Tiger I im Einsatz

Scores of unique photos of Tiger tanks Intricate and richly colored drawings, with special focus on markings and insignia Accompanying text lists units' combat strengths, equipment, commanders, and engagements By the end of World War II, the dreaded Tiger tank had achieved mythical, almost mystical status. In this much-sought-after volume on the Wehrmacht's numbered Tiger units, Wolfgang Schneider tells--in pictures--the story of these renowned tanks. Hundreds of photos depict Tigers in all situations and terrain, and a section of painstakingly detailed drawings brings the tanks to life in the metallic grays, snow whites, desert tans, and forest greens and browns that colored them. Modelers and buffs alike will delight in this impressive collection.

Tigers in Combat

This detailed history of the Tiger Company of Nazi Germany's notorious "Death's Head" panzer division of the Waffen-SS covers the armored combat at Kursk, Warsaw, and other battles on the Eastern Front. Based on after-action reports, war diaries, and personal accounts from veterans, this all-encompassing title includes numerous detailed photos of Tiger tanks and the men who crewed them. Essential reference for modelers, historians, armor fans, and World War II enthusiasts.

Das Tiger-Release Java 5 im Einsatz

WWII began with a metallic roar as the German Blitzkrieg raced across Europe, spearheaded by the most dreaded weapon of the 20th century: the Panzer. No German tank better represents that thundering power than the infamous Tiger, and Otto Carius was one of the most successful commanders to ever take a Tiger into battle, destroying well over 150 enemy tanks during his incredible career.

Tiger

The Tiger I tank, probably the most famous German armoured vehicle of the Second World War, might have been a war-winning, break-through weapon if it had been produced in sufficient numbers and if it had been introduced earlier on the Eastern Front, before the balance of strength had tipped towards the Soviet Union. At the Battle of Kursk there were not enough Tigers to make a decisive difference and thereafter the Tiger was forced to play a mainly defensive role as the Wehrmacht struggled to withstand the advances of the Red Army. And it is this period in the Tiger tank's short history that Dennis Oliver concentrates on in this, his third book on the Tiger in the TankCraft series. He uses archive photos and extensively researched colour illustrations to examine the tanks and units of the German army's heavy panzer battalions. A large part of the book showcases available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeller needs to recreate an accurate representation of the Tigers of 1943.

The first comprehensive study of the legendary Panzer commander. Though there have been numerous articles on Wittmann, none have come close to understanding the scope of his life and combat experiences. Wittmann's military exploits stand out from all the rest, as his Sturmgeschutz III and Tiger I crews succeeded in destroying 138 enemy tanks and 132 anti-tank guns and field artillery pieces. Gary Simpson conducted extensive research, travel, and interviews to uncover the true facts and situations that Michael Wittmann encountered on the battlefields of both the eastern and western fronts.

The Combat History of Schwere Panzer-Abteilung 507

Accounts of what it was like to command a tank in combat. Contains maps, official documents, newspaper clippings, and orders of battle. Volume Two follows Michael Wittmann and his unit into Normandy to defend against the Allied invasion. A week after D-Day, Wittmann achieved his greatest success. On June 13, 1944, near Villers Bocage, the panzer ace and his crew attacked a British armored unit, single-handedly destroying more than a dozen tanks and preventing an enemy breakthrough. The exploit made Wittmann a national hero in Germany and a legend in the annals of war. He was killed two months later while attempting to repulse an Allied assault, but the book continues beyond his death until the Leibstandarte's surrender.

