Beam drop

The work of seminal contemporary artist Chris Burden, insightfully contextualized around major themes, illuminates a practice that is as unique as it is influential. For four decades, Chris Burden's work has redefined the boundaries of the sculptural field. Whether subjecting himself to extremes of physical suffering or reconfiguring forgotten urban objects and toy models to create potent signifiers of a time and place, the brute force of Burden's work in the physical realm reverberates through the psychic one. On the occasion of the New Museum's focused survey of Burden's work, this book provides new perspectives on his art. Organized around themes like the Myth of the American West, the Institution, Gender Roles, and Model Making, the book reexamines preoccupations that span the artist's long career.

Chris Burden: Extreme Measures

From violating his own body in highly controversial performance works during the 1970s to a series of breathtaking installations over recent years, American artist Chris Burden has been driven by the desire to explain and reconstruct experiences and ideas we normally take for granted. He is interested in the political, institutional, and technological, and in all these areas he is concerned to demystify symbols of authority and explain hidden processes. At the end of the 20th century ordinary people have little or no understanding of how the world we live in functions, how the food we eat is grown, or how the objects we use are manufactured. This volume documents Chris Burden's project showing at the Tate Gallery in February 1999, where he will set up a factory-like assembly line which will manufacture model airplanes from tissue paper, plastic, and balsa wood parts. He lays bare the principles of mass production in a way that is entertaining, ingenious, and provocative. The book reproduces many of Burden's original working drawings and documents the functioning assembly line.

Chris Burden

Burden has a love-hate relationship with the machine: Suspended from the ceiling of the gallery or presented in glorious isolation, the toy-like machine becomes an object of fear and worship, however ironically, a mysterious idol to be propitiated and venerated, even if it no longer works. Thus art makes the machine benign by turning into a strange toy. It masters the machine in a playful, Machiavellian act of homage to it. Burden implicitly sets the cunning of the artist against the engineer who masterminded the machine, implying that the artist can magically undo the human damage the latter unwittingly did with his machine.

Chris Burden

This book explores the attribution and local negotiation of cultural valuations of artistic and art-institutional practices around the world, and considers the diverse ways in which these value attributions intersect with claims of universality and cosmopolitanism. Taking Michael Herzfeld's notion of the "global hierarchy of value" as point of departure, the volume brings together six empirical studies of the collection, circulation, classification and exhibition of objects in present-day Brazil, China, India, Japan, South Africa and Indigenous Australia in light of Europe's loss of global hegemony. Including reflections by a number of senior scholars, the chapters demonstrate that the question of valuation lies at the heart of artistic and art-institutional practices writ large – including museum practices, museum architecture, galleries, auction houses, art fairs and biennales.

Global Art in Local Art Worlds

Comprehensive edition regarding the first 5 multimedia installations as originally envisioned by artist Oiticica (b. Brazil) and conceived in collaboration with the filmmaker D'Almeida (b. Brazil). The Cosmococa photographic series consist of single rolls of film in accordance with the artist's concept of "quasi-cinema"

Cosmococa

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Historical Painting Techniques, Materials, and Studio Practice

What makes a cult artist? Whether pioneering in their craft, fiercely and undeniably unique, or critically divisive, cult artists come in all shapes and guises. Some gain instant fame, others instant notoriety, and more still remain anonymous until a chance change in fashion sees their work propelled into the limelight. Cult Artists handpicks 50 notable figures in the modern art world and explores the creative genius that earned them the 'cult' label, while celebrating the works that made their names. From the iconic Salvador Dalí and Frida Kahlo, to radical activists such as the Guerrilla Girls and Ana Mendieta. The artistic mediums explored are similarly varied, with sculptors, performance, graffiti and fine artists alike. From little knowns with small, devout followings, to superstars gracing the covers of magazines, each is special in their individuality and their ability to inspire, antagonise and delight. Cult Artists is an essential addition to any art lovers' library, as well as an entertaining introduction to our weird and wonderful art world.

