The Voyages and Adventures of Ferdinand Mendez Pinto, the Portuguese

In this book, Marcio Goldman provides an interpretation of a 'big' theme - the functioning of a modern political system - based on the ethnographic analysis of a 'small' one - the political involvement of a group of African-Brazilian people living in the town of Ilheus in the north-east of Brazil, and belonging to Afro-Brazilian religions, black movement factions, families and neighbourhoods. By giving a description 'from the native's point of view' he leads us to a truly anthropological perception of modern democracies, showing how we need to take seriously the actions and the reflections of those generally viewed as passive, manipulated, ignorant and not really interested in the political game. Only this can lead us to an 'ethnographic theory of politics' A ground-breaking work of real importance - not only to the anthropology of politics, but to the continuing development of theory and epistemology in anthropology and the social sciences at large. - Prof. Christina Toren, University of St Andrews Goldman has masterfully analysed the terrain of politics in this town, illuminating not only its local specifics.... but what he calls the 'constitutive ambiguities' of democracy in Brazil - and indeed of democracy as a whole. In the process he robustly challenges various accepted wisdoms about poor people's political choices, gives new life to classic anthropological ideas like 'segmentation', and strips away the veil that, for many of us, obscures 'how democracy works'. He achieves this ambitious task with consummate skill, combining fine-grained detail with bold theoretical insight.- Prof. Deborah James, London School of Economics If the intellectual contemplation of collectively instituted irrationality is what got anthropology going in the first place, then it must, at some point, address such entities as politicians, and why people vote for them. Read this book and learn. - Prof. Peter Gow, University of St Andrews

How Democracy Works

Vivaldo Bonfim was a bored book-keeper whose main escape from the tedium of his work was provided by novels. In the office, he tended to read rather than work, and, one day, became so immersed in a book that he got lost and disappeared completely. That, at least, is the version given to Vivaldo's son, Elias, by his grandmother. One day, Elias sets off, like a modern-day Telemachus, in search of the father he never knew. His journey takes him through the plots of many classic novels, replete with murders, all-consuming passions, wild beasts and other literary perils. The Book that Devoured my Father is, at once, a celebration of filial love, friendship and literature.

Bíblia da Infância. (Tradução do Dr. Aprígio Justiniano da Silva Guimarães.).

It has long been a task of great scholars to establish definitive texts of major works. But why, Bernard Cerquiglini asks, must there be such a preference? Might such a preference distort the fundamental understanding of what texts are or could be?

In Praise of the Variant

An attractive, interesting layout can certainly attract and please the reader; but when the readers are not good, reading requires extra effort and any pleasure is short-lived. 'Detail in Typography' is a concise and close-up view of the subject. It considers all the elements that constitute a column of text letters, words, the line, and the space around these elements - and it discusses what is essential for the legibility of text.

Iraçéma, the Honey-Lips

A distinguished group of scholars here provides a comprehensive survey of the theology of the early church as it is presented by the author of Acts. The twenty-five articles show the current state of scholarship and the main themes of theology in Acts.

Consolation for the Tribulations of Israel (Consolaçam Às Tribulaçoens de Israel)

Vol. 2: Published for the first time in English alphabetical order, vol. 2 (of the 5 original volumes) of "Canon of Medicine" (Law of Natural Healing), is an essential addition to the history of medicine as it holds a treasure of information on natural pharmaceuticals used for over 1000 years to heal various diseases and disorders. Fully color illustrated with a 150 page, 7000 word index of the healing properties of each of the entries, the text itself is an alphabetical listing of the natural pharmaceuticals of the simple compounds. By simple compounds, Avicenna includes the individual plants, herbs, animals and minerals that have healing properties. Avicenna lists 800 tested natural pharmaceuticals including plant, animal and mineral substances. The compiler has included the Latin, Persian and Arabic names of the drugs along with artistic renderings of the drugs as illustrations as well as Avicenna's Tables or Grid for each entry that describes the individual, specific qualities of simple drugs.

Seminar paper from the year 2007 in the subject Communications - Movies and Television, grade: 1.0, Technical University of Berlin, course: Audiovisuelle Wahrnehmung. Phänomene in der Medienrezeption, language: English, abstract: In the process of filmmaking, sound design is an relatively young creative discipline, compared with applying sound design in theatre. That has perhaps impacted the fact that the responsibilities and duties of the acoustic professionals, who are working as a sound designers on film, are still not precise determinated. Nevertheless the revolution of sound design happened exactly on the film. As a result, the film industry has devoted many of its resources to develop techniques for producing sound effects and ambience sounds that evoke emotional responses and allow the viewer to be immersed.

