ARCHIVES OF INTERNAL MEDICINE

Excerpt from The Archives of Internal Medicine, 1909, Vol. 3 The production OF edema. AN experimental study OF the relative fitiologic importance OF renal injury, vascular injury and pletiioric i-[ydremia. Richard M. Pearce, M.D., new york city. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

The Archives of Internal Medicine, 1909, Vol. 3 (Classic Reprint)

Excerpt from The Archives of Internal Medicine, Vol. 1: May, 1908 The general views as to the etiology of goiter may be divided into two groups: (1) that it is due to an infecting agent (miasm) and (2) that it is the manifestation of a nutritional disturbance. The former had its period of greatest development parallel with the early period of bacteriology (1850 Virchow, Hirsch and, in particular, Ewald have supported this view. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

The Archives of Internal Medicine, Vol. 1

Excerpt from The Archives of Internal Medicine, 1919, Vol. 23 After 14 c.c. Of tincture of digitalis, P3 was definitely upright and remained so during 'the administration of digitalis (fig. 3, C). Record taken at the time of discharge, eight days after the last digitalis had been given, Showed a variable P3, upright, diphasic or inverted (fig. 3, D). Summary: Inverted or diphasic P3, rendered upright by atropin, becoming inverted again after recovery from the atropin, then rendered upright by the

administration of digitalis and remaining upright throughout its administration, becoming again variable eight days after the last digitalis had been given, when it appears upright, diphasic or inverted. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. Archives of Internal Medicine

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Archives of Internal Medicine

Each of these books represents a flagship volume in the new Best of Archives Journals Series from the American Medical Association. Each book is a compilation of 12-15 of the most significant articles from its corresponding specialty journals published from June 1998 to June 1999. Articles are selected based on their impact on the field and according to the following criteria: New treatments of diagnostic techniques Controversial issues in the field Simplification of a known problem for practicing physicians Information that is important to other specialists Expert commentary is provided a context in which the reader can consider the selection, and make the journal articles more accessible to practicing physicians. Also included is an introduction to each volume to provide an overview of the advancements made in the year, and to place these advancements in context for the practicing physician

The Archives of Internal Medicine, 1919, Vol. 23 (Classic Reprint)

Excerpt from The Archives of Internal Medicine, Vol. 20: October 15, 1917 Person, and in Four Cases of Rheumatoid Arthritis. Bull. Com. For Study of Special Diseases, Edinburgh, 1910, 3, 57. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The Archives of Internal Medicine, Vol. 20

This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. We believe this work is culturally important, and despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book.

The Archives of Internal Medicine, Vol. 18

Excerpt from The Archives of Internal Medicine, Vol. 1: July 15, 1908 Again and again I have left the bedside of patients brought into the hospital pulseless and apparently moribund without any external injury, having suffered falls or blows so serious as to have induced the symptoms of prostration to an alarming extent, and have found them on the succeeding day, to my great surprise, restored to the tone and tranquility of normal health. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Archives of Internal Medicine

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars

believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Internal Medicine

Excerpt from The Archives of Internal Medicine, Vol. 21: March 15, 1918 Bruce's case is the second recorded case of this sort, the first having been published by Hall and Muir² Their record is as follows. Archives of Internal Medicine, Volume 11 - Scholar's Choice Edition

Excerpt from The Archives of Internal Medicine, Vol. 1: June, 1908 Symptoms of a focal reaction in the lungs are not uncommon. In 60 doubtful cases that reacted, they were noted in 18 and marked as definitely absent in 17. In the remaining 25 cases no note is made about the condition, which means in practically all of the cases that the symptoms were not present. Of the 18 cases, 10 complained of increased cough, and 4 of these of increased sputum 9 complained of pain in the chest. Of 13 cases with definite signs of a pulmonary lesion, 8 gave definite focal symptoms, and in only one the note is made that they were absent. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. The Archives of Internal Medicine, Vol. 18

Excerpt from The Archives of Internal Medicine, Vol. 10 Onset - The patient was, at the time of onset, and had been for five years previously. A mail-carrier in the rural free delivery service, having to ride thirty miles daily over rough roads. There was some exposure to cold. But not excessive. Four years ago, in the spring, he first noticed frequent urination, both diurnal and nocturnal. This rapidly increased in frequency, until it became embarrassing. 110 would have to stop every half hour or even more frequently while on his route. Auv attempt to suppress this tendency resulted in great misery. The quantities were large at each urination. There would be four or five nocturnal micturitions. The quantity was several quarts a day. His mouth and throat felt constantly parched, in spite of the great amounts of water drunk. The tongue was dry. Bulimia also developed in the spring. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. The Archives of Internal Medicine, Vol. 1

Excerpt from The Archives of Internal Medicine, Vol. 17: January 15, 1916 At thirteen the patient had had scarlet fever, and six months later diphtheria, followed by more or less extensive paralysis. In other respects she had been a healthy woman and had had several children. For ten or twelve years, however, there had been some shortness of breath on exertion, and for eight months, frequent bleeding from the nose. For two months she had had peculiar periods of dizziness in which it had been noticed that her pulse was slow and irregular. Two weeks before she had had a sudden attack characterized by loss of consciousness and repeated slight convulsive seizures. Immediately after the attack the pulse was very slow, about 18 to the minute, and fairly regular. On the morning preceding the attack it had been 44; since the attack it had ranged between 28 and 35. Examination showed a fairly healthy looking woman, lying on her back in bed. The pulse was regular, 36 to the minute. On inspection of the neck, by a rather poor light, there was a well-marked impulse in the jugular with each beat of the pulse, together with a second impulse, occurring at a point about midway between each beat. A satisfactory analysis of the jugular undulation was impossible because of the dimness of the light. The heart was slightly enlarged; the sounds were clear throughout. There was heard, however, between each regular beat, a slight but yet distinctly audible sound. This occurred constantly about midway between the regular heart sounds, and had the general character of the sound which one commonly hears in association with the auricular contraction in heart block. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Archives of Internal Medicine