High Performance

This open access book details the relationship between the artist and their created works, using tools such as information technology, computer environments, and interactive devices, for a range of information sources and application domains. This has produced new kinds of created works which can be viewed, explored, and interacted with, either as an installation or via a virtual environment such as the Internet. These processes generate new dimensions of understanding and experience for both the artist and the public's relationships with the works that are produced. This has raised a variety of interdisciplinary opportunities and issues, and these are examined. The symbiotic relationship between artistic works and the cultural context in which they are produced is reviewed. Technology can provide continuity by making traditional methods and techniques more efficient and effective. It can also provide discontinuity by opening up new perspectives and paradigms. This can generate new ideas, and produce a greater understanding of artistic processes and how they are implemented in practice. Tools have been used from the earliest times to create and modify artistic works. For example, naturally occurring pigments have been used for cave paintings. What has been created provides insight into the cultural context and social environment at the time of creation. There is an interplay between the goal of the creator, the selection and use of appropriate tools, and the materials and representations chosen. Technology, Design and the Arts - Opportunities and Challenges is relevant for artists and technologists and those engaged in interdisciplinary research and development at the boundaries between these disciplines.

Cult Artists

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Arts Digest

This book reflects on the motivations of creative practitioners who have moved out of cities from the mid-1960s onwards to establish creative homesteads. The book focuses on desert exile painter Agnes Martin, radical filmmaker and gardener Derek Jarman, and iconoclastic conceptual artist Chris Burden, detailing their connections to the cities they had left behind (New York, London, Los Angeles). Sarah Lowndes also examines how the rise of digital technologies has made it more possible for artists to live and work outside the major art centers, especially given the rising cost of living in London, Berlin, and New York, focusing on three peripheral creative centers: the seaside town of Hastings, England, the mid-sized metro of Leipzig, Germany, and post-industrial Detroit, USA.

Technology, Design and the Arts - Opportunities and Challenges

This authoritative catalogue of the Corcoran Gallery of Art's renowned collection of pre-1945 American paintings will greatly enhance scholarly and public understanding of one of the finest and most important collections of historic American art in the world. Composed of more than 600 objects dating from 1740 to 1945.

A History of Video Art is a revised and expanded edition of the 2006 original, which extends the scope of the first edition, incorporating a wider range of artists and works from across the globe and explores and examines developments in the genre of artists' video from the mid 1990s up to the present day. In addition, the new edition expands and updates the discussion of theoretical concepts and ideas which underpin contemporary artists' video. Tracking the changing forms of video art in relation to the revolution in electronic and digital imaging that has taken place during the last 50 years, A History of Video Art orients video art in the wider art historical context, with particular reference to the shift from the structuralism of the late 1960s and early 1970s to the post-modernist concerns of the 1980s and early 1990s. The new edition also explores the implications of the internationalisation of artists' video in the period leading up to the new millennium and its concerns and preoccupations including post-colonialism, the post-medium condition and the impact and influence of the internet.

Drawing Futures

The 1928 Book of Common Prayer is a treasured resource for traditional Anglicans and others who appreciate the majesty of King James-style language. This classic edition features a Presentation section containing certificates for the rites of Baptism, Confirmation, and Marriage. The elegant burgundy hardcover binding is embossed with a simple gold cross, making it an ideal choice for both personal study and gift-giving. The 1928 Book of Common Prayer combines Oxford's reputation for quality construction and scholarship with a modest price - a beautiful prayer book and an excellent value.