Tigers in the Mud

The German Tiger I and Tiger II (known to the Allies as the 'King Tiger' or 'Royal Tiger') were the most famous and formidable heavy tanks of the Second World War. In their day their awesome reputation inspired such apprehension among Allied soldiers that the weaknesses of these brilliant but flawed designs tended to be overlooked. Anthony Tucker-Jones, in this illustrated history, tells the story of their conception and development and reconsiders their operational history, and he dispels the legends and misunderstandings that have grown up around them. The Tigers were over-engineered, required raw materials that were in short supply, were time-consuming to manufacture and difficult to recover from the battlefield. Only around 1,300 of the Tiger I and fewer than 500 of the Tiger II were produced, so they were never going to make anything more than a local impact on the outcome of the fighting. Yet the myth of the Tigers, with their 88mm guns, thick armour and brutal profiles, has grown over time to the extent that they are regarded as the deadliest tanks of the Second World War. Anthony Tucker-Jones's expert account of these remarkable fighting vehicles is accompanied by a series of colour plates showing the main variants of the designs and the common ancillary equipment and unit markings. Anthony Tucker-Jones is a prolific writer on the history of fighting vehicles and armoured warfare. He has also written extensively on military affairs and terrorism. After a career in the intelligence

community, he became a freelance defence writer and military historian. His most recent books are Armoured Warfare on the Eastern Front, Armoured Warfare in the North African Campaign, Armoured Warfare in the Battle for Normandy, The Kalashnikov in Combat and The Soviet-Afghan War.

Tiger 1

The most famous tank of World War II, the Tiger was a monster of a machine that dominated the battlefields of Europe and beyond. Originally conceived in response to the German Army's experience fighting British tanks in western Europe and North Africa, the Tiger cemented its reputation of near invincibility during the savage battles of the Eastern Front. This is a complete illustrated guide to one of the world's most famous fighting vehicles, exploring its history, its strengths and weaknesses and its combat performance as it duelled against the best the Allies had to give. Drawing on a wealth of research, detailed illustrations and contemporary photographs, this book reveals how this remarkable tank became an icon of military history.

Tigers in Normandy

This book is the second in a series that will delve in to the inner workings of Germany's most fearsome panzers of the Second World War, the Tiger and Tiger II. There are many books already in publication that deal with various aspects of the Tiger series of tanks but few include more than minimal biographical information of the men who crewed these battlefield behemoths. Based mainly on interviews, personal diaries, and recollections, the series will present to the reader the German Tiger and King Tiger crewmen as soldiers who had the opportunity to serve as a member of a crew and unit that fielded an extraordinary and deadly weapon. The series will include all levels of soldiers from the Tiger-abteilung commanders, down to the drivers, loaders, gunners, and radio-operators. As with the first book in this series covering the experiences of Alfred Rubbel, this second book is strictly the story of one man: Horst Krönke. The story combines the experiences of Krönke with approximately 400 photographs (most which are unpublished), hand-drawn maps, and original documents, to tell the story of a veteran of Germany's elite panzerwaffe and feared Tiger tanks. His initial experience was in training with Panzer Ersatz Abteilung 5. From there he was assigned to Panzer Regiment 6, of the 3rd Panzer Division and experienced the opening of the war in Russia. Krönke was in action on the Eastern Front through the end of 1942 at which time he was sent back to Germany to attend officer cadet and then officer's schools. Upon his return to the front and Panzer Regiment 6 he was sidetracked by an old comrade and was incorporated into schwere Panzer Abteilung 503. At that point, Horst was introduced to the new Tiger tank and served with a Tiger unit, transferring to schwere Panzer Abteilung 505 to serve with his brother, until the end of the war.

Tiger Tanks at War

'May the army of millions of dead of all nations bear witness to humanity for the hope that future generations may learn to discard war as the best way to resolve their differences.' - Helmut Schneider
This is the little-known story of Heavy Panzer (Tiger) Battalion 507 told through the recollections of the men who fought with the unit. The book was conceived during a reunion of the '507' at Rohrdorf in 1982, where it was agreed to set up an editorial committee under Helmut Schneider, himself a veteran of the battalion, to search for as many survivors of the unit as possible and gather their reminiscences. The resulting account is a treasure trove of first-hand material, from personal memories, diary entries and letters to leave passes, wartime newspaper cuttings, Wehrmacht bulletins and more than 160 photographs. The account follows the unit from its formation in 1943 and the catastrophic events on the Eastern Front, through battles on the Western Front and engagements against the American 3rd Armoured Division to the confusion of retreat, panic-stricken flight and Soviet captivity in the closing

stages of the war. Honest and unflinching, this remarkable collection of autobiographies offers a glimpse into life in Hitler's panzer division and is a stark testimony of a generation that sacrificed its best years to the war. This is the first English-language translation of the work.

