Mappe. Il teatro del mondo

LA STORIA DELL'UOMO E DELLA SUA VISIONE DEL MONDO ATTRAVERSO L'EVOLUZIONE DELLE MAPPE DALLE PITTURE RUPESTRI A GOOGLE EARTH Che cos'è una mappa? Com'è cambiata nel tempo la nostra rappresentazione del mondo? Cosa dicono di noi le carte geografiche? Questo libro ci descrive il cammino tortuoso della cartografia, tra arte e tecnologia, sogni di potere e ambizioni di conoscenza, esigenze pratiche e attrazione dell'ignoto. La storia della cartografia è la storia del mondo e racconta la nostra percezione di esso. È insieme la Storia stessa, quella con la S maiuscola. Dalle prime rappresentazioni rupestri a Google Earth, passando per le proiezioni di Tolomeo o del Mercatore, Berg ci racconta la storia dei popoli e delle nazioni, di chi siamo stati e chi siamo ora. Mappe. Il teatro del mondo è insieme un libro sulla scienza, sull'arte e la tecnologia, sul potere e le ambizioni, sui nostri bisogni e i nostri sogni. Lungo la strada incontriamo geografi visionari ed eroici esploratori, cartografi che si accusano vicendevolmente di plagio, e sovrani che si fanno confezionare mappe falsate per accrescere il loro dominio e la loro influenza. Corredato da splendide fotografie e riproduzioni, il libro di Berg ci conduce in un viaggio nello spazio e nel tempo che parla del mondo e di come lo vediamo, ma soprattutto parla di noi.

Mappe. Il teatro del mondo

“Dai Babilonesi a Google Earth Jerry Brotton racconta la nostra storia attraverso le carte geografiche... Dobbiamo a Brotton la possibilità di impararne le tecniche segrete, le ragioni ultime e le infinite particolarità curiose: il fatto che ce la porga senza essere pedante o vacuamente romanzesco rende il suo libro un esempio significativo di come il sapere possa essere semplice tranquillità, pacata sicurezza e composta passione.” Alessandro Baricco, “la Repubblica”

Teatro del mondo

In occasione degli 800 anni di presenza francescana in Terra Santa (1217-2017) viene pubblicato questo catalogo dei libri di viaggio antichi (Itinera ad loca sancta) conservati presso le biblioteche della Custodia di Terra Santa a Gerusalemme, che sono una delle testimonianze del lungo servizio dei francescani in questi luoghi. Frati e viaggiatori hanno sentito la necessità di raccontare e fissare

in inchiostro una traccia del loro vissuto in questa terra secondo la propria sensibilità e interesse, restituendo al lettore di oggi un panorama articolato e stratificato della Terra Santa. La raccolta infatti, non comprende solo cronache e diari con la registrazione della propria esperienza, ma conta anche volumi di guide alle indulgenze, osservazioni etnografiche, rilievi archeologici, descrizioni topografiche e manuali di botanica. Sfogliando il catalogo si trovano libri in latino, italiano, tedesco, olandese, inglese, francese, portoghese e spagnolo, stampati in tutta Europa e scritti da viaggiatori delle più diverse provenienze. A questa già grande varietà umana, si aggiunge anche quella di chi ha usufruito di questi libri lasciando traccia di pensieri e riflessioni a bordo pagina oppure firmandone il possesso attraverso il proprio nome, timbro o exlibris. Registrando anche questi elementi in ciascun esemplare del fondo, il catalogo è ancor più significativamente un catalogo dei tipi umani che, nel lasciare traccia di sé in modo più o meno consapevole, raccontano una parte importante della storia dei Luoghi Santi e della Cristianità in questa Terra, fatta non solo di pietre e luoghi ma soprattutto di testimoni diretti dei Luoghi della Salvezza. (dalla Presentazione di Francesco Patton ofm, Custode di Terra Santa)

Il Teatro del mondo ...

