The Nightshade Forensic Files: Fracture Five

Eleri and Donovan are back! NightShade's newest agents are in L.A. to bring down a burgeoning terrorist cell. To make things worse, it's not just one terrorist cell, it's two. Or is it three? There is little to go on, only links between missing Army munitions and a veteran named Cooper Rollins. With his special ops training and severe PTSD, it's impossible to tell what kind of game Rollins is playing. Eleri and Donovan will have to use their unique skills to stop the attack before it happens. But in the crowded city, there are too many people who might reveal what Donovan is if he dares to make the change. And Eleri is starting to show signs of powers she didn't know she had, and can't control. On the surface the cells seem unrelated, each with separate perpetrators and different motives. But they are all linked by Rollins and the very disturbing passcode: "Fracture Five."

NightShade Forensic FBI Files: Vol 1 (Books 1-4)

Huge savings off the individual book cost Under Dark Skies - Book 1 Eleri Eames didn't think she'd ever be allowed to work for the FBI again, so the special FBI division of NightShade seems like an amazing opportunity. But all too soon, her chance to start over starts to disturb her. When the FBI offers Donovan a chance to leave his job as a medical examiner and try his hand at something new, he takes a chance on the NightShade division. Somehow, he has to try to escape from his shadows, but can he trust Eleri with the truth? Thrown together on their first case, Eleri and Donovan must deal with a charismatic cult leader and his true-believers. The cult is mixed up with several decade-old kidnapping cases and the missing daughter of a prominent FBI Agent. As Eleri and Donovan dig deeper, they discover that NightShade's mysteries aren't coincidence. Their secrets will save them . . . or destroy them. Fracture Five - Book 2 NightShade's newest agents are in L.A. to bring down a burgeoning terrorist cell. To make things worse, it's not just one terrorist cell, it's two. Or is it three? There is little to go on, only links between missing Army munitions and a veteran named Cooper Rollins. With his special ops training and severe PTSD, it's impossible to tell what kind of game Rollins is playing. Eleri and Donovan will have to use their unique skills to stop the attack before it happens. But in the crowded city, there are too many people who might reveal what Donovan is if he dares to make the change. And Eleri is starting to show signs of powers she didn't know she had, and can't control. On the surface the cells seem unrelated, each with separate perpetrators and different motives. But they are all linked by Rollins and the very disturbing passcode: "Fracture Five." The Atlas Defect - Book 3 Eleri wanted a different kind of case. She should have been careful what she wished for. When an odd human skeleton in Michigan's Manistee-Huron National Forest triggers a NightShade investigation, Eleri and Donovan arrive to find it missing. But two other skeletons are a little too easily uncovered—each displays different anomalies that raise alarming questions. The bones aren't from the area or probably even the continent. A decades-old abandoned building doesn't register on satellite images. Files detailing genetic experiments on children are even more disturbing, and most of the children are unaccounted for. Who were the test subjects and where are the bodies? If the case itself wasn't enough of a problem, someone is watching. Someone with a particular interest in Donovan's own skeletal anomalies . . . Echo and Ember - Book 4 FBI agents Donovan and Eleri left their last case with a sense of unease. Unable to close the investigation, they've been thrown into their next assignment far too fast. A string of strange arson-based murders are just part of the trouble. Not only is former agent Wade de Gottardi on their team for this one, so are two other NightShade agents: Dana Brantley and Christina Pines. The problem is, Eleri is no longer the senior agent, Dana is. Maybe their boss no longer trusts them, or maybe it's simply because four people have already died. Either way, Donovan and Eleri are no longer in control of the case as they hunt a serial killer who's getting bolder with each success. While Eleri and Donovan are just getting their special skills in hand, Dana and Christina are more at ease with theirs. While Dana's talents prove useful, Christina's are frightening . . . and suspicious. These are the first through fourth books in the NightShade Forensic FBI Files series by USA Today bestselling author A.J. Scudiere. These books can each be read as a standalone, but readers who love paranormal investigations and FBI thrillers will want to read the entire series!

The NightShade Forensic Files

Your favorite NightShade agents are back, only Eleri and Donovan are now on their own. This time they aren't working with the FBI, and the case is as personal as it can get... FBI Agent Eleri Eames was there the day her sister disappeared at eight years old. However, Eleri is the only one who knows that her sister is already dead and has been for quite some time. When a skeleton is unearthed in New Orleans, Eleri is convinced it belongs to Emmaline. The age and ancestry of the remains are a match, and there's something telling Eleri that New Orleans is the place where her sister lived and died. As Eleri hunts for answers, demons-old and new-begin following her. The Lobomau have been entering the city in ever-increasing numbers, and that might just have something to do with the Dauphine sisters and their long family history of witchcraft and voodoo. Eleri desperately needs her partner Donovan on this case with her, but can he risk his own job to help her? Eleri's ancestry may have imbued her with some powers, but compared to her own great-grandmother and the Dauphines, she's untrained and untested at best. When the bones turn out not to belong to her sister, Eleri has to ask how a case so similar to Emmaline's even exists...and is it an arrow pointed to her own twisted family history? This is the sixth installment in the award-winning NightShade Forensic Files. Can be read as a standalone.

