### Watching the English

In "Watching The English" anthropologist Kate Fox takes a revealing look at the quirks, habits and foibles of the English people. She puts the English national character under her anthropological microscope, and finds a strange and fascinating culture, governed by complex sets of unspoken rules and byzantine codes of behaviour. The rules of weather-speak. The ironic-gnome rule. The reflex apology rule. The paranoid-pantomime rule. Class indicators and class anxiety tests. The money-talk taboo and many more ... Through a mixture of anthropological analysis and her own unorthodox experiments (using herself as a reluctant guinea-pig), Kate Fox discovers what these unwritten behaviour codes tell us about Englishness.

### Hydrology

The book comprises nine chapters, with seven core chapters dealing in detail with the basic principles and processes of the main hydrological components of the water cycle: precipitation, interception, evaporation, soil water, groundwater, streamflow and water quality. It takes a broadly non-mathematical approach, although some numeracy is assumed particularly in the treatment of evaporation and soil water. The introductory and concluding chapters show the relations and interactions between these components, and also put the importance of water into a wider human context – its significant role in human history, its key role today, and potential role in future in the light of climate change and increasing global population pressures. The book is thoroughly up-to-date, contains over 100 diagrams and photographs to explain and amplify the concepts described, and contains over 750 references for further study.

Schizophrenia may not be a single disease, but the result of a diverse set of related conditions. Modern neuroscience is beginning to reveal some of the genetic and environmental underpinnings of schizophrenia; however, an approach less well travelled is to examine the medical disorders that produce symptoms resembling schizophrenia. This book is the first major attempt to bring together the diseases that produce what has been termed 'secondary schizophrenia'. International experts from diverse backgrounds ask the questions: does this medical disorder, or drug, or condition cause psychosis? If yes, does it resemble schizophrenia? What mechanisms form the basis of this relationship? What implications does this understanding have for aetiology and treatment? The answers are a feast for clinicians and researchers of psychosis and schizophrenia. They mark the next step in trying to meet the most important challenge to modern neuroscience – understanding and conquering this most mysterious of human diseases.

## Secondary Schizophrenia

'In this brilliant new edition Andy Field has introduced important new introductory material on statistics that the student will need and was missing at least in the first edition. This book is the best blend that I know of a textbook in statistics and a manual on SPSS. It is a balanced composite of both topics, using SPSS to illustrate important statistical material and, through graphics, to make visible important approaches to data analysis. There are many places in the book where I had to laugh, and that's

saying a lot for a book on statistics. His excellent style engages the reader and makes reading about statistics fun' - David C Howell, Professor Emeritus, University of Vermont USA This award-winning text, now fully updated with SPSS Statistics, is the only book on statistics that you will need! Fully revised and restructured, this new edition is even more accessible as it now takes students through from introductory to advanced level concepts, all the while grounding knowledge through the use of SPSS Statistics. Andy Field's humorous and self-deprecating style and the book's host of characters make the journey entertaining as well as educational. While still providing a very comprehensive collection of statistical methods, tests and procedures, and packed with examples and self-assessment tests to reinforce knowledge, the new edition now also offers: - a more gentle introduction to basic-level concepts and methods for beginners - new textbook features to make the book more user-friendly for those learning about more advanced concepts, encouraging 'critical thinking' - a brand new, full-colour design, making it easy for students to navigate between topics, and to understand how to use the latest version of SPSS Statistics - both 'real world' (the bizarre and the wonderful) and invented examples illustrate the concepts and make the techniques come alive for students - an additional chapter on multilevel modelling for advanced-level students - reinforced binding to make the book easier to handle at a computer workstation. The book also includes access to a brand new and improved companion Website, bursting with features including: - animated 'SPSS walk-through' videos clearly demonstrating how to use the latest SPSS Statistics modules - self-marking multiple choice questions - data sets for psychology, business and management and health sciences - a flash-card glossary for testing knowledge of key concepts - access to support material from SAGE study skills books. Statistics lecturers are also provided with a whole range of resources and teaching aids, including: - the test bank - over 300 multiple-choice questions ready to upload to WebCT, Blackboard or other virtual learning environments - charts and diagrams in electronic format for inclusion in lecture slides - PowerPoint slides written by the author to accompany chapters of the text.