Mappe dei nostri corpi spettacolari è la storia di un essere inafferrabile che, lento e inesorabile, si aggira in un paesaggio affascinante: il corpo umano. Si ferma al suo interno, ne esplora gli organi, si moltiplica tra le cellule. Una creatura che racconta la topografia di un corpo, da cui assorbe energia vitale tappa dopo tappa; avanza lungo gli argini delle sue vene, si riversa nei tessuti, scivola nelle anse dei capillari. Sfiora la trachea come i tasti di uno xilofono. Si diffonde implacabile. Ma è anche la storia di Lia, una giovane donna sposata con Harry e madre di Iris, alle prese con i cambiamenti dell'adolescenza. È la loro quotidianità che questa creatura racconta, perché conosce tutti loro: i segreti del passato, le verità non dette del presente e l'inevitabilità del futuro. Mentre Lia affronta quella che potrebbe essere la fine, i ricordi della sua infanzia e una storia d'amore nascosta portano alla luce paure profonde. Sotto attacco da dentro, Lia cerca di trovare un equilibrio e di tracciare i confini di un'instabile felicità. Ma il tempo e i corpi sono porosi e imprevedibili. Maddie Mortimer si muove tra diversi stili di scrittura e stati d'animo, in una vera e propria catabasi attraverso il corpo umano che si fa racconto di luoghi spettacolari e al contempo spaventosi; la discesa in un abisso profondo che si trasforma in una celebrazione assoluta della vita.

La storia del mondo in dodici mappe

Collana T+A Territori di Architettura diretta da Luigi Ramazzotti Il territorio a ovest di Palermo, compreso da Isola delle Femmine a Partinico, si caratterizza per una edilizia sparsa, nuclei più densi e radi terreni coltivati. La seconda natura si sta trasformando in campagna urbanizzata, con l'eccezione dell'area intorno a Partinico dove sono presenti campi agricoli più ampi. Questo destino ineluttabile può trovare un'alternativa nell'ipotesi de "La città in estensione" di Giuseppe Samonà (1976) che diviene riferimento privilegiato per gli sviluppi teorici e progettuali del Prin 2009. Tali esiti danno corpo alla presente pubblicazione dell'Unità di ricerca della Facoltà di Architettura di Palermo, in cui si propone di progettare la città e il paesaggio come un insieme unitario. Sprawl, dense small towns and the countryside characterize the territory west of Palermo, between Isola delle Femmine and Partinico. The anthropized nature is turning into sprawl, with the exception of the area around Partinico mainly consisting of wide agricultural fields. This inescapable fate can find an alternative in the "Extending town" hypothesized by Giuseppe Samonà (1976) that becomes the prime reference for the theoretical and projectual developments of the Prin 2009. These results compose the publication of the Research Unit of the Faculty of Architecture of Palermo, in which is proposed to design the town and the landscape as a unified whole.

Mappe dei nostri corpi spettacolari

Tra Cinque e Seicento, all'indomani della Conquista, sullo sfondo di un dirompente collasso demografico e di un vasto riassetto culturale, economico, sociale e geopolitico, le popolazioni della Nuova Spagna produssero una straordinaria quantità di mappe locali. La ricostruzione dello specifico contesto sociale, istituzionale e culturale in cui furono confezionate queste rappresentazioni territoriali permette di scoprire in esse documenti storici preziosi e irripetibili: sono contemporanee all'espansione europea della pratica cartografica governativa e ai primi tentativi sistematici di organizzazione centralizzata dei

dati territoriali; sono intersezioni imprevedute di mondi culturali fino a pochi decenni prima autonomi e separati; sono, al tempo stesso, un risultato delle strategie geopolitiche dell'amministrazione asburgica e uno strumento delle rivendicazioni territoriali di settori locali novoispani, indigeni e spagnoli; sono, da una parte, un caleidoscopico riflesso dei conflitti costitutivi di ogni società di ancien régime, dall'altra, una testimonianza della specificità culturale e politica della società novoispana. L'indagine d'archivio su moventi e procedure delle pratiche di definizione e rappresentazione del territorio nel Messico spagnolo offre così al lettore una prospettiva inedita per osservare la realtà dei rapporti interetnici in Nuova Spagna e per valutare la complessità delle relazioni tra poteri centrali, intermedi e locali in una società cetuale.

