Using passwords in your scripts

Prompting / Get Credential

DPAPI Method / Cleartext

Question: I want to deploy a PowerShell file (little gui compiled to exe) to my users, which gives them the opportunity to create a special file structure under a name that they enter. I want to restrict the NTFS rights for creation to a special user and would therefore encrypt the user data in my script.

What can I do to have maximum security?

Question: How can I update a local admin password with PS and keep the new password encrypted? Net user works, but it's not encrypted when pushing out through Deploy.

Active Directory reset password

Question: Can you use PowerShell to uninstall ClickOnce apps using Deploy?

DPAPI Get Credential

What does it mean when we say encrypted?

Question: I have a question about running remote PowerShell commands from PDQ Inventory. I can get this to work: Get-NetFirewallRule. But I get an error when I try to add qualifiers: Get-NetFirewallRule | Where { \$_.Enabled -eq 'True'-and \$_.Direction -eq 'Inbound' } Essentially an unexpected token error. I assume it has to do with spaces, and that it's likely just something I am missing with how PowerShell works.

Import and export Clixml

Question: The Fog client runs as local System. This means that the PowerShell.exe process launched via a snapin will run in that context, and Invoke-Command will inherently try that credential. Can you provide an example of a credential object for the -Credential parameter?

Question: Is there a way to run/manage the Microsoft Local Administrator Password Solution via PDQ?

Integrated Logistic Support (ILS) Management Guide

This guideline provides updated global, evidence-informed recommendations on the intake of free sugars to reduce the risk of NCDs in adults and children, with a particular focus on the prevention and control of unhealthy weight gain and dental caries. The recommendations in this guideline can be used by policy-makers and programme managers to assess current intake levels of free sugars in their countries relative to a benchmark. They can also be used to develop measures to decrease intake of free sugars, where necessary, through a range of public health interventions. Examples of such interventions and measures that are already being implemented by countries include food and nutrition labelling, consumer education, regulation of marketing of food and non-alcoholic beverages that are high in free sugars, and fiscal policies targeting foods and beverages that are high in free sugars. This guideline should be used in conjunction with other nutrient guidelines and dietary goals, in particular those related to fats and fatty acids (including saturated fatty acids and trans-fatty acids), to guide development of effective public health nutrition policies and programmes to promote a healthy diet.

Integrated Logistic Support (ILS) Management Guide

Logistics Support Analysis A Complete Guide - 2021 Edition.

Integrated Logistic Support (ILS) Procedural Guide

Following three successful editions, the fourth edition of this book provides concise, updated guidance and procedures for providing logistical support to a deployed army on 21st-century battlefields.

Logistics Support Analysis A Complete Guide - 2020 Edition

This Integrated Logistic Support Implementation Guide for DOD Systems and Equipments is designed to assist program managers in government and industry in the implementation of that policy contained in DOD Directive 4100.35. In discussion of the application of the ILS concept to various types of acquisition, description of ILS techniques and the relationship of ILS to other disciplines, this guide facilitates improved communications between government and industry program managers, design, procurement, and financial managers, and between various agencies within the government. The guide is organized to make it useful for program managers involved in the detailed planning and management of logistic support, and at the same time to be a valuable reference source for the non-specialist who needs assistance on specific problems with respect to logistics support and its interfaces.

Performance Based Logistics: A Program Manager's Product Support Guide

Since the publication of first edition by the end of 2016, the positive feedback that I have received in connection with this book has been wide and constant. That has provided me with great satisfaction, as my wish was to bring the theory and practice of integrated logistics support closer to professionals interested in the discipline. The last years have witnessed the eclosion of the fourth industrial revolution, also known as Industry 4.0, which is transforming activities in all industrial sectors. Logistics is no exception and hence it is becoming more frequent to talk about Logistics 4.0. This second edition attempts to address how the field of logistics is being transformed. Consequently, in addition to correcting a few errors detected in the first edition, four new chapters have been added. First, a chapter on technology refreshment programs because they enable, together with performance-based logistics, the reduction of the capabilities gap that systems suffer during their operational lives. Second, a chapter on Industry 4.0, addressing the main goals and enabling technologies of the fourth industrial revolution, together with its main risks and challenges. Third, a chapter on Logistics 4.0, or how logistics is now shaped in the frame of the fourth industrial revolution. Finally, a chapter on the perils faced by logistics engineers, who wish to stay in the state of the art in the discipline. I hope that these new chapters reinforce the contents of the book and further help those who wish to attain a good command of the discipline of integrated logistics support.

