia and civil disobedience? This book confronts these dilemmas, tracing arguments of moral thinkers, including Socrates, Plato, Aristotle, and brings us up to date with postmodern critics.

Introducing Semiotics

Unique graphic introductions to big ideas and thinkers, written by experts in the field.

Introducing Sartre

INTRODUCING guide to the father of existentialism and one of 20th century philosophy's most famous characters. Jean-Paul Sartre was once described as being, next to Charles de Gaulle, the most famous Frenchman of the 20th century. Between the ending of the Second World War in 1945 and his death in 1980, Sartre was certainly the most famous French writer, as well as one of the best-known living philosophers. Introducing Sartre explains the basic ideas inspiring his world view, and pays particular attention to his idea of freedom. It also places his thinking on literature in the context of the 20th century debate on its nature and function. It examines his ideas on Marxism, his enthusiasm for the student rebellion of 1968, and his support for movements of national liberation in the Third World. The book also provides a succinct account of his life, and especially of the impact which his unusual childhood had on his attitude towards French society.

Introducing Kierkegaard

Soren Kierkegaard is regarded as the founder of Existentialism and the first modern theologian. Philosophy, in Kierkegaard's radical view, was of no use unless it permanently changed people's lives. His distrust of grand abstract schemes, particularly Hegel's, and his insistence that philosophy is essentially writing also identify him as a forerunner of postmodernism.

Introducing Empiricism

Our knowledge comes primarily from experience – what our senses tell us. But is experience really what it seems? The experimental breakthroughs in 17th-century science of Kepler, Galileo and Newton informed the great British empiricist tradition, which accepts a 'common-sense' view of the world – and yet concludes that all we can ever know are 'ideas'. In Introducing Empiricism: A Graphic Guide, Dave Robinson - with the aid of Bill Mayblin's brilliant illustrations - outlines the arguments of Locke, Berkeley, Hume, J.S. Mill, Bertrand Russell and the last British empiricist, A.J. Ayer. They also explore criticisms of empiricism in the work of Kant, Wittgenstein, Karl Popper and others, providing a unique overview of this compelling area of philosophy.

Introducing Slavoj Zizek

Charting his meteoric rise in popularity, Christopher Kul-Want and Piero explore Zizek's timely analyses of today's global crises concerning ecology, mounting poverty, war, civil unrest and revolution. Covering topics from philosophy and ethics, politics and ideology, religion and art, to literature, cinema, corporate marketing, quantum physics and virtual reality, Introducing Slavoj Zizek deftly explains Zizek's virtuoso ability to transform apparently outworn ideologies – Communism, Marxism and psychoanalysis – into a new theory of freedom and enjoyment.

Introducing Ethics

What is the place of individual choice and consequence in a post-Holocaust world of continuing genocidal ethnic cleansing? Is "identity" now a last-ditch cultural defence of ethnic nationalisms and competing fundamentalisms? In a climate of instant information, free markets and possible ecological disaster, how do we define "rights"?

Introducing Plato

"Introducing Plato" begins by explaining how philosophers like Socrates and Pythagoras influenced Plato's thought. It provides a clear account of Plato's puzzling theory of knowledge, and explains how this theory then directed his provocative views on politics, ethics and individual liberty. It offers detailed critical commentaries on all of the key doctrines of Platonism, especially the very odd theory of Forms, and concludes by revealing how Plato's philosophy stimulated the work of important modern thinkers such as Karl Popper, Martha Nussbaum, and Jacques Derrida.

Introducing Romanticism

The birth of modern attitudes to political and artistic freedom.

Introducing Philosophy

Philosophers have always enjoyed asking awkward and provocative questions, such as: What is the nature of reality? What are human beings really like? What is special about the human mind and consciousness? Are we free to choose who we are and what we do? Can we prove that God exists? Can we be certain about anything at all? What is truth? Does language provide us with a true picture of the world? How should we behave towards each other? Do computers think? *Introducing Philosophy* is a comprehensive graphic guide to the thinking of all the significant philosophers of the Western world from Heraclitus to Derrida. It examines and explains their key arguments and ideas without being obscure or solemn. Lively and accessible, it is the perfect introduction to philosophers and philosophical ideas for anyone coming to the subject for the first time.

