Intro
How much do scrap warships cost?
Why did the IJN have so much difficulty designing the oxygen system for the Type 93 torpedo?
When you see the cut down rear funnels on RN destroyers, apparently to improve their AA gun arcs, does this have any impact on their steaming?
Japan's well deserved reputation for awful POW treatment was thoroughly documented by the end of WW2. Was their treatment of foreign prisoners always so bad? Or did it steadily get worse as the military dictatorship took over?
What happened to IJN gunnery by the time of Leyte Gulf?
Is there still a risk of radioactive contamination on the Operation Crossroads wrecks?
How much more capable would Allied designs be if built to the same displacement as Kriegsmarine ships?
Did ships use other material before the metal plating in order to slow down/disrupt the incoming projectile.
Type of welding used on ships?
Should the USN have focussed on battlecruisers instead of battleships in the later 1910's?
SMS Emden commandeering the Cormoran?
Questions about boilers?
In the movie Nate and Hayes, a German iron ship with single gun turret is disabled by placing a shell at the turret rotation stop, which detonated when the turret is rotated to contact its fuse. Was this even a possibility with such shells of this or any period?
Could you tell us a bit the painting "The Fighting Temeraire" by JMW Turner and the context in which it was painted?
How hot would a gun have to be to cook off a round?

Hill argues that understanding the process of viewing violence is one way to open up the current debate concerning the effects of violence to include objective and broad-minded responses to this phenomenon.

Key Ideas in Media

Designed for AS & A2 level students, this series encapsulates the fundamental concepts that shape the study of Media and Communications. It offers quick and easy-to-read summaries of key ideas and key theories enabling students to attain and assimilate knowledge quickly.

The Crash Controversy

Between 1996-97 an almost unprecedented campaign was mounted in the British press against one film: David Cronenberg's *Crash*. What motivated this campaign? What can it tell us about British film culture? What impact did the campaign have on general audiences? This book, which draws on a year-long investigation supported by the Economic and Social Research Council, offers a series of important and challenging findings and is a major contribution to our understanding of censorship campaigns, how audiences respond to films, and the strategies employed in engaging with such texts.

Reality TV

Reality TV restores a crucial, and often absent, element to the critical debate about reality television: the voices of people who watch reality programmes. From *Animal Hospital* to *Big Brother*, Annette Hill argues that much can be learned from listening to audience discussion about this popular and rapidly changing television genre. Viewers' responses to reality TV can provide invaluable information to enhance our understanding of both the reality genre and contemporary television audiences. Drawing on quantitative and qualitative audience research to understand how viewers categorise the reality genre, and how they judge the performance of ordinary people and the representation of authenticity within different types of reality programmes. * Do audiences think reality TV is real? * Can people learn from watching reality TV? * How critical are viewers of reality TV? Reality TV argues that audiences are engaged in a critical examination of the development of popular factual television. The book examines how audiences can learn from watching reality programmes, and how viewers think and talk about the ethics of reality TV.

TV Living

TV Living presents the findings of the BFI Audience Tracking Study in which 500 participants completed detailed questionnaire-diaries on their lives, their television watching, and the relationship between the two over a five year period. Gauntlett and Hill use this extensive data to explore some of the most fundamental questions in media and cultural studies, focusing on issues of gender, identity, the impact of new technologies, and life changes. Opening up new areas of debate, the study sheds new light on audiences and their responses to issues such as sex and violence on television. A unique study of contemporary tv audience behaviour and attitudes, TV Living offers a fascinating insight into the complex relationship between mass media and people's lives today.

Television Violence

If one culprit is suspected above all others for encouraging society to become more violent and unfeeling, it is television. This medium, which has become so pervasive in the last 50 years, seems to play an enormous role in the lives of the vast majority of people. But who controls the content which exerts such an enormous influence and to an extent controls the people? What are they doing now and what will they be doing tomorrow? Is violence essential to sell toothpaste and hamburgers? What are our children becoming and what will their children be like? Will every child carry a gun or other weapon just waiting for someone to trigger their violent nature and ignite their preprogrammed anger?

