Find The ... The Pearl Girls In Shan Xia Hu. Zhejiang Province. China GIRLS

The green bottles you see in the lakes suspend the growing mollusks. This is a common sight throughout the lakes and rivers in the Zhejiang Province.

This variety of freshwater mollusks are called Triangular Oysters. They are well suited for cultured pearl production. They are tissue nucleated and left to grow and develop in the freshwater pond. During this time, water quality and management is very important.

After the tissue and pearls are removed from the triangle oysters, the meat is separated and the pearls are rinsed.

After the pearls are harvested, various techniques are used to polish and treat the pearls including tumbling, polishing and heating. The purpose is to maintain the integrity of the pearl while optimizing its color and luster.

Pearls are then drilled and sorted according to color, size and quality. This is a multiple step process. Scenes of women and men sorting and matching pearls are very common in Shan Xia Hu.

Medieval and Historiographical Essays

Includes genealogical charts of kings and noblemen associated with the search for the grail.

Medieval and Historiographical Essays in Honor of James Westfall Thompson

First published in 1931, this book covers the broad period of time between the Christian Roman Empire instituted in the fourth century and the period of the Renaissance. The author traces the main events of medieval history — striking a balance between political, institutional, social and cultural history — with no event of major importance escaping recognition. In addition to covering medieval Europe in detail, it also includes sections on the Byzantine Empire and the foundation of Islam. Many maps are also included to geographically illustrate key points. This book will be of interest to students of history.

Medieval and Historiographical Essays in Honor of James Westfall Thompson. Edited by James Lea Cate and Eugene N. Anderson. [With a Portrait and a Bibliography.].

A fascinating work of detective history, *The Black Death* traces the causes and far-reaching consequences of this infamous outbreak of plague that spread across the continent of Europe from 1347 to 1351. Drawing on sources as diverse as monastic manuscripts and dendrochronological studies (which measure growth rings in trees), historian Robert S. Gottfried demonstrates how a bacillus transmitted by rat fleas brought on an ecological reign of terror -- killing one European in three, wiping out entire villages and towns, and rocking the foundation of medieval society and civilization.

Love, War, and the Grail

Herbs and Healers from the Ancient Mediterranean through the Medieval West brings together eleven papers by leading scholars in ancient and medieval medicine and pharmacy. Fittingly, the volume honors Professor John M. Riddle, one of today's most respected medieval historians, whose career has been devoted to decoding the complexities of early medicine and pharmacy. "Herbs" in the title generally connotes drugs in ancient and medieval times; the essays here discuss interesting aspects of the challenges scholars face as they translate and interpret texts in several older languages. Some of the healers in the volume are named, such as Philotas of Amphissa, Gariopontus, and Constantine the African; many are anonymous and known only from their treatises on drugs and/or medicine. The volume's scope demonstrates the breadth of current research being undertaken in the field, examining both practical medical arts and medical theory from the ancient world into early modern times. It also includes a paper about a cutting-edge Internet-based system for ongoing academic collaboration. The essays in this volume reveal insightful research approaches and highlight new discoveries that will be of interest to the international academic community of classicists, medievalists, and early-modernists because of the scarcity of publications objectively evaluating long-lived traditions that have their origin in the world of the ancient Mediterranean.

History of the Middle Ages

Appearing in all figural media from the mid-twelfth century, family trees and lineages made political claims for their patrons.

Catharist Social Ideas in Medieval French Romance [signé James Westfall Thompson].

The 19 papers presented in this volume by North American and European historians and archaeologists discuss how early medieval political and religious elites constructed 'places of power', and how such places, in turn, created powerful people. They also examine how the 'high-level' power exercised by elites was transformed in the post-Roman kingdoms of Europe, as Roman cities gave way as central stages for rituals of power to a multitude of places and spaces where political and religious power were represented. Although the Frankish kingdoms receive a large share of attention, contributions also focus on the changing topography of power in the old centres of the Roman world, Rome and Constantinople, to what 'centres of power' may have meant in the steppes of Inner Asia, Scandinavia or the lower Vistula, where political power was even more mobile and decentralised than in the post-Roman kingdoms, as well as to monasteries and their integration into early medieval topographies of power.

Introduction to Medieval Europe, 300-1500 [by] James Westfall Thompson ... & Edgar Nathan Johnson ...

