Multi axis, or 5 axis, CNC machines. Moving on to 5 axis machines, you'll learn that they rotate on 5 axis, making them different from 3 axis CNC machines. The general benefits and imitations of 5 axis machines are briefly discussed.

Indexed 5-axis CNC milling machines. Or 3 + 5 CNC machines. In this section of the video, we'll explain how an indexed 5-axis machine works and what some of the benefits and limitations are.

Continuous 5-axis CNC machines. We'll start this part of the video by explaining why continuous 5 axis CNC machines are different from Index 5-axis CNC machines. You'll see how a continuous 5-axis machine works and we'll cover some of the benefits and limitations of this machine.

Mill-turning CNC centers. Here, Mill-turning CNC centers are explained and why this machine is a good hybrid of a turning and milling machine.

Fredric Jameson

This volume brings together original work from internationally recognized scholars that critically engages with the full range of Jameson's work, including: Sartre, Lukács, 'Third World' literature, architecture, postmodernity, globalization, film, dialectics and Brecht. In a series of lively, and at times iconoclastic readings, the contributors challenge accepted views of Jameson's work and locate his project in the historical, political and institutional context that shaped it. The volume concludes with an original contribution by Jameson himself, providing an opportunity for readers to critically engage with his work themselves.

The Jameson Reader

This book brings together key essays and excerpts from the broad spectrum of Frederic Jameson's writings, providing an accessible introduction to the intricacies of his thought and uncovering new and exciting aspects of his work.

Jameson and Literature

This book demonstrates how Fredric Jameson's understanding of the novel form has heavily influenced his work as a critical theorist. It contends that Jameson's idiosyncratic engagements with the literary canon have had a major impact on his theoretical frameworks, particularly in his sense of historical change. The book investigates Jameson's predominant literary interests in chapters focusing on realism, modernism, postmodernism and genre fiction. These readings provide fresh perspectives on Jameson's career, ones that look beyond his most famous contributions to cultural theory and interpretive practice. Through this work, the book also rethinks the criticism that has surrounded Jameson, while suggesting ways in which his literary interpretation remains useful for contemporary reading practices.

The Prison-house of Language

Fredric Jameson's survey of Structuralism and Russian Formalism is, at the same time, a critique of their basic methodology. He lays bare the presuppositions of the two movements, clarifying the relationship between the synchronic methods of Saussurean linguistics and the realities of time and history.

The Success and Failure of Fredric Jameson

A critical overview of the work of Fredric Jameson, with an emphasis on his notoriously difficult writing style.

Postmodernism, or, The Cultural Logic of Late Capitalism

Now in paperback, Fredric Jameson's most wide-ranging work seeks to crystalize a definition of "postmodernism". Jameson's inquiry looks at the postmodern across a wide landscape, from "high" art to "low" from market ideology to architecture, from painting to "punk" film, from video art to literature.

Fredric Jameson

An invaluable introduction to the life and work of one of today's most important cultural critics. Studied on most undergraduate literary and cultural studies courses, Fredric Jameson's writing targets subjects from architecture to science fiction, cinema to global capitalism. Of his works, *The Political Unconscious* remains one of the most widely cited Marxist literary-theoretical texts, and *'Postmodernism, or the cultural logic of late capitalism'*, is amongst the most influential statements on the nature of post-modernity ever published. Adam Roberts offers an engaging introduction to this crucial figure, which will convince any student of contemporary theory that Jameson must be read.

Postmodernism, Or, the Cultural Logic of Late Capitalism

Fredric Jameson has been described as "probably the most important cultural critic writing in English today" and he is widely acknowledged as the foremost proponent for the tradition of critical theory known as Western Marxism. Yet his work has not been given the systematic review like other contemporary thinkers like Foucault and Derrida. *Fredric Jameson: Marxism, Hermeneutics, Postmodernism* is a thoroughly up-to-date, detailed review and analysis of the work of this influential intellectual. Covering Jameson's work and thought from his early projects of form and history to his more recent engagements with postmodernism and cultural politics, this synthesis offers a balanced assessment of his ideas, their development and their continuing influence.

