Advanced Calculus

An authorised reissue of the long out of print classic textbook, Advanced Calculus by the late Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades. This book is based on an honors course in advanced calculus that the authors gave in the 1960's. The foundational material, presented in the unstarred sections of Chapters 1 through 11, was normally covered, but different applications of this basic material were stressed from year to year, and the book therefore contains more material than was covered in any one year. It can accordingly be used (with omissions) as a text for a year's course in advanced calculus, or as a text for a three-semester introduction to analysis. The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view, together with some acquaintance with linear algebra. The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication. As possible introductory texts, we mention Differential and Integral Calculus by R Courant, Calculus by T Apostol, Calculus by M Spivak, and Pure Mathematics by G Hardy. The reader should also have some experience with partial derivatives. In overall plan the book divides roughly into a first half which develops the calculus (principally the differential calculus) in the setting of normed vector spaces, and a second half which deals with the calculus of differentiable manifolds.

NEW DIRECTIONS IN ENGLISH LANGUAGE TEACHING : ISSUES, PRACTICES, CHALLENGES

New Directions in English Language Teaching: Issues, Practices, Challenges attempts to create a comprehensive vision of critical and culturally relevant English teaching methodologies at the cusp of the 21st century. The present book is multi-voiced. It includes perspectives from classroom teachers, teacher educators and researchers in language and literacy, positioned to respond to recent changes in national conversations about literacy, learning and assessment. These vividly situated authors also recognise the rapidly changing demographics in colleges, the changing nature of teaching English in the digital age, and increasing demands for teaching pedagogies. This book is critically placed at the juncture of numerous directions in novel techniques. At all times, education is a political act, and colleges are embedded with a socio-culture reality that benefits some at the expense of others. Therefore the approach advocated through many of the chapters is one of critical literacy where English students gain reading and writing skills and proficiency with digital technologies that allow them to become more able, discerning, and empowered consumers and producers of texts.

Although no less an authority than Joseph A. Schumpeter proclaimed that Antonio Serra was the world's first economist, he remains something of a dark horse of economic historiography. 'A 'Short Treatise' on the Wealth and Poverty of Nations' presents, for the first time, an English translation of Serra's 'Breve Trattato' (1613), one of the most famous tracts in the history of political economy. The Routledge History of Literature in English

Still, to say that it all began when Sophie Mol came to Ayemenem is only one way of looking at it . . . It could be argued that it actually began thousands of years ago. Long before the Marxists came. Before the British took Malabar, before the Dutch Ascendancy, before Vasco da Gama arrived, before

the Zamorin's conquest of Calicut. Before Christianity arrived in a boat and seeped into Kerala like tea from a teabag. That it really began in the days when the Love Laws were made. The laws that lay down who should be loved, and how. And how much.
