[#bone wars](#) [#cope marsh rivalry](#) [#paleontology history](#) [#dinosaur discoveries](#) [#19th century fossil hunt](#)

The Bone Wars refers to the intense and often scandalous rivalry between paleontologists Edward Drinker Cope and Othniel Charles Marsh during the late 19th century. This period saw them fiercely compete to discover and name new dinosaur species, significantly advancing paleontology but also marked by professional sabotage and public mud-slinging.

Starlight and Storm

“One of the great climbers of all time . . . who has discovered through the medium of mountains the true perspective of living.” —Sir John Hunt, author of The Conquest of Everest Known for his lyrical writing and his ability to convey not only the dangers of mountaineering but the pure exaltation of the

climb, Gaston Rébuffat is among the most well-known and revered Alpinists of all time. He rose to international prominence in 1950 as one of the four principal stalwarts in the first ascent of Annapurna, the highest mountain climbed at that time. Yet his finest feat as a mountaineer was to be the first man to climb all six of the legendary great north faces of the Alps—the Grandes Jorasses, the Piz Badile, the Dru, the Matterhorn, the Cima Grande di Lavaredo, and the Eiger. With this elegant book, first published in 1954, Gaston Rébuffat transformed mountain writing. His insistence on seeing a climb as an act of harmonious communion with the mountain, not a battle waged against it, seemed radical at the time, though Rébuffat's aesthetic has since won the day. Through storms, avalanches, rock fall, unplanned bivouacs, and even the deaths of companions, we follow the Chamonix guide to the altar of his communion, on dark, icy walls that struck terror into the hearts of Europe's finest mountaineers. Nor are these deft narratives mere recitations of dangers faced and obstacles overcome, for Rébuffat pays as keen attention to the joys of comradeship won on these faces as he does to the climbs themselves. In our own day of corporate sponsorships, online expeditions, and eco-vacations, the purity of Rébuffat's vision of the Alps as (in the epithet of the title of another of his books) an "enchanted garden" shines forth in prose as fresh and stylish as any ever lavished on mountaineering.

Starlight And Storm

The noted French climbing guide and first man to climb all six of the great north faces of the Alps offers a personal account of his climbing adventures, recounting the dangers, triumphs, and joy found in the sport.

Starlight and Storm

This book is the first edited collection to offer an intersectional account of gender in mountaineering adventure sports and leisure. It provides original theoretical, methodological, and empirical insights into mountain spaces as sites of socio-cultural production and transformation. The book shows how gender matters in the twenty-first century, and illustrates that there is a need for greater efforts to mainstream difference in representations and governance structures if we are to improve equality in adventure, sporting and leisure spaces. The interdisciplinary volume represents scholars from theoretical as well as applied perspectives across adventure, tourism, sport science, sports coaching, psychology, geography, sociology and outdoor studies.

Gender, Politics and Change in Mountaineering

Mont Blanc er med sine 4810 meter toppen af Europa. Det er et fantastisk smukt bjerg midt i et højalpint område med nogle af Europas største gletsjere og omgivet af stejle, svært tilgængelige granittinder. Mont Blanc er en dramatisk og voldsom udfordring for bjergbestigere, ikke mindst fordi forholdene i bjergene lynhurtigt kan ændre sig. Derfor skal tilgangen til Mont Blanc ske med respekt. Den respekt har Bo Belvedere Christensen, som er en af Danmarks mest erfarne bjergbestigere og eventyrere. I bogen fortæller han egne Mont Blanc-historier, og samtidigt fortæller han hele bjergets historie. Kulturhistorie og dramatiske beretninger illustreret med forfatterens fantastiske fotos.

Faced with finding a livable response to globalization, many communities are renegotiating their identities and functions and, in some instances, entirely new communities are being formed. Renegotiating Community asks what happens to the autonomy of individuals and communities under the influence of globalization. Original case studies show how a range of communities are renegotiating the meanings of community and autonomy while living with, and sometimes challenging, the processes of globalization. By addressing the coercive and comforting dimensions of community – as well as the need to reconcile conflicting claims to autonomy – this book redraws the conceptual maps through which community, globalization, and autonomy are understood.