Witness to the Gospel

Cartas Chilenas são poemas satíricos, um artificioso compêndio das desordens. Esses poemas circularam em manuscritos pouco antes da Inconfidência Mineira, em 1789. Nele, Critilo - um habitante de Santiago - narra ao seu amigo os desmandos despóticos e narcisistas do governador chileno Fanfarrão minésio.

The Romans in the Age of Augustus

"Classical works have for us become covered with the glassy armor of familiarity," wrote Victor Shklovsky in 1914. Here Kristin Thompson "defamiliarizes" the reader with eleven different films. Developing the technique formulated in her Eisenstein's Ivan the Terrible (Princeton, 1981), she clearly demonstrates the flexibility of the neoformalist approach. She argues that critics often use cut-and-dried methods and choose films that easily fit those methods. Neoformalism, on the other hand, encourages the critic to deal with each film differently and to modify his or her analytical assumptions continually. Thompson's analyses are thus refreshingly varied and revealing, ranging from an ordinary Hollywood film, *Terror by Night*, to such masterpieces as *Late Spring* and *Lancelot du Lac*. She proposes a formal historical way of dealing with realism, using *Bicycle Thieves* and *The Rules of the Game* as examples. *Stage Fright* and *Laura* provide cases in which the classical cinema defamiliarizes its own conventions by playing with audience expectations. Other chapters deal with Tati's *Les Vacances de Monsieur Hulot* and *Play Time* and Godard's *Tout va bien* and *Sauve qui peut (la vie)*. Although neoformalist analysis is a rigorous, distinctive approach, it avoids extensive specialized vocabulary and esoteric concepts: the essays here can be read separately by those interested in the individual films. The book's overall purpose, however, goes beyond making these particular films more accessible and intriguing to propose new ways of looking at cinema as a whole.

The Canon of Medicine (al-Q nkn F+l-mibb)

This text examines the forms and functions of reflexives. Even when analyses have been conducted from different theoretical perspectives, the volume indicates a certain degree of convergence of results. The papers offer a variety of approaches, aiming to be of use in a variety of linguistic fields.

Made to be Seen brings together leading scholars of visual anthropology to examine the historical development of this multifaceted and growing field. Expanding the definition of visual anthropology beyond more limited notions, the contributors to Made to be Seen reflect on the role of the visual in all areas of life. Different essays critically examine a range of topics: art, dress and body adornment, photography, the built environment, digital forms of visual anthropology, indigenous media, the body as a cultural phenomenon, the relationship between experimental and ethnographic film, and more. The first attempt to present a comprehensive overview of the many aspects of an anthropological approach to the study of visual and pictorial culture, Made to be Seen will be the standard reference on the subject for years to come. Students and scholars in anthropology, sociology, visual studies, and cultural studies will greatly benefit from this pioneering look at the way the visual is inextricably threaded through most, if not all, areas of human activity.

Cartas Chilenas

Sometimes image, sometimes word, and often both or neither, concrete poetry emerged out of an era of groundbreaking social and technological developments. Television, nuclear weapons, radio transistors, space travel, and colour photography all combined to drastically alter the representation of the world in the period following the Second World War. While never fully embraced as poetry or as visual art, and often criticized for an aesthetic that veers too close to commercial design, concrete poetry is an ambitious critical project that strives to break free of national languages and narrow literary traditions. Crossing national and disciplinary borders to highlight connections between poems and a variety of other cultural material, Jamie Hilder shows how the movement's international character predates and initiates some trends now associated with globalization. Hilder places concrete poetry alongside such transformative projects as the modernist city of Brasília, the development of computers, and the rise of conceptual art in order to accentuate its significance as one of the major poetic movements of the twentieth century. Heavily illustrated with examples of poems that exhibit the politically engaged, complex, and varied aspects of the movement, Designed Words for a Designed World illuminates how a group of poets fascinated by the possibilities of a rapidly transforming cultural geography operated within an emerging global imaginary.