A Companion to the Horror Film

This cutting-edge collection features original essays by eminent scholars on one of cinema's most dynamic and enduringly popular genres, covering everything from the history of horror movies to the latest critical approaches. Contributors include many of the finest academics working in the field, as well as exciting younger scholars. Varied and comprehensive coverage, from the history of horror to broader issues of censorship, gender, and sexuality. Covers both English-language and non-English horror film traditions. Key topics include horror film aesthetics, theoretical approaches, distribution, art house cinema, ethnographic surrealism, and horror's relation to documentary film practice. A thorough treatment of this dynamic film genre suited to scholars and enthusiasts alike.

Ill Effects

The influence of the media remains a contentious issue. Every time a particularly high-profile crime of violence is committed, there are those who blame the effects of the media. The familiar culprits of cinema, television, video and rock music, have now been joined, particularly in the wake of the massacre at Columbine High, by the Internet and the World Wide Web. Yet, any real evidence that the media do actually have such negative effects remains as elusive as ever and, consequently, the debate about effects frequently ends up as being little more than strident and rhetorical appeals to 'common sense'. *Ill Effects* argues that the question of media influence needs to be debated by those with a clearer understanding of how audiences and media interact with one another. Analysing the failure of the effects approach to understand both the modern media and their audiences, this second edition examines the influence of the effects tradition in America, the United Kingdom, Australia and Europe as well as the role of the British Board of Film Classification. Contributors examine the increasing number of stories about the alleged ill effects of the Internet and enquire whether this is a prelude to, and a crude attempt to legitimise, the imposition of tighter controls on new media. *Ill Effects* is a guide for the perplexed. It suggests new and productive ways in which we can understand the effects of the media and questions why many in media education accept a simple interpretation of the effects debate, particularly at times of moral panic. Refusing to adopt the absurd position that the media have no influence at all, *Ill Effects* reconceptualises the notion of media influence in ways which take into account how people actually use and interact with the media in their everyday lives. Martin Barker, Sara Bragg, David Buckingham, Tom Craig, David Gauntlett, Patricia Holland, Annette Hill, Mark Kermode, Graham Murdoch, Julian Petley, Sue Turnbull.

Moving Experiences

"A newly revised and expanded edition of the classic critique of media effects studies." -- Publisher.

Body Horror

The author examines the media's presentation of graphic images of war, natural disasters, accidents, murder and execution, death and grief and the public's response to these images.

Media Studies

Why are some people more capable than others? What are the reasons for someone gaining unusual abilities or special expertise, or being especially creative? What has to happen in order for a young person to become a child prodigy or genius? How can we help today's children to reach high levels of ability, and to shine in the arts or the sciences, in sports or games, or to excel in other fields of expertise? *The Psychology of High Abilities* explains how, when, and why people acquire such special expertise, and illuminates ways to make it possible for larger numbers of young people to extend their capabilities. Examining how and why people differ in their capabilities, it investigates the actual causes

underlying impressive accomplishments and achievements. The volume reveals the kinds of influences that contribute to high abilities and provides practical insights into the most effective ways for extending the abilities of young people and creating higher levels of expertise.

Creative Explorations

How do you picture identity? What happens when you ask individuals to make visual representations of their own identities, influences, and relationships? Drawing upon an array of disciplines from neuroscience to philosophy, and art to social theory, David Gauntlett explores the ways in which researchers can embrace people's everyday creativity in order to understand social experience. Seeking an alternative to traditional interviews and focus groups, he outlines studies in which people have been asked to make visual things – such as video, collage, and drawing – and then interpret them. This leads to an innovative project in which Gauntlett asked people to build metaphorical models of their identities in Lego. This creative reflective method provides insights into how individuals present themselves, understand their own life story, and connect with the social world. *Creative Explorations* is a lively and original discussion of identities, media influences, and creativity, which will be of interest to both students and academics.

Reel Knockouts

When Thelma and Louise outfought the men who had tormented them, women across America discovered what male fans of action movies have long known—the empowering rush of movie violence. Yet the duo's escapades also provoked censure across a wide range of viewers, from conservatives who felt threatened by the up-ending of women's traditional roles to feminists who saw the pair's use of male-style violence as yet another instance of women's co-option by the patriarchy. In the first book-length study of violent women in movies, *Reel Knockouts* makes feminist sense of violent women in films from Hollywood to Hong Kong, from top-grossing to direct-to-video, and from cop-action movies to X-rated skin flicks. Contributors from a variety of disciplines analyze violent women's respective places in the history of cinema, in the lives of viewers, and in the feminist response to male violence against women. The essays in part one, "Genre Films," turn to film cycles in which violent women have routinely appeared. The essays in part two, "New Bonds and New Communities," analyze movies singly or in pairs to determine how women's movie brutality fosters solidarity amongst the characters or their audiences. All of the contributions look at films not simply in terms of whether they properly represent women or feminist principles, but also as texts with social contexts and possible uses in the re-construction of masculinity and femininity.

