

The Human Face Of The European Union Are Eu Law And Policy Humane Enough

[#European Union](#) [#EU Law](#) [#EU Policy](#) [#Human Rights EU](#) [#Social Impact Europe](#)

This analysis critically examines the human dimension of the European Union, specifically questioning if EU law and policy are humane enough in their implementation and impact. We explore the core principles guiding EU governance, its social implications, and whether the 'human face' of Europe truly aligns with its legal and policy frameworks, assessing their effectiveness in safeguarding human rights and promoting a compassionate society across member states.

The Human Face of the European Union

This title assesses EU law and policy using a novel and alternative framework based on the notion of humaneness.

The Ethos of Europe

Andrew Williams analyses the role of values in the European Union and suggests how to make the EU more just.

The Court of Justice of the European Union

In an era of Covid 19, The Court of Justice of the European Union explores how the CJEU can realise its role as guardian of the EU's rule of law and its aftermath through the anchoring of a structured rule of law review of the public health derogation.

The European Union and the Use of Force

In The European Union and the Use of Force Julia Schmidt examines the development and activities of the EU as an emerging international military actor. The author offers a comprehensive analysis of the legal framework for the EU's military crisis management operations.

Democracy in the EMU in the Aftermath of the Crisis

The book covers some of the major issues concerning the problematic relationship between respect for democratic principles and the new European Economic Governance. Innovative approaches are highlighted throughout the book: new frameworks and arrangements are proposed on the basis of efficiency analyses, as well as their institutional and legal suitability. Though the perspective adopted is essentially a legal one, the economic and policy background are also given due consideration. The

papers presented here offer a balanced mix of empirical (including comparative) and theoretical analysis; several also combine the two approaches, carrying out empirical analyses, then setting the results against theoretical options. Given the relative dearth of literature on democratic principles and the EMU, let alone a comprehensive enquiry, the book marks a valuable new contribution.

The European Union and International Sanctions

This enlightening new book unpacks the ascendancy of the European Union as a distinct actor in the field of international sanctions. Offering an innovative model of actorness, Kevin Urbanski establishes a coherent bridge between debates on actorness and mainstream theories of international institutions and European integration.

The EU as a Children's Rights Actor

This edited collection critiques, from an interdisciplinary perspective, the growing body of EU children's rights activities in the light of broader political, economic and legal processes. Specifically, it interrogates whether EU intervention effectively responds to what are perceived as violations of children's rights and the extent to which EU efforts to uphold children's rights complement and reinforce parallel national and international pursuits. Moreover, it scrutinises the compatibility of EU children's rights measures with the principles and provisions enshrined in the UN Convention on the Rights of the Child (CRC).

Research Handbook on European Union Citizenship Law and Policy

This Research Handbook provides a panoramic guide to the study and research of EU citizenship and its development within a challenging environment characterised by restrictive access to social benefits, Brexit, Euroscepticism and Covid-19. It combines theoretical perspectives with analyses of both the existing and future rights, duties and social protection that EU citizens ought to enjoy in a democratic and principled European Union.

The Cambridge Companion to European Criminal Law

European Criminal Law has developed into a complex, jagged subject matter, which at the same time has become increasingly important for everyday criminal law practice. On the one hand, this work aims to do comprehensive justice to the complexity of the matter without sacrificing readability. In order to achieve this, the book's structure enables legal scholars and experienced practitioners to access the information relevant to them in a targeted manner and, at the same time, enables less oriented readers to gain access to European criminal law. Thus, the volume both answers basic questions and offers discussion in more specialised areas. Written by experts in the field, the book offers discussions which are both of the highest academic standards and accessibly readable.

Constructing Roma Migrants

This open access book presents a cross-disciplinary insight and policy analysis into the effects of European legal and political frameworks on the life of 'Roma migrants' in Europe. It outlines the creation and implementation of Roma policies at the European level, provides a systematic understanding of identity-based exclusion and explores concrete case studies that reveal how integration and immigration policies work in practice. The book also shows how the Roma example might be employed in tackling the governance implications of our increasingly complex societies and assesses its potential and limitations for integration policies of vulnerable groups such as refugees and other discriminated minorities. As such the book will be of interest to academics, practitioners, policy-makers and a wider academic community working in migration, refugee, poverty and integration issues more broadly.

Enhancing the Rule of Law in the European Union's External Action

This timely book scrutinises the mechanisms for guaranteeing respect for the rule of law in the European legal system. Focusing on external relations, it assesses the capacity of the EU to disseminate these values as a global actor and offers novel suggestions for how this capacity could be exercised more effectively.