Breaking the Glass Armor

In *The Sibyl Cassandra: A Christmas Play with the Insanity and Sanctity of Five Centuries Past*, the sixteenth century play by Gil Vicente is translated in full, and provided with a full introduction by Cheryl Folkins McGinniss. Cassandra, the heroine, is a young woman who rebels against the expectations and roles that society has placed upon her. Her refusal to marry causes outrage and chaos. Amid song and dance, she is accused of blasphemy and madness until the nativity scene is magically revealed. All is restored through Christ--or is it? The translator has "unpacked" this fascinating drama from an ancestral trunk for its renewed display and enjoyment during the Christmas season.

Made to Be Seen

Anti-Literature articulates a rethinking of what is meant today by "literature." Examining key Latin American forms of experimental writing from the 1920s to the present, Adam Joseph Shellhorse reveals literature's power as a site for radical reflection and reaction to contemporary political and cultural conditions. His analysis engages the work of writers such as Clarice Lispector, Oswald de Andrade, the Brazilian concrete poets, Osman Lins, and David Viñas, to develop a theory of anti-literature that posits the feminine, multimedial, and subaltern as central to the undoing of what is meant by "literature." By placing Brazilian and Argentine anti-literature at the crux of a new way of thinking about the field, Shellhorse challenges prevailing discussions about the historical projection and critical force of Latin American literature. Examining a diverse array of texts and media that include the visual arts, concrete poetry, film scripts, pop culture, neo-baroque narrative, and others that defy genre, Shellhorse delineates the subversive potential of anti-literary modes of writing while also engaging current debates in Latin American studies on subalternity, feminine writing, posthegemony, concretism, affect, marranismo, and the politics of aesthetics.

Designed Words for a Designed World

What begins as a meditation on "the museum" by one of the world's leading art historians becomes, in this book, a far-reaching critical examination of how art history and museums have guided and controlled not only the way we look at art but the ways in which we understand modernity itself. Originally delivered as the 2001 Slade Lectures in the Fine Arts at Oxford University, the book makes its deeply complex argument remarkably accessible and powerfully clear. Concentrating on a period from the beginning of the nineteenth century to the beginning of the twentieth, Donald Preziosi presents case studies of major institutions that, he argues, have defined--and are still defining--the possible limits of museological and art historical theory and practice. These include Sir John Soane's Museum in London, preserved in its 1837 state; the Crystal Palace Exhibition of 1851; and four museums founded by Europeans in Egypt in the late nineteenth century, which divided up that country's history into "ethnically marked" aesthetic hierarchies and genealogies that accorded with Europe's construction of itself as the present of the world's past, and the "brain of the earth's body." Through this epistemological and institutional archaeology, Preziosi unearths the outlines of the more radical Enlightenment project that academic art history, professional museology, and art criticism have rendered marginal or invisible. Finally, he sketches a new theory about art, artifice, and visual signification in the cracks and around the margins of the "secular theologisms" of the globalized imperial capital called modernity. Addressed equally to the theoretical and philosophical foundations of art history, museology, history, and anthropology, this book goes to the heart of recent debates about race, ethnicity, nationality, colonialism, and multiculturalisms--and to the very foundations of modernity and modern modes of knowledge production.

Arte funerária no Brasil, 1890-1930

As long as there has been culture, there has been counterculture. At times it moves deep below the surface of things, a stealth mode of being all but invisible to the dominant paradigm; at other times it's in plain sight, challenging the status quo; and at still other times it erupts in a fiery burst of creative—or destructive—energy to change the world forever. But until now the countercultural phenomenon has been one of history's great blind spots. Individual countercultures have been explored, but never before has a book set out to demonstrate the recurring nature of counterculturalism across all times and societies, and to illustrate its dynamic role in the continuous evolution of human values and cultures. Countercultural pundit and cyberguru R. U. Sirius brilliantly sets the record straight in this colorful, anecdotal, and wide-ranging study based on ideas developed by the late Timothy Leary with Dan Joy. With a distinctive mix of scholarly erudition and gonzo passion, Sirius and Joy identify the distinguishing characteristics of countercultures, delving into history and myth to establish beyond doubt that, for all their surface differences, countercultures share important underlying principles: individualism, anti-authoritarianism, and a belief in the possibility of personal and social transformation. Ranging from the Socratic counterculture of ancient Athens and the outsider movements of Judaism, which left indelible marks on Western culture, to the Taoist, Sufi, and Zen Buddhist countercultures, which were equally influential in the East, to the famous countercultural moments of the last century—Paris in the twenties, Haight-Ashbury in the sixties, Tropicalismo, women's liberation, punk rock—to the cutting-edge countercultures of the twenty-first century, which combine science, art, music, technology, politics, and religion in astonishing (and sometimes disturbing) new ways, *Counterculture Through the Ages* is an indispensable guidebook to where we've been . . . and where we're going.

