Straight Talk with the Family

Today's media constantly report on the sorrowful state of today's families. From rebellious and disrespectful children to absent and abusive parents, the modern family is in disarray. Rev. Dr. Donald R. Wesson presents a faith-based, spiritual guide for repairing the cracks in your family's foundation. Drawing on his own experiences in counseling numerous families, Wesson delivers a Bible-centered blueprint that focuses on the importance of traditional family roles and the return of old-fashioned values. Broken into easy-to-understand chapters, this groundbreaking book discusses such important topics as - developing a transparent family; - centering your lives on God; - determining each family member's responsibility; - incorporating worship into family life; - discerning between healthy and unhealthy family relationships. Full of helpful hints and sound advice, Straight Talk with the Family offers families big and small the encouragement and support they need to bring healing to their lives. Let hope back into your heart!

Saved from Success

What if the world's view of success is God's definition of failure? What if your beliefs about marriage, children, career, or money aren't based on God's values, but on those of a broken culture? When Dale Partridge's outwardly perfect life, marriage, and family were crumbling on the inside, he began questioning if culture's definition of success was something to seek after or be saved from. What he found challenged everything he believed about "the good life" and equipped him to rebuild an even better life based on God's timeless design. Filled with scripture and practical application, Saved from Success is the book millions of burned-out and bedraggled Christians have been waiting for.

The Blueprint

Seven-time Grammy award winning artist offers an inspiring blend of God and grit for building a fulfilling life "The Blueprint is a transparent approach to talking about issues-from marriage to politics to sex and

religion-and it's from my perspective. Not from a Princeton, mainline, protestant, evangelical or liberal viewpoint, but from a 2010 Christian moderate with swag." --Kirk Franklin Gospel artist Kirk Franklin's faith wasn't always as strong as it is today. His father abandoned his family; his mother constantly told Kirk that he was an unwanted child and left him to be adopted when he was four; his sister became a crack addict; he never saw a black man who was faithful in marriage. Despite his shaky foundation he found strength and success through his music and through God. In *The Blueprint*, Franklin will explain how by communicating with life's architect, God, he learned to see hardships as necessary life propellants and moved on to become the bestselling gospel musician in recent history, as well as a devoted husband and loving father. This is not a step program, it's a lifelong journey. With Franklin's guidance, you will: -pursue your dreams without losing yourself in the chase -do some lifescaping to eliminate the "weeds" that hold you back -declare your life to be drama-free -get past your fears, so you can live and love fully -pass the baton to future generations by leading by example It's time to take faith out of the church pews and into our everyday lives. With hope, devotion, and strength, *The Blueprint* offers a plan to help you move beyond hardships to create your own personal Blueprint for life. Watch a Video

God's Blueprint for Success

When Nehemiah led the people of Jerusalem to turn back to God, He restored them and helped them reestablish their city. In *God's Blueprint for Success*, you'll take a closer look at the book of Nehemiah and the details surrounding the rebuilding of Jerusalem's walls to secure the city. You'll see how God interacted with His people and how they responded, which will help you deal with situations of brokenness in your own life. Discover how you can turn back to God, follow His plan, and successfully accomplish His will.

Anatomy of an Affair

When it comes to adultery, never say, "It won't happen to me." Just when you think your marriage is safe from adultery is when you may be the most vulnerable. With eye-opening stories, clinical insights, and up-to-date data, Dave Carder reveals what adulterers learned the hard way—and what they want the rest of us to know to save us the pain. Dave Carder, counselor and author of the bestselling *Torn Asunder* (100,000 in print), is a sought-after expert on issues of adultery. Here he helps you make your marriage adultery-proof by showing you: How attractions can lead to affairs Ways you may be vulnerable to affairs The common ingredients of adultery How to restore intimacy to your marriage How to make wise, protective decisions Marriage is too sacred to be taken casually. Affairs are a very real threat, and they can destroy lives and families. For this reason, *Anatomy of an Affair* should be on every church leader's and marriage counselor's required reading list, and in the home of every married couple. Includes charts and assessments to understand and guard against affairs. This book is the revised edition of *Close Calls* (2008)