Contemporary Artists Working Outside the City

In this first critical account of Matta-Clark's work, Pamela M. Lee considers it in the context of the art of the 1970s—particularly site-specific, conceptual, and minimalist practices—and its confrontation with issues of community, property, the alienation of urban space, the "right to the city," and the ideologies of progress that have defined modern building programs. Although highly regarded during his short life—and honored by artists and architects today—the American artist Gordon Matta-Clark (1943-78) has been largely ignored within the history of art. Matta-Clark is best remembered for site-specific projects known as "building cuts." Sculptural transformations of architecture produced through direct cuts into buildings scheduled for demolition, these works now exist only as sculptural fragments, photographs, and film and video documentations. Matta-Clark is also remembered as a catalytic force in the creation of SoHo in the early 1970s. Through loft activities, site projects at the exhibition space 112 Greene Street, and his work at the restaurant Food, he participated in the production of a new social and artistic space. Have art historians written so little about Matta-Clark's work because of its ephemerality, or, as Pamela M. Lee argues, because of its historiographic, political, and social dimensions? What did the activity of carving up a building-in anticipation of its destruction—suggest about the conditions of art making, architecture, and urbanism in the 1970s? What was one to make of the paradox attendant on its making—that the production of the object was contingent upon its ruination? How do these projects address the very writing of history, a history that imagines itself building toward an ideal work in the service of progress? In this first critical account of Matta-Clark's work, Lee considers it in the context of the art of the 1970s—particularly site-specific, conceptual, and minimalist practices—and its confrontation with issues of community, property, the alienation of urban space, the "right to the city," and the ideologies of progress that have defined modern building programs.

Corcoran Gallery of Art

Historians and art historians provide a critique of existing methodologies and an interdisciplinary inquiry into seventeenth-century Dutch art and culture.

A History of Video Art

"With a new introduction by the author"--Jacket.

The 1928 Book of Common Prayer

A Série Universitária foi desenvolvida pelo Senac São Paulo com o intuito de preparar profissionais para o mercado de trabalho. Os títulos abrangem diversas áreas, abordando desde conhecimentos teóricos e práticos adequados às exigências profissionais até a formação ética e sólida. Metodologias em arte-educação traça um panorama crítico e comparativo das principais abordagens em arte-educação, apresentando contextos históricos e exemplos práticos. O objetivo é subsidiar a construção de metodologias próprias para que cada educador trabalhe de acordo com seu contexto, suas necessidades e os recursos disponíveis, tanto no ensino formal como no informal. Para isso, o livro contempla um amplo leque de linguagens artísticas, incluindo artes visuais, teatro, dança, música, performance, audiovisual e arte urbana, com informações atualizadas e referências para a expansão do repertório do arte-educador.

Object to Be Destroyed

Architecture Constructed explores the central, open secret of architecture: the long-suppressed conflict between arche and teckton-between those who design, and those who build. This unresolved tension has a centuries-old history in the discipline, persisting through Classical and Renaissance times to the present day, and yet it has rarely been addressed through a historical and theoretical lens. In this book, acclaimed architectural theorist Mark Jarzombek examines this tension head-on, and uses it to rethink the nature of the history of architecture. He reveals architecture to be a troubled, interconnected realm, incomplete and unstable, where labor, craft, and occupation are the 'invisible' complements to the work of the architect. Erudite, entertaining, and full of surprising and thought-provoking juxtapositions and challenges, Architecture Constructed is packed with novel insights into the internal conflicts and paradoxes of architecture, and is rich with examples from modern and contemporary practice-including Mies, Koolhaas, Potrc, Hadid, Bawa, Diller + Scofidio-which demonstrate how contemporary architecture inhabits the very same tensions that have riven the discipline since the days of Alberti. This provocative book will stimulate conversations among students, researchers, and designers, as it pushes the boundaries on how we define the professional discipline of architecture and overturns entrenched assumptions about the nature of architectural history and theory.

Art in History/History in Art

Explores actual causality, and such related notions as degree of responsibility, degree of blame, and causal explanation. The goal is to arrive at a definition of causality that matches our natural language usage and is helpful, for example, to a jury deciding a legal case, a programmer looking for the line of code that cause some software to fail, or an economist trying to determine whether austerity caused a subsequent depression.

