It is well known that Jorge Luis Borges was a translator, but this has been considered a curious minor aspect of his literary achievement. Few have been aware of the number of texts he translated, the importance he attached to this activity, or the extent to which the translated works inform his own stories and poems. Between the age of ten, when he translated Oscar Wilde, and the end of his life, when he prepared a Spanish version of the Prose Edda, Borges transformed the work of Poe, Kafka, Hesse, Kipling, Melville, Gide, Faulkner, Whitman, Woolf, Chesterton, and many others. In a multitude of essays, lectures, and interviews Borges analyzed the versions of others and developed an engaging view about translation. He held that a translation can improve an original, that contradictory renderings of the same work can be equally valid, and that an original can be unfaithful to a translation. Borges's bold habits as translator and his views on translation had a decisive impact on his creative process. Translation is also a recurrent motif in Borges's stories. In "The Immortal," for example, a character who has lived for many centuries regains knowledge of poems he had authored, and almost forgotten, by way of modern translations. Many of Borges's fictions include actual or imagined translations, and some of his most important characters are translators. In "Pierre Menard, author of the Quixote," Borges's character is a respected Symbolist poet, but also a translator, and the narrator insists that Menard's masterpiece-his "invisible work"-adds unsuspected layers of meaning to Cervantes's Don Quixote. George Steiner cites this short story as "the most acute, most concentrated commentary anyone has offered on the business of translation." In an age where many discussions of translation revolve around the dichotomy faithful/unfaithful, this book will surprise and delight even Borges's closest readers and critics.

A Nobel Peace Prize winner reflects on poverty, injustice, and the struggles of Mayan communities in Guatemala, offering “a fascinating and moving description of the culture of an entire people” (The Times) Now a global bestseller, the remarkable life of Rigoberta Menchú, a Guatemalan peasant woman, reflects on the experiences common to many Indian communities in Latin America. Menchú suffered gross injustice and hardship in her early life: her brother, father and mother were murdered by the Guatemalan military. She learned Spanish and turned to catechistic work as an expression of political revolt as well as religious commitment. Menchú vividly conveys the traditional beliefs of her community and her personal response to feminist and socialist ideas. Above all, these pages are illuminated by the enduring courage and passionate sense of justice of an extraordinary woman.

The Art of Trover Saves the Universe

This book offers a wide selection of contributions presented at the LV Conference of Italian society of agricultural economics (SIDEA) Studies. Agricultural economists and sociologists reflect on the change processes that are affecting the agri-food systems and take a small step towards an improved understanding of the complexity of green metamorphosis, and the interplay between agriculture, food and ecology. The key message is that a green metamorphosis has been taking place, increasingly involving more and more aspects and dimensions: from environment to consumers' preferences, from social value to human health, from profitability to governance issues. Furthermore, this book tries to shed a light on the complexity of the new agricultural paradigm, which involves technology as well as traditions, trying to understand the ongoing metamorphosis taking into account that 'nothing is created, nothing is destroyed, everything is transformed'. This volume intends to guide the new generations of agricultural economists, who have the hard task of leading the green metamorphosis across the four main axes of sustainability: economic, socio-cultural, environmental, and political.

The Spider Garden

The fourth book in the Erskan Chronicles once again blends science fiction with an erotic tale of female dominance and male submission. An expansive and beautiful ocean of grass is the backdrop for unforeseen clashes of deceit, betrayal and tumultuous cultural upheaval in a land where protection - and sexual slavery - of the male is the paramount essence of the plainswoman's life.

Scrapbook of a Roving Highlander

First performed in 458BC, Aeschylus's trilogy of plays - known collectively as The Oresteia - remains perhaps the great masterpiece of Ancient tragic drama. Telling the bloody story of the House of Atreus, Aeschylus's tragedy stages an eternal debate about justice and revenge that remains relevant more than two millenia later. Now available in the Bloomsbury Revelations series in this classic and authoritative translation by Hugh Lloyd-Jones, this book contains the text of all three plays - Agamemnon, The Libation Bearers and The Eumenides - with extensive scholarly annotation throughout.

Green Metamorphoses

The Quechua people, the "singing mountaineers" of Peru, still sing the songs that their Inca ancestors knew before the Spaniards invaded the Andes. Some of these songs, collected and translated into Spanish by José María Arguedas and María Lourdes Valladares from the Quechua language and the Huanca dialect, are now presented for the first time in English in the beautiful translations of Ruth Stephan, author of the recent prize-winning novel, The Flight. Also included in this rich collection are nine folk tales collected by Father Jorge A. Lira, translated into Spanish by Sr. Arguedas, and into English by Kate and Angel Flores.