Typography, Referenced is the single most comprehensive volume covering every aspect of typography that any design student, professional designer, or design aficionado needs to know today. In these pages, you'll find: —Thousands of illustrated examples of contemporary usage in design —Historical developments from Greek lapidary letters to the movie Helvetica —Landmark designs turning single letters into typefaces —Definitions of essential type-specific language, terms, ideas, principles, and processes —Ways technology has influenced and advanced type —The future of type on the web, mobile devices, tablets, and beyond In short, *Typography, Referenced* is the ultimate source of typographic information and inspiration, documenting and chronicling the full scope of essential typographic knowledge and design from the beginnings of moveable type to the present "golden age" of typography.

Anti-Literature

In reading all the theoretical contributions to this book, an essentially common idea of the social can be observed which is of fundamental importance for a new definition of artistic production: a process-related order of institutionalized actions, including the linguistic actions to which individuals are exposed. For here, in the repetition of such institutionalized acts, is where subjects first emerge at all. Objects, whether they be objects of everyday use or whole architectures, are like moulds which provide for the institutionalization of actions. The artist emerges as a social figure, as the product of a society and the agent of political interests. From this point of view, the status of objects, the status of the "work" is not the expression of a circumscribed meaning, but the instrument of forming a subject. The opposition of theory and practice becomes obsolete. Subject and object are meaning written into actions.

House of the Fortunate Buddhas

Tracing the parallel history of official indigenist policy and Indianist writing, this study explores the encounter between literature and politics in Brazil's Indianist movement from 1750 to 1889 and reveals the central role of the Indian in constructing the self-image of state and society under Empire.

The Graphic Art of the Underground: A Countercultural History takes the reader on a dazzling journey through the visual art and design of alternative and youth cultures from the 1950s to the present day. Ian Lowey and Suzy Prince's compelling account draws upon the work of an array of artistic figures – many of whose lives have proved as colourful as their work— such as Ed 'Big Daddy' Roth, Kenny 'Von Dutch' Howard, Robert Williams, Robert Crumb, Martin Sharp, Jamie Reid, Linder Sterling, Gee Vaucher, Winston Smith, Barney Bubbles, Mark Ryden, Shag, Camille Rose Garcia, Marion Peck and Pete Fowler among numerous others.

The Graphic Art of the Underground

Tracing developments in toy making and marketing across the evolving landscape of the 20th century, this encyclopedia is a comprehensive reference guide to America's most popular playthings and the culture to which they belong. From the origins of favorite playthings to their associations with events and activities, the study of a nation's toys reveals the hopes, goals, values, and priorities of its people. Toys have influenced the science, art, and religion of the United States, and have contributed to the development of business, politics, and medicine. Toys and American Culture: An Encyclopedia documents America's shifting cultural values as they are embedded within and transmitted by the nation's favorite playthings. Alphabetically arranged entries trace developments in toy making and toy marketing across the evolving landscape of 20th-century America. In addition to discussing the history of America's most influential toys, the book contains specific entries on the individuals, organizations, companies, and publications that gave shape to America's culture of play from 1900 to 2000. Toys from the two decades that frame the 20th century are also included, as bridges to the fascinating past—and the inspiring future—of American toys.

Toys and American Culture

A historic generator of American counterculture, California has become the landing site for Asian vinyl toy culture as well. Beyond Ultraman examines the vinyl art toy landscape as seen through the work of seven California artists who reflect that movement, turning art into toys and vice versa. Through originality, wit, flippancy and brilliance, each artist represented here has elevated the vinyl art toy movement and captured the attention of two audiences: the mainstream art community and the toy community. This full-color illustrated catalog documents a first-of-its-kind exhibition presented jointly by the Pasadena Museum of California Art and the Los Angeles Toy, Doll and Amusements Museum. Specific works by Gary Baseman, Tim Biskup, David Gonzales, David Horvath, Sun-Min Kim, Brian McCarty and Mark Nagata are illustrated and described within both current and historical contexts. The vinyl art toy movement is fueled by a generation of enthusiastic young collectors for whom this book is essential.