Successfully navigate the rich world of travel narratives and identify fiction and nonfiction read-alikes with this detailed and expertly constructed guide. Just as savvy travelers make use of guidebooks to help navigate the hundreds of countries around the globe, smart librarians need a guidebook that makes sense of the world of travel narratives. *Going Places: A Reader's Guide to Travel Narratives* meets that demand, helping librarians assist patrons in finding the nonfiction books that most interest them. It will also serve to help users better understand the genre and their own reading interests. The book examines the subgenres of the travel narrative genre in its seven chapters, categorizing and describing approximately 600 titles according to genres and broad reading interests, and identifying hundreds of other fiction and nonfiction titles as read-alikes and related reads by shared key topics. The author has also identified award-winning titles and spotlighted further resources on travel lit, making this work an ideal guide for readers' advisors as well a book general readers will enjoy browsing.

The New Yorker

In 1893 Nansen set sail in the *Fram*, a ship specially designed and built to be frozen into the polar ice cap, withstand its crushing pressures, and travel with the sea's drift closer to the North Pole than anyone had ever gone before. Experts said such a ship couldn't be built and that the voyage was tantamount to suicide. This brilliant first-person account, originally published in 1897, marks the beginning of the modern age of exploration. Nansen vividly describes the dangerous voyage and his 15-month-long dash to the North Pole by sledge. An unforgettable tale and a must-read for any armchair explorer.

Going Places

In the first comprehensive history of Himalayan mountaineering in 50 years, the authors offer detailed, original accounts of the most significant climbs since the 1890s, and they compellingly evoke the social and cultural worlds that gave rise to those expeditions.

Farthest North

In 1966, Edward Hoagland made a three-month excursion into the wild country of British Columbia and encountered a way of life that was disappearing even as he chronicled it. Showcasing Hoagland's extraordinary gifts for portraiture—his cast runs from salty prospector to trader, explorer, missionary, and indigenous guide—*Notes from the Century Before* is a breathtaking mix of anecdote, derring-do, and unparalleled elegy from one of the finest writers of our time.

The Publishers Weekly

Discover the leadership strengths of world-class mountain guides and see how developing and applying these principles can help you reach for the highest summits in work—and in life. This intriguing approach to business and personal success introduces six leadership strengths of world-class mountain guides: demonstrating social intelligence; adopting a flexible leadership style; empowering others; facilitating the development of trust; managing risk in an environment of uncertainty; and seeing the big picture. The premise is that these same strengths provide a valuable model in the workplace and other networks, whether one is already in a leadership position or aspiring to get there. The result of more than a decade of research combined with the author's personal experience, the book explains how mountain guides coach people to reach for their highest goals in the most challenging environments, often enabling them to far exceed what they imagined possible. The same principles can be applied in business and elsewhere. To set readers on the right path, the author explains six strengths of guides, incorporating interviews and quotes from guides and expedition participants to illustrate leadership lessons and show how they can be successfully used off the slopes. The book also provides a checklist of action steps readers can follow to foster skill development.

Fallen Giants

In 1912, six months after Scott and his men came to grief in Antarctica, the Russian navigator Valerian Albanov embarked on an expedition that would prove even more disastrous. In search of new Arctic hunting grounds, Albanov's ship, the *Saint Anna*, was frozen fast in the pack ice of the treacherous Kara Sea - a misfortune grievously compounded by an incompetent commander, the absence of crucial nautical charts, insufficient fuel, and inadequate provisions that left the crew weak and debilitated by scurvy. For nearly a year and a half, the twenty-five men and one woman aboard the *Saint Anna* endured terrible hardships and danger as the icebound ship drifted helplessly north. Convinced that

the Saint Anna would never free herself from the ice, Albanov and thirteen crewmen left the ship in January 1914, hauling makeshift sledges and kayaks behind them across the frozen sea, hoping to reach the distant coast of Franz Josef Land. With only a shockingly inaccurate map to guide him, Albanov led his men on a 235-mile journey of continuous peril, enduring blizzards, disintegrating ice floes, attacks by polar bears and walrus, starvation, sickness, snowblindness, and mutiny. That any of the team survived is a wonder. That Albanov kept a diary of his ninety-day ordeal - a story that Jon Krakauer calls an 'astounding, utterly compelling book', and David Roberts calls 'as lean and taut as a good thriller' - is nearly miraculous. First published in Russia in 1917, Albanov's narrative is here translated into English for the first time. Haunting, suspenseful, and told with gripping detail, *In the Land of White Death* can now rightfully take its place among the classic writings of Nansen, Scott, Cherry-Garrard and Shackleton.