Geeky meets kinky in this second too-hot-to-handle novel in the Slices of Pi series by RITA-nominated author Elia Winters, which follows the erotic adventures of the employees at PI Games, a gaming company based out of sultry Florida. Don't miss Single Player, the next sizzling installment in this series! Iris Parker never planned on ending up in HR because, let's face it: HR isn't the most glamorous position in the world. She took a comfortable job and always planned on leaving when something better came

along, but before she knows it, she's thirty and the HR director for PI Games. Even though she likes her coworkers, there's no excitement in the job for her, and Iris is worried that she'll lose her spark. Luckily, Iris's romantic life provides some thrills—living the confirmed bachelor life, when she wants her bed warm, she can find company, and in her sights at the moment is the cute pastry chef at her favorite bakery. Owen Hobbs has noticed the gorgeous businesswoman making eyes at him when she comes in for coffee and sweets, but he's not the type of guy who dates much anymore. Unfortunately for him, it didn't take long in his sporadic dating history to learn that most women aren't interested in taking charge in bed, which is what he really craves. Working early mornings at the bakery keeps him from the nightlife where he might meet someone who can fulfill his needs, so he's resigned himself to fantasies and pretty much given up on the dating scene altogether. But when Iris's advances become too much to resist, Owen finds himself revealing his desire to be sexually dominated...the only question is, is she the right woman for the job?

Falk's Trans-Pacific Sketches

Between the sixteenth and nineteenth centuries, competing European empires, notably Spain, Portugal, Great Britain, the Netherlands, Germany, France, Belgium, and others vied for commercial and political control of transoceanic networks, particularly the transpacific routes between Asia and the Americas. The essays in *Transpacific Engagements: Trade, Translation, and Visual Culture of Entangled Empires (1565–1898)* address the resulting cultural and artistic exchanges with an emphasis on both the Spanish and American enterprises in the Asia-Pacific region. The essays are grouped into three parts entitled “Entangled Empires,” “Empires and Translations,” and “Empires and Trade.” A common thread in the diverse perspectives presented here is the importance of transpacific engagements to the global connections of the sixteenth century and beyond. While the focus is on the specific connection between the Asia-Pacific region and the Americas through the Philippines, we see how other parts of the world, notably South and Southeast Asia and Europe, were also participants impacted by these transpacific linkages. The goal is to convey the complexity of entangled networks of commercial,

political, and religious interests that complicate the Spanish enterprise in the Pacific. Commercial ventures into Canton and Manila by the early American republic, for example, overlapped with and later replaced the Spanish galleons. East, South, and Southeast Asian polities and dynasties remained powerful players in what were often multilateral, rather than bilateral, exchanges. Contributors to this volume are based in Asia, the Americas, and Europe.

Trans-Pacific Sketches

This volume provides comprehensive chapter-by-chapter assessment of one of the world's most important regional trade agreements, the TPP/CPTPP.

Trans-Pacific Sketches

The Trans-Pacific Partnership (TPP) talks attempt to link together at least nine countries in three continents to create a 'high-quality, twenty-first century agreement'. Such an agreement is intended to open markets to competition between the partners more than ever before in sectors ranging from goods and services to investment, and includes rigorous rules in the fields of intellectual property, labour protection and environmental conservation. The TPP also aims to improve regulatory coherence, enhance production supply chains and help boost small and medium-sized enterprises. It could transform relations with regions such as Latin America, paving the way to an eventual Free Trade Area of the Asia Pacific, or see innovations translated into the global trade regulatory system operating under the WTO. However, given the tensions between strategic and economic concerns, the final deal could still collapse into something closer to a standard, 'twentieth-century' trade agreement.

Transpacific Engagements

This book is a successor to Robin Burnett's *Law of International Business Transactions*. It provides an up-to-date analysis of the legal environment for international trade and covers: the changes made to payment and letters of credit by reason of the adoption of the UCP 600, which became effective in 2007, and other means of payment which are currently used; the provisions and possible adoption of the UNCITRAL Draft Convention on the Carriage of Goods Wholly or Partly by Sea; recent developments in the law relating to international sale of goods; the question of international arbitration and other means of dispute resolution; and the strategies and issues of international operations while incorporating and building on the comprehensive information and material in the previous book. It will assist practitioners and students in their understanding of the legal and practical aspects of international and overseas trade and operations.

