(Reading Practice (Improve your pronunciation in English - (Reading Practice (Improve your pronunciation in English by English Language Academy 5,382,336 views 2 years ago 23 minutes - All rights reserved)1'/% C9E G0.**3 J0D' !'1,%D' F9 FJDH\$3E 1J: F-F) .14FD' BHB-()JE-E *GHJ/JAD' :JE,)8HA- Billions of years ago, bacteria were some of the first living things on Earth. Bacteria are microbes that live everywhere and there are many different types. Some bacteria make us sick, and some are very useful. Bacteria can eat almost anything. Some feed on waste, some eat oil, and some eat the food between people's teeth.

Bacteria are many different shapes. Some are like rods, some are like balls and some are curly. Some have flagella that look like tiny hairs. These move in different directions to help the bacteria to move around. Bacteria live in places like glaciers, high mountains and volcanoes, where most other living things can't survive.

When we use fossil fuels, we make a gas called carbon dioxide. Scientists think that we are putting too much carbon dioxide into the air. The carbon dioxide increases the greenhouse effect, and Earth gets warmer. This is called global warming. Scientists think that global warming is changing our climate and making the weather more extreme. This is a problem for people, animals and plants.
