A set of stones has fallen into his lap that gives him access to any place - and any time - that he chooses. But along with that gift comes the responsibility of stopping the man who is using those very stones to travel through time and change history for his own purposes. A man who is now holding Jason's grandfather hostage, and threatening the world's very existence. Jumping through time with his best friend and body guard, Jason must enter the world of Medieval England, learn its customs, navigate unimaginable danger, and help Henry VII win the Battle of Bosworth, in the name of finding his grandfather, rescuing a beautiful girl from the clutches of a corrupt church, and destroying the one man who pledges to turn history inside out.

In this colorful and touching story that celebrates what makes each of us unique, a little creature that's not quite a bird and not quite a bunny--it's "neither"--searches for a place to fit in. In the Land of This and That, there are only two kinds: blue bunnies and yellow birds. But one day a funny green egg hatches, and a little creature that's not quite a bird and not quite a bunny pops out. It's neither! Neither tries hard to fit in, but its bird legs aren't good for jumping like the other bunnies, and its fluffy tail isn't good for flapping like the other birds. It sets out to find a new home and discovers a very different place, one with endless colors and shapes and creatures of all kinds. But when a blue bunny and a yellow bird with some hidden differences of their own arrive, it's up to Neither to decide if they are welcome in the Land of All. This colorful, simple, and touching story promotes diversity and offers a valuable lesson to the youngest of audiences: it is our differences that unite us.

The SpongeBob SquarePants Experience

This anthology examines the social construction of race, class, gender, and sexuality and the institutional bases for these relations. While other texts discuss various forms of stratification and the impact of these on members of marginalized groups, Ore provides a thorough discussion of how such systems of stratification are formed and perpetuated and how forms of stratification are interconnected. The anthology supplies sufficient pedagogical tools to aid the student in understanding how the material relates to her/his own life and how her/his own attitudes, actions, and perspectives may serve to perpetuate a stratified system.

All Grown Up Volume 1

Bestselling author Dave Gorman thinks we're suffering from information overload. How much do we really pay attention to? What happens if you stop and try to take it all in? Dave intends to find out. It's hard to imagine a world where anything you could possibly want to know about -- and everything you

don't even know you want to know about -- isn't accessible 24-hours a day, seven days a week, with just a few taps of our fingers. But that world once existed. And Dave Gorman remembers it. He remembers when there were only three channels on TV. He remembers when mobile phones were the preserve of arrogant estate agents and yuppie twonks. And he remembers when you had to unplug your phone to plug the computer into the landline in order to use the (crippling slow) internet. Nowadays of course, the world is full of people trying to tell us things. So much so that we have taught our brains not to pay much attention. After all, click the mouse, tap the screen, flick the channel and it's on to the next thing. But Dave Gorman thinks it's time to have a closer look, to find out how much nonsense we tacitly accept. Suspicious adverts, baffling newspaper headlines, fake twitter, endless cat videos, insane TV shows where the presenters ask the same questions over and over. Can we even hear ourselves think over the rising din? Or is there just too much information?

Angelica, Island Princess

A groundbreaking twentieth-century history of transgender children With transgender rights front and center in American politics, media, and culture, the pervasive myth still exists that today's transgender children are a brand new generation—pioneers in a field of new obstacles and hurdles. Histories of the Transgender Child shatters this myth, uncovering a previously unknown twentieth-century history when transgender children not only existed but preexisted the term transgender and its predecessors, playing a central role in the medicalization of trans people, and all sex and gender. Beginning with the early 1900s when children with “ambiguous” sex first sought medical attention, to the 1930s when transgender people began to seek out doctors involved in altering children's sex, to the invention of the category gender, and finally the 1960s and '70s when, as the field institutionalized, transgender children began to take hormones, change their names, and even access gender confirmation, Julian Gill-Peterson reconstructs the medicalization and racialization of children's bodies. Throughout, they foreground the racial history of medicine that excludes black and trans of color children through the concept of gender's plasticity, placing race at the center of their analysis and at the center of transgender studies. Until now, little has been known about early transgender history and life and its relevance to children. Using a wealth of archival research from hospitals and clinics, including incredible personal letters from children to doctors, as well as scientific and medical literature, this book reaches back to the first half of the twentieth century—a time when the category transgender was not available but surely existed, in the lives of children and parents.

Good Night, World

This Classic Board Book edition of *Good Night, World* is a charming bedtime book that celebrates the wonders of the natural world. Good night sun and other stars, good night Saturn, Venus, Mars. Elsewhere in the world it's light, it's morning there, but here it's night. As the sun sets from east to west, this soothing board book takes children on a magical round-the-world journey to bid good night to the world's natural wonders, from plants and animals to mountains, oceans, and wide desert plains. Willa Perlman's soothing, lyrical text combines with Carolyn Fisher's sweeping illustrations to paint a vivid picture of everything, everywhere going to sleep—including an imaginative little boy.

Baby's First Farm

"The" Athenaeum

Enchanting artwork combined with an ingenious slider mechanism on every page make this a perfect board book for toddlers who love the beach! Ingela P. Arrhenius's unmistakable, enchanting artwork combined with an ingenious slider mechanism on every page make this a totally irresistible board book for toddlers who love the beach. Young children will be captivated by the peekaboo concept and—with something to push, pull, or turn on every spread—won't be able to put it down!

Baby's First ABC

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Peekaboo: Sun

Say good night and good morning with these adorable forest friends! The sun is coming up, but it's bedtime for some of the forest animals! Follow along and interact with sleepy nocturnal critters as they say good night (and good morning!). Touch-and-feel elements on every page bring the forest to life just in time to fall asleep!

Athenaeum and Literary Chronicle

The Literary Gazette and Journal of Belles Lettres, Arts, Sciences, &c

Named one of Vulture's Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the Cult of Smart is destroyed.

The London Literary Gazette and Journal of Belles Lettres, Arts, Sciences, Etc

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Goodnight, Owl!

This is the absolutely guaranteed 100% mostly true story of Terry Bradshaw: the man who gained sports immortality as the first quarterback to win four Super Bowls -- and the man who later became America's most popular sports broadcaster. *IT'S ONLY A GAME* "I had a real job once," begins a memoir as honest, unexpected, and downright hysterical as Bradshaw himself. From his humble

beginnings in Shreveport, Louisiana, to his success as the centerpiece of the highest-rated football studio show in television history, Terry has always understood the importance of hard work. A veritable jack-of-all-trades, he has probably held more jobs than any other football Hall of Famer ever: pipeline worker, youth minister, professional singer, actor, television and radio talk show host, and now one of the nation's most popular speakers. But let's not forget one of the reasons why so many people know and love Terry Bradshaw: he won four Super Bowls! In *It's Only A Game*, Terry brings the reader right into the huddle and describes the game from the bottom of a two-ton pile to the top of the sports world. You'll sit right on the fifty-yard line and watch as Terry earns the title world's greatest benchwarmer. And you'll also hear about the single greatest play in pro football -- the Immaculate Reception -- as he never saw it. *It's Only A Game* is much more than a collection of Terry Bradshaw's favorite and funniest stories, it is the personal account of a great man's search for life before and after football...as only Terry could tell it.