Fredric Jameson

Jameson's first full-length engagement with Walter Benjamin's work. The Benjamin Files offers a comprehensive new reading of all of Benjamin's major works and a great number of his shorter book reviews, notes and letters. Its premise is that Benjamin was an anti-philosophical, anti-systematic thinker whose conceptual interests also felt the gravitational pull of his vocation as a writer. What resulted was a coexistence or variety of language fields and thematic codes which overlapped and often seemed to contradict each other: a view which will allow us to clarify the much-debated tension in his works between the mystical or theological side of Benjamin and his political or historical inclination. The three-way tug of war over his heritage between adherents of his friends Scholem, Adorno and Brecht, can also be better grasped from this position, which gives the Brechtian standpoint more due than most influential academic studies. Benjamin's corpus is an anticipation of contemporary theory in the priority it gives language and representation over philosophical or conceptual unity; and its political motivations are clarified by attention to the omnipresence of History throughout his writing, from the shortest articles to the most ambitious projects. His explicit program—"to transfer the crisis into the heart of language" or, in other words, to detect class struggle at work in the most minute literary phenomena—requires the reader to translate the linguistic or representational literary issues that concerned him back into the omnipresent but often only implicitly political ones. But the latter are those of another era, to which we must gain access, to use one of Benjamin's favorite expressions.

The Benjamin Files

Representing Capital, Fredric Jameson's first book-length engagement with Marx's magnum opus, is a unique work of scholarship that records the progression of Marx's thought as if it were a musical score. The textual landscape that emerges is the setting for paradoxes and contradictions that struggle toward resolution, giving rise to new antinomies and a new forward movement. These immense segments overlap each other to combine and develop on new levels in the same way that capital itself does, stumbling against obstacles that it overcomes by progressive expansions, which are in themselves so many leaps into the unknown.

Representing Capital

Jacques Lacan is one of the most challenging and controversial of contemporary thinkers, as well as the most influential psychoanalyst since Freud. Lacanian theory has reached far beyond the consulting room to engage with such diverse disciplines as literature, film, gender and social theory. This book covers the full extent of Lacan's career and provides an accessible guide to Lacanian concepts and his writing on: the imaginary and the symbolic; the Oedipus Complex and the meaning of the phallus; the subject and the unconscious; the real; sexual difference. Locating Lacan's work in the context of contemporary French thought and the history of psychoanalysis, Sean Homer's *Jacques Lacan* is the ideal introduction to this influential theorist.

Jacques Lacan

Fredric Jameson's survey of Structuralism and Russian Formalism is, at the same time, a critique of their basic methodology. He lays bare the presuppositions of the two movements, clarifying the relationship between the synchronic methods of Saussurean linguistics and the realities of time and history.

The Prison-House of Language

Fredric Jameson, in *The Political Unconscious*, opposes the view that literary creation can take place in isolation from its political context. He asserts the priority of the political interpretation of literary texts,

claiming it to be at the center of all reading and understanding, not just a supplement or auxiliary to other methods current today. Jameson supports his thesis by looking closely at the nature of interpretation. Our understanding, he says, is colored by the concepts and categories that we inherit from our culture's interpretive tradition and that we use to comprehend what we read. How then can the literature of other ages be understood by readers from a present that is culturally so different from the past? Marxism lies at the foundation of Jameson's answer, because it conceives of history as a single collective narrative that links past and present; Marxist literary criticism reveals the unity of that uninterrupted narrative. Jameson applies his interpretive theory to nineteenth- and twentieth-century texts, including the works of Balzac, Gissing, and Conrad. Throughout, he considers other interpretive approaches to the works he discusses, assessing the importance and limitations of methods as different as Lacanian psychoanalysis, semiotics, dialectical analysis, and allegorical readings. The book as a whole raises directly issues that have been only implicit in Jameson's earlier work, namely the relationship between dialectics and structuralism, and the tension between the German and the French aesthetic traditions.

The Political Unconscious

Fredric Jameson is the most important Marxist critic in the world today. While consistently operating at the cutting edge of literary and cultural studies, Jameson has remained committed to seemingly old-fashioned philosophical discourses, most notably dialectical criticism and utopian thought. In *Fredric Jameson: The Project of Dialectical Criticism*, Robert Tally surveys Jameson's entire oeuvre, from his early studies of Sartre and formal criticism through his engagements with postmodernism and globalisation to his recent readings of Hegel, Marx and the valences of the dialectic. The book is both a comprehensive critical guide to Jameson's theoretical project and itself a convincing argument for the power of dialectical criticism to understand the world today.