The Harajuku neighbourhood of Tokyo has become an international style mecca, a street-level fashion scene prowled by major designers looking for inspiration, and whose local, cutting-edge labels enjoy

global cachet. *Style Deficit Disorder* is the first book to explore this remixed, fast-forward fashion hotbed, profiling its most daring and influential designers, labels, stylists, and shops. Featuring nearly 200 photos, essays by key Japanese fashion editors, and commentary by many western designers, this is a must-have, insider's look at an international fashion and pop culture epicentre, past, present, and future.

Style Deficit Disorder

Ever changing, challenging and re-inventing, designer toys are in a never-ending state of flux. Old becomes new and new can become pioneering. Flux is an intimate and exciting journey through the idiosyncrasies of designer playthings - every artist featured offers you the chance to meet the quirky characters of their imagination, and see the world through their eyes.

See/Saw offers a provocative new look at the origins of Japanese pop art. Often defined by its references to manga or anime, contemporary Japanese art in fact has much broader roots. By drawing parallels between the art of Japan past and present, this compelling volume reveals how current artists rework the traditional forms and techniques of Japanese art history. Modern takes on time-honored conventions are illustrated by the work of a star-studded roster of contemporary artists including Tabaimo, Makoto Aida, Takashi Murakami, Yoshitomo Nara, and Yayoi Kusama. Aficionados of both contemporary and traditional Japan are sure to appreciate this fresh perspective on art and the power of visual culture.

Informed by the analytical practices of the interdisciplinary 'material turn' and social historical studies of childhood, *Childhood By Design: Toys and the Material Culture of Childhood* offers new approaches to the material world of childhood and design culture for children. This volume situates toys and design culture for children within broader narratives on history, art, design and the decorative arts, where toy design has traditionally been viewed as an aberration from more serious pursuits. The essays included treat toys not merely as unproblematic reflections of socio-cultural constructions of childhood but consider how design culture actively shaped, commodified and materialized shifting discursive constellations surrounding childhood and children. Focusing on the new array of material objects designed in response to the modern 'invention' of childhood-what we might refer to as objects for a childhood by design-*Childhood by Design* explores dynamic tensions between theory and practice, discursive constructions and lived experience as embodied in the material culture of childhood. Contributions from and between a variety of disciplinary perspectives (including history, art history, material cultural studies, decorative arts, design history, and childhood studies) are represented – critically linking historical discourses of childhood with close study of material objects and design culture. Chronologically, the volume spans the 18th century, which witnessed the invention of the toy as an educational plaything and a proliferation of new material artifacts designed expressly for children's use; through the 19th-century expansion of factory-based methods of toy production facilitating accuracy in miniaturization and a new vocabulary of design objects coinciding with the recognition of childhood innocence and physical separation within the household; towards the intersection of early 20th-century child-centered pedagogy and modernist approaches to nursery and furniture design; through the changing consumption and sales practices of the postwar period marketing directly to children through television, film and other digital media; and into the present, where the line between the material culture of childhood and adulthood is increasingly blurred.

Cult Collectors examines cultures of consumption and the fans who collect cult film and TV merchandise. Author Lincoln Geraghty argues that there has been a change in the fan convention space, where collectible merchandise and toys, rather than just the fictional text, have become objects for trade, nostalgia, and a focal point for fans' personal narratives. New technologies also add to this changing identity of cult fandom whereby popular websites such as eBay and ThinkGeek become cyber sites of memory and profit for cult fan communities. The book opens with an analysis of the problematic representations of fans and fandom in film and television. Stereotypes of the fan and collector as portrayed in series such as *The Big Bang Theory* and films like *The 40 Year Old Virgin* are discussed alongside changes in consumption practices and the mainstreaming of cult media. Following this, theoretical chapters consider issues of gender, representation, nostalgia and the influence of social media. Finally, extended case study chapters examine in detail the connections between the fan community and the commodities bought and sold. Topics discussed include: The San Diego Comic-Con and the cult geographies of the fan convention Hollywood memorabilia and collecting cinema history The Star Wars franchise, merchandising and the adult collector Online stores and the commercialisation of cult fandom Mattel, Hasbro and nostalgia for animated eighties children's television