Introducing Foucault

This book places Michel Foucault's work in its turbulent philosophical and political context, and critically explores his mission to expose the links between knowledge and power in the human sciences, their discourses and institutions. It explains how Foucault overturned our assumptions about the experience and perception of madness, sexuality and criminality, and the often brutal social practices of confinement, confession and discipline.

Introducing Buddha

This vast and complex non-theistic religion is woven into the fabric of Asian civilizations, from India to the Himalayan regions, China, Vietnam, Korea, Japan and elsewhere. What is Buddhism really all about? *Introducing Buddha* describes the life and teaching of the Buddha, but it also shows that enlightenment is a matter of experiencing the truth individually, and by inspiration which is passed from teacher to student. 'An exemplary introduction ... persuasive and intelligently critical.' *Times Educational Supplement*

Introducing Heidegger

Martin Heidegger - philosophy's 'hidden king', or leading exponent of a dangerously misguided secular mysticism. Heidegger has been acclaimed as the most powerfully original philosopher of the twentieth century. Profoundly influential on deconstruction, existentialism and phenomenology, he stands behind all major strands of post-structuralist and postmodern thought. Heidegger announced the end of philosophy and of humanism, and was a committed Nazi and vocal supporter of Hitler's National Socialism. Was Heidegger offering a deeply conservative mythology or a crucial deconstruction of philosophy as we have known it? "Introducing Heidegger" provides an accessible introduction to his notoriously abstruse thinking, mapping out its historical contexts and exploring its resonances in ecology, theology, art, architecture, literature and other fields. The book opens up an encounter with a kind of thinking whose outlines might still not yet be clear, and whose forms might still surprise us.

Foucault: A Very Short Introduction

Foucault is one of those rare philosophers who has become a cult figure. Born in 1926 in France, over the course of his life he dabbled in drugs, politics, and the Paris SM scene, all whilst striving to understand the deep concepts of identity, knowledge, and power. From aesthetics to the penal system; from madness and civilisation to avant-garde literature, Foucault was happy to reject old models of thinking and replace them with versions that are still widely debated today. A major influence on Queer Theory and gender studies (he was openly gay and died of an AIDS-related illness in 1984), he also wrote on architecture, history, law, medicine, literature, politics and of course philosophy, and even managed a best-seller in France on a book dedicated to the history of systems of thought. Because of the complexity of his arguments, people trying to come to terms with his work have desperately sought introductory material that makes his theories clear and accessible for the beginner. Ideally suited for the Very Short Introductions series, Gary Gutting presents a comprehensive but non-systematic treatment of some highlights of Foucault's life and thought. Beginning with a brief biography to set the social and political stage, he then tackles Foucault's thoughts on literature, in particular the avant-garde scene; his philosophical and historical work; his treatment of knowledge and power in modern society; and his thoughts on sexuality. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Having endured Nazi persecution firsthand, she fled across Europe, coming to live in a world inhabited by such luminaries as Marc Chagall, Marlene Dietrich, Albert Einstein and Sigmund Freud. She ultimately sacrificed her unique genius for philosophy and her love of a much-compromised man – the philosopher and Nazi-sympathiser Martin Heidegger – for what she called 'love of the world'. Strikingly illustrated, this compassionate and timely biography illuminates the life of a complex, controversial, deeply flawed yet irrefutably courageous woman whose experiences and writings shine a light on how to live as an individual and a public citizen in troubled times.

It provides a context for these recent developments by situating them within the longer-term tradition of critical analysis going back to the rise of Marxism. Sex and the Failed Absolute

In the most rigorous articulation of his philosophical system to date, Slavoj Žižek provides nothing short of a new definition of dialectical materialism. In forging this new materialism, Žižek critiques and challenges not only the work of Alain Badiou, Robert Brandom, Joan Copjec, Quentin Meillassoux, and Julia Kristeva (to name but a few), but everything from popular science and quantum mechanics to sexual difference and analytic philosophy. Alongside striking images of the Möbius strip, the cross-cap, and the Klein bottle, Žižek brings alive the Hegelian triad of being-essence-notion. Radical new readings of Hegel, and Kant, sit side by side with characteristically lively commentaries on film, politics, and culture. Here is Žižek at his interrogative best.
