The European Union and Crisis Management

In the wake of the Balkan wars, the EU has worked hard to close the so-called 'capabilities-expectations gap' in the European Security and Defence Policy (ESDP). With the institution of new political and military structures and procedures, the agreement on principles for consultation and cooperation with other international organizations, the adoption of an *acquis sécuritaire*, and the launching of twenty ESDP operations, the EU has affirmed its operational capacity in ESDP. The proliferation of the EU's institutional and operational mechanisms to manage crises on its doorstep and farther afield has led to a whole series of new legal and policy questions, which were addressed at the 37th edition of the T.M.C. Asser Institute's Colloquium on European Law in 2007. The contributions by leading academics and practitioners to the Asser Colloquium have been expanded and updated in the light of the Lisbon Treaty and are now available in this unique compilation.

The European Union and Conflict Prevention

Since 2001, the prevention of violent conflicts has turned into a priority of the European Union's external policy. In addition to new operational competences developed under the Common Foreign and Security Policy, the European Union is particularly suited to combating the root causes of conflicts spreading throughout the world. It is noteworthy that the Treaty establishing a Constitution for Europe, signed in Rome on 29 October 2004, proposes to insert the prevention of conflicts in the Constitution. In 25 original essays written by both practitioners and scholars from European institutions, international organisations, universities and NGOs, this book proposes to explore and scrutinize the progress achieved by the European Union in the definition of a concrete conflict prevention strategy, as well as the challenges it still faces. In particular, the book dwells on the following issues: the definition of and indicators for conflict prevention; institutional and financial dimensions of conflict prevention; EU instruments for the prevention of violent conflicts; structural conflict prevention and the mainstreaming of conflict prevention into EU policies; and cooperation with other international organisations and other actors, such as NGOs and the private sector.

The European Union and Peacebuilding

With a Foreword by Catherine Ashton, High Representative of the Union for Foreign Affairs and Security Policy/Vice-President of the European Commission Like conflict prevention and crisis management, 'peacebuilding' forms an integral part of the European Union's external policy efforts to break the cycle of conflict, insecurity and poverty. A concept developed in the context of the United Nations, the EU's Lisbon Treaty mentions 'post-conflict stabilisation' among the tasks which the EU is set to perform in the implementation of the Common Security and Defence Policy. The Union's advance in this field has been universally welcomed by peacebuilding actors, especially since the EU's ongoing contributions in financial, technical and logistical terms in post-conflict areas have been couched in an

increasing number of European Security and Defence Policy missions. The proliferation of the EU's institutional and operational mechanisms to build peace in post-conflict environments has led to a whole series of new policy and legal questions, which are addressed by leading practitioners and academics in this unique compilation. Specific to this book: • Contributions take into account the final text of the Lisbon Treaty and the lessons learned from more than twenty military and civilian operations • Addresses policy and legal potential and limits, and outlines the parameters for future decision-making and capacity-building • Combines thematic contributions with concrete case studies, and offers insights into how the EU's peacebuilding tools are implemented in practice

A Responsibility to Assist

This report, written as part of a wider review of human rights in EU foreign policy, describes and assesses the current decision-making structures and procedures for EU military, police and civilian crisis management missions throughout the world. EU interventions or missions in non-member countries are a relatively recent development, and have largely been undertaken to ensure more effective co-ordination of humanitarian, peace-keeping, and peace building efforts by Member States in response to international conflicts and crises - and perhaps also to project the role of the EU as a major actor on the global stage. EU missions may involve the deployment of military forces in peace-keeping or peace enforcement operations, the deployment of military and police personnel in a preventive role or with a view to maintaining public order or controlling criminal activity, or they may involve the provision of civilian support for the rebuilding or redevelopment of the rule of law in countries where governmental structures have broken down. This report examines the incidence of these interventions, as well as their interaction with other bodies such as the UN, NATO, the African Union and voluntary coalitions, and the complex diplomatic and military negotiations leading to particular operations. The focus on assistance reflects the primary responsibility of the EU not to act independently of the UN and other international bodies but to provide support and assistance to the wider international community. The main aim of the report is not to provide a detailed analysis of the success or failure of particular missions, but is to describe the often complex and confusing structures developed over the past decade and to assess the past, present and future of the EU's responsibility to intervene in international crises.