Zen and the Art of Motorcycle Maintenance

Paul Kingsnorth was once an activist, an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on 'sustainability' rather than the defence of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, Confessions of a Recovering Environmentalist gathers the wave-making essays that have charted the change in Kingsnorth's thinking. In them he articulates a new vision that he calls 'dark ecology,' which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. Provocative and urgent, iconoclastic and fearless, this ultimately hopeful book - which includes the much-discussed 'Uncivilization' manifesto - poses hard questions about how we've lived and how we should live.

Metodologias em arte-educação

Bogs are fascinating landscapes for ecologists, climatologists, archaeologists, environmental historians and water managers. But many bogs have been damaged, and legislative protection - as 29 case studies demonstrate - is not enough to conserve the rest.

Architecture Constructed

Like music, art is a universal language. Although looking at works of art is a pleasurable enough experience, to appreciate them fully requires certain skills and knowledge." --Carol Strickland, from the introduction to *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* * This heavily illustrated crash course in art history is revised and updated. This second edition of Carol Strickland's *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* offers an illustrated tutorial of prehistoric to post-modern art from cave paintings to video art installations to digital and Internet media. * Featuring succinct page-length essays, instructive sidebars, and more than 300 photographs, *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* takes art history out of the realm of dreary textbooks, demystifies jargon and theory, and makes art accessible-even at a cursory reading. * From Stonehenge to the Guggenheim and from Holbein to Warhol, more than 25,000 years of art is distilled into five sections covering a little more than 200 pages.

Flash Art

Nesta edição da revista Enjoy Trip percorremos um roteiro que vai desde as Américas até a Europa. Nos destinos nacionais, destaque para as belíssimas praias e encantos do nordeste brasileiro. Abordamos a arquitetura imponente de Brasília e os encantos do Instituto Inhotim, em Belo Horizonte.

Actual Causality

From the Pulitzer Prize-winning author of 'The Hours', comes the story of a marriage thrown off course by a moment of mistaken identity.

Travel & Leisure

Conceptualism played a different role in Latin American art during the 1960s and 1970s than in Europe and the United States, where conceptualist artists predominantly sought to challenge the primacy of the art object and art institutions, as well as the commercialization of art. Latin American artists turned to conceptualism as a vehicle for radically questioning the very nature of art itself, as well as art's role in responding to societal needs and crises in conjunction with politics, poetry, and pedagogy. Because of this distinctive agenda, Latin American conceptualism must be viewed and understood in its own right, not as a derivative of Euroamerican models. In this book, one of Latin America's foremost conceptualist artists, Luis Camnitzer, offers a firsthand account of conceptualism in Latin American art. Placing the evolution of conceptualism within the history Latin America, he explores conceptualism as a strategy, rather than a style, in Latin American culture. He shows how the roots of conceptualism reach back to the early nineteenth century in the work of Simón Rodríguez, Simón Bolívar's tutor. Camnitzer then follows conceptualism to the point where art crossed into politics, as with the Argentinian group Tucumán arde in 1968, and where politics crossed into art, as with the Tupamaro movement in Uruguay during the 1960s and early 1970s. Camnitzer concludes by investigating how, after 1970, conceptualist manifestations returned to the fold of more conventional art and describes some of the consequences that followed when art evolved from being a political tool to become what is known as "political art."

Art & Text

"Video Green examines the explosion of late 1990s art produced by high-profile graduate programs that catapulted Los Angeles into the epicenter of the international art world. Probing the programs' own art-critical buzzwords, Chris Kraus asks how LA art came to be so completely divorced from the city's other realities. Radicalized beyond belief, Video Green does for contemporary art what Greil Marcus's *Lipstick Traces* did for the 20th century, mapping the persistence of peripheral culture."--BOOK JACKET.