Globalisation and Governance

This edited collection evaluates international and regional approaches to global governance problems, exploring solutions offered by the EU.

EU External Migration Policies in an Era of Global Mobilities: Intersecting Policy Universes

This collection examines the evolving European Union legal-institutional and policy frameworks for governing migration, borders and asylum post-2015/16. It is the first study on why and how the 'intersectionality' across policy areas and actors affects democratic rule of law and the mobility, livelihood and human rights of refugees and immigrants.

Labour Standards in International Economic Law

The book offers a comprehensive perspective on the highly topical issue of protecting and promoting labour standards in international economic law and the globalized economy. For the purpose of an in-depth analysis of both the specific and the fundamental aspects in this regard, it combines views from specialized academics of the legal and political sciences as well as experienced practitioners. The contributions to this book do not only reveal recurring obstacles but also point at best practices and potential for synergies, providing important guidance for future research and practice in international economic and labour law and policy.

Gender and Queer Perspectives on Brexit

This collection examines the opportunities and challenges, rights and wrongs, and prospects and risks of Brexit from the perspectives of gender and sexuality. While much has been written about Brexit from legal, political, social and economic perspectives, there has been little analysis of the effects of Brexit on women and gender/sexual minorities who have historically been marginalised and whose voices have been less audible in political debates – both nationally and at the European level. The collection explores how Brexit might change the equality, human rights and social justice landscape, but from the viewpoint of women and gender/sexual minorities. The contributions gathered in it demonstrate the variety of ways that Brexit will make a difference to the lives of women and individuals marginalised because of gender or sexual identity.

Queering Asylum in Europe

This two-volume open-access book offers a theoretically and empirically-grounded portrayal of the experiences of people claiming international protection in Europe on the basis of their sexual orientation or gender identity (SOGI). It shows how European asylum systems might and should treat asylum claims based on people's SOGI in a fairer, more humane way. Through a combined comparative, interdisciplinary (socio-legal), human rights, feminist, queer and intersectional approach, this book examines not only the legal experiences of people claiming asylum on grounds of their SOGI, but also their social experiences outside the asylum decision-making framework. The authors analyse how SOGI-related claims are adjudicated in different European frameworks (European Union, Council of Europe, Germany, Italy and UK) and offer detailed recommendations to adequately address the intersectional experiences of individuals seeking asylum. This unique approach ensures that the book is of interest not only to researchers in migration and refugee studies, law and wider academic communities, but also to policy makers and practitioners in the field of SOGI asylum.

Transnational Solidarity

This book analyses the concept and conditions of transnational solidarity, the challenges and the opportunities, from an interdisciplinary global perspective.

Looking for New Paths in Comparative and International Law

This volume contains the scientific papers presented at the Conference on Comparative and International Law that was held on 25 June 2021 online on Zoom. This is an international conference. The conference is organized every year by the Society of Juridical and Administrative Sciences together with the Faculty of Law of the Bucharest University of Economic Studies. More information about the conference can be found on the official website: www.comparativelawconference.eu. The scientific studies included in this volume are grouped into two chapters: Inspirational analyzes in comparative law, Seeking the brilliance of international law. This volume is aimed at practitioners, researchers, students

and PhD. candidates in juridical sciences, who are interested in recent developments and prospects for development in the field of comparative and international law.

EU Citizenship and Free Movement Rights

EU citizenship and Free Movement Rights examines how EU citizenship reconstructs in unexpected ways what citizenship as a status means and stands for in relation to family reunification, social rights, expulsion and discusses the effects of Brexit for EU citizens.

The Greek Debt Crisis

This book sheds new light on the Greek economic challenges and helps readers understand the current debt crisis. Chapters from leading experts in the field identify and outline potential solutions to the on-going decline of the Greek economy by considering both Eurozone-adopted current policy framework explanations and potential alternative explanations. In contrast to the standard chronological approach toward the Greek debt crisis typically adopted by other texts, this book draws on the experience and views of specialized economists and offers divergent opinions that could potentially form alternative solutions. It will be of interest to researchers and academics interested in the Greek economy, modern financial modelling, and risk management.

European Prison Rules

This publication examines the rules in force in Europe governing prisons and the treatment of prisoners, including the use of force, the selection of prison staff and the protection of prisoners' human rights, based on Recommendation Rec (2006) 2 on the European Prison Rules (which was adopted by the Committee of Ministers of the Council of Europe in January 2006). It contains the text of the recommendation with a detailed commentary on it, together with a report which considers recent developments and analyses the effectiveness of these rules and of imprisonment as a form of punishment.