Integrated Logistics Support Handbook, Special Reprint Edition

This guideline aims to help Member States and their partners in their efforts to make informed decisions on the appropriate nutrition actions to achieve the Sustainable Development Goals (SDGs) the global targets set in the Comprehensive implementation plan on maternal infant and young child nutrition and the Global Strategy for Women's Children's and Adolescents' Health 2016-2030. The recommendations in this guideline are intended for a wide audience including policy-makers their expert advisers and technical and programme staff at organizations involved in the design implementation and scaling-up of anaemia prevention programmes and in nutrition actions for public health.

Integrated Logistics Support Handbook

What are the short and long-term Integrated logistics support goals? How do you use Integrated logistics support data and information to support organizational decision making and innovation? What will be the consequences to the business (financial, reputation etc) if Integrated logistics support does not go ahead or fails to deliver the objectives? Is the Integrated logistics support process severely broken such that a re-design is necessary? How does Integrated logistics support integrate with other business initiatives? Defining, designing, creating, and implementing a process to solve a business challenge or meet a business objective is the most valuable role... In EVERY company, organization and department. Unless you are talking a one-time, single-use project within a business, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' This Self-Assessment empowers people to do just that - whether their title is entrepreneur, manager, consultant, (Vice-)President, CxO etc... - they are the people who rule the future. They are the person who asks the right questions to make Integrated logistics support investments work better. This Integrated logistics support All-Inclusive

Self-Assessment enables You to be that person. All the tools you need to an in-depth Integrated logistics support Self-Assessment. Featuring 723 new and updated case-based questions, organized into seven core areas of process design, this Self-Assessment will help you identify areas in which Integrated logistics support improvements can be made. In using the questions you will be better able to: - diagnose Integrated logistics support projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in Integrated logistics support and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the Integrated logistics support Scorecard, you will develop a clear picture of which Integrated logistics support areas need attention. Guideline: Sugars Intake for Adults and Children

Contains the preferred DoD product support strategy to improve weapons system readiness by procuring performance, which capitalizes on integrated logistics chains and public/private partnerships. Used as a tool for Program Managers and Product Support Managers as they design product support strategies for new programs or major modifications, or as they re-engineer product support strategies for existing fielded systems. Presents a method for implementing a Performance Based Logistics (PBL) product support strategy.

Logistics Support Analysis A Complete Guide - 2021 Edition

This book is a guide for Logistician's (military or civilian) in the execution of Movement Control and Distribution Management. - Provides examples of procedures and guidance utilized by our armed forces operating in Iraq to date, as well as being reviewed as emerging doctrine for the future. - Presents information for staff management that incorporates manual and automated procedures to monitor and track movement and commodities on today's modern battlefields. - Provides a process to utilize data from different automation systems, which do not talk to one another, as well as incorporates manual procedures to develop a system to monitor and track movement and commodities on today's modern battlefields. By doing this, we have provided the commander with a focused staff battle rhythm that works. Due to the Army Transformation and Spiral Development, there is a lack of documentation on just how to interpret and implement the new concepts and automation applications, and synchronize their usage and development. Many of the ideas and process in this book have not advanced beyond the conjectural level. The work covered is an initial effort to make operational these new ideas and procedures and provide them as training in a classroom and wartime environment. The uniqueness of the logistical mission and the technology of these services, this book may be guided towards a rather select audience. But due to the tactics and methods being used by our enemies in the field, it is important to understand that at all levels, the ability to have visibility and command and control of movement within our battle space is essential.

Infoasesoría es un boletín digital de periodicidad mensual (excepto los meses de junio a agosto) que recoge información sobre las actividades de la Consejería de Educación en Bélgica y Luxemburgo, así como recursos didácticos para la enseñanza del español y enlaces sobre temas relacionados con la lengua y cultura españolas. El boletín incluye normalmente tres grandes apartados: Formación: con información sobre actividades para el profesorado de español en Bélgica y Luxemburgo, Recursos: con enlaces a diversas páginas de interés para el profesorado de español, y otra información donde se hace referencia a otros asuntos como becas, concursos, vacantes, actividades culturales, y todo lo referente a la lengua y culturas españolas en los dos países.

Instrucciones para la redacción de proyectos

El libro es un compendio de información histórica y descriptiva de la Red de Centros Docentes Españoles dependientes de la Consejería de Educación en Marruecos, poniéndose de relieve la singularidad de estas instituciones educativas, entre las que se cuenta el único centro de Formación Profesional en el Exterior. A través de un breve recorrido histórico se ofrecen datos del origen y de las características particulares de sus edificios e instalaciones. Se da a conocer la labor realizada mediante la participación en proyectos educativos innovadores, impulsados y coordinados por la Consejería de Educación. Asimismo, se menciona como característica remarcable la organización de actividades de proyección cultural, así como la labor desempeñada por los equipos directivos, claustro de profesorado y comunidad educativa, bajo la coordinación de la Consejería de Educación, con el fin de ofrecer las enseñanzas del sistema educativo español en un marco intercultural y plurilingüe.