A numbered, limited edition of *Art-Toys* by Brian McCarty that comes in special packaging and has been signed by McCarty and over a dozen of the artists whose work is featured in the book. *Art-Toys* is a massive collection of McCarty's work that chronicles the art-toy movement through a stunning collection of meticulously composed photographs. These images were created to serve both creative and commercial goals, and as such provide a unique perspective on the art and commerce of the urban vinyl movement. McCarty's images do more than simply showcases sculptural objects, they bring those objects to life. Other books on art-toys, such as *Vinyl Will Kill* and *Dot Dot Dash*, sold out quickly and are now valuable collectibles.

"In *Cracked Media*, Caleb Kelly explores how the deliberate utilization of the normally undesirable (a crack, a break) has become the site of productive creation. Cracked media, Kelly writes, slides across disciplines, through music, sound, and noise. Cracked media encompasses everything from Cage's silences and indeterminacies, to Paik's often humorous tape works, to the cold and clean sounds of digital glitch in the work of Tone and Oval. Kelly offers a detailed historical account of these practices, arguing that they can be read as precursors to contemporary new media."

Graphic full-color illustrations of the most notable Kaiju are featured in this beautifully designed book, along with descriptions of their strengths, weaknesses and special powers. Also featured are the heroes and heroines who prevented Kaiju attacks, the creators who designed these breathtaking beasts, and a breakdown of the central, defining plot and story structures of Kaiju dramas and battle sequences. A Kaiju research section that assembles data, charts, and figures—valuable scientific findings that will aid in the battle to save humankind is also included, and artist Mark Nagata will render cross-sections of a Kaiju to show the skeletal and muscular construction of these monsters.

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. *Drawing Futures* will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. *Drawing Futures* focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Through his highly subversive art Ron English (b. 1959) has bombed the global landscape with striking and often unsettling imagery. He coined the term "POPaganda" to describe his signature and darkly satirical renderings of corporate branding icons. Ranging from superhero mythology to pillars of art history, his work is populated with a vast and constantly growing arsenal of original characters such as MC Supersized, the obese fast-food mascot featured in the hit movie *Supersize Me*; and Abraham Obama, which fused America's 16th and 44th Presidents, an image that was posited by the media as having directly impacted the 2008 election. His cameo on *The Simpsons* secured his position as America's premier pop iconoclast. This book is the first complete retrospective of English's work, compiling his paintings, illustrations, toys, sculpture, street art, and "agit-pop." Additionally, it contains a lengthy and comprehensive interview with the artist conducted exclusively for this publication.

'Fizzes with intellectual curiosity. Kane writes engagingly and with a humility difficult to find among idea-entrepreneurs' James Harkin, Independent We all think we know what play is. Play is what we do as children, what we do outside of work, what we do for no other reason than for pleasure. But this is only half of the truth. The Play Ethic explores the real meaning of play and shows how a more playful society would revolutionize and liberate our daily lives. Using wide and varied sources – from the Enlightenment to Eminem, Socrates to Chaos theory, Kierkegaard to Karaoke – The Play Ethic shows how play is fundamental to both society and to the individual, and how the work ethic that has dominated the last three centuries is ill-equipped to deal with the modern world. With verve, wit and intelligence, Pat Kane takes us on a tour of the playful world arguing that without it business, the arts, politics, education, even our family and spiritual lives are fundamentally impoverished. The Play Ethic seeks to change the way you look at your daily life, how you interact with others, how you view the world. It is a guidebook to new, exciting – and unsettling – times. Shocking, controversial, yet magnificently argued, The Play Ethic is a book no one who works, or has ever worked, can afford to be without. 'Kane's Manifesto for a Different Way of Living is a brave attempt to inject a little playfulness . . . into the dull grind of the working stiff' Iain Finlayson, The Times

You Might Be a Monster

This is a history of the Japanese art world from 1990 up to the tsunami of March 2011, and its struggle to find a voice amidst Japan's economic decline and China's economic ascent. It looks at how the pop-culture fantasies of Takashi Murakami, Yoshitomo Nara and the other artists of the Superflat movement came to dominate the art of Japan today. It also delves into what lies behind their imagery of a childish and decadent society unable to face reality.