Women desire to live well. However, living well in this modern world is a challenge. The pace of life, along with the new front porch of social media, has changed the landscape of our lives. Women have been told for far too long that being on the go and accumulating more things will make their lives full. As a result, we grasp for the wrong things in life and come up empty. God created us to walk with him; to know him and to be loved by him. He is our living well and when we drink from the water he continually provides, it will change us. Our marriages, our parenting, and our homemaking will be transformed. Mommy-blogger Courtney Joseph is a cheerful realist. She tackles the challenge of holding onto vintage values in a modern world, starting with the keys to protecting our walk with God. No subject is off-limits as she moves on to marriage, parenting, and household management. Rooted in the Bible, her practical approach includes tons of tips that are perfect for busy moms, including: Simple Solutions for Studying God's Word How to Handle Marriage, Parenting, and Homemaking in a Digital Age 10 Steps to Completing Your Husband Dealing With Disappointed Expectations in Motherhood Creating Routines that Bring Rest Pursuing the Discipline and Diligence of the Proverbs 31 Woman There is nothing more important than fostering your faith, building your marriage, training your children,

and creating a haven for your family. Women Living Well is a clear and personal guide to making the most of these precious responsibilities.

Visioneering, Revised and Updated Edition

Helps Christians engage lovingly, thoughtfully, and biblically with discussions on gender identity. Originally released in 2017, this version has been updated and expanded. In the West, more and more Christians are coming across the topic of gender identity in their everyday lives. Legislative changes are impacting more and more areas of life, including education, employment, and state funding, with consequences for religious liberty, free speech, and freedom of conscience that affect everyone. So it's a crucial moment to consider how to engage lovingly, thoughtfully, and biblically with one of the most explosive cultural discussions of our day. This warm, faithful, and compassionate book that helps Christians understand what the Bible says about gender identity has been updated and expanded throughout, and now includes a section on pronoun usage and a new chapter challenging some of the claims of the transgender activist movement. Andrew T. Walker also answers questions such as: What is transgender and gender fluidity? How should churches respond? What does God's word actually say about these issues?

They insist they are just a group of friends, yet they funnel millions of dollars through tax-free corporations. They claim to disdain politics, but congressmen of both parties describe them as the most influential religious organization in Washington. They say they are not Christians, but simply believers. Behind the scenes at every National Prayer Breakfast since 1953 has been the Family, an elite network dedicated to a religion of power for the powerful. Their goal is "Jesus plus nothing." Their method is backroom diplomacy. The Family is the startling story of how their faith—part free-market fundamentalism, part imperial ambition—has come to be interwoven with the affairs of nations around the world.

God and the Transgender Debate

Never before have so many Americans been more frustrated with our economic system, more fearful that it is failing, or more open to fresh ideas about a new one. The seeds of a new movement demanding change are forming. But just what is this thing called a new economy, and how might it take shape in America? In *What Then Must We Do?* Gar Alperovitz speaks directly to the reader about where we find ourselves in history, why the time is right for a new-economy movement to coalesce, what it means to build a new system to replace the crumbling one, and how we might begin. He also suggests what the next system might look like—and where we can see its outlines, like an image slowly emerging in the developing trays of a photographer's darkroom, already taking shape. He proposes a possible next system that is not corporate capitalism, not state socialism, but something else entirely—and something entirely American. Alperovitz calls for an evolution, not a revolution, out of the old system and into the new. That new system would democratize the ownership of wealth, strengthen communities in diverse ways, and be governed by policies and institutions sophisticated enough to manage a large-scale, powerful economy. For the growing group of Americans pacing at the edge of confidence in the old system, or already among its detractors, *What Then Must We Do?* offers an elegant solution for moving from anger to strategy.