New Hollywood Violence

Exploring the depiction of violence and related issues in Hollywood productions, this book focuses on the motivations and cultural politics of violence on the big screen, as well as its effects on viewers and society as a whole.

Paul Tillich and the Possibility of Revelation Through Film

This study explores the possibility that even films lacking religious subject matter might have a religious impact upon their viewers. It begins with a reading of Paul Tillich's theology of revelation through culture and continues with a qualitative research project assessing the experiences of filmgoers in Latin America.

The Television Studies Reader

The *Television Studies Reader* brings together key writings in the expanding field of television studies, providing an overview of the discipline and addressing issues of industry, genre, audiences, production and ownership, and representation. The Reader charts the ways in which television and television studies are being redefined by new and 'alternative' ways of producing, broadcasting and watching TV, such as cable, satellite and digital broadcasting, home video, internet broadcasting, and interactive TV, as well as exploring the recent boom in genres such as reality TV and docusoaps. It brings together articles from leading international scholars to provide perspectives on television programmes and practices from around the world, acknowledging both television's status as a global medium and the many and varied local contexts of its production and reception. Articles are grouped in seven themed sections, each with an introduction by the editors: Institutions of Television Spaces of Television Modes

of Television Making Television Social Representation on Television Watching Television Transforming Television

Transfigurations

In many senses, viewers have cut their teeth on the violence in American cinema: from Anthony Perkins slashing Janet Leigh in the most infamous of shower scenes; to the 1970s masterpieces of Martin Scorsese, Sam Peckinpah and Francis Ford Coppola; to our present-day undertakings in imagining global annihilations through terrorism, war, and alien grudges. *Transfigurations* brings our cultural obsession with film violence into a renewed dialogue with contemporary theory. Grønstad argues that the use of violence in Hollywood films should be understood semiotically rather than viewed realistically; *Transfigurations* thus alters both our methodology of reading violence in films and the meanings we assign to them, depicting violence not as a self-contained incident, but as a convoluted network of our own cultural ideologies and beliefs.

Politics and Film

Politics and Film explores the meaning of film within a societal context. In examining the political role of films we become real time cultural anthropologists, sifting through the artifacts of modern society to determine what our culture really is all about. Common sense tells us that if filmmakers want to make a profit, they have to be responsive to the market. This doesn't mean that they have to produce a product that simply delights the eyes. Films must also please the mind, and not just in terms of satisfying our desire to be entertained (although that alone is sometimes enough) but also deepen our understanding of people, ideas, and problems that we may confront in everyday life. In this respect, even commercial films are political. And, if 'we are what we eat,' we may also say, 'we are what we pay to see.' This book contends that to a large extent American film reflects political culture in American society.

Media and the Politics of Offence

This book explores different forms of mediated offence in the context of Trump's America, Brexit Britain, and the rise of far-right movements across the globe. In this political landscape, the so-called 'right to offend' is often seen as a legitimate weapon against a 'political correctness gone mad' that stifles 'free speech'. Against the backdrop of these current developments, this book aims to generate a productive dialogue among scholars working in a variety of intellectual disciplines, geographical locations and methodological traditions. The contributors share a concern about the complex and ambiguous nature of offence as well as about the different ways in which this so-called 'negative affect' comes to matter in our everyday and socio-political lives. Through a series of instructive case studies of recent media provocations, the authors illustrate how being offended is more than an individual feeling and is, instead, closely tied to political structures and power relations.