Excerpt from The Archives of Internal Medicine, Vol. 21: February 15, 1918 Physical Examination - Aside from these attacks the examination of the patient revealed little that was abnormal. The cardiac dulness extended 3 cm. To the right and 10 cm. To the left of the midline. On auscultation there was a systolic murmur, heard best along the left border Of the sternum, but heard distinctly at the apex and transmitted into the axilla. There was no edema of the ankles, ascites or hydrothorax. The liver extended 3 cm. Below the costal margin and there was slight general abdominal tenderness. The temperature reached F. On the day of admission. But was normal thereafter. The remainder of the physical examination and the laboratory examinations, including the Wassermann reaction, were negative. The Archives of Internal Medicine, Vol. 17

Excerpt from Internal Medicine, Vol. 1 of 3: A Work for the Practicing Physician on Diagnosis and Treatment, With a Complete Desk Index In the making Of a. Handbook of this kind it is necessary to draw at every step upon the great fund of acquired information which has become the common property of the profession. To those whose contributions have formed that fund and to those who are daily adding to it I tender grateful acknowledgment for its use. I have mentioned by name those to whose work I have especially referred, but, as a general rule, it has been impracticable for want of space to append systematic references to the literature. The illustrations are in large part drawn from personal observations. They have been selected solely with the View to elucidate the subject in hand. Diagrams have been employed when this method of presentation has appeared desirable, and the free use of clinical charts constitutes an important feature of the work. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Internal Medicine, Vol. 1 of 3

The landmark guide to internal medicine— updated and streamlined for today's students and clinicians A Doody's Core Title for 2017! All eChapters in the Nineteenth Edition are accessible online as well as on the DVD packaged within the print volumes, so you have the flexibility of using the method of access most convenient to you. Through six decades, no resource has matched the authority, esteemed scholarship, and scientific rigor of Harrison's Principles of Internal Medicine. Capturing the countless advances and developments across the full span of medicine, the new 19th edition of Harrison's provides a complete update of essential content related to disease pathogenesis, clinical trials, current diagnostic methods and imaging approaches, evidence-based practice guidelines, and established and newly approved treatment methods. Here are just a few of the outstanding features of the new Nineteenth Edition: Presented in two volumes: Volume 1 is devoted to foundational principles, cardinal manifestations of disease and approach to differential diagnosis; Volume 2 covers disease pathogenesis and treatment NEW chapters on important topics such as Men's Health, The Impact of Global Warming on Infectious Diseases, Fatigue, and many more Critical updates in management and therapeutics in Hepatitis, Coronary Artery Disease, Ebola Virus Disease, Multiple Sclerosis, Diabetes, Hypertension, Deep Vein Thrombosis and Pulmonary Embolism, Acute and Chronic Kidney Disease, Inflammatory Bowel Disease, Lipoprotein Disorders, HIV and AIDS, and more. Increased number of the popular Harrison's clinical algorithms; clinically relevant radiographic examples spanning hundreds of diseases; clinical-pathological images in full color; crystal clear, full color drawings and illustrations and helpful tables and summary lists that make clinical application of the content faster than ever Access to outstanding multi-media resources including practical videos demonstrating essential bedside procedures, physical examination techniques, endoscopic findings, cardiovascular findings, and more Supporting the renowned coverage are supplemental resources that reflect and assist modern medical practice: more than 1,000 full-color photographs to aid visual recognition skills, hundreds of state-of-the-art radiographs, from plain film to 3D CT to PET Scans; beautiful illustrations that bring applied anatomy and processes to life; the renowned Harrison's patient-care algorithms, essential summary tables, and practical demonstrative videos. In addition, the book's several digital atlases highlight noninvasive imaging, percutaneous revascularization, gastrointestinal endoscopy, diagnosis and management of vasculitis, and numerous other issues commonly encountered in clinical practice. Acclaim for Harrison's: "Covering nearly every possible topic in the field of medicine, the book begins with a phenomenal overview of clinical medicine, discussing important topics such as global medicine, decision-making in clinical practice, the concepts of disease screening and prevention, as well as the importance of medical disorders in specific groups (e.g. women, surgical patients, end of life). The extensive chapters that follow focus on a symptom-based presentation of disease and then illness organized by organ system. Numerous tables, graphs, and figures add further clarity to the text. The accompanying DVD includes extensive video and image collections of pathology, histology, procedures, additional lectures, and radiology... ..Written by experts in the field, this book is updated with the latest advances in pathophysiology and treatment. It is organized in a way that makes reading from beginning to end a logical journey, yet each chapter can stand alone as a quick reference on a particular topic. "

The International Journal of Indian Psychology, Volume 3, Issue 2, No. 6

Authoritative, well-written, and comprehensive textbook of clinical nephrology, combining the clinical aspects of renal disease important for daily clinical practice while giving extensive information about the underlying basic science and current evidence available. This new edition highlights the numerous changes in clinical management that have arisen as a result of recently concluded clinical trials and there are now specific formal guidelines for optimal treatment of patients. Each section of the textbook has been critically and comprehensively edited under the auspices of one of the leading experts in the field. The emphasis throughout is on marrying advances in scientific research with clinical management. Where possible treatment algorithms are included to aid patient care.