As old cases rear their ugly heads, Eleri and Donovan get drawn into the mysteries of their fellow NightShade agents. Will their new team implode from distrust before they crack the case? Their unique talents may not be enough to save them from a seemingly unstoppable killer.

Salvage

Your favorite series takes a new twist. Walter and GJ have the opportunity of a lifetime: become FBI agents. But once you're in NightShade, the secrets start coming out... Former marine turned Private Investigator, Walter Reed, has been given yet another strange and amazing opportunity: to become an agent with the FBI's NightShade division. Though confident her training will make Quantico a cake walk—even with only one leg—Walter is discovering her shot at a new career has disaster written all over it. Her first hurdle? Walter doesn't graduate training if her new partner GJ Janson doesn't graduate, too... After previously being arrested by the FBI, GJ Janson hopes to redeem herself with the chance to become an agent. Unfortunately, her snooping around her grandfather's laboratory reveals he's been hiding strange skeletons—with strikingly similar anomalies to those she notices in her friend Donovan. When a weekend visit to her grandfather's lab yields a fresh body, GJ goes into investigation mode. But the body is that of a fellow NightShade agent, and Walter and GJ quickly realize that nothing in NightShade is what it seems—not the case, the other agents, nor even their job descriptions. Only one thing is clear: the killer is coming after them next. And they suspect it's someone GJ knows. Salvage is the fifth book in the NightShade Forensic FBI Files series by USA Today bestselling author A.J. Scudiere. The NightShade Forensic Files

A witch who can't trust her power. A wolf who can't trust his nose. A serial killer who can vanish into the air. What should have been a straightforward case is turning into anything but. Someone is dumping bodies in the Florida Everglades after torturing the victims. There's no posed positioning, or even an attempt to hide their handiwork, making a profile nearly impossible to develop. The locals know more than they do, and Eleri and Donovan can't even link the victims. When they start suspecting they are being followed, they reach out to other NightShade agents, only to discover the others have the same growing concerns they do. Why are some agents getting sent back to the Atlas Project while others are in the wind? Still, the case in front of them needs to be solved, even if there's another wolf around. How can they stop the murders when all the clues disappear into the vanishing point? This killer will drive them into the riskiest gamble of all.

The NightShade Forensic Files

The next installment in the NightShade Forensic Files is here...Christina Pines could make anyone see or think anything she chose. It was a talent she'd had her whole life, though she'd never refer to it as a "gift." It hadn't been enough to save her partner, Dana. And it was proving almost futile now in finding the escaped Dr. Marks. What she had learned from the bartender was that the badass woman with the prosthetic leg was looking for her. Walter Reed was on her tail-which meant that her Special Agent in Charge Westerfield knew she was missing and had sent a cleanup crew. The bartender smiled and wiped down the bar in front of her, but with a subtle push she made his gaze slide away. He wouldn't remember her. She took another sip from her whiskey. He wouldn't remember that he'd ever seen her, or even that someone was here and hadn't finished her drink. But someone had followed Dr. Marks here just two weeks earlier. Christina headed out the door, chasing a trail that threatened to go cold despite her stunning talents. She was armed with her unique ability and a fierce determination to win. But probably her best asset was that she was willing to die to bring Dr. Marks to justice...NightShade Agent Christina Pines has one goal: Find and destroy Dr. Marks. The problem is that she's not the only one after him.

The NightShade Forensic Files

When a former mermaid turns up dead, Eleri and Donovan are stuck with a case they never wanted, but can't shake... Eleri-a former mermaid herself-should have been recused from the case. That's her friend on the autopsy table and putting her in charge of the investigation violates more rules than she can count. But her Special Agent in Charge won't let her off the case, making her wonder if there's more to Westerfield's demands than meets the eye. He won't let Donovan out of the case either. The mysterious package from a brother Donovan didn't know he had contains as much threat as it does information. The lobomau are more organized and further-reaching than anyone thought, and Donovan now has a personal connection. The team is stuck on a research vessel with a killer hot on their trail... but Eleri's skills are glitchy at best, and Donovan can't swim. Can they keep the remaining crew members-and themselves-alive or will the killer turn out to be the one they least suspected? This next installment in the NightShade Forensic Files brings more X-Files-like mystery to the series! Be prepared for an up-all-night thrill ride and grab Dead Tide now.