Fredric Jameson

Cultural critic Fredric Jameson, renowned for his incisive studies of the passage of modernism to postmodernism, returns to the movement that dramatically broke with all tradition in search of progress for the first time since his acclaimed *A Singular Modernity*. *The Modernist Papers* is a tour de force of analysis and criticism, in which Jameson brings his dynamic and acute thought to bear on the modernist literature of the nineteenth and twentieth centuries. Jameson discusses modernist poetics, including intensive discussions of the work of Baudelaire, Rimbaud, Mallarmé, Wallace Stevens, Joyce, Proust, and Thomas Mann. He explores the peculiarities of the American literary field, taking in William Carlos Williams and the American epic, and examines the language theories of Gertrude Stein. Refusing to see modernism as simply a Western phenomenon he also pays close attention to its Japanese expression; while the complexities of a late modernist representation of twentieth-century politics are articulated in a concluding section on Peter Weiss's novel *The Aesthetics of Resistance*. Challenging our previous understanding of the literature of this period, this monumental work will come to be regarded as the classic study of modernism.

The Modernist Papers

The legacy of Bertolt Brecht is much contested, whether by those who wish to forget or to vilify his politics, but his stature as the outstanding political playwright and poet of the twentieth century is unforgettably established in this major critical work. Fredric Jameson elegantly dissects the intricate connections between Brecht's drama and politics, demonstrating the way these combined to shape a unique and powerful influence on a profoundly troubled epoch. Jameson sees Brecht's method as a multi-layered process of reflection and self-reflection, reference and self-reference, which tears open a gap for individuals to situate themselves historically, to think about themselves in the third person, and to use that self-projection in history as a basis for judgment. Emphasizing the themes of separation, distance, multiplicity, choice and contradiction in Brecht's entire corpus, Jameson's study engages in a dialogue with a cryptic work, unpublished in Brecht's lifetime, entitled *Me-ti; Book of Twists and Turns*. Jameson sees this text as key to understanding Brecht's critical reflections on dialectics and his orientally informed fascination with flow and flux, change and the non-eternal. For Jameson, Brecht is not prescriptive but performative. His plays do not provide answers but attempt to show people how to perform the act of thinking, how to begin to search for answers themselves. Brecht represents the ceaselessness of transformation while at the same time alienating it, interrupting it, making it comprehensible by making it strange. And thereby, in breaking it up by analysis, the possibility emerges of its reconstitution under a new law.

Brecht and Method

Imagine Fredric Jameson--the world's foremost Marxist critic--kidnapped and taken on a joyride through the cultural ephemera, generational hype, and Cold War fallout of our post-post-contemporary landscape. In *The Jamesonian Unconscious*, a book as joyful as it is critical and insightful, Clint Burnham devises unexpected encounters between Jameson and alternative rock groups, new movies, and subcultures. At the same time, Burnham offers an extraordinary analysis of Jameson's work and career that refines and extends his most important themes. In an unusual biographical move, Burnham negotiates Jameson's major works--including *Marxism and Form*, *The Political Unconscious*, and *Postmodernism, or, The Cultural Logic of Late Capitalism*--by way of his own working-class, queer-ish, Gen-X background and sensibility. Thus Burnham's study draws upon an immense range of references familiar to the MTV generation, including *Reservoir Dogs*, theorists Slavoj Žižek and Pierre Bourdieu, *The Satanic Verses*, Language poetry, the collapse of state communism in Eastern Europe, and the indie band Killdozer. In the process, Burnham addresses such Jamesonian questions as how to imagine the future, the role of utopianism in capitalist culture, and the continuing relevance of Marxist theory. Through its redefinition of Jameson's work and compelling reading of the political present, *The Jamesonian Unconscious* defines the leading edge of Marxist theory. Written in a style by turns conversational, playful, and academic, this book will appeal to students and scholars of Marxism, critical theory, aesthetics, narratology, and cultural studies, as well as the wide circle of readers who have felt and understood Jameson's influence.