Images of Blood in American Cinema

Through studying images of blood in film from the mid-1950s to the end of the 1960s, this path-breaking book explores how blood as an (audio)visual cinematic element went from predominately operating as a signifier, providing audiences with information about a film's plot and characters, to increasingly operating in terms of affect, potentially evoking visceral and embodied responses in viewers. Using films such as *The Return of Dracula*, *The Tinger*, *Blood Feast*, *Two Thousand Maniacs*, *Color Me Blood Red*, *Bonnie and Clyde*, and *The Wild Bunch*, Rødje takes a novel approach to film history by following one (audio)visual element through an exploration that traverses established standards for film production and reception. This study does not heed distinctions regarding to genres (horror, western, gangster) or models of film production (exploitation, independent, studio productions) but rather maps the operations of cinematic images across marginal as well as more traditionally esteemed cinematic territories. The result is a book that rethinks and reassembles cinematic practices as well as aesthetics, and as such invites new ways to investigate how cinematic images enter relations with other images as well as with audiences.

The Cult Film Reader

"An invaluable collection for anyone researching or teaching cult cinema ... The Cult Film Reader is an authoritative text that should be of value to any student or researcher interested in challenging and transgressive cinema that pushes the boundaries of conventional cinema and film studies." *Science*

Fiction Film and Television "A really impressive and comprehensive collection of the key writings in the field. The editors have done a terrific job in drawing together the various traditions and providing a clear sense of this rich and rewarding scholarly terrain. This collection is as wild and diverse as the films that it covers. Fascinating." Mark Jancovich, Professor of Film and Television Studies, University of East Anglia, UK "It's about time the lunatic fans and loyal theorists of cult movies were treated to a book they can call their own. The effort and knowledge contained in The Cult Film Reader will satisfy even the most ravenous zombie's desire for detail and insight. This book will gnaw, scratch and infect you just like the cult films themselves." Brett Sullivan, Director of *Ginger Snaps Unleashed* and *The Chair* "The Cult Film Reader is a great film text book and a fun read." John Landis, Director of *The Blues Brothers*, *An American Werewolf in London* and Michael Jackson's *Thriller* "Excellent overview of the subject, and a comprehensive collection of significant scholarship in the field of cult film. Very impressive and long overdue." Steven Rawle, York St John University, UK Whether defined by horror, kung-fu, sci-fi, sexploitation, kitsch musical or 'weird world cinema', cult movies and their global followings are emerging as a distinct subject of film and media theory, dedicated to dissecting the world's unruliest images. This book is the world's first reader on cult film. It brings together key works in the field on the structure, form, status, and reception of cult cinema traditions. Including work from key established scholars in the field such as Umberto Eco, Janet Staiger, Jeffrey Sconce, Henry Jenkins, and Barry Keith Grant, as well as new perspectives on the gradually developing canon of cult cinema, the book not only presents an overview of ways in which cult cinema can be approached, it also re-assesses the methods used to study the cult text and its audiences. With editors' introductions to the volume and to each section, the book is divided into four clear thematic areas of study – The Conceptions of Cult; Cult Case Studies; National and International Cults; and Cult Consumption – to provide an accessible overview of the topic. It also contains an extensive bibliography for further related readings. Written in a lively and accessible style, The Cult Film Reader dissects some of the biggest trends, icons, auteurs and periods of global cult film production. Films discussed include *Casablanca*, *The Rocky Horror Picture Show*, *Eraserhead*, *The Texas Chainsaw Massacre*, *Showgirls* and *Ginger Snaps*. Essays by: Jinsoo An; Jane Arthurs; Bruce Austin; Martin Barker; Walter Benjamin; Harry Benshoff; Pierre Bourdieu; Noel Carroll; Steve Chibnall; Umberto Eco; Nezih Erdogan; Welch Everman; John Fiske; Barry Keith Grant; Joan Hawkins; Gary Hentzi; Matt Hills; Ramaswami Harindranath; J. Hoberman; Leon Hunt; I.Q. Hunter; Mark Jancovich; Henry Jenkins; Anne Jerslev; Siegfried Kracauer; Gina Marchetti; Tom Mes; Gary Needham; Sheila J. Nayar; Annalee Newitz; Lawrence O'Toole; Harry Allan Potamkin; Jonathan Rosenbaum; Andrew Ross; David Sanjek; Eric Schaefer; Steven Jay Schneider; Jeffrey Sconce; Janet Staiger; J.P. Telotte; Parker Tyler; Jean Vigo; Harmony Wu