Garden of Bone

Your favorite NightShade agents are back, only Eleri and Donovan are now on their own. This time they aren't working with the FBI, and the case is as personal as it can get... FBI Agent Eleri Eames was there the day her sister disappeared at eight years old. However, Eleri is the only one who knows that her sister is already dead and has been for quite some time. When a skeleton is unearthed in New Orleans, Eleri is convinced it belongs to Emmaline. The age and ancestry of the remains are a match, and there's something telling Eleri that New Orleans is the place where her sister lived and died. As Eleri hunts for answers, demons—old and new—begin following her. The Lobomau have been entering the city in ever-increasing numbers, and that might just have something to do with the Dauphine sisters and their long family history of witchcraft and voodoo. Eleri desperately needs her partner Donovan on this case with her, but can he risk his own job to help her? Eleri's ancestry may have imbued her with some powers, but compared to her own great-grandmother and the Dauphines, she's untrained and untested at best. When the bones turn out not to belong to her sister, Eleri has to ask how a case so similar to Emmaline's even exists...and is it an arrow pointed to her own twisted family history? Garden of Bone is the sixth book in the NightShade Forensic FBI Files series by USA Today bestselling author A.J. Scudiere. This book can be read as a standalone, but readers who love paranormal investigations and FBI thrillers will want to read the entire series!

The Neverglades: Volume One

Mark Hannigan is a homicide detective in the isolated town of Pacific Glade, located in the dense forest regions of Washington. The town is so shut off from the rest of the world that it has earned the nickname “Neverglades” from its longtime residents. The Neverglades are no stranger to bizarre and inexplicable events, and Hannigan has seen plenty of things on the police force that seem to defy earthly explanation. Enter the Inspector. A mysterious figure always seen with a cigar and fedora,

this otherworldly detective knows more about the workings of the Neverglades than any human being rightly should. There's a rip in reality around Pacific Glade, he says, making it a breeding ground for the strange and supernatural, and the Inspector is just one of many entities who have managed to slip through. In these nine interwoven stories, Hannigan and the Inspector traverse the haunted grounds of the Neverglades, where it's going to take everything they've got to make it out alive. Time paradoxes, pocket universes, giant dream-weaving crabs and star-snuffing leviathans - it's a lot for one measly little human to handle. But with an eldritch abomination by his side, Hannigan just might stand a chance.

One Last Chance

Welcome to the island where people never die When Chief Inspector Andreas Kaldis's longtime assistant, Maggie, returns to her ancestral home on Ikaria for her 104-year-old grandmother's funeral, she quickly realizes not only was Yiayia likely murdered, but that a series of other long-lived Ikariots had recently died under the same suspicious circumstances. Back in Athens, Andreas and his chief detective Yianni pursue a smuggling and protection ring embedded in the Greek DEA, and its possible involvement in the assassination of an undercover cop. But then Maggie and Yianni uncover a connection between their respective leads in the elder-killings on Ikaria and the DEA corruption case, and they realize that there are international intrigues far more dangerous at play than anyone had imagined.

Molecules of Murder

The book looks at 10 toxic molecules and discusses their chemistry and effects in humans, followed by a re-examination of their deliberate misuse in high profile murder cases.

The Criminal Prosecution and Capital Punishment of Animals

Can an Animal Commit a Crime? This pioneering work collects an amazing assemblage of court cases in which animals have been named as defendants--chickens, rats, field mice, bees, gnats, and (in 34 recorded instances) pigs, among others-- providing insight into such modern issues as animal rights, capital punishment, and social and criminal theory. Evans suggests an intriguing distinction between trials of specific animals or particular crimes, such as the "murder" of an infant by a pig, and trials

for larger, catastrophic events, such as plagues and infestations. In the latter case, Evans suggests a parallel to witchcraft. Edward Payson Evans [1831-1917], a historian, linguist and associate of Ralph Waldo Emerson, taught at the University of Michigan before moving to Germany, where he became a specialist in Oriental languages and German literature. A prolific author, his other Animal-related books are *Animal Symbolism in Art and Literature* and *Animal Symbolism in Ecclesiastical Architecture*, both published in 1887. CONTENTS Introduction 1. The Shadow Constant