The Jamesonian Unconscious

Fredric Jameson, in *The Political Unconscious*, opposes the view that literary creation can take place in isolation from its political context. He asserts the priority of the political interpretation of literary texts, claiming it to be at the center of all reading and understanding, not just a supplement or auxiliary to other methods current today. Jameson supports his thesis by looking closely at the nature of interpretation. Our understanding, he says, is colored by the concepts and categories that we inherit from our culture's interpretive tradition and that we use to comprehend what we read. How then can the literature of other ages be understood by readers from a present that is culturally so different from the past? Marxism lies at the foundation of Jameson's answer, because it conceives of history as a single collective narrative that links past and present; Marxist literary criticism reveals the unity of that uninterrupted narrative. Jameson applies his interpretive theory to nineteenth- and twentieth-century texts, including the works of Balzac, Gissing, and Conrad. Throughout, he considers other interpretive approaches to the works he discusses, assessing the importance and limitations of methods as different as Lacanian psychoanalysis, semiotics, dialectical analysis, and allegorical readings. The book as a whole raises directly issues that have been only implicit in Jameson's earlier work, namely the relationship between dialectics and structuralism, and the tension between the German and the French aesthetic traditions. *The Political Unconscious* is a masterly introduction to both the method and the practice of Marxist criticism. Defining a mode of criticism and applying it successfully to individual works, it bridges the gap between theoretical speculation and textual analysis.

Mark Z. Danielewski is routinely hailed as the most exciting author in contemporary American literature, and he is celebrated by critics and fans alike. *Revolutionary Leaves* collects essays that have come out of the first academic conference on Danielewski's fiction that took place in Munich in 2011, which brought together younger and established scholars to discuss his works from a variety of perspectives. Addressing his major works *House of Leaves* (2000) and *Only Revolutions* (2006), the texts are as multifaceted as the novels they analyze, and they incorporate ideas of (post)structuralism, modernism, post- and post-postmodernism, philosophy, Marxism, reader-response criticism, mathematics and physics, politics, media studies, science fiction, gothic horror, poetic theory, history, architecture, mythology, and more. Contributors: Nathalie Aghoro, Ridvan Askin, Hanjo Berressem, Aleksandra Bida, Brianne Bilsky, Joe Bray, Alison Gibbons, Julius Greve, Sebastian Huber, Sascha Pöhlmann, and Hans-Peter Söder.

For a half century, the American intellectual Fredric Jameson has been a driving force in literary and cultural theory. In *Periodizing Jameson*, Phillip E. Wegner builds upon Jameson's unique dialectical method to demonstrate the value of Jameson's tools—periodization, the fourfold hermeneutic, and the Greimasian semiotic square, among others—and to develop virtuoso readings of Jameson's own

work and the history of the contemporary American university in which it unfolds. Wegner shows how Jameson's work intervenes in particular social, cultural, and political situations, using his scholarship both to develop original explorations of nineteenth-century fiction, popular films, and other prominent theorists, and to examine the changing fortunes of theory itself. In this way, *Periodizing Jameson* casts new light on the potential of and challenges to humanist intellectual work in the present.

In *The Program Era*, Mark McGurl offers a fundamental reinterpretation of postwar American fiction, asserting that it can be properly understood only in relation to the rise of mass higher education and the creative writing program. McGurl asks both how the patronage of the university has reorganized American literature and—even more important—how the increasing intimacy of writing and schooling can be brought to bear on a reading of this literature. McGurl argues that far from occasioning a decline in the quality or interest of American writing, the rise of the creative writing program has instead generated a complex and evolving constellation of aesthetic problems that have been explored with energy and at times brilliance by authors ranging from Flannery O'Connor to Vladimir Nabokov, Philip Roth, Raymond Carver, Joyce Carol Oates, and Toni Morrison. Through transformative readings of these and many other writers, *The Program Era* becomes a meditation on systematic creativity—an idea that until recently would have seemed a contradiction in terms, but which in our time has become central to cultural production both within and beyond the university. An engaging and stylishly written examination of an era we thought we knew, *The Program Era* will be at the center of debates about postwar literature and culture for years to come.

"*The Marxian Hermeneutics of Fredric Jameson*" is the first comprehensive, book-length study of Jameson's writings, from "Marxism and Form" (1971) through "Postmodernism" (1991). Wise begins his discussion by examining Jameson's tripartite hermeneutic, as introduced in "The Political Unconscious" (1981), in relation to the interpretive systems of Northrop Frye and the Patristics. From Hegelian-Marxist discourse, Jameson's critical methodology is discussed in relation to the writings of Georg Lukacs, Jean-Paul Sartre, and Theodor W. Adorno. A central contention of this study is that Jameson's writings are finally comprehensible only within the framework of "both" Hegelian-Marxism and more -traditional-hermeneutic thought."