Opening the Black Box

Closed Circuit Television (CCTV) cameras are a prominent, if increasingly familiar, feature of urbanism. They symbolize the faith that spatial authorities place in technical interventions for the treatment of social problems. CCTV was principally introduced to sterilize municipalities, to govern conducts and to protect properties. Vast expenditure has been committed to these technologies without a clear sense of how precisely they influence things. CCTV cameras might appear inanimate, but *Opening the Black Box* shows them to be vital mediums within relational circulations of supervision. The book principally excavates the social relations entwining the everyday application of CCTV. It takes the reader on a journey from living beneath the camera, to working behind the lens. Attention focuses on the labour exerted by camera operators as they source and process distanced spectacles. These workers are paid to scan monitor screens in search of disorderly vistas, visualizing stimuli according to its perceived riskiness and/or allurements. But the projection of this gaze can draw an unsettling reflection. It can mean enduring behavioural extremities as an impotent witness. It can also entail making spontaneous decisions that determine the course of justice. *Opening the Black Box*, therefore, contemplates the seductive and traumatic dimensions of monitoring telemediated 'riskscapes' through the prism of camera circuitry. It probes the positioning of camera operators as 'vicarious' custodians of a precarious social order and engages their subjective experiences. It reveals the work of watching to be an ambiguous practice: as much about managing external disturbances on the street as managing internal disruptions in the self.

Understanding Media Users

Understanding Media Users: From Theory to Practice focuses on the blurred concept of the "active audience" at the core of media studies. Examines the relationship between media and audiences by one of the world's leading media scholars provides a history of media effects' and an overview of the

current analytical approaches that constitute media reception theory charts some of the most important interfaces of media reception and interaction - TV, film, the Internet, advertising, journalism, and tourism studies concludes with additional insights into the future of media reception in a global age

Controversial Images

Offering a series of case studies of recent media controversies, this collection draws on new perspectives in cultural studies to consider a wide variety of images. The book suggests how we might achieve a more subtle understanding of controversial images and negotiate the difficult terrain of the new media landscape.

Watching Sympathetic Perpetrators on Italian Television

This book offers the first comprehensive study of recent, popular Italian television. Building on work in American television studies, audience and reception theory, and masculinity studies, *Sympathetic Perpetrators and their Audiences on Italian Television* examines how and why viewers are positioned to engage emotionally with—and root for—Italian television antiheroes. Italy's most popular exported series feature alluring and attractive criminal antiheroes, offer fictionalized accounts of historical events or figures, and highlight the routine violence of daily life in the mafia, the police force, and the political sphere. Renga argues that Italian broadcasters have made an international name for themselves by presenting dark and violent subjects in formats that are visually pleasurable and, for many across the globe, highly addictive. Taken as a whole, this book investigates what recent Italian perpetrator television can teach us about television audiences, and our viewing habits and preferences.

The Routledge Companion to Screen Music and Sound

The Routledge Companion to Screen Music and Sound provides a detailed and comprehensive overview of screen music and sound studies, addressing the ways in which music and sound interact with forms of narrative media such as television, videogames, and film. The inclusive framework of "screen music and sound" allows readers to explore the intersections and connections between various types of media and music and sound, reflecting the current state of scholarship and the future of the field. A diverse range of international scholars have contributed an impressive set of forty-six chapters that move from foundational knowledge to cutting edge topics that highlight new key areas. The companion is thematically organized into five cohesive areas of study: *Issues in the Study of Screen Music and Sound*—discusses the essential topics of the discipline *Historical Approaches*—examines periods of historical change or transition *Production and Process*—focuses on issues of collaboration, institutional politics, and the impact of technology and industrial practices *Cultural and Aesthetic Perspectives*—contextualizes an aesthetic approach within a wider framework of cultural knowledge *Analyses and Methodologies*—explores potential methodologies for interrogating screen music and sound. Covering a wide range of topic areas drawn from musicology, sound studies, and media studies, The Routledge Companion to Screen Music and Sound provides researchers and students with an effective overview of music's role in narrative media, as well as new methodological and aesthetic insights.