Ziel dieses verhaltenstherapeutischen Trainings ist es, sozial unsicheren Kindern mehr Selbstbewusstsein zu vermitteln, Vermeidungstendenzen abzubauen, neue praktische Handlungsstrategien aufzubauen und den Einsatz vorhandener Kompetenzen in sozialen Situationen zu fördern. Das Training ist für Jungen und Mädchen im Alter zwischen fünf und zehn Jahren konzipiert und bei Sozialer Unsicherheit, Sozialer Phobie, Störung mit sozialer Ängstlichkeit und Störung mit Trennungsangst einsetzbar. Das Trainingsprogramm unterscheidet sich von bisherigen Therapieprogrammen durch den Einsatz des «Tigers» als Identifikationsfigur und Modell. In zwei Einzelstunden und neun Gruppenstunden üben die Kinder gezielt selbstsicheres Verhalten ein. Zahlreiche Arbeitsmaterialien und Beispiele erleichtern die Umsetzung des Trainings in der Praxis. Die Neuauflage erläutert zudem, wie das Tiger-Training im Einzelsetting angewendet werden kann und liefert die Arbeitsmaterialien zum direkten Ausdrucken auf einer CD-ROM.

Michael Wittmann and the Waffen SS Tiger Commanders of the Leibstandarte in World War II

During the Second World War Tiger tank crews had to be trained as quickly and effectively as possible. To assist in this process General Heinz Guderian authorised the publication of the Tigerfibel, the illustrated manual which was issued to Tiger I crews from 1943 onwards. This highly unorthodox publication was full of risqu  drawings and humorous illustrations and was designed to convey complex battlefield instructions in a simple and memorable manner.??This unique primary source has now been translated into English by Emmy Award winning historian Bob Carruthers. It makes for indispensable reading for anyone interested in tank warfare in World War II. The manual contains everything the reader could ever wish to know concerning how the crews were instructed to handle the Tiger I under combat conditions. The Tigerfibel contains the original German publication with a complete English translation and a new overview and introduction. The Tigerfibel contains detailed instructions on aiming, firing, ammunition and close combat. There are extensive sections on maintenance, driving, radio operation and the essentials of commanding a Tiger I in combat.??This priceless information is now being made available to a wider English speaking audience as an electronic publication for the first time. Interesting and highly accessible, the Tigerfibel is essential and rewarding reading for all readers interested in the history of this famous tank.??This book is part of the 'Hitler's War Machine' series, a new military history range compiled and edited by Emmy Award winning author and historian Bob Carruthers. The series draws on primary sources and contemporary documents to provide a new insight into the true nature of Hitler's Wehrmacht.??The series consultant is David Mcwhinnie creator of the award winning PBS series 'Battlefield'.

Tiger in Combat

One of the most feared weapons of World War II, the Tiger tank was a beast of a machine which dominated the battlefields of Europe with its astonishing size, speed and firepower, which continues to fascinate more than 70 years after it was first designed. Revealing its design and development history, Thomas Anderson draws upon original German archival material to tell the story of the birth of the Tiger. He then analyzes its success on the battlefield and the many modifications and variants that also came into play. Illustrated throughout with rare photographs and drawings, this is a unique history of what is easily the most famous tank ever produced.

