Revolusi Indonesia dan bangsa Melayu

History of Malay kingdoms in North Sumatra in 1946.

The Politics of Indonesia-Malaysia Relations

This book provides a comprehensive overview of the relationship between Indonesia and Malaysia, focusing especially on how the relationship has developed in the last fifty years. It argues that the political relationship between the two countries has been largely defined by rivalry, despite the fact that the processes of national self-determination began by emphasising Indo-Malay fraternity. It shows how the two countries have different, contested interpretations of Indo-Malay history, and how the continuing suspicion of Javanese hegemony which defined much of the history of the Indo-Malay world is also a key factor in the relationship.

Peradaban dan perkauman di Malaysia: hubungan etnik Melayu-Cina (Penerbit UM)

Kajian lalu yang membahaskan isu-isu hubungan etnik sama ada dari sudut politik, ekonomi, sistem kelas, dan sejarah masih kurang berjaya meleraikan konflik hubungan etnik yang berlarutan hingga masa kini. Fokus utama buku ini ialah menganalisis dan menilai punca konflik antara etnik Melayu dengan etnik Cina dalam proses pembinaan negara-bangsa di Malaysia dari sudut baharu, iaitu per-spektif peradaban. Ini merujuk kepada dua nilai utama yang terangkum dalam peradaban dan bu-daya yang dikenali sebagai nilai induk dan rukun teras. Usaha memupuk kesatuan antara etnik Me-layu dengan etnik Cina bukanlah sesuatu yang mudah kerana masing-masing lahir dengan mewarisi unsur budaya dan peradaban yang bertembungan. Jurang yang memisahkan hubungan kedua-dua etnik ini mungkin dapat dikurangkan dan kerjasama mampu dipupuk sekiranya semua pihak sedia bertolak ansur serta memahami kedudukan masing-masing menerusi sejarah.

Shared Histories Conference, 30 July - 3 August 2003

In northern Sumatra, as in Malaya, colonial rule embraced an extravagant array of sultans, rajas, datuks and uleebalangs. In Malaya the traditional Malay elite served as a barrier to evolutionary change and survived the transition to independence, but in Sumatra a wave of violence and killing wiped out the traditional elite in 1945-46. Anthony Reid's *The Blood of the People*, now available in a new edition, explores the circumstances of Sumatra's sharp break with the past during what has been labelled its "social revolution." The events in northern Sumatra were among the most dramatic episodes of Indonesia's national revolution, and brought about more profound changes even than in Java, from where the revolution is normally viewed. Some ethnic groups saw the revolution as a popular, peasant-supported movement that liberated them from foreign rule. Others, though, felt victimised by a radical, levelling agenda imposed by outsiders. Java, with a relatively homogeneous population, passed through the revolution without significant social change. The ethnic complexity of Sumatra, in contrast, meant that the revolution demanded and altogether new "Indonesian" identity to override the competing ethnic categories of the past.

The Blood of the People

This updated edition examines the rise of fundamentalist Islam in Indonesia and asks why the country's democratic aspirations have yet to be realized.

Malay annals

Written by a senior lecturer in Asian studies at Flinders University, this book presents a grass-roots level study of the Indonesian revolution. The author concentrates upon the Three Regions Affair (Tiga Daerah) in Pekalongan Residency in northern Central Java in 1945. Through the use of oral sources (more than 350 interviews), Dutch archives and Indonesian newspapers the author provides an insight into the revolutionary years in Indonesia. Contains time chart of events, biographical appendix, bibliography and an index.

A History of Modern Indonesia

This book deals with the rebellion that occurred in Aceh, a province in the northern tip of the Indonesian island of Sumatra, in 1953-62. It traces the political stance of the Acehnese, a people who are well known for their centuries-old independence and heroism, in relation to their Central Government in Jakarta. Although the main theme of this book is about rebellion, it implicitly reveals the political life and behaviour of the Acehnese.

One Soul One Struggle

Oral History is a means of recording the past, through interviews. There has been much oral history activity in Southeast Asia since the 1960s at both the institutional and individual levels. This volume contains a range of papers dealing with the theoretical, methodological and practical issues in oral history and the unique problems of their application in the Southeast Asian context. The authors include both academics and practitioners who bring with them a wealth of expertise and experience in anthropology, history, sociology, publishing and archives administration.