MediaMaking

Taking a unique approach to the study of mass communication and cultural studies, MediaMaking is a volume that presents the current knowledge about the relationship between media, culture, and society. What sets this volume apart from competing texts is the approach taken and the distinguished scholarship. Rather than examining each major medium separately (newspapers, books, magazines, radio, television, film), the authors contend that mass communication cannot be studied apart from the other institutions in society and the other dimensions of social life—each is shaping and defining the other. They hold that media can only be understood in relation to their context—institutional, economic, social, cultural, and historical. As such, this book explores the variety of ways in which the media are involved in our social lives. The authors explore the different relationships between the media and the systems of social value and social differences that organize power in contemporary society. They examine how the media are reproduced and consumed and what they produce in turn. Theoretically and analytically organized with sections on media's relation to behavior, politics, media effects, the public, globalization, organizations, meaning, and ideology, this text offers students a more comprehensive understanding of the nature of media communication processes—an absolutely necessary part of understanding contemporary life.

Ethics and Media Culture: Practices and Representations

Ethics and Media Culture straddles the practical and ethical issues of contention encountered by journalists. The book's various contributors cover a diversity of issues and viewpoints, attempting to broaden out the debates particularly in relation to Journalism Studies, Cultural Studies, Sociology of Culture and Communications, Philosophy and History. The debate concerning media ethics has intensified in recent years, fuelled mainly by the standards of journalist and media practices. The role of practitioners has taken centre-stage as concerns over what constitutes ethical, and therefore socially acceptable practice and behaviour, by the public, practitioners and intellectuals alike. The discursive relationship between the production and consumption of information is central to the debate regarding moral conduct, particularly in light of the commercialisation of the media. Considering that media institutions operate in a climate of intense competition, the value of information and its corresponding quality have begun to be critically assessed in terms of ethical understanding. A degree of open-endedness is maintained in discussions throughout this book, which is intended to engage the reader with the issues raised and determine their own conclusions.

Violence And The Media

Why is there so much violence portrayed in the media? What meanings are attached to representations of violence in the media? Can media violence encourage violent behaviour and desensitize audiences to real violence? Does the 'everydayness' of media violence lead to the 'normalization' of violence in society? Violence and the Media is a lively and indispensable introduction to current thinking about media violence and its potential influence on audiences. Adopting a fresh perspective on the 'media effects' debate, Carter and Weaver engage with a host of pressing issues around violence in different media contexts - including news, film, television, pornography, advertising and cyberspace. The book offers a compelling argument that the daily repetition of media violence helps to normalize and legitimize the acts being portrayed. Most crucially, the influence of media violence needs to be understood in relation to the structural inequalities of everyday life. Using a wide range of examples of media violence primarily drawn from the American and British media to illustrate these points, Violence and the Media is a distinctive and revealing exploration of one of the most important and controversial subjects in cultural and media studies today.

Holy Terror

The authors of religious scriptures had little difficulty enhancing sacred narratives with the rhetoric of violence. The phenomenon continues in the habitual linkage of violence and religion in contemporary film, music and literature. 'Holy Terror' brings together scholars of religious studies, biblical studies, film studies and sociology to examine the social function of violence in popular discourse. The book questions how violent rhetoric shapes belief and values, how audience empathy with violent protagonists can be understood, and the significance of the association of violence with particular religious groups and ideas. A range of phenomena are analysed, including terrorism in Scripture, apocalyptic texts in film and violence in sport.

Realism and Popular Cinema

Compares *Once were warriors* with other films that have similar themes.

Screenwriters and Screenwriting

Screenwriters and Screenwriting is an innovative, fresh and lively book that is useful for both screenwriting practice and academic study. It is international in scope, with case studies and analyses from the US, the UK, Australia, Japan, Ireland and Denmark. The book presents a distinctive collection of chapters from creative academics and critical practitioners that serve one purpose: to put aspects of screenwriting practice into their relevant contexts. Focusing on how screenplays are written, developed and received, the contributors challenge assumptions of what 'screenwriting studies' might be, and celebrates the role of the screenwriter in the creation of a screenplay. It is intended to be thought provoking and stimulating, with the ultimate aim of inspiring current and future screenwriting practitioners and scholars.