In 1860, fifteen years after Sir John Franklin's ill-fated expedition disappeared in the Arctic, a Cincinnati businessman named Charles Francis Hall set out to locate and rescue the expedition's survivors. He was an amateur explorer, without any scientific training or experience, but he was driven by a sense of personal destiny and of religious and patriotic mission. Despite the odds against him, he made three forays into the far North, the final--and fatal--one taking him farther north than any westerner had ever gone before. But Hall was suddenly taken ill on that voyage and died under mysterious circumstances. Ninety-seven years later, Chauncey Loomis headed an expedition to Hall's grave in northwestern Greenland. He exhumed Hall's frozen body and performed an autopsy. His findings suggest that the investigators of Hall's death nervously sidestepped the damning evidence. Loomis has written a masterful biography-cum-mystery that brilliantly evokes the lure of the Arctic and the brutal contest between man and nature. The Hazel Wood meets *The Astonishing Color of After* in this dreamy, atmospheric novel that follows sixteen-year-old Eli as she tries to remember what truly happened the night her mother disappeared off a frozen fjord in Norway under the Northern Lights. Never whistle at the Northern Lights, the legend goes, or they'll sweep down from the sky and carry you away. Sixteen-year-old Eline Davis knows it's true. She was there ten years ago, on a frozen fjord in Svalbard, Norway, the night her mother

whistled at the lights and then vanished. Now, Eli lives an ordinary life with her dad on Cape Cod. But when the Northern Lights are visible over the Cape for just one night, she can't resist the possibility of seeing her mother again. So she whistles--and it works. Her mother appears, with snowy hair, frosty fingertips and a hazy story of where she's been all these years. And she doesn't return alone. Along with Eli's mother's reappearance come strange, impossible things. Narwhals swimming in Cape Cod Bay, meteorites landing in Eli's yard, and three shadowy princesses with ominous messages. It's all too much, too fast, and Eli pushes her mother away. She disappears again--but this time, she leaves behind a note that will send Eli on a journey across continents, to the northern tip of the world: Find me where I left you.

"The Machine Stops" by E.M. Forster, now presented in a beautifully illustrated edition, is a visionary and thought-provoking novella that explores the perils of technological dependency and the potential consequences of a society overly reliant on machines. Set in a future where humanity lives underground, isolated in individual cells, their every need attended to by an all-encompassing Machine, the story follows Vashti, a lecturer and true believer in the Machine's omnipotence. However, as the Machine begins to show signs of malfunction, Vashti's worldview is challenged, leading to a series of events that question the very foundations of her society. "The Machine Stops" remains a compelling exploration of the dangers of sacrificing human connections for the convenience of technology. This illustrated edition provides a fresh perspective on Forster's timeless work, making it an engaging and visually captivating experience for both new and returning readers.

Between Heaven and Earth

A secret power. The revival of magic. An ancient evil stirs. Twenty-year-old university dropout Cassie Rogan has returned to her small British Columbia home. Tortured by an accident that killed her parents, she drifts, failing life at every turn. When an impossibly localized lightning storm hits the surrounding forest, Cassie discovers her supernatural side. After centuries of atrophy, the forces of magic are flowing back into our world, and Cassie can wield arcane powers. Her life seems destined to turn around, until the downside of magic brings everything to a screeching halt. Horrifying mythical beasts now prowl the northern wilderness—including the Basilisk—an enormous eight-legged lizard that can turn its prey to stone. Recruited by a secretive agency, Cassie must quickly master her powers to protect mankind. As she develops her skills, a dark power secretly watches from the shadows. The Fae Seelie (a.k.a. the Dark Elves)—humanity's ancient enemy—have returned to settle the score. *Starlight* is the first book in the *Dark Elf War* series, an epic urban fantasy and coming of age series that features fast-paced action, mysterious creatures, careful world-building, and breathless pacing. An Amazon Charts bestseller. Dawn Conners's parents are famous for finding historic treasures, but she has a knack for losing things—her job, her boyfriend, and now, her reputation. Thanks to a mud-slinging exposé, Dawn's late great-grandfather is assumed guilty of stealing silver from a century-old shipwreck. Hoping to clear his name, Dawn returns to *Starlight Cove*, her idyllic hometown on Lake Michigan, where the doomed vessel sleeps beneath the beam of a ramshackle lighthouse. Her plan: remodel and sell the lighthouse while untangling the perplexing family mystery. Neither task is easy, especially once her well-meaning parents and the quirky locals—including nautical researcher and *Starlight Cove*'s most eligible bachelor, Kip Whittaker—get involved. Despite their attraction, Dawn is reluctant to trust Kip, or any of the close-knit townsfolk. But as she pieces together the truth, Dawn's once-shuttered heart opens up. And if she's willing, the lighthouse might guide her to a place she never expected to find, where the past entwines with a bright new beginning.