The Republican Revolt

Just who are 'the Malays'? This provocative study poses the question and considers how and why the answers have changed over time, and from one region to another. Anthony Milner develops a sustained argument about ethnicity and identity in an historical, 'Malay' context. The Malays is a comprehensive examination of the origins and development of Malay identity, ethnicity, and consciousness over the past five centuries. Covers the political, economic, and cultural development of the Malays Explores the Malay presence in Brunei, Singapore, Indonesia, Thailand, Cambodia, Sri Lanka, and South Africa, as well as the modern Malay show-state of Malaysia Offers diplomatic speculation about ways Malay ethnicity will develop and be challenged in the future

Economic and Social Change Among the Simalungun Batak of North Sumatra

"The first edition of this Handbook is built on surveys by well-known figures from around the world and around the intellectual world, reflecting several different theoretical predilections, balancing coverage of enduring questions and important recent work. Those strengths are now enhanced by adding new chapters and thoroughly revising almost all other chapters, partly to reflect ways in which the field has

changed in the intervening twenty years, in some places radically. The result is a magnificent volume that can be used for many purposes." David W. Lightfoot, Georgetown University "The Handbook of Linguistics, Second Edition is a stupendous achievement. Aronoff and Rees-Miller have provided overviews of 29 subfields of linguistics, each written by one of the leading researchers in that subfield and each impressively crafted in both style and content. I know of no finer resource for anyone who would wish to be better informed on recent developments in linguistics." Frederick J. Newmeyer, University of Washington, University of British Columbia and Simon Fraser University "Linguists, their students, colleagues, family, and friends: anyone interested in the latest findings from a wide array of linguistic subfields will welcome this second updated and expanded edition of The Handbook of Linguistics. Leading scholars provide highly accessible yet substantive introductions to their fields: it's an even more valuable resource than its predecessor." Sally McConnell-Ginet, Cornell University "No handbook or text offers a more comprehensive, contemporary overview of the field of linguistics in the twenty-first century. New and thoroughly updated chapters by prominent scholars on each topic and subfield make this a unique, landmark publication."Walt Wolfram, North Carolina State University This second edition of The Handbook of Linguistics provides an updated and timely overview of the field of linguistics. The editor's broad definition of the field ensures that the book may be read by those seeking a comprehensive introduction to the subject, but with little or no prior knowledge of the area. Building on the popular first edition, The Handbook of Linguistics, Second Edition features new and revised content reflecting advances within the discipline. New chapters expand the already broad coverage of the Handbook to address and take account of key changes within the field in the intervening years. It explores: psycholinguistics, linguistic anthropology and ethnolinguistics, sociolinguistic theory, language variation and second language pedagogy. With contributions from a global team of leading linguists, this comprehensive and accessible volume is the ideal resource for those engaged in study and work within the dynamic field of linguistics.

Singa, the Lion of Malaya

Explores the relations of power and production that structured the course of plantation agriculture and the lives of those drawn into its field of force

Oral History in Southeast Asia

Traces the story of India's expansion that is woven into the culture of Southeast Asia.

Almanak Sumatera

This pioneering volume traces the history of the region which became Indonesia, from early times to the present day, in over three hundred specially drawn full-colour maps with detailed accompanying text. In doing so, the Atlas brings fresh life to the fascinating and tangled history of this immense archipelago. Beginning with the geographical and ecological forces which have shaped the physical form of the archipelago, the Historical Atlas of Indonesia goes on to chart early human migration and the changing distribution of ethnic groups. It traces the kaleidoscopic pattern of states in early Indonesia and their gradual incorporation into the Netherlands Indies and eventually into the Republic of Indonesia.

A Textbook of Jurisprudence

Red Star Over Malaya is an account of the inter-racial relations between Malays and Chinese during the final stages of the Japanese occupation. In 1947, none of the three major race of Malaya - Malays, Chinese, and Indians - regarded themselves as pan-ethnic "e;Malayans";e; with common duties and problems. With the occupation forcibly cut them off from China, Chinese residents began to look inwards towards Malaya and stake political claims, leading inevitably to a political contest with the Malays. As

the country advanced towards nationhood and self-government, there was tension between traditional loyalties to the Malay rulers and the states, or to ancestral homelands elsewhere, and the need to cultivate an enduring loyalty to Malaya on the part of those who would make their home there in future. As Japanese forces withdrew from the countryside, the Chinese guerrillas of the communist-led resistance movement, the Malayan People's Anti-Japanese Army (MPAJA), emerged from the jungle and took control of some 70 per cent of the country's smaller towns and villages, seriously alarming the Malay population. When the British Military Administration sought to regain control of these liberated areas, the ensuing conflict set the tone for future political conflicts and marked a crucial stage in the history of Malaya. Based on extensive archival research, *Red Star Over Malaya* provides a riveting account of the way the Japanese occupation reshaped colonial Malaya, and of the tension-filled months that followed Japan's surrender. This book is fundamental to an understanding of social and political developments in Malaysia during the second half of the 20th century.