The Blessing Of A Skinned Knee

Most people see trouble as something negative and seek to avoid it whenever possible. But what if it's those troubles that actually lead to greater blessing and purpose? In *The Blessing of Adversity*, a retired U.S. Navy admiral and the 62nd chaplain of the U.S. Senate distills the wisdom gained from thirty years as a counselor, theologian, and psychologist. Barry Black offers a blueprint for removing the sting of life's trials, showing us how to let God use our pain for his glory by blessing others—and how that can actually help heal our own pain. Drawing on Scripture and his own experiences as a counselor and chaplain to some of the most powerful people in the world, Black teaches us how to deal with seasons of God's apparent silence, offers techniques for staying encouraged in the middle of life's storms, and shows how to find advantages in adversity.

Detective Chief Inspector George Flaxman is a cop on a collision course with destiny. A man ruling the paranoid Nottinghamshire streets of 1996 with his own set of rules. Rules ingrained with unhinged power, menace, violence and intrinsic corruption. What if you knew that by simply crossing the room and saying hello to someone, you could change that person's forever? Just a few steps to make an eternal difference. It has nothing to do with methods and everything to do with taking a genuine interest in another human being. All you need is a heart that's in tune with the Holy Spirit and a willingness to venture out of your "Circle of Comfort" and into another person's life. Just *Walk Across the Room* brings personal evangelism into the twenty-first century. Building on the solid foundation laid in *Becoming a Contagious Christian*, Bill Hybels shows how you can participate in the model first set by Jesus, who stepped down from heaven 2,000 years ago to bring hope and redemption to broken people living in a fallen world. Now it's your turn. Your journey may not be as dramatic, but it can have a life-changing impact for someone standing a few steps away from you—and for you as well, as you learn the power of extending care, compassion, and inclusiveness under the guidance of the Holy Spirit. The highest value in personal evangelism is cooperating with the Spirit, says Hybels. This means playing only the role you're meant to play—walking when the Spirit says to walk, talking when he says to talk, and falling silent when he suggests that you've said enough. Hybels encourages you to "live in 3D" ... —Developing friendships —Discovering stories —Discerning appropriate next steps ... as a means of learning to understand the Holy Spirit's promptings. With fresh perspectives from his own reflections and experiences collected during his most recent decade of ministry, Bill Hybels shows with convincing and inspiring clarity the power of this personal, richly relational approach to evangelism. The stakes are high. The implications are eternal. And you may be only a conversation away from having an eternal impact on someone's life—if you will just walk across the room.

How to rewire your brain to improve virtually every aspect of your life-based on the latest research in neuroscience and psychology on neuroplasticity and evidence-based practices Not long ago, it was thought that the brain you were born with was the brain you would die with, and that the brain cells you had at birth were the most you would ever possess. Your brain was thought to be "hardwired" to function in predetermined ways. It turns out that's not true. Your brain is not hardwired, it's "softwired" by experience. This book shows you how you can rewire parts of the brain to feel more positive about your life, remain calm during stressful times, and improve your social relationships. Written by a leader in the field of Brain-Based Therapy, it teaches you how to activate the parts of your brain that have been underactivated and calm down those areas that have been hyperactivated so that you feel positive about your life and remain calm during stressful times. You will also learn to improve your memory, boost your mood, have better relationships, and get a good night sleep. Reveals how cutting-edge developments in neuroscience, and evidence-based practices can be used to improve your everyday life Other titles by Dr. Arden include: Brain-Based Therapy-Adult, Brain-Based Therapy-Child, Improving Your Memory For Dummies and Heal Your Anxiety Workbook Dr. Arden is a leader in integrating the new developments in neuroscience with psychotherapy and Director of Training in Mental Health for Kaiser Permanente for the Northern California Region Explaining exciting new developments in neuroscience and their applications to daily living, Rewire Your Brain will guide you through the process of changing your brain so you can change your life and be free of self-imposed limitations.