Crisis Management in the European Union

In less than a decade, Europe has witnessed a series of large-scale natural disasters and two major terrorist attacks. Growing concern about the trans-national effects of these incidents has caused the EU Member States to seek more multilateral cooperation. As a result, a system of common arrangements for handling large-scale emergencies or disasters has emerged, which, due to its quick and ad-hoc development, may seem almost impenetrable to newcomers to the field. This book seeks to provide a much-needed overview of disaster and crisis management systems in the EU. It provides a basic understanding of how EU policy has evolved, the EU's mandate, and above all, a concise and hands-on description of the most central crisis management arrangements. Written by some of Europe's main experts and consultants in the field, this book represents a unique and comprehensive source of information for everyone involved or interested in the European Union crisis management system. "This book will quickly become an indispensable resource for two groups: Practitioners will enjoy its accessible and comprehensive style. Academics curious about this emerging field will turn to it for an introductory overview. As someone who closely studies this field, I find the book engaging, detailed, and accurate, and I read every line with great interest. The authors are to be commended for the quality of research that went into this work." Mark Rhinard, Senior Research Fellow at the Swedish Institute of International Affairs (UI)

The Role of EU Agencies in the Eurozone and Migration Crisis

This book provides a wealth of empirical material to understand key aspects of EU governance including its plurality of actors and policy making modes and its functioning during crisis management. Authored by legal scholars and political scientists, it presents new research and insights on the role of EU agencies in the context of the Euro and migration crises. Specifically, the contributions assess why the crises have led to the creation of new EU agencies and what roles these agencies have performed since their inception; how the crisis, notably the migration crisis, has impacted on existing EU agencies; how EU agencies have shaped the policies during and after the crises; and, how the crisis has affected the accountability of EU agencies. This book is essential in understanding the intricacies of EU crisis management and the specific role of EU agencies therein, as well as EU governance more broadly.

The European Union and Global Emergencies

This collection of essays analyses the European Union's involvement in global emergencies from a law and policy perspective. Bringing together leading academics and officials from the European Union institutions, the book offers an expert account of the theoretical and practical issues the EU faces when dealing with global emergencies. The subjects covered are highly topical and include the financial and debt crises, regional security and the fight against terrorism, public health and food scares, human trafficking and energy security.

Accountability in EU Security and Defence

Currently, some 2,500 civilian experts work across Europe, Africa, and Asia in ten ongoing civilian missions launched under the Common Security and Defence Policy (CSDP). Mandates cover a broad range of multidimensional tasks, such as rule of law support, law enforcement capacity building, or security sector reform. Numerous (recent) incidents from the field underscore that there are serious institutional as well as procedural weaknesses and irregularities tied to accountability in these EU peacebuilding missions. This title offers a comprehensive legal analysis and empirical study of accountability concerning the Union's peacebuilding endeavours, also referred to as civilian crisis management. Along with examining the governance credentials of EU peacebuilding, the monograph thoroughly scrutinizes de jure and de facto accountability arrangements of political, legal, and administrative nature existing in the domestic sphere, at EU level, and across levels. With a view to providing for a nuanced picture, the assessment further distinguishes between different accountability finalities and evaluates the appropriateness of existing accountability arrangements in civilian crisis management based on a combination of quantitative and qualitative criteria.