The Essential Cult TV Reader is a collection of insightful essays that examine television shows that amass engaged, active fan bases by employing an imaginative approach to programming. Once defined by limited viewership, cult TV has developed its own identity, with some shows gaining large, mainstream audiences. By exploring the defining characteristics of cult TV, The Essential Cult TV Reader traces the development of this once obscure form and explains how cult TV achieved its current status as legitimate television. The essays explore a wide range of cult programs, from early shows such as Star Trek, The Avengers, Dark Shadows, and The Twilight Zone to popular contemporary shows such as Lost, Dexter, and 24, addressing the cultural context that allowed the development of the phenomenon. The contributors investigate the obligations of cult series to their fans, the relationship of camp and cult, the effects of DVD releases and the Internet, and the globalization of cult TV. The Essential Cult TV Reader answers many of the questions surrounding the form while revealing emerging debates on its future.

'I liked The Unit very much... I know you will be riveted, as I was.' Margaret Atwood 'Echoing work by Marge Piercy and Margaret Atwood, The Unit is as thought-provoking as it is compulsively readable.' Jessica Crispin, NPR.org Ninni Holmqvist's eerie dystopian novel envisions a society in the not-so-distant future where men and women deemed economically worthless are sent to a retirement community called the Unit. With lavish apartments set amongst beautiful gardens and state-of-the-art facilities, elaborate gourmet meals, and wonderful music and art, they are free of financial worries and want for nothing. It's an idyllic place, but there's a catch: the residents – known as dispensables – must donate their organs, one by one, until the final donation. When Dorrit Weger arrives at the Unit, she resigns herself to this fate, seeking only peace in her final days. But she soon falls in love, and this unexpected, improbable happiness throws the future into doubt. Clinical and haunting, The Unit is a modern-day classic and a spine-chilling cautionary tale about the value of human life.

#### Radio Times

A “sympathetic and exceptionally well-written account” (USA Today), Ray Connolly’s biography of the King soars with “spontaneity and electricity” (Preston Lauterbach). Elvis Presley is a giant figure in American popular culture, a man whose talent and fame were matched only by his later excesses and tragic end. A godlike entity in the history of rock and roll, this twentieth-century icon with a dazzling voice blended gospel and traditionally black rhythm and blues with country to create a completely new kind of music and new way of expressing male sexuality, which simply blew the doors off a staid and repressed 1950s America. In *Being Elvis* veteran rock journalist Ray Connolly takes a fresh look at the career of the world’s most loved singer, placing him, forty years after his death, not exhaustively in the garish neon lights of Las Vegas but back in his mid-twentieth-century, distinctly southern world. For new and seasoned fans alike, Connolly, who interviewed Elvis in 1969, re-creates a man who sprang from poverty in Tupelo, Mississippi, to unprecedented overnight fame, eclipsing Frank Sinatra and then inspiring the Beatles along the way. Juxtaposing the music, the songs, and the incendiary live concerts with a personal life that would later careen wildly out of control, Connolly demonstrates that Elvis’s amphetamine use began as early as his touring days of hysteria in the late 1950s, and that the financial needs that drove him in the beginning would return to plague him at the very end. With a narrative informed by interviews over many years with John Lennon, Bob Dylan, B. B. King, Sam Phillips, and Roy Orbison, among many others, Connolly creates one of the most nuanced and mature portraits of this cultural phenomenon to date. What distinguishes *Being Elvis* beyond the narrative itself is Connolly’s more subtle examinations of white poverty, class aspirations, and the prison that is extreme fame. As we reach the end of this poignant account, Elvis’s death at forty-two takes on the hue of a profoundly American tragedy. The creator of an American sound that resonates today, Elvis remains frozen in time, an enduring American icon who could “seamlessly soar into a falsetto of pleading and yearning” and capture an inner emotion, perhaps of eternal yearning, to which all of us can still relate. Intimate and unsparing, *Being Elvis* explores the extravagance and irrationality inherent in the Elvis mythology, ultimately offering a thoughtful celebration of an immortal life.