The Marxian Hermeneutics of Fredric Jameson

The concepts of modernity and modernism are amongst the most controversial and vigorously debated in contemporary philosophy and cultural theory. In this intervention, Fredric Jameson—perhaps the most influential and persuasive theorist of postmodernity—excavates and explores these notions in a fresh and illuminating manner. The extraordinary revival of discussions of modernity, as well as of new theories of artistic modernism, demands attention in its own right. It seems clear that the (provisional) disappearance of alternatives to capitalism plays its part in the universal attempt to revive 'modernity' as a social ideal. Yet the paradoxes of the concept illustrate its legitimate history and suggest some rules for avoiding its misuse as well. In this major interpretation of the problematic, Jameson concludes that both concepts are tainted, but nonetheless yield clues as to the nature of the phenomena they purported to theorize. His judicious and vigilant probing of both terms—which can probably not be banished at this late date—helps us clarify our present political and artistic situations.

A Singular Modernity

The Caribbean Novel Since 1945 offers a comparative analysis of fiction from across the pan-Caribbean, exploring the relationship between literary form, cultural practice, and the nation-state. Engaging with the historical and political impact of capitalist imperialism, decolonization, class struggle, ethnic conflict, and gender relations, it considers the ways in which Caribbean authors have sought to rethink and re-narrate the traumatic past and often problematic 'postcolonial' present of the region's peoples. It pays particular attention to the role cultural practices such as stickfighting and Carnival, as well as religious rituals and beliefs like Vodou and Myal, have played in efforts to reshape the novel form. In so doing, it provides an original perspective on the importance of these practices, with their emphasis on bodily movement, to the development of new philosophies of history. Beginning in the post-WWII period, when optimism surrounding the possibility of social and political change was at a peak, *The Caribbean Novel Since 1945* interrogates the trajectories of various national projects

through to the present. It explores how the textual histories of common motifs in Caribbean writing have functioned to encode the fluctuating fortunes of different political dispensations. The scope of the analysis is varied and comprehensive, covering both critically acclaimed and lesser-known authors from the Anglophone, Francophone, and Hispanophone traditions. These include Jacques Roumain, Sam Selvon, Marie Chauvet, Luis Rafael Sánchez, Earl Lovelace, Patrick Chamoiseau, Erna Brodber, Wilson Harris, Shani Mootoo, Oonya Kempadoo, Ernest Moutoussamy, and Pedro Juan Gutiérrez. Mixing detailed analysis of key texts with wider surveys of significant trends, this book emphasizes the continuing significance of representations of the nation-state to literary articulations of resistance to the imperialist logic of global capital.

This is the first book focused on Forster's *Maurice* and its legacies in modern and contemporary fiction, film and new media. Ground-breaking essays by leading scholars offer new readings by exploring overlooked contexts including: feminism and the 'social purity' movement; anti-Fascism; religion and allegory; and early twentieth-century contestations over body-soul relation.

From Finding to Making offers the first detailed discussion of the relationship between Marxism and pragmatism. These two philosophies of praxis are not incompatible, and an analysis of their relation helps one to better understand both. Establishing a transatlantic theoretical dialogue, this book discusses similarities and differences between these philosophies. It is an interdisciplinary study that brings together philosophy, American and European intellectual history, and literary studies. Schulenberg's book shows that if we seek to continue the unfinished project of establishing a genuinely postmetaphysical culture, the attempt to elucidate the dialectics of Marxism and pragmatism is a good starting point. The book offers detailed discussions of Sidney Hook, Georg Lukács, Theodor W. Adorno, Fredric Jameson, W.E.B. Du Bois, John Dewey, Richard Rorty, and Jacques Rancière.

Marxism, Pragmatism, and Postmetaphysics

The master of literary theory takes on the master of the detective novel Raymond Chandler, a dazzling stylist and portrayer of American life, holds a unique place in literary history, straddling both pulp fiction and modernism. With *The Big Sleep*, published in 1939, he left an indelible imprint on the detective novel. Fredric Jameson offers an interpretation of Chandler's work that reconstructs both the context in which it was written and the social world or totality it projects. Chandler's invariable setting, Los Angeles, appears both as a microcosm of the United States and a prefiguration of its future: a megalopolis uniquely distributed by an unpromising nature into a variety of distinct neighborhoods and private worlds. But this essentially urban and spatial work seems also to be drawn towards a vacuum, an absence that is nothing other than death. With Chandler, the thriller genre becomes metaphysical.