Visions and Visionaries in Contemporary Austrian Literature and Film

Visions and Visionaries is an apt title for this volume of essays on contemporary Austrian literature and film, because this collection offers insightful discussions of a gallery of significant authors and cultural figures. It also investigates important issues of style and genre, and portrays questions of Austrian identity and culture in rich contexts of recent literary and multi-media developments, cross-cultural interactions, and historical forces. This book encompasses relevant trends and notions from the past - especially the complexities of lingering effects of the Nazi era - along with issues of the future - in particular the present and anticipated interactions of culture and cyberspace. The essays are enhanced by poems by Evelyn Schlag and Gerhard Kofler.

Media Psychology

Media Psychology examines the impact that 21st century media use has on human behavior, from teenage crushes on pop stars to soap fandom in adulthood. It brings together North American communication research with European media research in a variety of disciplines--psychology, sociology, communication and media studies--and in doing so, maps out the territory for media psychology. David Giles argues that psychologists have been guilty of ignoring the influence of the media over the last century, seeing it at best as a minor nuisance that will eventually go away. However, with the increasing prevalence of new electronic forms of mass communication, the media seem to have a greater influence than ever over our daily lives. In this book, Dr. Giles tackles the traditional topics of media psychology--sex, violence, advertising--along with sections on developmental aspects of media influence and the psychology of the audience. He also examines a number of specific media genres--news, sports, soaps, and the increasingly popular audience participation media, such as "reality" and "lifestyle" television. In addition, he asks what light psychology can shed on the popularity of these genres and the response of their audiences. Finally, there are chapters on the increasing influence of the Internet and on the representation of psychology and psychologists themselves in the media.

Continuum Guide to Media Education

Presented in an A-Z format this is an authoritative guide to media education in all its aspects.

Film – An International Bibliography

Kommentierte Bibliografie. Sie gibt Wissenschaftlern, Studierenden und Journalisten zuverlässig Auskunft über rund 6000 internationale Veröffentlichungen zum Thema Film und Medien. Die vorgestellten Rubriken reichen von Nachschlagewerk über Filmgeschichte bis hin zu Fernsehen, Video, Multimedia.

The Aesthetics of Violence in Contemporary Media

The topic of violence in the media seems as inundated as can be. Countless studies and research projects have been conducted, mostly to show its negative effects on society. What Gwynneth Symonds proposes, though, takes this significant topic one step further: studying the aesthetics of media violence. By defining key terms like the 'graphic' nature and 'authenticity' of violent representations, and discussing how those definitions are linked to actual violence outside the film and television screen, Symonds broadens the arena of study. Engagingly written, *The Aesthetics of Violence in Contemporary*

Media fills an important gap. Symonds uses existing studies for the empirical audience reception data, together with discussions of the different representations of violence to look at violence in the media as an art form in of itself. By looking at *The Simpsons*, *Bowling for Columbine* and Norma Khouri's *Forbidden Love*, just to name a few, Symonds cross-analyzes violence in multiple media to see their affective role in audience reception - an important aspect when discussing media. The book strikes a balance between the readers' need to see how theory matches what actually happens in the texts in question and the demands of a theoretical overview.

Violence and American Cinema

First Published in 2001. Routledge is an imprint of Taylor & Francis, an informa company.

Children and Media Violence

This yearbook compiles information on research findings on children and youth and media violence, as seen from the perspective of the United Nations (UN) Convention on the Rights of the Child. The thematic focus of the yearbook is on the influence of children's exposure to media violence. Section 1 of the yearbook, "Children and Media on the UN and UNESCO Agendas," includes articles on the significance of the UN Convention on the Rights of the Child. Section 2, "Children and Violence on the Screen: Research Articles," includes articles on U.S. television violence and children, the nature and context of violence on American television, and media violence in Japan, Australia, New Zealand, Israel, Europe, and Argentina. Section 3, "Children's Media Situation: Research Articles," contains articles describing children's media access and use in various parts of the world, including Asia, China, Australia, South Africa, and Belgium. Section 4, "Media in the World," provides statistics on children and the media worldwide. Section 5, "Children in the World," details demographic indicators for children worldwide. Section 6, "Children's Participation in the Media: Some Examples," describes examples of positive child participation in the media production process. Section 7 contains international declarations and resolutions regarding children and the media. Section 8 discusses regulations and measures as a basis for building television policy. A bibliography containing approximately 300 references on children and media violence published after 1970 completes the yearbook. (KB)