#### Anxiety Disorders

A collection of murder, mystery, and history, *Gourmet Ghosts 2* is the latest guide to dozens of haunted and blood-stained bars, restaurants, and hotels in Los Angeles. Featuring more unpublished stories and bizarre events from the city’s dark past, this volume scours the newspaper archives to find out the truth behind the tales.

#### Being Elvis: A Lonely Life

With an exciting new look, math diagnostic tool, and a research roadmap to navigate projects, this new edition of Andy Field’s award-winning text offers a unique combination of humor and step-by-step instruction to make learning statistics compelling and accessible to even the most anxious of students. SAGE edge offers a robust online environment featuring an impressive array of free tools and resources for review, study, and further exploration, keeping both instructors and students on the cutting edge of teaching and learning. Course cartridges available for Blackboard, Canvas, and Moodle. Andy Field is the award winning author of *An Adventure in Statistics: The Reality Enigma* and is the recipient of the UK National Teaching Fellowship (2010), British Psychological Society book award (2006), and has been recognized with local and national teaching awards (University of Sussex, 2015, 2016).

#### Gourmet Ghosts 2

Each disease-related chapter begins with a detailed description of the patient and the delineating symptoms used for establishing the diagnosis and differential diagnosis. The highly detailed figures

illustrate the metabolic derangement in a uniform way, together with essential aspects of the genetics involved, thus affording clarification and better understanding of the treatment. Topics covered range from general aspects such as the clinical approach, emergency treatment, diagnostic procedures, and psychosocial care for the child and the family, to specific discussions of new modes of treatment, including liver, bone marrow transplantation and somatic gene therapy.

The product of the LASI (Laccoliths and Sills conference) workshop, it comprises thematic sections written by one or more experts on the respective field. It features reviews concerning the physical properties of magma, geotectonic settings, and the structure of subvolcanic systems, as well as case studies on the best-known systems. The book provides readers a broad and comprehensive understanding of the subvolcanic perspective on pluton growth, which is relevant for mineralogical processes as well as the genesis of mineral deposits.

#### Theory and Practice in Policy Analysis

~\*~\*~2010 EPIC AWARD FINALIST!~\*~\*~Settle yourself in for a wicked bed time story, a hot, wild ride through nursery rhymes like you've never heard them before. Set in a fantastical world where the privileged few own and raise sex slaves like beloved pets, Mother herself is the star of the show, wielding a riding crop and taking care of and training her young charges with a firm and skillful hand. But where has Father Goose wandered off to, and who will take Mother in hand when she ventures too far?-----Warnings: This title contains erotic situations, graphic language, sex, spanking, elements of bdsm, and a perspective on nursery rhymes you'll never forget!-----EXCERPT:"Peep!" The voice shook the room and the startled girl looked up as Mother came in. "Do you know where your sheep are now?" "No, Mother." The girl looked up from her position, kneeling on the floor, her blue eyes wide. "I penned them before I left, I swear it." Mother Goose came toward her, the high heels of her soft boots clicking on the floor. She squatted down before Peep, whose hands were bound behind her to her feet with pink satin sashes. "You are a pretty little one," Mother said, lifting the girl's chin and studying her face. Mother's eyes moved over the girl's body, the pink and white corset drawn tight, her blonde curls spilling over her shoulders, partially hiding Peep's rosy little nipples. "Sometimes I think you're just playing dumb." "No, Mother," Peep implored, shaking her head. "I penned them, I promise you." "Is that so?" Mother asked, standing again. Peep looked up Mother's long legs, encased in black fishnet stockings and garters, the dark triangle between her legs exposed, as it always was, for easy access. Mother had taken to wearing black since Father had crossed over, and her mood was ever changeable, but lately she seemed often cross and hard to please. Mother tapped her toe in front of Peep's knee, folding her arms over her ample breasts that were pushed up high in her black corset, but covered with the sheer, lace peignoir that she always wore, unbuttoned to the floor. "Mother, please," Peep pleaded. "I will go tend them, if you let me." Mother walked over to the cabinet and the girl moaned, the sound caught halfway between regret and anticipation. "I think we need a little correction, don't you?" Mother's voice drifted over her shoulder as she chose a small cat o' nine tails from her collection. "Please," Peep pleaded again, her eyes downcast. "I'll be a good girl." "Yes," Mother murmured, coming to caress the her cheek with her soft hand. "You will." Mother reached behind the girl and began untying the pink satin ribbon that bound her. Peep sighed in relief, rolling her tired shoulders once her arms were free. She leaned forward onto her hands and knees as Mother began to untie her feet, but then the older woman stopped. "No... this is good," Mother said, tightening the sashes at the girl's ankles, chuckling. "Turn around, Little Bo Peep, who's lost her sheep, and doesn't know were to find them." Peep did as she was told, turning her face toward the wall on her hands and knees, using her hands to slowly work herself around. She felt Mother's hand caressing her ass, and she shivered, looking back over her shoulder at the older woman. Mother was squatting down behind her, beginning to drip the many straps of the cat o' nine tails over Peep's behind like a little leather waterfall. "Peep's little puss," Mother whispered, parting the dark blonde fuzz with her fingers to peer in at the pink treasure. "I love peeping at Peep's