The Comprehensive and Progressive Trans-Pacific Partnership

The experimentalist phenomenon of 'noise' as constituting 'art' in much twentieth-century music (paradoxically) reached its zenith in Cage's ('silent' piece) 4'33". But much post-1970s musical endeavour with an experimentalist telos, collectively known as 'sound art', has displayed a postmodern need to 'load' modernism's 'degree zero'. After contextualizing experimentalism from its inception in the early twentieth century, Dr Linda Kouvaras's *Loading the Silence: Australian Sound Art in the Post-Digital Age* explores the ways in which selected sound art works demonstrate creatively how sound is embedded within local, national, gendered and historical environments. Taking Australian music as its primary - but not sole - focus, the book not only covers discussions of technological advancement, but also engages with aesthetic standpoints, through numerous interviews, theoretical developments, analysis and cultural milieux for a contemporary Australian, and wider postmodern, context. Developing new methodologies for synergies between musicology and cultural studies, the book uncovers a new post-postmodern aesthetic trajectory, which Kouvaras locates as developing over the past two decades - the altermodern. Australian sound art is here put firmly on the map of international debates about contemporary music, providing a standard reference and valuable resource for practitioners in the artform, music critics, scholars and educators.

The Trans-Pacific Partnership

Stories and images of collapsed factories, burned down sweatshops, imprisoned migrant workers, child workers and many other violations of internationally recognized labour rights continue to spread across the globe. This highly topical book examines the different instruments which are intended to protect labour rights on a transnational scale, and asks whether they make a difference. With perspectives

from law, management, sociology, political science and political economy, the topics discussed include the protection of international labour rights in a globalizing economy, the EU's social dimension in its external trade relations, Asian and US perspectives on labour rights in international trade agreements, the role of (trade) unions in global labour governance and the transformative capacity of private labour governance regimes. Academics and advanced students from different disciplines will benefit from the up-to-date empirical material in this study. Policymakers, NGOs and Unions will find the discussions of the instruments used to protect labour rights of great value to their work.

The Trans-Pacific

This book highlights the significance of North--South connections as a part of transpacific history. The little-known stories it tells of such "vertical" encounters across the Pacific Ocean complicates established historical narratives which focus instead on "horizontal" connections between the United States and Asia

The Trans-Pacific

This book explores connections between Atlantic studies and (trans)Pacific studies, including the potential discursive, topical, and historical overlaps of the two fields. It carves out mutual concerns and theoretical affinities, but also divergent approaches and differences. While acknowledging the fundamental differences that characterize the individual fields, the essays in this volume examine how both Atlantic and (trans)Pacific studies are part of global currents of political, activist, artistic, economic, and academic exchange. This volume brings together voices from Europe, North America,

and the Pacific with disciplinary backgrounds in history, culture, and literature. Directed at scholars with a background in (trans)Pacific and/or Atlantic studies, this collection is an attempt to stimulate exchange between the two fields, to intensify their impact within the current transnational focus of literary and cultural studies, to encourage the questioning of well-mapped paths of inquiry, and to outline new theoretical approaches to both fields. This book was originally published as a special issue of the journal *Atlantic Studies*.

The Trans-Mississippi West, 1804-1912

This book focuses on the Asia-Pacific region, delineating the evolving dynamics of foreign investment in the region. It examines the relationship between efforts to increase foreign direct investment (FDI) and efforts to improve governance and inclusive growth and development. Against a background of rapidly developing international investment law, it emphasises the need to strike a balance between these domestic and international legal frameworks, seeking to promote both foreign investment and the laws and policies necessary to regulate investments and investor conduct. Foreign investments play a pivotal role in most countries' political economies, and in order to encourage cross-border capital flows, countries have taken various steps, such as revising their domestic legal frameworks, liberalising rules on inward and outward investment, and creating special regimes that provide incentives and protections for foreign investment. Alongside the developments in domestic laws, countries have also taken bilateral and multilateral action, including entering into trade and/or investment agreements. Further, the book explores regional investment trends, highlights specific features of Asia-Pacific investment laws and treaties, and analyses policy implications. It addresses four overarching themes: the trends (how Asia-Pacific's agreements compare with recent global trends in the evolving rules on foreign investment); what China is doing; current investment arbitration practice in Asia; and the importance of regionalising investment law in the Asia-Pacific region. In addition, it identifies and discusses the research and policy gaps that should be filled in order to promote more sustainable and responsible investment. The book offers a valuable resource not only for academics and students, but also for trade and investment officials, policy-makers, diplomats, economists, lawyers, think tanks, and business leaders interested in the governance and regulation of foreign investment, economic policy reforms, and the development of new types of investment agreements.

Australians in America, 1876-1976

The Research Handbook on Environment and Investment Law examines one of the most dynamic areas of international law: the interaction between international investment law and environmental law and policy. The Research Handbook takes a thematic approach, analysing key issues in the environment–investment nexus, such as freshwater resources, climate, biodiversity, biotechnology and sustainable development. It also includes sections which explore regional experiences and address practice and procedure, and offers innovative approaches and critical perspectives, including the interface between foreign investment and the environment with human rights, gender, indigenous peoples, and economics.