A Single Model of Governance Or Tailored Responses?: Historical, Economic and Legal Aspects of European Governance in the Crisis

Conflict prevention and crisis management has become a key activity for the EU since the creation of the Common Security and Defence Policy in 1999. The rapid growth of this policy area, as well as the number of missions deployed beyond the EU's border raise important questions about the nature of the EU's international role and its contribution to international security. The Contributions to EU Conflict Prevention and Crisis Management analyze European conflict prevention and crisis management in terms of the EU's evolving global role, its institutions and its policies. The volume analyzes the EU's position in relation to the US, the UN and other regional security organizations, and applies three different institutionalist perspectives – historical, rational choice and sociological institutionalism - to explain the increasing institutionalization of EU crisis management. It also critically analyzes the application of EU policies in West Africa, Afghanistan and the Caucasus. Providing a comprehensive analysis of EU crisis management, the volume explores what role EU conflict prevention and crisis management plays in a European and a global context. Offering a comprehensive and original contribution to the literature on EU foreign and security policy, this volume will be of interest to students and scholars of European politics, international relations and security studies.

EU Conflict Prevention and Crisis Management

This innovative and timely consideration of the European Union's crisis response mechanisms brings together scholars from a range of disciplinary backgrounds to examine how and why the EU responds to crises on its borders and further afield. The work is based on extensive fieldwork in – among other places – Afghanistan, Libya, Mali and Iraq. The book considers the construction of crises and how some issues are deemed crises and others not. A major finding from this comparative study is that EU crisis response interventions have been placing increasing emphasis on security and stabilisation and less emphasis on human rights and democratisation. This changes – quite fundamentally – the EU's stance as an international actor and leads to questions about the nature of the European Union and how it perceives itself and is perceived by others.

The EU and crisis response

This discerning book examines the external dimension EU migration and asylum policies in times of crisis. It thoroughly assesses patterns of co-operation in EU migration management with a focus on co-operation with the global south. A key resource for academics and students focussing on EU Law and migration more specifically, this book will also appeal to policy-makers, legal practitioners and international organisation representatives alike.

Constitutionalising the External Dimensions of EU Migration Policies in Times of Crisis

Like early mariners, politicians and officials trying to navigate European foreign policy find themselves in an environment of unpredictable hazards hidden institutional shoals, and legal reefs that can tear the bottom out of a policy. This insightful collection of contrasted studies shines the twin beams of political science and legal analysis into these opaque depths. Practitioners as well as scholars will benefit from the illumination. Nick Witney, European Council on Foreign Relations and Former Chief Executive of the European Defence Agency, UK This collection on EU foreign policy is an attractive one for several reasons: it contains a very nice set of essays on a topic which has loomed large on the European Union agenda for some years, namely the international role of the EU. The chapters are written by a range of interesting and eminent scholars in the field. Most importantly in terms of its distinctive contribution, the book brings together perspectives from law and from political science. This is done in part by including chapters by authors from different disciplines but also by choosing cross-pillar themes and topics such as the European Neighbourhood Policy, EU policy on Kosovo, security and defence policy, as well as more general cross-cutting themes like the idea of coherence, the position of the EU within international organizations, and the approach of the EU to the international legal order. Each of the individual chapters is well worth reading, and the book as a whole is a useful and interesting contribution to the existing literature. Gráinne de Búrca, Harvard Law School, US Written by leading experts, this book focuses on central issues of the foreign policy of the European Union. The issues explored include: how the EU's judges understand its relationship with the international order; the coherence of the Union's external action; the EU's approach to its neighbours; the Common Security and Defence Policy; and, the EU's participation in international organisations. By addressing each topic from a legal, political science and international relations standpoint, this relevant book highlights the different perspectives that these disciplines bring to the central issues of the EU's foreign affairs, and starts a conversation between the respective communities. Scholars and students in European and international law, politics, and international relations will find this book insightful. It will also prove timely for policy-makers in the EU and international organisations, as well as think tanks and non-governmental organisations specialising in European affairs.