This book offers an in-depth study of the female experience in one Mormon polygynous community, the Apostolic United Brethren. Women in such rigid, patriarchal religious groups are commonly portrayed as the oppressed, powerless victims of male domination. Janet Bennion shows, however, that the reality is far more complex. Many women converts are attracted to this group, and they are much more likely than male converts to remain there. Often these women are seeking improved socio-economic status for themselves and their children, as well as an escape from their marginalized status in the

mainstream Mormon church. In the polygynous group women experience rapid assimilation, autonomy, and upward mobility. Bennion supports her study with narratives from the lives of women now living in the group--narratives that clearly reveal why many mainstream Mormon women are viewing polygyny as a viable alternative to the difficulties to single-motherhood, "spinsterhood," poverty, and emotional deprivation.

Students and staff from KCL's Social Sciences BA programme turn the research lens back on their own world and together explore the many challenges of 'trying to do things differently' in Higher Education. In doing so, they grapple with fundamental questions in education such as: how to meaningfully foreground democracy, partnership, and emotional care; the role and limits of free speech; and how to deconstruct enduring inequality and marginalisation. In a period of considerable change and challenge for education, there is surely no better time to be critically analysing the principles guiding our universities through the lens of real-life practice. "In a period when university arrangements are being rethought in the wake of COVID-19 and the resurgence of Black Lives Matter, this compelling text is both timely and forward looking. 'We're trying to do things differently' successfully brings together first year undergraduates and lecturers to research, analyse and document how students and staff co-create meaningful educational experiences. The authors offer a nuanced picture of the centrality of relationships and recognition to the degree course. It shows how the students foreground love, kindness and social justice, rather than curriculum and outcomes, while being alert to the politics of difference and absence in higher education classrooms. The book draws on well-worn and innovative writing styles to produce analyses and arguments that are eye-opening, persuasive and raise difficult questions for future educational practices. This book is a must for anyone interested in championing excellence and social justice in higher education." Ann Phoenix, Professor of Psychosocial Studies, UCL Institute of Education "This is a book with a difference. It is based on critical scholarship and draws on reflexive analysis but – and this is the important and unique part - it is a book written mainly by university students about how to enact meaningful relationships in the academy. It takes as its substantive focus one new undergraduate programme but the agenda is about change, social justice and the hard work of real inclusion. This book stands as a wake-up call to all of us who care deeply about socially just education and democracy in our institutions of higher education. It is also a wonderful example of how to write something that really matters!" - Meg Maguire, Professor of Sociology of Education, King's College London

Using ROI for Strategic Planning of Online Education

Published in association with While higher education has rarely employed ROI methodology—focusing more on balancing its revenue streams, such as federal, state, and local appropriations, tuition, and endowments with its costs—the rapid growth of online education and the history of how it has evolved, with its potential for institutional transformation and as a major source of revenue, as well as its need for substantial and long-term investment, makes the use of ROI an imperative. This book both demonstrates how ROI is a critical tool for strategic planning and outlines the process for determining ROI. The book's expert contributors lay the foundation for developing new practices to meet the compelling challenges of online education and identify new models that offer the potential for transforming the educational system, meeting new workforce demands, and ultimately improving the economy. The opening chapters of the book explore the dimensions of ROI as a strategic planning process, offering guiding principles as well as methods of measurement and progress tracking, and demonstrate the impact of ROI across the institution. The book identifies the role of previously overlooked constituents—such as online professionals as critical partners for developing institutional strategy and institutional stakeholders for vital input on inclusivity, diversity, and equity—and their increasingly important role in impacting the ROI of online programs. Subsequent chapters offer a range of approaches to ROI reflecting the strategic priorities and types of return institutions seek from their investment in online programming, whether they be increased profits or surpluses via reduced expenses or increased operating efficiencies or the development of increased brand awareness for their programs. They also address the growing competitive environment of recent commercial entrants and online program managers (OPMs). The contributors offer best practices for setting goals and identifying benchmarks for increasing and measuring payback, including the creation of cross-functional ROI teams from across an institution; and further address the advantages and disadvantages of universities partnering with external providers, or even other colleges and universities, to provide online programs with them and for them. This book offers presidents and senior administrators, faculty engaged in shared governance, online learning administrators, and stakeholders representing student, community and employer interests with a rigorous process for developing an online strategy.