Bricolage per un naufragio. Alla deriva nella notte del mondo

Questo libro raccoglie una serie di saggi sull'alterazione, ovvero sul rapporto interpretazione e realtà, sostanzialmente sul come si possa aumentare la realtà oltre l'impiego di strumenti tecnologici. Con l'espressione "realtà aumentata" si vuole qui sostenere l'autonomia della visione, la sua non necessità di protesi da altri impostate, a favore di un potenziamento delegato alla sola teoria. L'obiettivo è aggiornare il binomio teoria-progetto, superare inutili dualismi, affermare la coincidenza dei due termini non solo sul piano dei contenuti ma anche su quello degli strumenti. Questa raccolta di testi rappresenta la seconda tappa di un percorso di ricerca avviato con la pubblicazione, prima sulle pagine della rivista (h)ortus e, successivamente, all'interno di questa stessa collana, del volume Nello spessore. Traiettorie e stanze dentro la città. La terza tappa sarà un approfondimento su La città della post-produzione a sancire un ipotetico trittico sull'architettura del progetto contemporaneo.

La rivista europea

La maggior parte di noi passa la vita a cercare di decifrare il significato dell'esistenza: lo cerchiamo esaminando i particolari della nostra infanzia, gli ostacoli che abbiamo superato, le difficoltà che abbiamo dovuto affrontare e i successi che siamo riusciti a conquistare. Vorremmo una mappa che ci spieghi come capire il passato, che ci guidi nel futuro e ci permetta di vedere qual è il nostro ruolo nel grande ciclo della vita. Spesso, però, questa ricerca sembra non portare a nulla: abbiamo l'impressione di girare a vuoto e di aver smarrito noi stessi, oppressi da uno stile di vita troppo rapido e caotico, incapace di nutrire lo spirito e il cuore. Con questo libro, Colette Baron-Reid ci invita a fare una pausa e a prenderci il tempo per guardarci dentro, e ci accompagna in un viaggio alla scoperta delle nostre emozioni, delle nostre paure, dei nostri desideri. Potremo imparare a conoscere i nostri paesaggi interiori visualizzandoli come luoghi incantati, in cui le emozioni prendono gli attributi del clima o gli aspetti del mondo naturale, e a fare pace con le parti soffocate, negate o ferite di noi stessi. Scopriremo che il potere di tracciare la nostra strada è nelle nostre mani, perché impareremo ad attingere a risorse interiori che forse non sappiamo nemmeno di avere.

L'hétérogénéité du visuel

Giallo - saggio (546 pagine) - Un percorso tra autori internazionali e nazionali di apocrifi sherlockiani – oltre duecento – proposto da uno dei principali cultori di questo argomento. Un libro studiato appositamente per tutti gli appassionati del grande detective di Baker Street e per chi voglia avvicinarsi agli apocrifi sherlockiani, sia per leggere quelli più meritevoli, sia magari per provare a scriverne. Un percorso tra autori internazionali e nazionali proposto da uno dei principali conoscitori di questo argomento: Luigi Pachì. Direttore da oltre vent'anni della Sherlock Magazine, editor di collane librerie come Odissea Mystery, Baker Street Collection, Sherlockiana, Sherlockiana Saggi, Sherlockiana Investigazioni e consulente editoriale fin dalla sua nascita del mensile Il Giallo Mondadori Sherlock, in questa sorta di vademecum Luigi Pachì propone i migliori autori e casi holmesiani da loro trattati nei romanzi e racconti apocrifi usciti in Italia negli ultimi anni. Non manca una sostanziosa parte iniziale dove si affrontano i seguenti temi: Il Canone sherlockiano e il suo universo; Arthur Conan Doyle e il ruolo dell'omicidio nel Canone; Sherlock Holmes: profilo del detective per antonomasia; Il professor Moriarty, la nemesis di Sherlock Holmes; La polizia e le forze dell'ordine ai tempi di Sherlock Holmes; La Londra vittoriana di Sherlock Holmes; La classifica personale dei casi canonici secondo Arthur Conan Doyle; La datazione dei casi canonici; Alcune regole basilari per chi scrive apocrifi sherlockiani. Luigi Pachì, nato a Milano nel 1961 ma stesiano da circa vent'anni, è laureato in economia e possiede un