Tiger Tank

An in-depth overview of these fearsome heavy tanks, including photos, illustrations, and modeling information. Tiger tanks were among the most-feared fighting vehicles of the Second World War. They gained almost legendary status—yet they never fulfilled their potential, because they were not produced in sufficient numbers and the tide of the war had turned against the German army by the time they were introduced. Often they were deployed in difficult circumstances and in defensive battles, struggling

against the odds. Nowhere was this truer than in western Europe during the Allied advance across France and into Germany, and it is the Tigers of this phase of the war that Dennis Oliver portrays in his third volume on the Tiger in the TankCraft series. Using archive photos and extensively researched color illustrations, he examines the Tiger tanks and units of the German Army and Waffen-SS heavy panzer battalions that struggled to resist the onslaught of Allied armor and air attacks during the last days of the conflict. A key section of his book displays available model kits and aftermarket products, complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeler needs to recreate an accurate representation of these historic tanks.

By the first weeks of 1945, the Eastern Front had been pushed back to the Carpathian mountain passes in the south and Warsaw on the Vistula River in the center, while in the north, the German army was fighting in East Prussia. The Wehrmacht's armored and mobile formations were now employed exclusively as fire brigades, rushed from one crisis to the next as the Red Army pushed inexorably westward. Critical to the German defense were the army's heavy Panzer battalions whose Tiger tanks, with their 8.8 cm guns, were almost invincible on the open plains of central Europe. In his latest book in the TankCraft series, Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Tiger tanks and units of the German Army and Waffen-SS heavy Panzer battalions that struggled to resist the onslaught of Soviet armor during the last days of the conflict which culminated in the battle for Berlin. -Scores of unique photos of Tiger tanks -Intricate and richly colored drawings, with special focus on markings and insignia -Accompanying text lists units' combat strengths, equipment, commanders, and engagements By the end of World War II, the dreaded Tiger tank had achieved mythical, almost mystical status. In this much-sought-after volume on the Wehrmacht's numbered Tiger units, Wolfgang Schneider tells--in pictures--the story of these renowned tanks. Hundreds of photos depict Tigers in all situations and terrain, and a section of painstakingly detailed drawings brings the tanks to life in the metallic grays, snow whites, desert tans, and forest greens and browns that colored them. Modelers and buffs alike will delight in this impressive collection.

Mutig werden mit Til Tiger

The German Tiger I—officially known as the Panzerkampfwagen VI Tiger I Auk. E (Skiffs 181)—was probably the most feared battle tank of World War II. Its invincibility lay in its main gun and heavy defensive armor. The Tiger's primary armament was the deadly 88mm Kiwi 36 L/56 gun that was the

most powerful antitank gun then in use by any army, capable of penetrating 112mm of armor plate from a range of 1400 meters. The Tiger I also had the toughest armor of any German tank—its frontal armor plate measured 100mm thick. Using the successful approach and format adopted for the Spitfire and Lancaster manuals, Tiger Tank Manual gives an insight into acquiring, owning, and operating one of these awesome fighting vehicles. It also gives an idea through personal recollections of what it was like to command a Tiger in war and what it felt like to be on the receiving end of its 88mm gun.

When the German Wehrmacht swarmed across Eastern Europe, an elite corps followed close at its heels. Along with the SS and Gestapo, the Ordnungspolizei, or Uniformed Police, played a central role in Nazi genocide that until now has been generally neglected by historians of the war. Beginning with the invasion of Poland, the Uniformed Police were charged with following the army to curb resistance, pacify the countryside, patrol Jewish ghettos, and generally maintain order in the conquered territories. Edward Westermann examines how this force emerged as a primary instrument of annihilation, responsible for the murder of hundreds of thousands of the Third Reich's political and racial enemies. In Hitler's Police Battalions he reveals how the institutional mindset of these "ordinary policemen" allowed them to commit atrocities without a second thought. To uncover the story of how the German national police were fashioned into a corps of political soldiers, Westermann reveals initiatives pursued before the war by Heinrich Himmler and Kurt Dalwege to create a culture within the existing police forces that fostered anti-Semitism and anti-Communism as institutional norms. Challenging prevailing interpretations of German culture, Westermann draws on extensive archival research—including the testimony of former policemen—to illuminate this transformation and the callous organizational culture that emerged. Purged of dissidents, indoctrinated to idolize Hitler, and trained in military combat, these police battalions—often numbering several hundred men—repeatedly conducted actions against Jews, Slavs, gypsies, asocials, and other groups on their own initiative, even when they had the choice not to. In addition to documenting these atrocities, Westermann examines cooperation between the Ordnungspolizei and the SS and Gestapo, and the close relationship between police and Wehrmacht in the conduct of the anti-partisan campaign of annihilation. Throughout, Westermann stresses the importance of ideological indoctrination and organizational initiatives within specific groups. It was the organizational culture of the Uniformed Police, he maintains, and not German culture in general that led these men to commit genocide. Hitler's Police Battalions provides the most complete and comprehensive study to date of this neglected branch of Himmler's SS and Police empire and adds a new dimension to our understanding of the Holocaust and the war on the Eastern front.