Leadership for the Future

The role of museum director has gone through many changes over the years. It is for this reason that Bryant F. Tolles, Jr. has written this insightful volume of thought-provoking essays on this transforming position in American history museums and historical societies. *Leadership for the Future* takes a multifaceted look at the role of director, examining its function as intellectual leader and educator; initiator of professional standards and training; legal guardian, organizer, and energizer for planning; fund raiser, marketing agent, and cultivator of institutional support; internal communicator; fiscal, facilities, and security manager. Image, social responsibilities, and positions within the public sector are also defined, along with the director's role in collections development, management, and conservation; exhibit and educational interpretation; and research functions. For museum directors or anyone who aspires to that role, this is useful, thoughtful reading.

The Science of Self-Learning

We've all heard the saying... "Work Smarter, and Not Just Harder". Accelerate your learning speed by being both the teacher and the student. Imagine how much more you can accomplish if you are able to be your own teacher. Instead of adapting to other people's way of teaching, you teach yourself the way you want, where you want it and however much you want it. Self-learning is not just to get better grades or get the next promotion. It's about freedom. It's about declaring to the universe that you are in charge of your own learning and you are going to achieve whatever goals you set for yourself. *The Science of Self-Learning* is a deep look into what makes an amazing self-learner amazing. Anyone can learn anything. True or true? However, let's be honest. Have you ever doubted your own abilities to learn something... even though it is completely bullsh**? "Education is not the learning of facts, but the training of the mind to think." - Albert Einstein What lies have you been telling yourself? What could you really have achieved, grew and evolved if you had the right skill sets and mindset? Breathe in... and let go. The past is gone, the future is not yet here but what you have right now is the present moment. A present. A gift. Have you ever heard of the story of how we should sharpen our axe first before chopping down trees? It was Abraham Lincoln. He said... "Give me six hours to chop down a tree and I will spend the first four sharpening the axe. Self-Learning is the sharpening of the axe. It is, indeed, the genesis of all learning. Unlike other book, *The Science of Self-Learning* is an actionable and scientifically backed guide to aid you on your journey to "sharpen your axe". The human potential is infinite. The human learning potential is infinite. However, what we do are usually not that impressive. Take back control! Step up! It's time to evolve. Scroll Up Now To Get::::: *The Science of Self-Learning: How to Learn Anything Faster, Remember More, and be More Productive* In *The Science of Self-Learning* you will discover: How to proceed with self-directed learning effectively. How to break free of limiting unconscious belief systems that are silently sabotaging your learning speed. How to use high level self-learning strategies that sickeningly intelligent people uses. How to make self-learning fun and exciting in seemingly boring and draining learning. How to learn anything faster and be more productive with some amazing life hacks And much more... Jim Rohn, the original teacher of Tony Robbins once said: "Never wish life were easier, wish that you were better." Are you ready to step up and take your life up to the next level? This publication is a very significant cooperative effort of the Department of Audiovisual Instruction and the National Society for Programmed Instruction. It is, we believe, a harbinger of future joint activities between our two organizations whose purposes converge in the field of programmed learning.