Die neue englischsprachige Reihe zur Mediävistik strebt eine methodisch reflektierte, anspruchsvolle Verbindung von Text- und Kulturwissenschaft an. Sie widmet sich den kulturellen Grundthemen der mittelalterlichen Welt aus der Perspektive der Literatur- und Geschichtswissenschaft. 'Grundthemen' sind die kulturprägenden Denkbilder, Weltanschauungen, Sozialstrukturen und Alltagsbedingungen des mittelalterlichen Lebens, also z. B. Kindheit und Alter, Sexualität, Religion, Medizin, Rituale, Arbeit, Armut und Reichtum, Aberglauben, Erde und Kosmos, Stadt und Land, Krieg, Emotionen, Kommunikation, Reisen usw. Die Reihe greift wichtige aktuelle Fachdiskussionen auf und stellt ein Forum der interdisziplinären Mittelalter-Forschung dar. *Fundamentals of Medieval and Early Modern Culture* steht Sammelbänden ebenso offen wie Monographien. Intention ist immer, kompendienhafte Werke zu zentralen Fragen der mittelalterlichen Kulturgeschichte vorzulegen, die einen soliden Überblick über einen geschlossenen Themenkreis aus der Perspektive verschiedener Fachdisziplinen vermitteln. Im Ganzen bietet die Reihe so eine Enzyklopädie der mittelalterlichen Literatur- und Kulturgeschichte und ihrer Hauptthemen. Es werden ca. zwei Bände pro Jahr erscheinen.

Black Death

"The Oxford History of the Laws of England" provides a detailed survey of the development of English law and its institutions from the earliest times until the twentieth century, drawing heavily upon recent research using unpublished materials.

Herbs and Healers from the Ancient Mediterranean through the Medieval West

Herbs and Healers from the Ancient Mediterranean through the Medieval West brings together eleven papers by leading scholars in ancient and medieval medicine and pharmacy. Fittingly, the volume honors Professor John M. Riddle, one of today's most respected medieval historians, whose career has been devoted to decoding the complexities of early medicine and pharmacy. "Herbs" in the title generally connotes drugs in ancient and medieval times; the essays here discuss interesting aspects of the challenges scholars face as they translate and interpret texts in several older languages. Some of the healers in the volume are named, such as Philotas of Amphissa, Gariopontus, and Constantine the African; many are anonymous and known only from their treatises on drugs and/or medicine. The volume's scope demonstrates the breadth of current research being undertaken in the field, examining both practical medical arts and medical theory from the ancient world into early modern times. Union Catalog of the Graduate Theological Union

Latest research on the chivalric ethos of western Europe 10c-15c. from the practical [houses, armour], to the intellectual [concept of holy war, loyalty, etc.]

Visualizing Ancestry in the High and Late Middle Ages

First comprehensive study of miracles in Crusade narrative, showing how and why they were deployed by their authors.

Topographies of Power in the Early Middle Ages

A clear and readable account of the development of the European economy and its infrastructure from the second century to 1500. Professor Pounds provides a balanced view of the many controversies within the subject, and he has a particular gift for bringing a human dimension to its technicalities. He deals with continental Europe as a whole, including an unusually rich treatment of Eastern Europe. For this welcome new edition -- the first in twenty years -- text and bibliography have been reworked and updated throughout, and the book redesigned and reset.

Communication, Translation, and Community in the Middle Ages and Early Modern Period

This critical edition and lexicological analysis of the first of the two glossaries of Book 29 of Shem Tov ben Isaac's Sefer ha-Shimmush contains more than 700 entries and offers an extensive overview of the formation of medieval medical terminology in the romance (Old Occitan and in part Old Catalan) and Hebrew languages, as well as within the Arabic and Latin tradition.

The Oxford History of the Laws of England: The Canon law and ecclesiastical jurisdiction from 597 to the 1640s

A compilation of facts, figures, maps, family trees, summaries of the major crusades and their historiography, the Routledge Companion to the Crusades spans a broad chronological range from the eleventh to the eighteenth century, and gives a chronological framework and context for modern research on the crusading movement. Not just a history of the Crusades, but an overview of the logistical, economic, social and biographical history, this is a core text for students of history and religious studies.

Herbs and Healers from the Ancient Mediterranean through the Medieval West

This volume brings together nine chapters that address the topic of the scale and size of companies, in both legal and economic history, in the Middle Ages, the Early Modern Period, and in the nineteenth century.