Tiger I and Tiger II Tanks

Probably the most famous tank of World War II, the Tiger I was originally conceived in 1941 in response to the German Army's experience in fighting British tanks and anti-tank guns in Western Europe and the North African desert. Following the invasion of Russia, the appearance of the Soviet T-34 and KW tanks lent a further impetus to the programme and 1,350 Tigers were produced between August 1942 and August 1944. The Tiger has proved to be one of the most popular modelling subjects of all time, with a vast and ever-increasing range of kits, aftermarket products and references available. This title

is a detailed modelling guide on the '121', s.Pz.Abt. 501, Tunisia 1943 in 1/35 scale. This guide forms part of Osprey Modelling 37 Modelling the Tiger I also available as an ebook.

Tiger I and Tiger II Tanks

A fully illustrated guide to the German Tiger I tank and its operations in the field by the renowned expert on WWII armored vehicles. At Hitler's insistence, the first Tiger I tanks drove into action in Tunisia in December 1942. Despite their lack of reliability and the small number deployed, they quickly gained a fierce reputation. With its heavy armor and 88mm gun, the Tiger I outclassed all the Allied tanks then in service. Beyond their deployment in North Africa, they also operated in Sicily and Italy between 1943 and 1945. In his second volume in the TankCraft series on the Tiger, Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Tiger tank and the German army units that first took them into combat. Perfect for model enthusiasts, Tiger I showcases available model kits and aftermarket products. It also includes a gallery of beautifully constructed and painted models in various scales. Technical details, as well as modifications introduced during production and in the field, are also examined providing everything the modeler needs to recreate an accurate representation of the tanks.

Tiger I & Tiger II Tanks

The German heavy tank Panzerkampfwagen VI Tiger is a vehicle known even to laymen. It was heavily armored and armed with a deadly 88 mm gun. Despite their legend, the Tigers were plagued by several technical problems, especially with propulsion, which often did not allow them to fully use their combat potential. The main motivator for designing the Pz.Kpfw. VI was eager to install a Flak 36 anti-aircraft gun 36 caliber 88 in the turret. It was a weapon that could destroy Soviet tanks on long distances. In addition, it was necessary to build a tank able to withstand fire from the T-34/76 guns, which effectively eliminated the German medium tanks Pz.Kpfw. III and IV. A competition for a tank that fulfills these requirements was set, and in April 1942 the prototypes of Porsche and Henschel went for the final duel. After a series of tests, the tank developed by Henschel proved to be better. It received the designation Sd.Kfz. 181 Pz.Kpfw. VI Tiger Ausf. H1 and went into production at the plants in Kassel-Mittelfeld and Wegmann AG. The tank was plagued by many teething problems, and as a result, many subsequent construction changes were introduced in the course of production. Considering the periods of their implementation, it is possible to extract Tigers of early production series, vehicles after modification and vehicles of late production series.

Tigers in Combat Vol 1

The Tiger tank endures today as the greatest legend of the German armored forces of World War II. Jean Restayn's text is backed up by 250 photographs, most of them never published before, and 50 color plates showing markings, insignia and camouflage schemes. Also included is a complete operational history and order of battle for all Eastern Front units, both Wehrmacht and Waffen-SS, who were equipped with the Tiger.