The Handbook of Linguistics

From 1884-1885, Christiaan Snouck Hurgronje stayed in Mecca. He became intimately acquainted with the daily life of the Meccans and the thousands of pilgrims from all over the world.

A Malay-english Dictionary

Drawing on previously unavailable archival material, this book argues that Indonesian nationalism rested on Islamic ecumenism heightened by colonial rule and the pilgrimage. The award winning author Laffan contrasts the latter experience with life in Cairo, where some Southeast Asians were drawn to both reformism and nationalism. After demonstrating the close linkage between Cairene ideology and Indonesian nationalism, Laffan shows how developments in the Middle East continued to play a role in shaping Islamic politics in colonial Indonesia.

Capitalism and Confrontation in Sumatra's Plantation Belt, 1870-1979

Jakarta, Sambas, Poso, the Moluccas, West Papua. These simple, geographical names have recently obtained strong associations with mass killing, just as Aceh and East Timor, where large-scale violence has flared up again. Lethal incidents between adjacent villages, or between a petty criminal and the crowd, take place throughout Indonesia. Indonesia is a violent country. Many Indonesia-watchers, both scholars and journalists, explain the violence in terms of the loss of the monopoly on the means of violence by the state since the beginning of the Reformasi in 1998. Others point at the omnipresent remnants of the New Order state (1966-1998), former President Suharto's clan or the army in particular, as the evil genius behind the present bloodshed. The authors in this volume try to explain violence in Indonesia by looking at it in historical perspective.

Historical Atlas of Indonesia

Being Dutch in the Indies portrays Dutch colonial territories in Asia not as mere societies under foreign occupation but rather as a Creole empire. Most of colonial society, up to the highest levels, consisted of people of mixed Dutch and Asian descent who were born in the Indies and considered it their home, but were legally Dutch.

Red Star Over Malaya

The concept of 'developing' countries dismissed as a cruelly misleading euphemism. The much talked of economic 'take-off' cannot take place in countries like Indonesia, where a bazaar mentality dominates commerce. Her population of about 135 million in 1977 is likely to rise by the year 2000 to 280 million by which time she will be unable to feed herself. Optimistic theories of development, and facile blaming of Dutch imperialism, hide the reality of chronic socio-economic stagnation. These will have to be discarded if the problem of Indonesia is to be understood, let alone solved. The author demonstrates the 'Indonesian Tragedy' not so much by argument, as by depicting the country as he experienced it from day to day. In developing his conclusion, he draws on history, and the works of sociologists, some of whom he disagrees with. In this way he sheds light on the predicament of Indonesia and helps to illuminate a problem common to much of the Third World.

Letters to Emilie Schenkl, 1934-1942

A philosophical interpretation of history, examining the significance of historical study as a science and a reflection of social values.

Mekka in the Latter Part of the 19th Century

Covering the period 1963 to 1986, this study demonstrates the degree of influence that Islam exerts on Malay identity. Islam is not only a focal point in relations between Malays and non-Malays, but also in the Malay ethnic community since Islam is integral to its culture and identity and is involved in a tense, dialectical relationship with Malay ethnicity. The Malay tendency to opt for ethnic Malay-based solutions instead of an Islamic alternative results in an upsurge of Malay ethnic nationalism, and is here explored against the backdrop of the current Islamic resurgence in Malaysia.

The Memoirs of Rashid Maidin

When you sail from Chamba fifteen thousand miles on a course between south and southeast, you come to a great island called Java. And experienced mariners of those Islands who know the matter well say that it is the greatest Island in the world and has a compass of three thousand miles. It is subject to a great King and tributary to no one else in the world. The people are idolaters. The Island is of surpassing wealth, producing black pepper, nutmegs, spikenard, galin-gale, cubebs, cloves and all other kinds of spices. This Island is also frequented by a vast amount of shipping, and by merchants who buy and sell costly goods from which they reap great profit. Indeed, the treasure of this Island is so great as to be past telling." Marco Polo.