Medieval Knighthood IV

A history of sabbatarianism, one of the most cherished Puritan causes during the Civil War.

Profitable Fields of Investigation in Medieval History

Medical ethics has been a constant adjunct of Western medicine from its origins in Greek times. Although the Hippocratic Oath has been intensely studied, until recently there has been very little historical work on medical ethics between the Oath and Thomas Percival's Medical Ethics of 1803, which is commonly thought of as the first treatise on modern medical ethics. This volume brings together original research which throws new light on how standards of behaviour for medical practitioners were articulated in the different religious, political and social as well as medical contexts from the classical period until the nineteenth century. Its ten essays will place the early history of medical ethics into the framework of the new social and intellectual history of medicine that has been developed in the last ten years.

The Miraculous and the Writing of Crusade Narrative

We are apt to forget how much people traveled in the Middle Ages. Not only merchants, friars, soldiers and official messengers, but crowds of pilgrims were a familiar sight on the roads of Western Europe. In this engaging work of history, Jonathan Sumption brings alive the traditions of pilgrimage prevalent in Europe from the beginning of Christianity to the end of the fifteenth century. Vividly describing such major destinations as Jerusalem, Rome, Santiago de Compostela and Canterbury, he examines both major figures -- popes, kings, queens, scholars, villains -- and the common people of their day.

Annual Bibliography of English Language & Literature Volume XX

This study examines the work of Matthew Spinka and Howard Kaminsky on medieval Hussites. The author analyzes their numerous contributions to our understandings of religious and social movements in late medieval Europe.

An Economic History of Medieval Europe

Dietz finds that this period of Christianity witnessed an explosion of travel, as men and women took to the roads, seeking spiritual meaning in a life of itinerancy. This book is essential reading for those who study the history of monasticism, for it was a monastic context that religious travel first claimed an essential place within Christianity.

Medical Synonym Lists from Medieval Provence: Shem Tov ben Isaac of Tortosa: Sefer ha - Shim-mush. Book 29

A riveting account of private art collectors' passion from Roman times to the present Whether it's the discovery of \$1.6 billion in Nazi-looted art or the news that Syrian rebels are looting UNESCO archaeological sites to buy arms, art crime commands headlines. Erin Thompson, America's only professor of art crime, explores the dark history of looting, smuggling, and forgery that lies at the heart of many private art collections and many of the world's most renowned museums. Enlivened by fascinating personalities and scandalous events, Possession shows how collecting antiquities has been a way of creating identity, informed by a desire to annex the past while providing an illicit thrill along the way. Thompson's accounts of history's most infamous collectors--from the Roman Emperor Tiberius, who stole a life-sized nude Greek statue for his bedroom, to Queen Christina of Sweden, who habitually pilfered small antiquities from her fellow aristocrats, to Sir William Hamilton, who forced his mistress to enact poses from his collection of Greek vases--are as mesmerizing as they are revealing.

7 , -)J(JD5D' (H1-D' .J1'* JA)DE'4D')9H3HED

Presents articles on concepts, issues, and notable persons related to politics and political science throughout history.

The Routledge Companion to the Crusades

An account of the medical world in eastern Spain in the decades before the Black Death.

Reference Studies in Medieval History

What was the role of merchant guilds in the medieval and early modern economy? Does their wide prevalence and long survival mean they were efficient institutions that benefited the whole economy? Or did merchant guilds simply offer an effective way for the rich and powerful to increase their wealth, at the expense of outsiders, customers and society as a whole? These privileged associations of businessmen were key institutions in the European economy from 1000 to 1800. Historians debate merchant guilds' role in the Commercial Revolution, economists use them to support theories about institutions and development, and policymakers view them as prime examples of social capital, with important lessons for modern economies. Sheilagh Ogilvie's magisterial new history of commercial institutions shows how scrutinizing merchant guilds can help us understand which types of institution made trade grow, why institutions exist, and how corporate privileges affect economic efficiency and human well-being.

The Company in Law and Practice: Did Size Matter? (Middle Ages-Nineteenth Century)

Katharine Park has written a social, intellectual, and institutional history of medicine in Florence during the century after the Black Death of 1348. Originally published in 1985. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Economic and Social History of the Middle Ages

No Place of Rest pursues the literary traces of the traumatic expulsion of Jews from France in 1306. Through careful readings of liturgical, philosophical, memorial, and medical texts, Susan Einbinder reveals how medieval Jews asserted their identity in exile.
