Gregg Braden discussing The Gospel of Thomas

When you come to know yourselves, then you will become known, and you will realize that it is you who are the sons of the living Father.

But if you will not know yourselves, you dwell in poverty and it is you who are that poverty.

The potential dangers of AI, including ChatGPT, are discussed, with concerns about fake news and misinformation, as well as the need for ethical guidelines.

The use of facial recognition technology raises concerns about privacy and human rights, as it can be used for both security and control purposes.

The dangers and ethical concerns of AI, including privacy invasion, devaluation of human beings, and biases in AI systems.

The ethical implications of AI and the need for regulation from a Christian perspective.

The impact of AI on children's development and education is concerning, especially in relation to the transhumanist agenda and the undermining of the concept of humanity.