Essentials of EU Law

This book will help students grasp the complex system of EU law.

The Evolution of EU Law

This last decade has been particularly turbulent for the EU. Beset by crises - the financial crisis, the rule of law crisis, the migration crisis, Brexit, and the pandemic - European Law has had to adapt and change in a way not previously seen. First published in 1999, the goal then was to reflect on the important developments that had been made since the creation of the EEC. That goal has not changed. From EU Administrative Law through to the Regulation of Network Industries, each chapter in this seminal work assess the legal and political forces that have shaped the evolution of EU law. With new chapters covering the Rule of Law, Judicial Reform, Brexit, Constitutional and Legal Theory, Refugee and Asylum law, and Data Governance, this third edition of The Evolution of EU Law is a must read for any student or academic of EU law.

Handbook on the EU and International Trade

The Handbook on the EU and International Trade presents a multidisciplinary overview of the major perspectives, actors and issues in contemporary EU trade relations. Changes in institutional dynamics, Brexit, the politicisation of trade, competing foreign policy agendas, and adaptation to trade patterns of value chains and the digital and knowledge economy are reshaping the European Union's trade policy. The authors tackle how these challenges frame the aims, processes and effectiveness of trade policy making in the context of the EU's trade relations with developed, developing and emerging states in the global economy.

Caring Responsibilities in European Law and Policy

This book explores the emerging engagement of EU law with care and carers. The book argues that the regulation of care by the EU is crucial because it enables the development of a broad range of policies. It contributes to the sustainability of society and ultimately it enables individuals to flourish. Yet, to date, the EU approach to regulating the caring relationship remains piecemeal and lacks the

underpinning of a cohesive strategy. Against this backdrop, this book argues that the EU can and must take leadership in this area by setting principles and standards in accordance with the values of the treaty, in particular gender equality, human dignity, solidarity and well-being. The book further makes a case for a stronger protection for carers, who should not only be protected against discrimination, but should also be supported, valued and put in a position to make choices and lead full lives. In order to achieve this, a proactive approach to rebalancing the relationship between paid and unpaid work is necessary. Ultimately, the book puts forward a series of legal and policy recommendations for a holistic approach to care in the EU.

EU Citizenship Law

European Union citizenship is a novel and complex legal status. Since its formal conception in the Maastricht Treaty, EU citizenship has catalysed an extraordinary, and ongoing, legal experiment, the development and implications of which are traced comprehensively throughout this book. EU Citizenship Law articulates, explains, and analyses the legal framework and legal developments that have shaped the status of EU citizenship and the rights that it confers on Member State nationals. By examining how the rights and responsibilities produced by EU citizenship relate to other rights conferred by EU law, the distinctive meaning and scope - the added legal value - of EU citizenship is uncovered. But the legal story examined here sits in deeper and wider economic, political, social, and emotional contexts because EU citizenship is also an idea: a vector of European integration, collective personhood, and multi-layered identities that reflects the paradoxically inclusive and exclusive qualities of citizenship more generally. EU citizenship challenges us to consider the worth and deepen the protection of the person, and to shape a European Union where principles and values really matter. Thorough yet accessible, this work provides a comprehensive legal reference point for the progression of debates about what EU citizenship law actually 'is,' and for the continuing study and practice of EU citizenship law.

The EU and the Rule of Law in International Economic Relations

This timely book explores the complexities of the EU's international economic relations in the context of its commitment to the rule of law both within the Union and internationally. Bringing together diverse perspectives from both EU and international law scholars and practitioners, the book investigates some of the most controversial and lively issues in the field of EU external relations and the relationship between EU law and international law.

Queer Migration and Asylum in Europe

Europe is a popular destination for LGBTQ people seeking to escape discrimination and persecution. Yet, while European institutions have done much to promote the legal equality of sexual minorities and a number of states pride themselves on their acceptance of sexual diversity, the image of European tolerance and the reality faced by LGBTQ migrants and asylum seekers are often quite different. To engage with these conflicting discourses, Queer Migration and Asylum in Europe brings together scholars from politics, sociology, urban studies, anthropology and law to analyse how and why queer individuals migrate to or seek asylum in Europe, as well as the legal, social and political frameworks they are forced to navigate to feel at home or to regularise their status in the destination societies. The subjects covered include LGBTQ Latino migrants' relationship with queer and diasporic spaces in London; diasporic consciousness of queer Polish, Russian and Brazilian migrants in Berlin; the role of the Council of Europe in shaping legal and policy frameworks relating to queer migration and asylum; the challenges facing bisexual asylum seekers; queer asylum and homonationalism in the Netherlands; and the role of space, faith and LGBTQ organisations in Germany, Italy, the UK and France in supporting queer asylum seekers.