Someone is keeping watch over the machine. Should it ever have been built? Suspense and Sci-fi readers will love this page turner from a USA Today bestselling author. The lure of the find behind the loose hearthstone at Hazleton House was too great. The schematic excited Evan, Reenie and Ivy for different reasons but it is Kayla who actually begins building it. Her ability to focus to the exclusion of all else is just one of the effects of her Asperger's. The scribbled initials E.W. were merely a curiosity until it's discovered they belong to Eli Whitney. But strange footprints and disturbing visitors let Evan know that the theft of his sister's prize schematic isn't just a coincidence. It becomes obvious that the generator has no apparent power source. And Eli Whitney was only the first to die because of the machine. Soon they realize their enemies are much bigger than they had imagined and the threat the device poses could topple an empire. The secret now threatens those at Hazleton House. Who is trying to stop them? Vanishing Point

A witch who can't trust her power. A wolf who can't trust his nose. A serial killer who can vanish into the air. What should have been a straightforward case is turning into anything but. Someone is dumping bodies in the Florida Everglades after torturing the victims. There's no posed positioning, or even an attempt to hide their handiwork, making a profile nearly impossible to develop. The locals know more than they do, and Eleri and Donovan can't even link the victims. When they start suspecting they are being followed, they reach out to other NightShade agents, only to discover the others have the same growing concerns they do. Why are some agents getting sent back to the Atlas Project while others are in the wind? Still, the case in front of them needs to be solved, even if there's another wolf around. How can they stop the murders when all the clues disappear into the vanishing point? This killer will drive them into the riskiest gamble of all. *Vanishing Point* is the tenth book in the NightShade Forensic FBI Files series by USA Today bestselling author A.J. Scudiere. This book can be read as a standalone, but readers who love paranormal investigations and FBI thrillers will want to read the entire series!

The Atlas Defect

As Agents Heath and Eames uncover the truth, a decades old scandal comes to light. Even now, some are willing to kill to keep their secrets hidden. Eleri wanted a different kind of case. She should have been careful what she wished for. When an odd human skeleton in Michigan's Manistee-Huron National Forest triggers a NightShade investigation, Eleri and Donovan arrive to find it missing. But two other skeletons are a little too easily uncovered—each displays different anomalies that raise alarming questions. The bones aren't from the area or probably even the continent. A decades-old abandoned building doesn't register on satellite images. Files detailing genetic experiments on children are even more disturbing, and most of the children are unaccounted for. Who were the test subjects and where are the bodies? Eleri and Donovan believe there are others out there who haven't died yet. But they will, if something isn't done. Fast. If the case itself wasn't enough of a problem, someone is watching. Someone with a particular interest in Donovan's own skeletal anomalies . . . *The Atlas Defect* is the third book in the NightShade Forensic FBI Files series by USA Today bestselling author A.J. Scudiere. This book can be read as a standalone, but readers who love paranormal investigations and FBI thrillers will want to read the entire series!

The Damned (Là-bas). Joris-Karl Huysmans. *The Damned (Là-bas)* By Joris-Karl Huysmans Charles-Marie-Georges Huysmans (February 5, 1848 - May 12, 1907) was a French novelist who published his works as Joris-Karl Huysmans; he is most famous for the novel *À rebours*. His style is remarkable for its idiosyncratic use of the French language, wide-ranging vocabulary, wealth of detailed and sensuous description, and biting, satirical wit. The novels are also noteworthy for their encyclopaedic documentation, ranging from the catalogue of decadent Latin authors in *À rebours* to the discussion of the symbology of Christian architecture in *La Cathédrale*. Huysmans' work expresses

a disgust with modern life and a deep pessimism, which led the author first to the philosophy of Arthur Schopenhauer then to the teachings of the Catholic Church.

Crown of Souls (The Tox Files Book #2)

Of all the plants men have ever grown, none has been praised and denounced as often as marihuana (*Cannabis sativa*). Throughout the ages, marihuana has been extolled as one of man's greatest benefactors and cursed as one of his greatest scourges. Marihuana is undoubtedly a herb that has been many things to many people. Armies and navies have used it to make war, men and women to make love. Hunters and fishermen have snared the most ferocious creatures, from the tiger to the shark, in its herculean weave. Fashion designers have dressed the most elegant women in its supple knit. Hangmen have snapped the necks of thieves and murderers with its fiber. Obstetricians have eased the pain of childbirth with its leaves. Farmers have crushed its seeds and used the oil within to light their lamps. Mourners have thrown its seeds into blazing fires and have had their sorrow transformed into blissful ecstasy by the fumes that filled the air. Marihuana has been known by many names: hemp, hashish, dagga, bhang, loco weed, grass-the list is endless. Formally christened *Cannabis sativa* in 1753 by Carl Linnaeus, marihuana is one of nature's hardiest specimens. It needs little care to thrive. One need not talk to it, sing to it, or play soothing tranquil Brahms lullabies to coax it to grow. It is as vigorous as a weed. It is ubiquitous. It flourishes under nearly every possible climatic condition.
