Learning Objectives

What is Behavior? The actions or reactions of an object or organism in relation to the environment

What is Human Behavior?

Human Behavior Concepts

Examples of Human behavior

Human behavior is often characterized as "Human nature."

Example 3

What is Human nature?

Questions to consider

Stages of Human life span

Early: 1 - 4 years

Adolescence: 13 - 25 years

Adulthood: 25 plus years Early adulthood Middle adulthood Late adulthood

What is Personality?

Personality development theories Hans Eysenck's Biological personality theory (1919-1997) Behavior and personality are related to genetics

Eysenck's Biological theory

Freud's Psychoanalytic theory

Erikson's Psychosocial theory

Maslow's Hierarchy of Needs Humanistic theory

Allport's trait theory

Interactionism Theory

Case - Example 1

Nature Genes and hereditary factors Physical appearance Personality traits

Nurture Environmental variables Childhood experiences How we were raised Social relationships

Cultural influences

What Traits does Nurture influence?

Consider the following What/Who has "shaped" you?

Plasticity or plasticity theory

Personality Models

Is this Personality trait "Good or Bad"?

The "Big Five" factor Model Goldberg, 1993

Openness to experience A person's willingness to try new things, and their capability to "think outside the box". Intellect or imagination

Conscientiousness Conscientious people are goal-directed, excel in their ability to work within the rules, plan and organize effectively. Leadership qualities

Extroversion

Neuroticism

Weakness as a Strength

Discussion

6. Behavioral Genetics I - 6. Behavioral Genetics I by Stanford 1,482,700 views 13 years ago 1 hour, 38 minutes - (April 12, 2010) Robert Sapolsky introduces a two-part series exploring the controversial scientific practice of inferring **behavior**, to ...

Patterns of Shared Traits

Incidence of Schizophrenia

Prenatal Effects

Issues of Paternity Uncertainty
Identical Twins Separated at Birth
Behavioral Traits
Social Smiling

Prenatal Environmental Effects

And Again Where the Best Evidence for this Has Been Is with Environmental Toxins That Knock Out That Have some of these Mutating Effects and Eggs They Are Not Mutations in a Classical Dna Sense but Nonetheless They Are Now Heritable so that Pops Up Also so What Have We Got Here We Have the Simple Assumption that if You See More Sharing of a Trait with the Mother than with the Father That's Reflecting Prenatal Environment and What We've Seen Here Is Totally Messing this Up Is the Fact that You Do Not Get Equal Genetic Influences from each Parent You Are Getting More Genetic Material You Are Getting More Genes for Your Mother because the Mitochondrial Dna Even if You Are Going To Equal Amounts of Dna Expression

9. Ethology - 9. Ethology by Stanford 1,198,906 views 13 years ago 1 hour, 41 minutes - (April 19, 2010) Robert Sapolsky looks at the biology of **behavior**, through the ethological lens: observing animals in various ...

Heritability

This Is How Much Water It Retains or the Plant's Iq or Something like that You're Measuring some Trait and You're Asking Does It Differ as a Function of Which Version of this Gene You Have So You Do Your Study and this Is What You See and You Say Whoa Okay I Went and Looked at this Plant in a Rainforest and We Identify the Genetic Versions of It and Look Very Different the Gene That You Have There Knowing that Gives You a Lot of Predictive Power over What Level of Whatever It Is that You're Measuring this Plant Is that's Great so You're Going To Get Your Doctorate out of that and You Get some Publications and It's Great and You Finally Stopped Being a Student and It's Terrific And What You Wind Up Seeing Here Is if You Can either Know this or the Environment You Want To Know What the Environment Is the Variability Oh Plant Iq Could Come In at 98 a Hundred a Hundred and Two Eight Ten and Twelve the Far More of the Variability in those Six Numbers Is Explained by What Environment It's Going On in Rather than the Genetic Difference That's What Heritability Is Telling You and in the Study like this It Would Tell You that the Heritability Number Is Actually Quite Low because the Amount of Variation due to this Is Far Less Explained by the Gene Type than whether It's the Amazon or the Gobi Desert

And What Ultimately One Has To Argue Is that It Is Impossible To Ever Say What a Gene Does You Can Only Say What a Gene Does in the Environments Which to Date It Has Been Studied in Okay Let's See that Expanding Even More because You've Got this Ok Let's Jump Ahead Ok so this Is Showing You Now Just How Totally Nutty and Counterintuitive Heritability Terms Actually Are You Ask a Question What's the Heritability of Number of Fingers on Your Hand no Genes Have To Do with the Fact that We Got Five Fingers Instead of Flippers or some Such Thing Genes Have Huge Amounts To Do with It You're Not Asking about the Average Number Figure Fingers You're Asking about the Variability

This Is What It Would Look like with Zero Percent Heritability There's no Difference at all of the Variation Explained by Gene Variation It's all Environmental So Now We Have a Version That Forces Us To Put in the Same Phrase We Heard about before this Is What Your Data Look like Now and You Now Ask the Question Well What Does Being an Environment What Does Your Environment Have To Do with Your Plant Iq and the Answer Is It Depends on Which Version of the Gene You Have and Now You Ask What Does Having a Certain Version of the Gene Have To Do with Your Plant Iq