The Role of the EU in the Promotion of Human Rights and International Labour Standards in Its External Trade Relations

This book represents a significant and timely contribution to the copious literature of the EU as a global actor providing new insights and fresh perspectives into the promotion of human rights and international labour standards in the EU's external trade relations, building on and stimulating further – the already well-engaged – scientific dialogue on this area of research. In particular, it provides the basis for developing a new analytical structure for better understanding the role of the EU in promoting human rights and international labour standards in global trade and, in particular, for assessing the

extent to which and how normative considerations have influenced the adoption of EU legal instruments and policy decisions. This book will appeal to research scholars, post-graduate students, practitioners and human rights activists.

The Law of the European Union and the European Communities

The Law of the European Union is a complete reference work on all aspects of the law of the European Union, including the institutional framework, the Internal Market, Economic and Monetary Union and external policy and action. Completely revised and updated, with many newly written chapters, this fifth edition of the most thorough resource in its field provides the most comprehensive and systematic account available of the law of the European Union (EU). Written by a new team of experts in their respective areas of European law, its coverage incorporates and embraces many current, controversial, and emerging issues and provides detailed attention to historical development and legislative history of EU law. Topics that are constantly debated in European legal analysis and practice are touched on in ways that are both fundamental and enlightening, including the following: .powers and functions of the EU law institutions and relationship among them; .the principles of equality, loyalty, subsidiarity, and proportionality; .free movement of persons, goods, services, and capital; .mechanisms of constitutional change – treaty revisions, accession treaties, withdrawal agreements; .budgetary principles and procedures; .State aid rules; .effect of Union law in national legal systems; .coexistence of EU, European Convention of Human Rights (ECHR), and national fundamental rights law; .migration and asylum law; .liability of Member States for damage suffered by individuals; .competition law – cartels, abuse of dominant position, merger control; .social policy, equal pay, and equal treatment; .environmental policy, consumer protection, public health, cultural policy, education, and tourism; .nature of EU citizenship, its acquisition, and loss; and .law and policy of the EU's external relations. The fifth edition embraces many new, ongoing, and emerging European legal issues. As in the previous editions, the presentation is notable for its attention to how the law relates to economic and political realities and how the various policy areas interact with each other and with the institutional framework. The many practitioners and scholars who have relied on the predecessors of this definitive work for years will welcome this extensively revised and updated edition. Those coming to the field for the first time will instantly recognize that they are in the presence of a masterwork that can always be turned to with profit and that helps in understanding the rationale underlying any EU law provision or principle.

Judicial Authority in EU Internal Market Law

This book examines the role of the European Court of Justice in the regulation of the internal market from a competence perspective. However, rather than focusing on the Court's role in enforcing the limits of EU competence in the EU's political decision making, it explores a related, albeit understudied, question: to what extent does the Court observe the constitutional limits of EU competence and its own institutional powers in the interpretation of EU internal market law laid down in the Treaties? The book provides an answer to this question through the analysis of EU free movement case law in light of the constitutional principles that govern the allocation of competences and powers in the EU: conferral, subsidiarity and proportionality, on the vertical level, and institutional balance, on the horizontal level. Why should the Court be bound by these principles? What do they mean when applied to judicial practice? To what extent are they observed in the free movement case law? The book argues that the Court's observance of the four principles has been inconsistent, thereby creating substantive and constitutional tensions in the EU's relationship with the Member States and upsetting the institutional balance of powers between the EU legislature and judiciary. Shortlisted for the UACES Best Book Prize 2023

EU Citizenship at the Edges of Freedom of Movement

EU citizenship : historical backdrop and debate -- The right to move and reside freely : Article 21(1) TFEU -- Residence and family reunification rights -- The right to equal treatment -- EU citizenship and political free movement rights -- EU citizenship and the Charter.