Master of Science in Management. Si occupa di comunicazione in ambito ICT ed è anche editore. È stato dirigente di alcune importanti aziende multinazionali americane di informatica e telecomunicazioni ricoprendo, per un triennio a Londra, ruoli internazionali per i mercati di Europa e Sud Africa. Iscritto all'Ordine Nazionale dei Giornalisti, collabora con alcune testate tecniche del settore. Ha scritto diversi racconti di narrativa d'anticipazione e, nel 2002, anche un romanzo a quattro mani assieme a Franco Forte (Ombre nel silenzio, Solid editore e ripubblicato in eBook per la Delos Digital). È cultore del giallo classico e dell'opera di Arthur Conan Doyle. Dal 2014 svolge il ruolo di consulente editoriale per la Mondadori per la collana mensile da edicola Il Giallo Mondadori Sherlock e dirige la rivista Sherlock Magazine, quadrimestrale che dal 2000 si occupa di tutti gli aspetti del mystery. Ha curato diverse collane per molteplici editori e le antologie Le cronache di Sherlock Holmes (Fabbri/RCS), I nuovi casi di Sherlock Holmes (Fabbri/RCS), Sherlock Holmes in Italia (Mondadori), Sherlock Holmes: indagini quasi sovranaturali (Delos Digital) e Sherlock Holmes – Donne, intrighi e indagini (Mondadori) e Casi paradigmatici per Sherlock Holmes (Delos Digital). Coordina lo Sherlock Magazine Award, dedicato ai racconti apocrifi sherlockiani e cura la collana settimanale di eBook intitolata Sherlockiana, oltre all'edizione inglese 221B e la collana di saggi Sherlockiana Saggi. Tra le collane da lui dirette si segnalano anche Odissea Mystery, Baker Street Collection, Innsmouth, Crime & Criminology e TechnoVisions.

La funzione educativa del cammino. Aspetti pedagogici, psicologici e sociologici

The study is aimed at reconstructing the historical process at the base of any significant theatre architecture. The modern space for the show is no longer intended as a direct derivation from classical types, but as a product of the transformation of the urban fabric in our cities. The research was conducted at the academies, state and municipal historical archives of numerous towns, in particular Rome, Milan, Mantua, Ferrara, Venice, London and Prague. All images are original. The work also includes the list of about 700 major Italian historical theatres.

Il mondo magico. Tra arte e conoscenza. Il metodo dei pittori

In meno di dieci anni Giovanni Botero pubblica tre libri che eserciteranno una vasta e profonda influenza: Delle cause della grandezza delle città (1588), Della ragion di Stato (1589) e Le Relazioni universali (1591-1596). Oltre a inaugurare la letteratura della ragion di Stato, Botero elabora una teoria della crescita urbana e getta le basi della moderna geografia politica. Impegnato a ribadire il controllo dell'autorità ecclesiastica sugli Stati temporali, egli studia attentamente nuovi oggetti – come la circolazione delle ricchezze, la popolazione, il territorio, l'equilibrio di potenza – ed escogita adeguati strumenti di governo. Nella lettura di Romain Descendre, le pagine di Botero offrono un ritratto politico della prima globalizzazione, basato sull'idea che città, Stati o imperi si rafforzino non solo con l'arte e militare, ma anche con la mobilitazione di saperi economici, demografici e geografici. Una lezione che questo importante libro, finalmente tradotto in italiano con l'aggiunta di una Nota dell'autore e una Prefazione del curatore, riscopre in tutta la sua attualità, restituendo a Botero il posto che merita nella storia del pensiero politico.