The European Union and Global Emergencies

The concept of human security is a new approach to security that focuses on the individual human being and provides policy alternatives to the traditional state-centred view, which considers the state to be the only and ultimate referent of security. Formally introduced into the United Nations system in 1994 the concept's intellectual roots draw from international humanitarian law, human rights and human development, and since its introduction human security has been progressively integrated into the international security discourse. *Mainstreaming Human Security: Policies, Problems, Potential* paints a comprehensive picture of the relevance of the concept of human security in practice in a time of changing security paradigms and a challenging international environment. This volume looks at the practical implications of mainstreaming human security. It focuses on the potential, problems and policies of human security in peace operations and crisis management operations of the United Nations and of the European Union. Topics addressed by the contributors include mainstreaming human rights and human security in peace and crisis management in general and the role of human security in the EU's Common Security and Defence Policy, security sector reform, restorative responses to human rights violations by peacemakers, human security in Serbia and in African peace operations as well as proposals for human security training. The contributions to the book focus equally on mainstreaming human security in the UN and in the EU context. The global issues discussed and conclusions drawn are of relevance for the future of security addressed by peace and crisis management operations all over the world.

European Foreign Policy

The European Union's civilian-military capabilities -- The EU's civilian aspirations -- Basic structures -- General record so far -- Police missions -- Rule of law missions -- Monitoring missions -- Civil

Mainstreaming Human Security in Peace Operations and Crisis Management

Featuring contributions from renowned scholars, *A Companion to European Union Law and International Law* presents a comprehensive and authoritative collection of essays that addresses all of the most important topics on European Union and international law. Integrates the fields of European Union law and international law, revealing both the similarities and differences. Features contributions from renowned scholars in the fields of EU law and international law. Covers a broad range of topical issues, including trade, institutional decision-making, the European Court of Justice, democracy, human rights, criminal law, the EMU, and many others.

EU Civilian Crisis Management

Over the years, human rights have assumed growing importance in the crisis management operations conducted by the EU. At the same time, the geopolitical context of recent years has created operational challenges going well beyond what previous Common Security and Defence Policy (CSDP) civilian crisis management operations had to deal with. This Occasional Paper uses the ongoing CSDP crisis management missions in Afghanistan and in Iraq - EUPOL and EUJUST LEX - as a yardstick for examining operational models chosen for high-risk CSDP civilian crisis management operations, and for assessing the degree to which these models are able to operationally integrate human rights dimensions. The paper seeks to answer the central question of whether the mission models adopted by EUPOL and EUJUST LEX can be considered as compliant with international best practices with regard to mainstreaming, protecting and promoting human rights in the context of civilian crisis response operations. While the paper does not assess per se the missions' overall effectiveness, it evaluates their operational design, and the implications that the chosen mission model has for the internal and external aspects of the missions' human rights activities.

A Companion to European Union Law and International Law

"Part I describes and analyses the ESDP, including all 22 military and civilian crisis management operations launched up to 31 August 2009 as well as developments under the Lisbon Treaty, and briefly discusses the international law issues raised, offering a unique insight into ESDP practice and its legal aspects. Part II examines this practice in the framework of the status and obligations of international organizations under international law: it looks at the legal status and personality of international organizations and of the EU as well as at how international organizations, including the EU, are bound by international obligations. Part III extensively addresses the international law applicable to the conduct of ESDP operations, in particular the law of armed conflict and international human rights law, filling a gap in the literature."--Jacket back cover.

International Law Aspects of the EU's Security and Defence Policy, with a Particular Focus on the Law of Armed Conflict and Human Rights

With a Foreword by Kristalina Georgieva, European Commissioner for International Cooperation, Humanitarian Aid and Crisis Response. Over the last decades natural and man-made disasters have been increasing in terms of frequency, size, number of people affected and material damage caused. There is growing awareness of the importance of adequate national and international legal frameworks for disaster prevention, mitigation and response. The implementation of these frameworks, however, poses serious challenges. This book analyses International Disaster Response Law as developed in recent times and identifies the main existing normative gaps. The authors address the rights