Equal Citizenship and Its Limits in EU Law

The research monograph Equal Citizenship and Its Limits in EU Law: We the Burden? is a critical study of the scope of EU citizenship as an 'equal status' of all Member State nationals. The book re-conceptualises the relationship between the status of EU citizenship and EU citizens' fundamental right to equal treatment by asking what indicates the presence of agency in EU law. A thorough analysis

of the case-law is used to support the argument that the present view of active citizenship in EU law fails to explain how EU citizens should be treated in relation to one another and what counts as 'related' for the purposes of equal treatment in a transnational context. In addressing these questions, the book responds to the increasing need to find a more substantive theory of justice for the European Union. The book suggests that a more balanced view of agency in the case of EU citizens can be based on the inherent connection between citizens' agency and their subjectivity. This analysis provides an integrated philosophical account of transnational equality by showing that a new source of 'meaningful relationships' for the purposes of equal treatment arises from recognizing and treating EU citizens as full subjects of EU law and European integration. The book makes a significant contribution to the existing scholarship on EU law, first, by demonstrating that the undefined nature of EU citizenship is fundamentally a question about transnational justice and not just about individual rights and, secondly, by introducing a framework within which the current normative indeterminacy of EU citizenship can be overcome.

States, the Law and Access to Refugee Protection

This timely volume seeks to examine two of the most pertinent current challenges faced by asylum seekers in gaining access to international refugee protection: first, the obstacles to physical access to territory and, second, the barriers to accessing a quality asylum procedure – which the editors have termed 'access to justice'. To address these aims, the book brings together leading commentators from a range of backgrounds, including law, sociology and political science. It also includes contributions from NGO practitioners. This allows the collection to offer interdisciplinary analysis and to incorporate both theoretical and practical perspectives on questions of immense contemporary significance. While the examination offers a strong focus on European legal and policy developments, the book also addresses the issues in different regions (Europe, North America, the Middle East, Africa and Australia). Given the currency of the questions under debate, this book will be essential reading for all scholars in the field of asylum law.

A Human Security Doctrine for Europe

Apart from the Study Group's Barcelona Report, it contains fifteen studies especially commissioned by the Study Group to help develop its approach."--Jacket.

Human Rights of Roma and Travellers in Europe

In many European countries, the Roma and Traveller populations are still denied basic human rights and suffer blatant racism. They remain far behind others in terms of educational achievement, employment, housing and health standards, and they have virtually no political representation. Anti-Gypsyism continues to be widespread and is compounded by a striking lack of knowledge among the general population about the history of repression of Roma in Europe. In times of economic crisis, the tendency to direct frustration against scapegoats increases - and Roma and Travellers appear to be easy targets. This report presents the first overview of the human rights situation of Roma and Travellers, covering all 47 member states of the Council of Europe. Its purpose is to encourage a constructive discussion about policies towards Roma and Travellers in Europe today, focusing on what must be done in order to put an end to the discrimination and marginalisation they suffer.

Essential Questions in EU Law

A 'Q & A' introduction to EU law, setting out the fundamentals of the subject with clarity and immediacy.

Constructing the Person in EU Law

The European Union places the 'individual' or person, 'at the heart of its activities'. It is a central concept in all of EU economics, politics, society and ethics. The 15 chapters in this innovative edited collection argue that EU law has had a transformative effect on this concept. The collection looks at the mechanisms used when 'constructing the person' in EU law. It goes beyond traditional literature on 'Europe and the Individual', exploring the question of personhood through critical and contextual perspectives. Constructing the Person in EU Law: Rights, Roles, Identities brings together contributions and debates from experts around Europe to this key question.

The Role of the EU in the Promotion of Human Rights and International Labour Standards in Its External Trade Relations

This book represents a significant and timely contribution to the copious literature of the EU as a global actor providing new insights and fresh perspectives into the promotion of human rights and international labour standards in the EU's external trade relations, building on and stimulating further – the already well-engaged – scientific dialogue on this area of research. In particular, it provides the basis for developing a new analytical structure for better understanding the role of the EU in promoting human rights and international labour standards in global trade and, in particular, for assessing the extent to which and how normative considerations have influenced the adoption of EU legal instruments and policy decisions. This book will appeal to research scholars, post-graduate students, practitioners and human rights activists.

Study on Obstacles to Effective Access of Irregular Migrants to Minimum Social Rights

This publication examines the minimum level of social rights which illegal migrants are entitled to in Council of Europe countries, as well as obstacles to access. This is done in the light of the Council of Europe's concern to promote human rights, maintain social cohesion and prevent racism and xenophobia, in counterbalance to the more restrictive approach to illegal migration adopted by the EU. Topics covered are rights in relation to housing, education, social security, health, social and welfare services, fair employment conditions and residence rights.
