Beginners Guide to Conquering an Ironman Triathlon

OK, so you've decided you are going to undertake an Ironman. You have watched a couple a motivational videos on YouTube, you have logged onto the site, entered your details, paid your fee, told everybody you know about it on Facebook and Twitter and have undertaken a sponsorship drive for the charity of your choice. Life is good and you feel good about it. At some point the enormity of what you have signed up for will hit you. It could be when you wake up in the middle of the night for a pee, when you start to read an article on the number of hours the Pro's put into training on a weekly basis or when you attempt your first swim in the pool and struggle to complete ten lengths. Do not panic! As daunting as it feels at this moment in time this is an achievable life changing challenge which will push you to your limits. If you put the right training and preparation in you will stand (or float) at the start line knowing that this is going to be one of the most amazing days of your life. The following Chapters

will take you through planning, executing and recovering in the weeks and months up to your Ironman event. The Chapters are aimed to be succinct and to the point in topics which are notoriously full of differing opinions and supporting scientific proof. The Chapters are based upon my findings during my journey to completing the four Ironman events that I have to date with a lot of reading, picking peoples brains and trial and error. Completing an Ironman is tough and should be given the respect that it deserves in the training and preparation that is made but caution should be taken in not giving the event too much respect in that it becomes crippling in your pursuit of glory.

The Complete Ironman(r)

This is the ultimate official celebration of the world's toughest, most revered endurance event: IRONMAN. For more than 40 years IRONMAN has been, arguably, the toughest athletic competition on the planet, presenting participants with an almost impossible physical challenge: a 2.4- mile swim, 112-mile cycle ride, and 26.2-mile marathon run. Even so, it always attracts thousands of entrants. This unique illustrated book explores every aspect of IRONMAN, from its history and legendary competitors to its major global events, and provides practical advice on how to prepare and succeed at such a demanding challenge. Written by acclaimed IRONMAN expert Bob Babbitt, this book captures the spirit, excitement, and endeavor of this globally respected sports event.

Project Ironman

I have written this book over the course of the last 5 years leveraging the contents as I coach and train for Ironman distance races. There seemed to be a gap to help assist self-coached athletes to pull together the pieces helping them achieve their personal goals in endurance sports. Most books I have read are excellent for helping to define training plans, use of training technologies, sprinkled with a few inspirational stories of how people overcame their challenges to achieve their triathlon goals. The challenge for some of us, myself included, is that technology and the details of the workouts are only a piece of the puzzle that help us to achieve our goals. They are the needed evils of training for our sport, but what seemed to be missing was a method to pull the information together in a manner that wasn't completely overwhelming. My approach was developed to ensure I had triathlon / work / life balance (and not necessarily in that order!) in an easy-to-understand methodology. Most of us hold down full time jobs and have kids or other family activities at the very least. I have a unique background for this journey with you. I am veteran of many marathons and all Triathlon-length races, including multiple Ironman's. I am an IRONMAN CERTIFIED Coach. I am also a seasoned project manager since the early 90's, and have managed numerous multimillion dollar complex projects. The discipline instilled by project management, with budget, scope, schedule and quality constraints, naturally lent itself to a logical and ordered approach for tackling the Ironman goals. I took my simple approach that I apply to large projects and applied it for endurance sports.

I have trained with and raced with elite athletes and winners from all over the world but I started not knowing what I was doing and was scared to death when I did my first race. I wish I had this book when I started out. I would have saved myself a lot of heart ache and stress! I wrote this to help all triathlon rookies get over their nerves and enjoy this fantastic sport." "Triathlon for beginners" is the start to finish complete guide which covers all the areas of training and racing including: -Where to start - types of races, what you need to know and where to begin -Jargon buster - helping you understand the terms of the sport so you can understand what people are talking about when they say "T1" or "Brick"! -Training rules and techniques -Swimming technique and etiquette -Running technique and how to prevent injury and run faster -Cycling in a pack what to do and what not to do -Transition - how to lay it out, what to bring and how to be effective -Understanding nutrition and why it is key, how best to manage your nutrition and what is best to eat for triathlon training and racing -Race day - what to look out for, how to prepare and what to expect This guide takes you from start to finish so you can feel confident and comfortable when you train and race. Here are some of the comments we have had from readers... I loved this book! I have completed a few triathlons- sprint and Olympic distance. This book really simplified what is important to focus on. There is so much to know and learn that sometimes you feel overwhelmed. It is an easy, entertaining read but packed with good knowledge that made a big difference to my racing. Charlotte Campbell, World Games triathlon gold medallist I wish this was around before! I did a number of Triathlons over the last few years. When I first took it up I had to ask people's advice which at best was disjointed and worst, confusing. I also read some very good stuff on the internet, however this was also disjointed and incomplete. This book would have been ideal, as it puts it all together clearly and concisely. Liam Harrington; sprint triathlete