and duties of States in preventing and mitigating disasters, in facilitating access to their territory for humanitarian relief actors, as well as issues related to liability and compensation. Due attention is paid to European Union law governing disaster response (and to its reform in the light of the Lisbon Treaty) and to the main trends in domestic legislation. Human rights obligations are thoroughly examined and the potential relevance of international criminal law is assessed. Additional topics such as the status of relief personnel, the hindrances to the delivery of relief consignments by customs and excise administration, the use of civilian and military defence assets in emergency situations, the mechanisms and procedures available to offer financial support for recovery and rehabilitation, risk insurance, and the issue of corruption during disaster-related activities are specifically addressed. By drawing on the expertise of lawyers, political scientists, economists and humanitarian practitioners, the book promotes much-needed interdisciplinary dialog and sheds light on a largely uncharted field of research. It is therefore essential reading for academics and practitioners in international and EU law, policy makers, civil protection and humanitarian operators and for anyone interested in exploring the legal facets of the international community's response to large-scale calamitous events. Over the last decades natural and man-made disasters have been increasing in terms of frequency, size, number of people affected and material damage caused. There is growing awareness of the importance of adequate national and international legal frameworks for disaster prevention, mitigation and response. The implementation of these frameworks, however, poses serious challenges. This book analyses International Disaster Response Law as developed in recent times and identifies the main existing normative gaps. The authors address the rights and duties of States in preventing and mitigating disasters, in facilitating access to their territory for humanitarian relief actors, as well as issues related to liability and compensation. Due attention is paid to European Union law governing disaster response (and to its reform in the light of the Lisbon Treaty) and to the main trends in domestic legislation. Human rights obligations are thoroughly examined and the potential relevance of international criminal law is assessed. Additional topics such as the status of relief personnel, the hindrances to the delivery of relief consignments by customs and excise administration, the use of civilian and military defence assets in emergency situations, the mechanisms and procedures available to offer financial support for recovery and rehabilitation, risk insurance, and the issue of corruption during disaster-related activities are specifically addressed. By drawing on the expertise of lawyers, political scientists, economists and humanitarian practitioners, the book promotes much-needed interdisciplinary dialog and sheds light on a largely uncharted field of research. It is therefore essential reading for academics and practitioners in international and EU law, policy makers, civil protection and humanitarian operators and for anyone interested in exploring the legal facets of the international community's response to large-scale calamitous events.

The EU Common Security and Defence Policy

This is a collection of works which considers the many different facets of the EU's increasingly important engagement with the world beyond its borders. The Treaty of Lisbon marked a change in the powers and competences endowed on the EU - the contributions to this collection consider both the direct and indirect impact of the Treaty on the contemporary state of EU external relations. The authors are drawn from legal, political science and international relations disciplines and consider innovations or changes brought about by the Treaty itself: the European External Action Service, the roles of the High Representative and President, the collapse of the 'pillar' structure and new competences such as those for foreign investment. Other chapters cover developments which reflect the latest incremental changes upon which the post-Lisbon Treaty arrangements have some bearing, including the COREU network, the transatlantic and neighbourhood relations and the external dimension of 'internal' security. Useful for academics working in the field of EU external relations law and foreign policy, as well as the EU law/politics/European studies market more generally.

International Disaster Response Law

In *The European Union and the Use of Force* Julia Schmidt examines the development and activities of the EU as an emerging international military actor. The author offers a comprehensive analysis of the legal framework for the EU's military crisis management operations.

EU External Relations Law and Policy in the Post-Lisbon Era

The major Commentary on the Treaty on European Union (TEU) is a European project that aims to contribute to the development of ever closer conceptual and dogmatic standpoints with regard to

the creation of a "Europeanised research on Union law". This publication in English contains detailed explanations, article by article, on all the provisions of the TEU as well as on several Protocols and Declarations, including the Protocols No 1, 2 and 30 and Declaration No 17, having steady regard to the application of Union law in the national legal orders and its interpretation by the Court of Justice of the EU. The authors of the Commentary are academics from ten European states and different legal fields, some from a constitutional law background, others experts in the field of international law and EU law professionals. This should lead to more unity in European law notwithstanding all the legitimate diversity. The different traditions of constitutional law are reflected and mentioned by name thus striving for a common framework for European constitutional law.

