Data Science 101: Deploying your Machine Learning Model - Data Science 101: Deploying your Machine Learning Model by Data Professor 57,496 views 4 years ago 4 minutes, 56 seconds - So you have built your **machine learning model**, so now what? In this video, I will share to you 4 approaches that you can use for ...

Obtaining the final machine learning model

Deploying the machine learning (ML) model

ML model as a data product

Four approaches to ML model deployment

Deployment format to use depends on the use case

Save ML model as objects

In Python, we can save as a pickle object

In R, we can save as a RDS object

Transfer ML-derived rules to a custom function, then apply this to make prediction

Create API to receive input and make prediction

Embed ML model inside a web application

In Python, popular web framework includes: Django, Flask and Dash

In R we have Dash and Shiny

Dash and Shiny are suitable for making data-driven dashboard

Shiny code can be deployed on your own web server or shinyapps.io