Trends in Programmed Instruction

As a single mother, I was a full-time college student, employee, and small business owner. Besides providing the needs of my children, I was also multi-tasking every area of my life alone. Because of my workload, I was constantly fatigued. I needed to find a way to juggle my responsibilities. I desired to handle everything without being frustrated, overwhelmed, or distracted from my goals. I needed to find balance, structure, and an effective plan to execute my agendas. I purchased a planner and started writing my goals. My responsibilities remained, but utilizing the planner helped me manage more efficiently. Eventually, I shifted from writing my goals to creating strategies to accomplish them. This caused me to see my dreams become a reality. I recognized the impact of prepping, planning, and executing my goals, so I begin to teach these principles. My ability to accomplish my goals inspired me to assist others with achieving theirs. My children started using these tools as well to assist with accomplishing some of their smallest goals to mastering bigger ones. The strategies changed our lives, and I am positive that the principles shared in this book will change your life as well. This book will provide strategies to help you grow personally, spiritually, and professionally. It will also help you develop skills that you need to prioritize and become organized. Master Your Blueprint will help you develop a balanced lifestyle, utilize critical thinking, and initiate your purpose. Overall, each reader will learn how to prep, plan, and accomplish their goals. This book was written to shift dreamers, visionaries, and those who desire a purposeful future. The strategies that I have used to master the blueprint for my life has become a lifestyle. Through diligent prepping and planning, I have learned to execute my goals. It has been a pleasure writing this book to help teach you how to learn this strategy. We all have a personal blueprint for our lives; it lives on the inside of us. Mastering your blueprint requires patience, consistency, and discipline; This book gives you the motivation to apply them all.

Self-Learning a Complete Guide

Management accounting and control deals with administrative devices which organizations use to control their managers and employees. Management accounting systems are a very important part used to motivate, monitor, measure, and sanction, the actions of managers and employees in organi-

zations. Management Accounting and Control Systems 2nd Edition is about the design and working of management accounting and control from an organizational and sociological perspective. It focuses on how control systems are used to influence, motivate, and control what people do in organizations. The second edition of the book takes into account the need for a general update of the content and a change in the structure of the original text, and some of the comments received by the external reviewers

Management Accounting and Control Systems

The book is a pragmatic departure from unachievable idealism and is replete with examples of insightful originality amply demonstrated by the selection of themes and their down-to-earth treatment

In the face of increasing failures, comments attributed to Albert Einstein loom large: "We cannot solve our problems with the same thinking we used when we created them." There is a pervasive feeling that any attempt to make sense of the current terrain of complex systems must involve thinking outside the box and originating unconventional approaches that integrate organizational, managerial, social, political, cultural, and human aspects and their interactions. This textbook offers research-based models and tools for diagnosing and predicting the behavior of complex techno-socio-economic systems in the domain of critical infrastructures, key resources, key assets and the open bazaar of space, undersea, and below-ground systems. These models exemplify emblematic models in physics, within which the critical infrastructures, as well as society itself and its paraphernalia, share the profile of many-body systems featuring cooperative phenomena and phase transitions – the latter usually felt as disruptive occurrences. The book and its models focus on the analytics of real-life-business actors, including policy-makers, financiers and insurers, industry managers, and emergency responders.

This book presents the parameters of Mastery Learning (ML), an especially stringent variety of competency-based education that guides students to acquire essential knowledge and skill, measured rigorously against a minimum passing standard (MPS). As both a scholarly resource and a teaching tool, this is a "how to" book that serves as a resource for a wide variety of health professions educators. A seminal source of information and practical advice about ML, this book divided into five parts: Clinical Education in the Health Professions, The Mastery Learning Model, Mastery Learning in Action, Transfer of Training from Mastery Learning and The Road Ahead. Complete with high-quality images and tables, chapters take an in-depth look into ML principles and practices across the health professions. Specific educational content instructs readers on how to build and present ML curricula, evaluate short and long-run results, conduct learner debriefing and give powerful feedback, set learner achievement standards, and prepare faculty for new educational roles. An invaluable addition to the Comprehensive Healthcare Simulation Series, Mastery Learning in Health Professions Education is written and edited by leaders in the field for practicing clinicians in a variety of health professions.