Collages : [exposición]

La acción educativa desarrollada por el Ministerio de Educación y Formación Profesional en el exterior se integra en el marco más amplio de la promoción y difusión de la lengua y la cultura españolas en el mundo, y de la cooperación internacional. En la actualidad el Ministerio está presente en más de 40 países a través de distintos programas, con un objetivo múltiple: por un lado, ofrecer enseñanzas regladas del sistema educativo español correspondientes a niveles no universitarios; por otro, organizar e impulsar la presencia española en el seno de otros sistemas educativos; y finalmente, trabajar por la expansión y el fomento de nuestro idioma y cultura. El objetivo de la guía es facilitar la llegada de los docentes y asesores que se incorporan a sus puestos en el ámbito de actuación de la Consejería. La guía de acogida recoge aspectos generales sobre la acción educativa española en el exterior, sobre Suiza y Liechtenstein, sobre los sistemas educativos y sobre la Consejería de Educación. Por otra parte incluye aspectos más concretos sobre los diversos programas dependientes de la Consejería. Además se explican las diversas tareas realizadas por los asesores técnicos en el exterior.

Currículo de Educación Infantil para Extremadura

Examina las líneas generales de la evolución de la investigación educativa en Europa, su evolución en España desde los años 70 y su actual estructura en España.

Voces hispanas

Compilación de textos legales y jurisprudenciales, tanto de carácter estatal como autonómico, referidos al ámbito educativo, a partir de 1985 hasta la fecha.

Diseños curriculares de lenguas extranjeras

Este libro surge como una propuesta de académicos y profesionales en relación con la actuación que la Educación Social puede desarrollar ante los retos que plantea el sistema educativo. Está pensado para todos aquellos docentes de educación superior interesados en mejorar la estructuración y los procesos formativos de los títulos de grado y posgrado. Además, puede resultar útil como una obra de consulta para profesionales de la Educación Social que trabajan en contextos educativos. El volumen está organizado en ocho capítulos de tal manera que se busca la coherencia y la continuidad de la propuesta. Tras un primer capítulo introductorio, en el que se conceptualizan términos clave de esta disciplina, se describe y define el ámbito educativo como integrante de áreas de acción de la Educación Social. Le siguen otros dos centrados en la figura del profesional de la Educación Social en el sistema educativo. Los pedagogos clásicos, considerados como los precursores de la Educación Social (Pedagogía Social), muestran vías de acción desde las cuales se llevaron a cabo experiencias

socioeducativas con el fin de acompañar a personas de diferentes edades y en contextos variados para facilitar su inserción en su sociedad. En la actualidad, el profesional de la Educación Social se halla inmerso en un sinfín de proyectos educativos que se ofrecen fuera y dentro de los contextos escolares. Se describe la situación actual en el Estado español y, a partir de este mapeo, se analiza la disparidad por comunidades autónomas y su (des)regulación por parte de la administración educativa. Los cinco capítulos sucesivos responden de forma reflexiva la siguiente cuestión: ¿Cuál/Cuáles es/son las propuestas de actuación que se ofrecen desde diferentes posiciones en el ámbito socioeducativo a las situaciones que se viven en los centros educativos? Las múltiples respuestas ofrecidas desde perspectivas diversas enriquecen el contenido del libro a la vez que provocan otros interrogantes sobre acciones que podrían plantearse a fin de facilitar que la comunidad educativa sea protagonista de su propia historia en relación con el tiempo y la sociedad en la que se inserta.

Infoasesoría nº 176. Boletín de la Consejería de Educación en Bélgica, Países Bajos y Luxemburgo

Este libro trata de ofrecer, desde una perspectiva práctica e innovadora una serie de supuestos prácticos para fomentar un clima de convivencia en los centros de Educación Primaria. Trata de responder a situaciones en las que es necesaria la aplicación de técnicas de modificación de conducta para la extinción de conductas disruptivas de los alumnos, actuaciones para prevenir y solucionar situaciones de acoso escolar, mejora de la atención y control del aula entre otras. En definitiva, un libro interesante para maestros o futuros maestros que quieran conocer cómo trabajar un clima de convivencia en el centro escolar.