Alarums and Excursions

In *EU Peacebuilding in Kosovo and Afghanistan: Legality and Accountability* Martina Spornbauer offers a comprehensive account of the EU's peacebuilding toolbox in light of the EU's constitutional architecture under the Treaty of Lisbon.

The European Union and the Use of Force

The most comprehensive introduction to the EU's role in the international system, written by a team of international experts, and incorporating the study of the EU's world role into the wider field of international relations, this book is the key text for anyone wishing to understand the EU's external relations. --

The Treaty on European Union (TEU)

In *The EU and the Security-Development Nexus* Hans Merkert unravels the long-standing commitment of the European Union (EU) to integrate its policies across the security-development nexus.

EU Peacebuilding in Kosovo and Afghanistan

After the adoption of a single monetary policy which commits the European Central Bank to maintaining the euro's purchasing power and price stability in the Eurozone, the European Union is facing a new, but equally fundamental challenge: the implementation in a relatively short time of the so-called "Banking Union". Its purpose is twofold: (1) breaking the link between banking and sovereign risk, with the ultimate goal of achieving full protection of EU savers in the event of a crisis; and (2) ensuring uniformity of credit conditions - which are still too fragmented - within the European banking market, to ensure greater EU integration of the financial system. Starting from the communication in which the European Commission stressed the need for a banking union, this paper intends to explore the complex process towards its establishment by looking at the EU institutional mechanisms and the legal aspects. In particular, the analysis will be based on two building blocks: (1) the Single Supervisory Mechanism, with a single supervisor at the heart of the banking union; and (2) the Single Resolution Mechanism as a new integrated resolution framework and a resolution fund to address the failure of banking institutions. The paper then assesses the next steps for a fully fledged banking union, necessary in order for this new instrument to lay the foundations for a genuine Economic and Monetary Union, thereby fostering financial and economic stability in the euro area and in the EU as a whole.

International Relations and the European Union

In recent years the European Union (EU) has played an increasingly important role as a manager of global conflicts. This book provides a comprehensive assessment of how the EU has performed in facilitating mediation, conflict resolution and peacebuilding across the globe. Offering an accessible introduction to the theories, processes and practice of the EU's role in managing conflict, the book features a broad range of case studies including Afghanistan, Bosnia & Herzegovina, Cyprus, Israel-Palestine, Macedonia and Moldova and examines both the institutional and policy aspects including the common foreign, security and defence policy. Drawing together a wide range of contributors, this will be of great interest to students of European Foreign Policy, the EU as a global actor and conflict resolution and management.

The EU and the Security-Development Nexus

This title assesses EU law and policy using a novel and alternative framework based on the notion of humaneness.

European Banking Union

The Brussels Effect offers a novel account of the EU by challenging the view that it is a declining world power. Anu Bradford explains how the EU exerts global influence through its ability to unilaterally regulate the global marketplace without the need to engage in neither international cooperation nor coercion.

The European Union as a Global Conflict Manager

This volume presents complementary analyses of the current features, issues and trends of multilateral security and the European Security and Defence Policy (ESDP) peace operations. The work presents an astute interpretation of the attributes of ESDP operations in the context of the diffusion of peace operations practice at the present time. Founded on the detailed examination of different peace operations and the analysis of relevant data, the book allows for the assessment of the near future of peace operations.

The Human Face of the European Union

Research on European governance is central to understanding both the process of European integration and its external influence as a laboratory for multilateralism. This volume focuses on the impact of the recent Eurozone crisis and its far-reaching implications for European governance both inside and outside the EU borders. Ideal for classroom use, this volume covers: I. European modes of governance: concepts, recent trends and international implications with chapters by Lefkofridi & Schmitter, Cini, Borrs and Radaelli. II. The transformation of European economic governance with contributions by Fabbrini, Stofaës, Collignon, Eising, Rasch and Rozbicka. III. The transformation of European social policy governance with Goetschy, Hemerijck, de la Porte and Heins. IV. The international implications of the transformation of EU governance highlighted by Rodrigues, Xiarchogiannopoulou and Mügge.