In such celebrated works as *Postmodernism: The Cultural Logic of Late Capitalism*, Fredric Jameson has established himself as one of America's most observant cultural commentators. High modernism is now as far from us as antiquity was for the Renaissance. Such is the premise of Fredric Jameson's major new work in which modernist works, this time in painting (Rubens) and music (Wagner and Mahler), are pitted against late-modernist ones (in film) as well as a variety of postmodern experiments (from SF to *The Wire*, from "Eurotrash" in opera to Altman and East German literature): all of which attempt, in their different ways, to invent new forms to grasp a specific social totality. Throughout the historical periods, argues Jameson, the question of narrative persists through its multiple formal changes and metamorphoses.

The novels of Wyndham Lewis have generally been associated with the work of the great modernists-Joyce, Pound, Eliot, Yeats-who were his sometime friends and collaborators. Lewis's originality, however, can only be fully grasped when it is understood that, unlike those writers, he was essentially a political novelist. In this now classic study, Fredric Jameson proposes a framework in which Lewis's explosive language practice-utterly unlike any other English or American modernism-can be grasped as a political and symbolic act. He does not, however, ask us to admire the energy of Lewis's style without confronting the inescapable and often scandalous ideological content of Lewis's works: the aggressivity and sexism, the predilection for racial and national categories, the brief flirtation with fascism, and the inveterate and cranky oppositionalism that informs his powerful polemics against virtually all the political and countercultural tendencies of his time. *Fables of Aggression* draws on the methods of narrative analysis and semiotics, psychoanalysis, and ideological analysis to construct a dynamic model of the contradictions from which Lewis's incomparable narrative corpus is generated, and of which it offers so many varying symbolic resolutions.

The Ancients and the Postmoderns

In an age of globalization characterized by the dizzying technologies of the First World, and the social disintegration of the Third, is the concept of utopia still meaningful? *Archaeologies of the Future*, Jameson's most substantial work since *Postmodernism, Or, the Cultural Logic of Late Capitalism*, investigates the development of this form since Thomas More, and interrogates the functions of utopian thinking in a post-Communist age. The relationship between utopia and science fiction is explored through the representations of otherness . alien life and alien worlds . and a study of the works of Philip K. Dick, Ursula LeGuin, William Gibson, Brian Aldiss, Kim Stanley Robinson and more. Jameson's essential essays, including "The Desire Called Utopia," conclude with an examination of the opposing positions on utopia and an assessment of its political value today.

Fables of Aggression

The secular mind had a grand plan, to establish an earthly paradise, a utopia of the here and now, a modern civilization governed by human reason, rationality, and the triumph of progress. Whilst ideals are one thing, the means to realize them is something else. Away from the hype, emancipating humanity from the 'shackles' of God and religion has proved no easy matter. *Mapping the Secular Mind* critically examines issues of reason, rationality, and secular materialism, to explore how these mental perceptions, or ways of mapping the world, have affected human interaction and sociological development.

Widely regarded as one of America's most important cultural theorists, Fredric Jameson has been at the forefront of the field of literary and cultural studies since the early 1970s. This book offers an introduction to the work of this important thinker. It provides an account of Jameson's important contributions to Critical Theory.

With the unleashing of the "War on Terror" in the aftermath of 9/11, Afghanistan has become prominent in the news. However, we need to appreciate that no substantive understanding of contemporary history, politics and society of this country can be achieved without a thorough analysis of the Afghan encounter with cultural and literary modernity and modernization. Modern Persian Literature in Afghanistan does just that. The book offers a balanced and interdisciplinary analysis of the rich and admirable contemporary poetry and fiction of a land long tormented by wars and invasions. It sets out to demonstrate that, within the trajectory of the union between modern aesthetic imagination and politics, creativity and production, and representation and history, the modernist intervention enabled many contemporary poets and writers of fiction to resist the overt politicization of the literary field, without evading politics or disavowing the modern state. The interpretative moves and nuanced readings of a series of literary texts make this book a major contribution to a rather neglected area of research and study.