Comprehensive Healthcare Simulation: Mastery Learning in Health Professions Education

Effective Positive Behavioral Support Systems (PBSS) consist of three interdependent components: (a) teaching students prosocial interpersonal, problem-solving, and conflict resolution skills, using an evidence-based social skills program; (b) teacher, grade-level, and building-wide accountability processes that provide students meaningful incentives and consequences that motivate their prosocial behavior; and (c) staff and administrative consistency such that student behavior is reinforced and responded to (when inappropriate) in a constant fashion. Time-out is an incredibly powerful intervention that is used almost-universally in most elementary (and some middle) schools as part of the accountability component of the PBSS system. Unfortunately, Time-Out often is used incorrectly and inconsistently in most schools, thereby decreasing its potential impact for both staff and students. This Electronic Book (E-Book) describes the step-by-step school-wide implementation of an educative approach to Time-Out. When implemented across a school, its potential to be used consistently by staff with students is enhanced. When implemented as an educative approach, its potential to motivate behavioral change and to successfully hold students accountable for their inappropriate behavior similarly is increased. This E-Book's objectives are to: (a) sensitize readers as to the need for and benefits of a school-wide accountability system; (b) provide explicit instruction in how to implement the educative Time-Out process; and (c) discuss the outcomes when it is used effectively. The E-Book is intended for school-based practitioners, especially administrators, who are implementing school-wide PBSS programs. More specifically, the behavioral principles underlying the Time-Out process will be discussed, along with the four prerequisites that are needed prior to its school-wide

implementation, and the intervention's integration into a set of school-wide behavioral standards and expectations. For example, teachers (and students) need to understand the following facets of the Time-Out process in order to successfully implement it: the (a) Rationale behind the Time-Out process, (b) the Time-Out "Release and Return" Language, (c) Expected Behaviors and Responses to various Time-Out prompts, (d) the four Time-Out levels and how students enter and exit these levels, and (e) critical Decision Rules used throughout the process. Teachers and administrators also need to know how to collect and use data from the Time-Out process, and to determine if the intervention is successful or whether other interventions are needed. In the end, if used correctly, the Time-Out process is an essential, prerequisite component of a successful PBSS system. Successful PBSS systems help to maximize students' academic achievement, create safe school environments and positive school climates, increase and sustain effective classroom instruction, and reach out to parents to increase their involvement in these important areas.

A Collection of Papers on Self-study and Institutional Improvement, 2004

Sickle cell disease (SCD) is a genetic condition that affects approximately 100,000 people in the United States and millions more globally. Individuals with SCD endure the psychological and physiological toll of repetitive pain as well as side effects from the pain treatments they undergo. Some adults with SCD report reluctance to use health care services, unless as a last resort, due to the racism and discrimination they face in the health care system. Additionally, many aspects of SCD are inadequately studied, understood, and addressed. Addressing Sickle Cell Disease examines the epidemiology, health outcomes, genetic implications, and societal factors associated with SCD and sickle cell trait (SCT). This report explores the current guidelines and best practices for the care of patients with SCD and recommends priorities for programs, policies, and research. It also discusses limitations and opportunities for developing national SCD patient registries and surveillance systems, barriers in the healthcare sector associated with SCD and SCT, and the role of patient advocacy and community engagement groups.

"A superb . . . how-to book for any entrepreneur who not only wants to get their thoughts down to share with the world, but to leverage off their expertise." –Geoff Hetherington, JG Hetherington, The Clarity CEO With the availability of self-publishing services and the rise of the entrepreneur as a thought leader, writing a book is becoming more appealing to an increasing number of small business owners. The problem? Most businesspeople aren't writers, have never written a book before, are time poor and don't know where to start. While many want to write a book, they worry about investing months of their time and thousands of their dollars to write something that isn't any good, or even whether they will finish. Book Blueprint gives a step-by-step framework that any entrepreneur can follow to write a great book quickly, even if they're not a writer.