little puss." Mother giggled, wiggling her fingers through and finding the girl's clit. "Oh, Mother!" Peep moaned, lifting her bottom in the air as much as she could with her feet tied together at the ankles.

"Up there," she says, "I'm just another little old lady. But down here, at the pool, I'm myself." For the people who swim there each day, the local pool is a haven of unexpected kinship and private solace. For Alice, her daily laps have become the ritual that gives her life meaning, even though she may not remember the combination to her locker or where she put her towel. But one day, a crack appears deep beneath the surface of the water, and then another, and then another. The pool must close for repairs, and with that Alice is plunged into dislocation and chaos. Away from the steady routines of her swimming, she is engulfed by difficult memories of her own past. And as her sense of home, and of herself, slip further out of her grasp, her daughter must navigate the newly fractured landscape of their relationship. From the internationally bestselling author of *The Buddha in the Attic* comes a novel about memory and loss, mothers and daughters, the stories that make up a life, and what happens when they start to unravel. "I'm in awe of how this beautiful, graceful novel can hold so much grief and loss and love in its pages: a literary gem." Nicci Gerrard 'An unforgettable novel about mothers and daughters by a spellbinding talent' Daily Mail

Calling into question the common assumption that the Middle Ages produced no secondary epics, Ann W. Astell here revises a key chapter in literary history. She examines the connections between the Book of Job and Boethius' *Consolation of Philosophy*--texts closely associated with each other in the minds of medieval readers and writers--and demonstrates that these two works served as a conduit for the tradition of heroic poetry from antiquity through the Middle Ages and into the Renaissance. As she traces the complex influences of classical and biblical texts on vernacular literature, Astell offers provocative readings of works by Dante, Chaucer, Spenser, Malory, Milton, and many others. Astell looks at the relationship between the historical reception of the epic and successive imitative forms, showing how Boethius's *Consolation* and Johan biblical commentaries echo the allegorical treatment of "epic truth" in the poems of Homer and Virgil, and how in turn many works classified as "romance" take Job and Boethius as their models. She considers the influences of Job and Boethius on hagiographic romance, as exemplified by the stories of Eustace, Custance, and Griselda; on the amatory romances of Abelard and Heloise, Dante and Beatrice, and Troilus and Criseyde; and on the chivalric romances of Martin of Tours, Galahad, Lancelot, and Redcrosse. Finally, she explores an encyclopedic array of interpretations of Job and Boethius in Milton's *Paradise Lost*, *Paradise Regained*, and *Samson Agonistes*.

War creates veterans and societies are reminded by their existence that violent conflicts had been waged in the past. Even when the wars have been long forgotten by many, veterans are the ones whose fate has been tied to war and destruction. Societies often struggle with their veterans, especially when they have to address the former soldiers' traumatic experiences and acknowledge the wounds that hurt beyond the body. While veterans are often a steady reminder of violent conflicts of the past, they are often ignored by their societies, once peace is achieved. Nevertheless, veterans play an important role in postwar contexts as well and their role, their possible influence and impact in the supposedly non-violent world need to be addressed. The present volume discusses the role of veterans in the aftermath of war and shows how they had been treated by and how societies tried to reintegrate them in narratives of the past.