The Brussels Effect

The third edition of this book incorporates more than 10 years of fascinating dynamics since the entry into force of the Lisbon Treaty. Apart from analysing the general basis of the Union's external action and its relationship to international law, the book explores the law and practice of the EU in more specialized fields of external action, such as common commercial policy, neighbourhood policy, development cooperation, cooperation with third countries, humanitarian aid, external environmental policy, and common foreign and security policy, as well as EU sanctions. Five years after the second edition published, this fully updated edition contains major developments within the law itself, along with changes and restructuring of the themes within the book. Carefully selected primary documents are accompanied with analytic commentary on the issues they raise and their significance for the overall structure of EU external relations law. The primary materials selected include many important legal documents that are hard to find elsewhere but give a vital insight into the operation of EU external relations law in practice.

Multilateral Security and ESDP Operations

This full-term study of the Western European Union (WEU) brings to life the history of Europe's search for a co-operative security and defence order, from its post World War II origins to the present day. Establishing the WEU as a support organization, designed to promote the two security "ideas" of collective defence and integration through the primary organizations of Alliance and Community, this book offers a window onto the challenges faced in the development and management of NATO and the evolving EC/EU over time. As the WEU's historical journey unfolds, the frequently competing visions of the future organization of the European security space are exposed in the fluctuating nature of its own functional evolution and devolution. A hybrid organization driven by its dual support role, the constructively ambiguous and conveniently autonomous WEU was to provide a mechanism through which divergent interests could converge and inherent tensions be relieved, preventing NATO and EC/EU stagnation. This book offers fresh insight into the means by which the gradual transformation

of the institutional framework of European security was enabled, and stakes the WEU's claim as a fundamental and life-long contributor to the stability of the European security system.

The Eurozone Crisis and the Transformation of EU Governance

Cooperation through international organizations is fundamental to the international legal order. International organizations are nowadays ubiquitous and come in many different manifestations, each allowing for different levels of international cooperation. The profile of regional and universal organizations may vary greatly from one organization to another. At the same time, they do not live apart and this has led to the creation of a complex network of relationships. These relationships have seldom been the object of scholarship, and this book seeks to address that gap. In general, the relationships between international organizations can give rise to such issues as the conditions placed upon one organization by another, demarcations of competence, membership of other organizations, and various forms of collaboration involving the conclusion of agreements between organizations. Optimal coexistence, cooperation and coherence all play a role in optimizing the relations between international organizations. The volume concludes by analysing current challenges, including those of legal identity, responsibility and accountability, as well as making proposals for reform, such as through the development of a common law between organizations.

The Law of EU External Relations

In European External Action Service, Mauro Gatti provides a legal analysis of the EU's 'foreign ministry' and assesses its capability to promote coherence in EU external relations.

The Western European Union

The present collection of essays offers the reader a broad range of original perspectives on democracy and the rule of law in the European Union, approaching the existing policy area from new points of view. Leading experts from different countries and backgrounds focus on how democracy and the rule of law are related to topics like security, pension rights, judicial cooperation and human rights protection. Their expert views are based on a combination of theory and knowledge acquired in their practice as academics or practitioners in the field of European integration.. The issue of the rule of law and democracy is close to the heart of Professor Jaap de Zwaan, a true European, building bridges between countries and peoples. He has written extensively on the subject of European integration. Therefore, this collection of expert views is not only an original and valuable contribution to the literature and discussion on the development and enlargement of the European Union, but at the same time it is a tribute to Jaap de Zwaan, whose academic and diplomatic career can be characterized as always serving "an ever closer Union". Flora Goudappel is Jean Monnet Professor of EU Trade Law in the Overseas Territories at the Erasmus University Rotterdam and a consultant on European Union law Ernst Hirsch Ballin is Professor of Dutch and European Constitutional Law at Tilburg University and Professor of Human Rights Law at the University of Amsterdam.