Confessions of a Recovering Environmentalist

The international bestseller about life, the universe and everything. 'A simply wonderful, irresistible book' DAILY TELEGRAPH 'A terrifically entertaining and imaginative story wrapped round its tough, thought-provoking philosophical heart' DAILY MAIL 'Remarkable ... an extraordinary achievement' SUNDAY TIMES When 14-year-old Sophie encounters a mysterious mentor who introduces her to philosophy, mysteries deepen in her own life. Why does she keep getting postcards addressed to another girl? Who is the other girl? And who, for that matter, is Sophie herself? To solve the riddle, she uses her new knowledge of philosophy, but the truth is far stranger than she could have imagined.

A phenomenal worldwide bestseller, *SOPHIE'S WORLD* sets out to draw teenagers into the world of Socrates, Descartes, Spinoza, Hegel and all the great philosophers. A brilliantly original and fascinating story with many twists and turns, it raises profound questions about the meaning of life and the origin of the universe.

Conserving Bogs

What a rare mushroom can teach us about sustaining life on a fragile planet Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

The Annotated Mona Lisa

"My Experiences as an Executioner" by James Berry presents a chilling and unflinchingly honest account of Berry's time as an executioner, providing readers with a gripping glimpse into the dark and complex world of capital punishment. Through his candid revelations and introspective reflections, Berry navigates the moral and ethical dilemmas he faced in his role, shedding light on the profound impact it had on his psyche. His narrative unearths the haunting realities of life and death decisions, offering readers a unique perspective on the complexities of justice, morality, and the weight of one's actions. As readers delve into Berry's experiences, they are confronted with thought-provoking questions about the nature of punishment, the human capacity for empathy, and the long-lasting emotional scars left by his grim profession. This book serves as a poignant exploration of the human condition and the somber consequences of society's pursuit of justice.

Enjoy Trip Ed. 19

An Anthropology of Landscape tells the fascinating story of a heathland landscape in south-west England and the way different individuals and groups engage with it. Based on a long-term anthropological study, the book emphasises four individual themes: embodied identities, the landscape as a sensuous material form that is acted upon and in turn acts on people, the landscape as contested, and its relation to emotion. The landscape is discussed in relation to these themes as both 'taskscape' and 'leisurescape', and from the perspective of different user groups. First, those who manage the landscape and use it for work: conservationists, environmentalists, archaeologists, the Royal Marines, and quarrying interests. Second, those who use it in their leisure time: cyclists and horse riders, model aircraft flyers, walkers, people who fish there, and artists who are inspired by it. The book makes an innovative contribution to landscape studies and will appeal to all those interested in nature conservation, historic preservation, the politics of nature, the politics of identity, and an anthropology of Britain.

By Nightfall

This is the first book-length study of installation art. Julie Reiss concentrates on some of the central figures in its emergence, including artists, critics, and curators.

Conceptualism in Latin American Art

Against Ambience diagnoses - in order to cure - the art world's recent turn toward ambience. Over the course of three short months - June to September, 2013 - the four most prestigious museums in New York indulged the ambience of sound and light: James Turrell at the Guggenheim, Soundings at

MoMA, Robert Irwin at the Whitney, and Janet Cardiff at the Met. In addition, two notable shows at smaller galleries indicate that this is not simply a major-donor movement. Collectively, these shows constitute a proposal about what we wanted from art in 2013. While we're in the soft embrace of light, the NSA and Facebook are still collecting our data, the money in our bank accounts is still being used to fund who-knows-what without our knowledge or consent, the government we elected is still imprisoning and targeting people with whom we have no beef. We deserve an art that is the equal of our information age. Not one that parrots the age's self-assertions or modes of dissemination, but an art that is hyper-aware, vigilant, active, engaged, and informed. We are now one hundred years clear of Duchamp's first readymades. So why should we find ourselves so thoroughly in thrall to ambience? Against Ambience argues for an art that acknowledges its own methods and intentions; its own position in the structures of cultural power and persuasion. Rather than the warm glow of light or the soothing wash of sound, Against Ambience proposes an art that cracks the surface of our prevailing patterns of encounter, initiating productive disruptions and deconstructions.
