Organic Chemistry

This revised edition presents reaction mechanisms in the context of real functional group chemistry and emphasizes the biological, environmental and medical applications of organic chemistry. The new edition maintains the same quality and approach that made prior editions so popular. Includes detailed explanations of mechanisms, structure and theory with careful attention given to the use of curved arrows. Features many more examples of organic acid-base reactions and an extended discussion of aromatic compounds.

On the cover of this book is a Pacific yew tree, found in the ancient forests of the Pacific Northwest. The bark of the Pacific yew tree produces Taxol, found to be a highly effective drug against ovarian and breast cancer. Taxol blocks mitosis during eukaryotic cell division. The supply of Taxol from the Pacific yew tree is vanishingly small, however. A single 100-year-old tree provides only about one dose of the drug (roughly 300 mg). For this reason, as well as the spectacular molecular architecture of Taxol, synthetic organic chemists fiercely undertook efforts to synthesize it. Five total syntheses of Taxol have thus far been reported. Now, a combination of isolation of a related metabolite from European yew needles, and synthesis of Taxol from that intermediate, supply the clinical demand. This case clearly demonstrates the importance of synthesis and the use of organic chemistry. It's just one of the many examples used in the text that will spark the interest of students and get them involved in the study of organic chemistry!

Introduction to Organic Chemistry

NDA/ NA 11 year Topic-wise Solved Papers (2006 - 2016) consists of last 11 years (both April and August papers) from 2006 - 2016 solved papers of Mathematics and General Ability Test distributed into 57 topics. In all there are 22 Question papers (2006 April - 2016 August). The paper I – Mathematics is distributed into 24 topics whereas the Paper II General Ability Test is divided into 2 parts – English and General Knowledge. English is divided into 9 topics whereas General Knowledge is divided into 7 Units – Physics, Chemistry, Biology, History, Polity, Geography and General Awareness, which are further divided into 24 topics. The book contains 5800 MCQ's from the above 22 Question papers. The Mathematics section contains 2600+ MCQ's whereas the General Ability section contains 3200 MCQ's. The strength of the book lies in the originality of its question papers and Errorless Solutions. The solution of each and every question is provided in detail (step-by-step) so as to provide 100% concept clarity to the students.