Interactions between Regional and Universal Organizations

Since its creation, the European Union (EU) has been a participant in the activities of other International Organisations (IOs) or has been working together with them. Still, little information is available on what this long-term involvement with(in) IOs means for International Relations and European Studies. Why has the EU been involved with(in) IOs on such a long-term basis? How? With what impact? These three key research questions are addressed in this innovative volume, in a bid to explore the continuity of EU action with(in) IOs. While written by a diversity of authors (from European Studies or from International Relations, Europeans or non-Europeans) and from a diversity of disciplines (in particular Law and Political Science), each chapter of the volume elaborates on three common political concepts derived from three-fold questioning: commitment (for the why question), consistency (for the how question), and effects (for the question of impact). Consisting of a two part structure, the book is focussed in Part I on more general trends of the EU's long-term participation with(in) IOs - with contributions by A. Wetzel, P. Debaere, F. De Ville, J. Orbie, B. Saenen and J. Verschaeve, and P. Nedergaard and M. D. Jensen - and in Part II on more precise case studies on labour standards, public services, flexicurity, human trafficking and security - with contributions by R. Kissack, A. Crespy, E. Xiarchogiannopoulou and D. Tsarouhas, B. Simmons and A. DiSilvestro, and N. Græger. Highly useful for students, academics and experts, this volume combines a clear and easy-to-use framework with new empirical data.

You're Evaluating a System What Steps Do You Take To Make Sure the System Is Not Curve Fit and that the System Is Robust

The Momentum Effect in Stocks

What Is the One Thing You Wish You Knew about System Training before You Started Developing Training Systems

The Problem Means these Numbers Weren't Really Relevant in the First Place It Doesn't Really Matter They're More or Less in that Area and Yeah Let's Keep Them or Less in that Area To Think that You're GonNa Get Much Better Results in the Future because You You Get Two Percent Higher Annualized Return if You Tweak some Variable Well It's Not Very Realistic that's Why I'M a System That You Trade or Concepts Fine Cause of some Trade or Not Not over Optimized Models Yeah that's some Great Advice Thanks Andreas another Question from Sean Do You Use Monte Carlo Simulations When Running Back Tests

I Think One Thing That Takes a Long Time To Learn Is To Make Major Losses in Terms of Money Not Necessarily Percent but To Lose Large Amount of Money and Still Sleep at Night once You Start Managing Institutional Money the Daily Swings in Terms of Actual Money Gave the Loss It Could Be Quite Substantial if You're in a Drawdown That Might Not Be Worrying from a Backtest Point of View for Instance Something That's Quite Normal in Terms of Behavior Might Be the Same as Everyone Else Is Loosing Out There and You're in Line or Even Better but Still if You Start Thinking about How Much Money Was Actually Lost Last Week and What Does It Mean in the Real World this Amount That Tries to Crazy You You Have To Get Rid of this Loop this Way of Thinking You Have To Let It Go You Have To Completely Detach Yourself Mentally from It and Start Seeing It as One-on-One or Full of Money It Might Sound Mahsun Callous but I Would Say It Has the Opposite Effect if You Have Too Much Emotional Attachment to this Kind of Things It Will Have a Negative Impact on Your Performance

Even though this Is Actually Real Money for Clients and of Course You Don't Mind It's in the Products but You Can't Keep Seeing It as I Just Lost another Ferrari Today

I Have To Say Disclaimer I'M on a Very Very Different Type of Hedge Fund but He Was but It's a He Shows a Different Side of that World World That Is Far Too Common Especially with the Discretionary Equity Hedge Funds It Just Shows a Very Different World of What What Traders Do and How the Business Works and It's an Extremely Extremely Brave Book and He's a He's a Very Nice Guy As Well and He's a He's Written a Very Good Book on that I Think It Should Open some Eyes for People Did He Lose a Lot of Customers after He Published a Book Well He Actually Wrote the Book Deliberately To Burn Himself To Make Sure that He Can Never Get a Job in Hedge Funds Again Uh-Huh that's Interesting no One no One Would Hire Him Again after He Wrote a Book