The complete catalogue of design collective Hipgnosis, showcasing groundbreaking cover art created for iconic rock 'n' roll giants, including the Rolling Stones, Paul McCartney, Led Zeppelin, and Pink Floyd. The complete, definitive, and never-before-published catalogue of album covers created by the legendary design agency Hipgnosis, this volume finally does justice to the work of the most important design collective in music history. Founded in 1967 by Storm Thorgerson, Aubrey "Po" Powell, and Peter Christopherson, Hipgnosis gained a legendary status in graphic design, transforming the look of album art forever and winning five Grammy nominations for package design. Their revolutionary cover art departed from the conventional group shots favored by record companies of the day, resulting in groundbreaking, often surreal designs inextricable from the major albums of many of the biggest names in the history of popular music: AC/DC, Black Sabbath, The Police, Genesis, Led Zeppelin, Pink Floyd, Paul McCartney, Syd Barrett, The Who, Wings, Yes, and XTC, to name but a few. Arranged chronologically, *Vinyl . Album . Cover . Art* features stunning reproductions of every single Hipgnosis cover—more than 300 in total—for the first time, along with pertinent insights from the rock 'n' roll legends whose albums are featured and behind-the-scenes photography. The text, written by Powell, and with contributions by Peter Gabriel, Robert Plant, and Nick Mason, brims with information that illuminates the album art and the compelling stories behind each cover's creation.

The Play Ethic

Brings together work of leading Lowbrow and Pop Surrealist artists. With over 100 examples by two dozens artists. Provides a timeline of the movement with graphic artists profiles.

* An engaging and accessible guide to the galleries, art museums and artists of London, past and present* Authored by Hettie Judah, contributor on art for The Guardian, The New York Times and Vogue* Exclusive photography includes portraits of Tracey Emin, Anish Kapoor, Grayson Perry, Chantal Joffe, Rasheed Araeen, Jeremy Deller, Yinka Shonibare and many more, in their own studios* Part of a new series exploring London culture, joined by Vinyl London, Rock 'n' Roll London, Writers' London and London PeculiarsProdigies, revolutionaries, defiers of the patriarchy; drunks, rebels and impassioned immigrants; queer pioneers, paint-spattered punks and proto-feminists: there have always been artists in London. Some were celebrated in their lifetime, others were out-of-step with the spirit of their age: too radical, too subversive, too modest, too female, too foreign. *Art London* is more than a guidebook. It will accompany you on a journey through this great city, telling stories, uncovering histories, sharing insights into those who have made, collected and influenced art past and present. Moving neighbourhood by neighbourhood, *Art London* travels the streets with you, revealing art in museums, galleries and beyond, from palace to pub to studio. Anish Kapoor, Grayson Perry, Mona Hatoum, John Akomfra, Rasheed Araeen, Sunil Gupta, Tracey Emin and Yinka Shonibare were among the artists who agreed to have their portraits taken for this book, while at work in their studios. Alex Schneiderman's exclusive photographs reveal the human element behind contemporary art, while pictures of streetside galleries place London's art scene within an ever-expanding cosmopolitan world. Fascinating, entertaining, full of anecdote and insights, *Art London* reflects the city itself: energetic, diverse, resilient, occasionally outrageous, and never short of fresh ideas.

Toys, fulfilling as they do one of mankind's most basic needs, have existed for as long as we have. From the earliest times both adults and children have used toys to simulate reality or simply to pass time. Renowned designers, artists and architects have always tried their hand at creating toys: from Frank Lloyd Wright's work with Frybel's building blocks to Josef Hartwig's Bauhaus chess set that is still produced today. Gerrit Rietveld, Pablo Picasso, Marcel Breuer and Andy Warhol also designed

toys. However, most often it was craftsmen and -women - such as the seamstress Margarete Steiff (Steiff teddy bears), the carpenters Christiansen (Lego), or the cabinet-maker Hans Beck (Playmobil) - who designed the most successful and enduring toys. Toys for small children are often distinguished by a high level of abstraction (babies' toys, for example, typically have fluid contours, simplified detail drawings and primary colors), although timeless designer toys such as those produced by Naef cross all age limits and can even be found on executive desks. This volume in the "Design" series presents both contemporary designer toys and classic toys that are still on the market.
